For the figures in the above table I am indebted to the Postmaster-General, Bengal, and the Deputy Postmaster-General, Eastern Bengal. They are an estimate only taken from the transactions of a single day or of two or three days. Newspapers appear to have fallen off from 1,331,252 to 567,346, post-cards appear to have decreased from 10,461,152 to 7,445,776, and in letters, both paid and unpaid, there is a heavy fall. I do not for a moment think there has been real decrease of business.

Progress in postal matters is best gauged by the sale of postage stamps. The following statement compares the sales in 1892-93 and 1893-94:—

DISTRICT.	1892-93. Postage stamps.		1893-94. Postage stamps.	
	Ordinary.	Service.	Ordinary.	Service.
1	2	3	4	5
Dacca ...	72,272	9,157	85,160	8,809
Mymensingh ...	52,403	5,578	61,477	6,178
Faridpur ...	38,418	4,213	44,351	4,123
Backergunge ...	41,009	4,822	45,497	6,248
Total ...	204,132	23,770	236,485	25,358

In ordinary postage there has been improvement to the extent of 15·8 per cent. on the whole. The Dacca district does best with 17·8 per cent. improvement, and the Backergunge district worst with 10·9 per cent. The handsome improvement in Faridpur does not look like scarcity.

Service postage has increased 6·7 per cent. on the whole; most in the Backergunge district, 29·6 per cent. Faridpur actually shows reductions in consumption of these stamps, which is highly creditable to all the officers concerned.

247. The transactions in money-orders and in savings bank deposits have been detailed in section XXII (monetary arrangements).

The Collector of Mymensingh reports that there was one criminal prosecution in respect of postal matters during the year under report in his district. A sum of Rs. 1,101-12-8 belonging to the Kendua post office was stolen from the iron safe at the local police-station. A postman was prosecuted for the theft and was sentenced to undergo two years' rigorous imprisonment under Section 380, Indian Penal Code, but was subsequently acquitted by the Sessions Judge. The police, the Magistrate says, were much to blame in this matter.

The inconvenience complained of in paragraph 316 of my last year's General Administration Report in the postal service between Narayanganj and Goalundo has been removed. The mails are now carried by the India General Steam Navigation Company by a steamer leaving Narayanganj at 6-41 A.M. instead of 5 A.M. But letters for Calcutta must still be posted overnight.

We already make use of the post office for many administrative purposes, viz.—

- (1) Service of landlords' notices under rule I, Chapter V of the Government rules under the Bengal Tenancy Act, VIII of 1885.
- (2) Valuation of lands, mode of assessments, section 84 (b), chapter VI, Part II of Act IX (B.C.) of 1880, Road Cess Act.
- (3) Certificate post-cards, under rule 21, section III of the rules under the Public Demands Recovery Act, VII (B.C.) of 1880.
- (4) Service of notice, section 135 (2) of Act VIII (B.C.) of 1876, Estates Partition Act.
- (5) Service of notices under the Income Tax Act, II of 1886, section 46.
- (6) Section 81 (2) of Act II (B.C.) of 1882, Embankment Act.
- (7) Section 45 (3) of Act I of 1894, Land Acquisition Act.

- (8) Under Board's letter No. 57A, dated 5th February 1894, the Collector of Backergunge, making enquiries through panchayots by issuing return post-cards or letters, as to whether the persons registered as proprietors or residing in their respective villages are still in possession of the interest in respect of which their names stand registered.
- (9) Under orders of the Postmaster-General forms of application for registration of names under the Land Registration Act, VII (B.C.) of 1876, are kept at post offices for distribution to the public free of cost.
- (10) Revenue processes for service in subdivisions are now sent to subdivisions by post.
- (11) Money-orders are largely used for paying rent, revenue, and cesses.

I hope to see the post office more freely used for process-serving purposes as time goes on.

248. Some steamer lines enjoy subsidies from the District Boards or the Zamindari Dák Fund for carrying mails. The India General Steam Navigation Company received a subsidy of Rs. 200 per mensem from 1st April 1893 from the District Board of Faridpur for their steamer service between Goa-lundo and Madaripur, but the subsidy has been withdrawn from the current year on account of the irregular running of the steamers. The Company still receive Rs. 63 per mensem from the Faridpur Zamindari Dák Fund for carrying mails. The same Company run a daily steamer between Barisal and Chandpur with a branch to Madaripur, for which the Backergunge District Board pays a subsidy of Rs. 1,500 per annum. The Company also received a subsidy of Rs. 54 per mensem from the Backergunge Zamindari Dák Fund for carrying mails from Barisal to Madaripur.

The Bengal Central Flotilla Company receive Rs. 6,000 per annum from the Backergunge District Board for their mail steamer service between Barisal and Khulna. The same Company receive also a subsidy of Rs. 1,200 per annum from the District Board for steamer service between Barisal and Gulshakhali *via* Patuakhali. In addition to this the Company receive a subsidy of Rs. 167 per mensem from the Zamindari Dák Fund for carrying mails from Barisal to Pirojpur.

249. The following statement shows the telegraphic business of the combined post and telegraph offices in the Division during the year under report:—

DISTRICT.	Number of combined offices.	Number of messages sent.	Number of messages received.
1	2	3	4
Dacca ... ..	6	8,819	9,513
Mymensingh ... ..	10	8,321	8,774
Faridpur ... ..	3	3,156	3,082
Backergunge ... ..	4	6,870	6,229
Total ... ..	23	27,166	27,598

The number of offices and the business done was more than double.

The following new lines of telegraphs were opened in this Division during the year under report:—

- |             |     |  |
|-------------|-----|--|
| Dacca       | ... | { (1) Narayanganj to Munshiganj.         |
|             |     | { (2) Ditto to Taltala.                  |
|             |     | { (3) Taltala to Srinagar.               |
|             |     | { (4) Do. to Jainshar.                   |
|             |     | { (5) Ramgopalpur to Iswarganj.          |
| Mymensingh  | ... | { (6) Iswarganj to Atharabari.           |
|             |     | { (7) Atharabari to Kishorganj.          |
|             |     | { (8) Tangail to Korotia.                |
|             |     | { (9) Sherpur to Mohendraganj and Manka- |
|             |     | ohar in Assam.                           |
| Backergunge | ... | { (10) Barisal to Nalchiti.              |

The telegraph line from Sherpur to Mohendraganj mentioned in the last year's report was duly completed and extended to Mankachar, where an office has been opened since May 1893. The further extension of the line to Assam may be completed during the current year.

All the subdivisions in Dacca and Faridpur, and three out of the four subdivisions in Mymensingh and one (Pirojpur) out of three in Backergunge, are now connected by telegraph with their respective district head-quarters. Netrakona will probably be so connected with Mymensingh during the current year.

The following is a list of the new lines which it is contemplated to open in the district of Mymensingh :—

Kishorganj to Dilalpur.  
Dilalpur to Bajitpur.  
Bajitpur to Karinganj.  
Karinganj to Bhairab.

Ramgopalpur to Gouripur.  
Gouripur to Netrakona.  
Netrakona to Naraindhar.  
Naraindhar to Durgapur (Susang).

### XXXIII.—FAIRS AND POUNDS.

250. There are many annual fairs in this Division, of which the most important are (1) Kartic Barni fair, (2) Nangalband fair in Dacca, (3) Jhulan mela, and (4) Jamalpur mela in Mymensingh.

Fairs.

(1) The Kartic Barni fair is held on the bank of the Dhaleswari river, close to the head-quarters of the subdivision of Munshiganj. It was open this year on the 10th December 1893 and continued till 10th February 1894, and is reported to have been visited by 102,600 persons, against 193,025 in the previous year. Though the attendance has fallen off, the business has largely increased. The value of goods brought for sale was Rs. 15,91,768, and that of goods actually sold was Rs. 8,27,150, against Rs. 10,96,607 and Rs. 4,23,884 in 1892-93. So the decadence reported last year has been to a large extent made good in spite of the general distress reported, especially from this part of the Division.

The conservancy and sanitary arrangements were satisfactory. A Civil Hospital Assistant with suitable medicines was deputed to the fair, 16 sweepers were employed, and the streets were lighted with kerosine-oil. The cost of these arrangements is paid out of the profits of the fair by the Feringi Bazar Babus, in whose interest the mela is run. There were two deaths from cholera, but no other fatal disease occurred.

A police force consisting of 1 sub-inspector, 4 head-constables, 2 writer-constables, and 22 constables, was stationed at the fair. One theft case and 14 nuisance cases were sent up by the police, and were promptly disposed of by the Subdivisional Officer of Munshiganj.

(2) The annual Nangalband fair did not fall within the year under report.

(3) The Jhulan mela in the Kishorganj subdivision commences on the date of the Jhulan Jatra festival in July, and continues for more than two months till the Durga Puja in September or October. About 3,000 persons are said to have visited the fair daily, against 2,000 in the preceding year. The total value of goods brought for sale and actually sold is estimated to have been Rs. 5,07,500 and Rs. 5,01,835 respectively.

(4) The Jamalpur mela is held on some Government land at the sub-divisional head-quarters. It was opened on the date of the Dole Jatra festival in April, and lasted for a little over three weeks. The principal business at this fair is the sale of up-country cattle. During the year under review, 11,420 head of cattle, the estimated value of which was Rs. 3,42,600, were sold. The Committee of the fair charge  $7\frac{1}{2}$  annas per head of cattle sold. They realized this year Rs. 5,353—a larger sum than was ever realized before. The profits, after defraying the expenses of the mela, are spent by the mela Committee on some object of public utility.

Mr. Earle reports that the sanitary arrangements at the Jhulan mela and the Jamalpur mela were made in accordance with the standard rules prescribed by the Sanitary Commissioner. The cost of the Jhulan mela is borne by the Kishorganj Municipality. No outbreak of disease was reported from either of the melas.

An annual exhibition was held as usual at the head-quarters of the Faridpur district. Samples of various kinds of grains, garden produce, articles of carpentry, cotton manufacture, &c., were shown, and prizes were given to the exhibitors.

Pounds. 251. The following statement shows the pound business of the year as compared with that of the preceding year:—

DISTRICT.	POUNDS UNDER THE DISTRICT BOARD.				POUNDS UNDER THE MUNICIPALITY.				REMARKS.	
	1893-94.		1892-93.		1893-94.		1892-93.			
	Number.	Receipts.	Number.	Receipts.	Number.	Receipts.	Number.	Receipts.		
1	2	3	4	5	6	7	8	9	10	
Dacca	...	175	Rs. 6,689	173	Rs. (a)7,142	12	Rs. 1,865	11	Rs. (a)1,895	(a) Revised figures given.
Mymensingh	...	246	33,821	240	(a)35,958	12	4,817	(a)13	(a)4,695	
Faridpur	...	122	6,050	118	8,195	6	262	7	463	
Backergunge	...	80	15,003	82	14,288	5	698	5	747	
Total	...	623	61,563	613	65,583	35	7,642	36	7,800	

All the pounds outside the municipal limits are under the control and management of the District Board. These as well as the municipal pounds are farmed out at public auction to the highest bidders. Only one pound at Narayanganj is held under direct management.

The incomes from pounds outside municipalities in Dacca and Mymensingh have decreased, although new pounds have been established during the year. Similarly, in Faridpur the opening of four new pounds has resulted in a deficit of Rs. 2,845 as compared with the preceding year. The profit in Backergunge has increased from Rs. 14,288 to Rs. 15,003, though two pounds have been abolished during the year. There has been a total decrease of Rs. 4,020 in this Division, which is reported to be due to (1) bad harvests, (2) stricter supervision by inspectors, (3) general distress amongst the people, (4) mortality among the cattle.

There has been a fall also in the rental of municipal pounds in the districts of Dacca, Faridpur, and Backergunge. In the Faridpur Municipality one pound has been closed.

It is reported from Mymensingh that cattle are often kept by the pound-keepers in a very disgraceful manner without proper shelter and without food or water. The District Boards are making necessary arrangements for providing pounds with suitable sheds and troughs for food and water. The inspecting officers will be directed to bring to notice cases in which these requirements are not supplied.

#### XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS. STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

Political institutions. 252. The principal political institutions in this Division are—

- (1) The East Bengal Landholders' Association at Dacca.
- (2) The Zamindars' Association at Mymensingh.
- (3) The Landholders' Association at Sherpur in the Jamalpur sub-division.
- (4) The Branch Indian Association at Mymensingh.
- (5) The Peoples' Association at Dacca.
- (6) Ditto at Faridpur.
- (7) Ditto at Bhanga.
- (8) Ditto at Barisal.
- (9) The Standing Congress Committee at Dacca.

That is, there are four Associations whose object is to promote the landlords' interests, four whose object is to promote general interests, and one is more specially political. The Landholders' Association at Dacca is composed chiefly of the zamindars of the Dacca Division, with the Honorable Nawab Ahsanullah Bahadur, C.I.E., as its President. Its object is, in the words of its Secretary, "to protect the interests of landlords against any unjust land laws, and generally to make known to Government their grievances from whatever cause arising." It is not apparently the object of the Association to promote education, sanitation or other public good. The Dacca Standing Congress Committee convened two public meetings and four Committee meetings during the year. It is reported that the Committee now works directly under the instruction of the British Committee.

The Branch Indian Association and the Zamindars' Association at Mymensingh have given but little evidence of vitality during the year. The Landholders' Association at Sherpur is a branch of the Indian Association at Calcutta. It has 51 members on its roll, and met three times during the year. Rai Radha Ballab Chaudhri Bahadur is the Secretary of the Association. None of these Associations seem to take much interest in public affairs. I presided at a meeting held at Dacca in August last, the object of which was to secure punctuality in the passenger steamer service between Goalundo and Narayanganj, and to protest against the absurdity of running the Dacca Mymensingh Railway 41 minutes behind local time. The meeting was promoted by private gentlemen in Dacca and Narayanganj. None of the above Associations moved in the matter. The Dacca Peoples' Association has not given much evidence of vitality in the course of the year. The Peoples' Association at Faridpur, whose object is the promotion of the interests of all classes, has, as reported last year, much life in it. It has held five meetings to consider various subjects, such as Mr. Paul's motion in Parliament on simultaneous examination for the Civil Service, the extension of the jury system to Faridpur, hook-swinging on the occasion of the Hindu festival Charak Puja, a vote of condolence on the death of Nawab Abdul Latif, relief of distress, the election of delegates to the Congress, &c. From this list of objects it would appear that this Association does little in the cause of sanitary and other reforms. The Peoples' Association at Bhanga practically exists in name only, and has done very little work during the year. The institution of the same name which exists in Backergunge has not, it is stated, given much evidence of life during the year.

253. There are now two social institutions in Dacca, viz. (1) The Students' Welfare Association, and (2) The Total Abstinence Society; two in Mymensingh, viz. (1) The Anjumania

Social institutions.

Islamia, and (2) The Saraswat Samiti; and two in Faridpur, viz. (1) The Surhid Sabha, (2) The Band of Hope; and none in Backergunge. The object of the Dacca Students' Welfare Association is to promote the general well-being of the student community at Dacca. Lectures are delivered on such subjects as conduct and purity. This is chiefly a Brahmo Association. The aim of the Total Abstinence Society is the promotion of abstinence from all intoxicating drinks and drugs. The Society met in October last in connection with the Hemp Drugs Commission, and when that Commission came here on the 19th of February last, its Secretary, the Revd. Mr. Kerry, and one of its members, gave their evidence before it. Neither of these Associations is supported by the influential sections of the Hindu and Muhammadan communities of the town. The Anjumania Islamia in the Mymensingh district, though classed as such, is not a purely social institution. It is a branch of the Calcutta Central Muhammadan Association, and has for its object the social, political, educational and religious advancement of the Muhammadan community. The Saraswat Samiti of Mymensingh has for its nominal aim the development of agricultural industries, but in fact the Collector states it promotes what is nothing more than an annual festivity, the expense of which is borne by the local zamindars and residents of the town of Nasirabad. The Surhid Sabha at Faridpur did good service with reference to the distress in that district, and in promoting female education. The Faridpur Band of Hope is an active and harmless institution, the object of which is the promotion of temperance in the use of intoxicating liquors.

254. The deficiency in the budget, the exchange compensation allowance granted to European officers, and the exclusion of imported cotton goods from the Tariff Act, were subjects of much adverse comment. The Municipal and Criminal Procedure Code Amendment Bills elicited much discussion. The educated classes of the native community were not a little exercised by the appointment of the Opium Commission, the Ganja Commission, and the Resolution passed by the House of Commons on the subject of simultaneous examination both in England and India for admission into the Civil Service of this country.

Mr. Jenkins, Collector of Dacca, reports that the partial failure of the *aus* crop, and the consequent high prices, caused some excitement which has since subsided. There was a little agitation about the kine-killing question when the riots in the North-Western Provinces took place, and at one time a raid by the lower classes of the Musalman population of the town of Dacca upon their Hindu brethren was apprehended; but the good sense of the leaders of the Muhammadan community prevailed, and the firmness displayed by the authorities removed all cause of alarm. Sriman Swami, the well-known agitator for the protection of kine, visited Dacca and Mymensingh towards the beginning of the year in order to collect funds. He gave two lectures at Mymensingh, which created some enthusiasm. His was not a secret mission, and he requested both the District Magistrate and the District Judge to be present at his lectures. At Dacca he addressed a meeting which was held on the 19th April 1893 in the premises of Jagannath College, under the presidency of Babu Kali Prasanna Ghosh, the chief Manager of the Raja of Joidebpur. The following resolutions were passed at this meeting, viz.—

- “(I) That in the interest of the agricultural welfare of India and the commercial prosperity of England, this meeting thinks it expedient, and as a matter of urgent agricultural necessity, to record its sympathy with the aims and objects of the Central Association of the cattle-protecting movements, in their agricultural, commercial, sanitary, economic and political aspects, involving, as they do, the national well-being of the Indian Empire.
- (II) That a Standing Committee be formed to co-operate with the Central Association referred to, and to support and strengthen the hands of Sriman Swami.”

Not a single meeting of the Sabha has been held since the departure of Sriman Swami; nor has any branch association been opened in the interior of the district. No picture or pamphlet has been issued by the members of the Association. The Sabha has made no progress up to date, and no one appreciates its value. No subscriptions have been collected for the central association. This gentleman called on me and informed me he was engaged in lecturing on the improvement of agriculture. I gave him some account of the methods pursued in China and Japan, especially with reference to the return of all sewage to the fields. I asked him to advocate these methods, proving to him that the output of agricultural produce would be enormously increased by them. I rather wasted my breath. To my surprise, this gentleman said that Government might order the people to return all sewage to their fields.

Mr. Morgan Browne, LL.D., a Congress delegate, visited Dacca and Mymensingh in the month of February last for the purpose of raising subscription for the support of the Home Branch of the Indian Congress, and increasing the circulation of *India*, an organ of the National Congress. I unfortunately had not an opportunity of meeting this gentleman.

In Faridpur there was no display of public feeling of much importance on any subject.

In the town of Barisal towards the latter part of the year there was some agitation regarding the municipal election, but its motive power was, the Collector says, “private rather than public.”

Mr. Savage writes: “The election of members for the Local Boards in the Sadar and Pirojpur subdivisions also created some stir, partly on account of private disputes among the candidates, and partly over the question whether the road cess should be levied at half rates only, or at some higher rate; but

although the latter question is one which affects the pockets of the voters, votes as a rule were given not because of any predilection for cess or no cess on the part of the voters, but because of the opinions of influential gentlemen in their neighbourhood, many of whom are convinced that the increase in the rate of cess is necessary to supply the District Board with funds for the proper performance of their duty. Hence the elections were not the one-sided affair which *primâ facie* might have been expected, and the Local Board elected members are many of them in favour of an increase in the rate of cess."

255. At the close of the year under report there were nine newspapers and four periodicals published in this Division, against seven newspapers and seven periodicals on the 31st March 1893.

State of Public Press.

#### Newspapers.

Dacca	...	1.	<i>Bengal Times</i>	...	English	...	Bi-weekly.
		2.	<i>The East</i>	...	Do.	...	Weekly.
		3.	<i>Dacca Gazette</i>	...	English and Bengali.	...	Do.
		4.	<i>Dacca Prakash</i>	...	Bengali.	...	Do.
		5.	<i>Saraswat Patra</i>	...	Do.	...	Do.
		6.	<i>Bharatbasi</i>	...	Do.	...	Do.
		7.	<i>Vicrampur</i>	...	Do.	...	Do.
Faridpur	...	8.	<i>Faridpur Hitaishini</i>	...	Do.	...	Monthly.
Backergunge	...	9.	<i>Kasipur Nibasi</i>	...	Do.	...	Fortnightly

#### Periodicals.

Dacca	...	1.	<i>New Light.</i>
		2.	<i>Bangabandhu.</i>
		3.	<i>Asa (New).</i>
		4.	<i>Santi (New).</i>

Two new newspapers, the *Bharatbasi* and the *Vicrampur*, have sprung up during the year—the former in Dacca town and the latter in the sub-division of Munshiganj. The *Charubarta* of Mymensingh died, but the *Faridpur Hitaishini*, which was reported to have ceased to exist in last year's report, has reappeared as a monthly journal.

Of the periodicals, five, viz., the *Sevaka* and the *Prakriti* in Dacca, and *Akbar Islamia*, *Uddesya Mahat* and *Hitakari* in Mymensingh, ceased to exist, while two, *Aśa* and *Śanti*, have been newly started at Dacca. The Magistrates report that the newspapers published in this Division are not conspicuous for their ability. None of them appear to be popular or to command a wide circulation. Their tone is generally moderate and loyal. Though the tone of the local vernacular press is generally moderate and loyal, I find the editors both of that press and of the outside press are occasionally misled by their informants. I give a few instances of such accidents. It is curious that people should be so anxious to show that they have not been able to prevent deaths from starvation. The periodicals are chiefly religious papers with limited circulation.

I have not had an opportunity of studying the local press personally, as no newspapers, local and other, are taken in my office. The Government supplies me weekly with a "Report on Native Papers," which contains extracts from the vernacular, but not from the English, newspapers, published in my Division, as well as from those published in other Divisions, in which I do not take much interest. I have thought that Commissioners should have nearer access to the local press, whether English or vernacular. I am a little surprised that publishers do not send me copies of their publications free of cost. As noted in my report last year, there is little enterprise among the editors and publishers of the local press. They seem hardly to realize what their position as reformers and teachers might be. Last year I recommended as an example that very enterprising person, the Editor of the *Review of Reviews* in London. "If Christ come to Dacca" would be an incomparable title from the advertiser's

point of view, and might be made a basis for much enlightenment on social and economic questions.

Newspapers.	Allegations.	Explanations.
1	2	3
<i>Samay</i> , dated 11th November 1892.	Serious distress in Attia in Mymensingh district, and suicides and deaths from starvation.	No deaths from starvation, but there is distress. There were deaths from bowel-complaints induced by insufficient or unwholesome food.
<i>Sudhakar</i> , 10th February 1893.	An attempt on the part of some zamindars' amilas, accompanied by 30 or 40 men and 10 elephants, to realize rents, mufassal expenses, and other illegal cesses from the raiyats by force.	No such occurrence.
<i>Dacca Prakash</i> , 14th June 1893.	Desertion of children by one Pitamber Gope of Govindapur, thana Nawubganj, on account of scarcity.	No man of that name ever lived in the village.
<i>Bangabasi</i> , 17th June 1893.	Five deaths from starvation, quoted from <i>Dacca Prakash</i> .	No deaths owing to distress.
<i>Sanjibani</i> , 9th September 1893.	Death from starvation in Mymensingh ...	The statement is not true.
<i>Kasipur Nirasi</i> , 14th September 1893.	Death of a Sankhabanik, of Kirtipasha, from starvation.	No such death from starvation. One Ram Bishnu Sankhabanik committed suicide, as he was suffering from colic.
<i>Bangabasi</i> , 23rd September 1893.	Death of Bhimrishi Muchi of Sengair in Mauikganj, found by Subdivisional Officer on enquiry to be caused by starvation.	Death from fever and not from starvation.
<i>Kasipur Nirasi</i> , 30th September 1893.	Excess of dacoities and ruffianisms in Backergunge in consequence of prevailing distress, with two instances:— (1) Certain Musalmans attacked a washerman's house and forcibly carried away a quantity of straw. (2) One Gopal Chandra Nag, of Kasipur, assaulted by dacoits.	Statements not true.
<i>Dacca Prakash</i> , 1st October 1893.	Severe distress in Gossair Hat in Faridpur, and deaths from starvation.	Distress not very severe, and no deaths from starvation.
<i>Sanjibani</i> , 14th April 1894.	Distress in Faridpur. Death of one Iswar Chandra Das of Jamulia from starvation, with another young widow about to, and in the same house suicide by a gentleman on account of starvation, and the walking about of women almost naked.	All the facts stated are untrue.

The Sub-divisional Officer of Madaripur, Maulvi Fazlal Karim, who met a delegate of the Faridpur Suhrid Sabha gratuitously distributing rice to the destitute women in Kotalipara from the funds of the Association, writes as follows in his diary under date the 7th of May 1884:—

"This gentleman showed me what he had written about the distress in the *Bangabasi* of the 5th instant; after reading it, I found he had very much exaggerated the facts, and had mentioned many things which are not correct. I drew his attention to these facts, and requested him not to misrepresent facts in this way."

#### SECTION XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

256. I annex a statement in which I have recorded the Collectors' and my own opinion, where I have anything to add, of the gazetted officers employed in this Division.

According to the instruction contained in paragraph 36, section IV, chapter IX of the Board's Rules, 1888, I have, in paragraphs 167 and 168 of my Report on the Land Revenue Administration for 1893-94, given some account of the services of the District Officers of my Division. As Mr. Savage has left Backergunge, I take this opportunity of recording my high appreciation of his services during his incumbency of the onerous and difficult post of Magistrate-Collector of that district.

Mr. Savage joined the Backergunge district in the year 1887-88. The land revenue then amounted to Rs. 14,79,188. In 1893-94 it was Rs. 15,62,590. While the general result of Mr. Savage's administration has thus been eminently successful, this officer has been equally happy in details. He has, to use a hackneyed phrase, "evolved order out of chaos." At the end of 1887-88 the arrears of land revenue were Rs. 1,50,864; at the end of 1893-94 they were Rs. 60,071. Salt, an important subject in a seaboard district, has had Mr. Savage's careful attention. Though in charge of this very important district, where the protection of person and property alone is enough to occupy one man's time, Mr. Savage has found time to supervise the administration of a large Court of Wards' estate, Dakhin Shahbazpur, in a very efficient manner.

One of this gentlemen's latest contributions to administrative improvement is a scheme for enforcing the registration of possessing titles under Act VII (B.C.), 1876, which bids fair to be a success.

Mr. Savage succeeded in persuading the Backergunge District Board to vote an addition of 50 per cent. to the rate of road cess.

In the administration of criminal justice and of the police, I can hardly say more than that Mr. Savage has succeeded in maintaining order in spite of the difficulties which our unoriental, somewhat elaborate, and perhaps over-scrupulous, system places in a District Officer's path.

257. I would also invite attention to the excellent work done by Mr. A. Earle since he has been in charge of the Mymensingh district. Mr. Earle had a hard task to perform in reforming and restoring the administration. He has been untiring in his efforts, which have been almost uniformly successful. I regret to say that his efforts, though of so much value to the district or to Government, have been disastrous to himself. I trust that his indisposition, brought on by overwork, is but temporary.

258. \* \* \* \* \*

#### XXXVI.—CONDUCT OF ZAMINDARS.

259. The district of Dacca is fortunate in some of its principal landed proprietors. The names of Nawab Sir Abdul Gani Bahadur, K.C.S.I., his son, Nawab Askanullah Bahadur, C.I.E., Raja Rajendra Narain Bahadur of Bhowal, Raja Srinath Rai of Bhagyakul, are known far beyond the limits of the district and of the Division. The Collector now adds the zamindars of Teota to the list of exceptionally public-spirited landed proprietors. I am glad to be able to report that the long-standing disputes between the Raja of Bhowal and the zamindar of Kasimpur have at last been terminated by the intervention of the Collector.

The disputes between the several zamindars of Baliati in the Manikganj subdivision, referred to in last year's report, I regret to say, continued during the year. The two young zamindars of Dhankora are also at feud. The two families of the Pal Babus of Lohajang in the Munshiganj subdivision have been fighting for a char throughout the year under review. Some of the minor zamindars are reported to be on bad terms with their tenants.

Among the zamindars most favourably noticed as liberal and peaceful landlords, are Raja Surjya Kanta Acharjya of Mymensingh, Muktagacha and Babu Jogendra Kishore Rai Chaudhri of Ramgopalpur. The names of Hafiz Muhamed Ali Khan of Korotia and Rai Radha Ballab Chaudhri of Sherpur are also prominently mentioned. Raja Surjya Kanta Acharjya Bahadur has of late shown in every possible way his wish to secure the good-will of the District Officer, and has on more than one occasion sought his help in averting impending disputes; while Babu Jogendra

Kishore Rai Chaudri of Ramgopalpur is reported to be an example to most landlords for the careful management of his estate.

Speaking generally, the resident landlords of this district have given little or no trouble during the year under review, while the evil effects of landlord absenteeism has been conspicuous in a few cases. It is generally the amla who, in order to benefit themselves at the expense of their masters, foment and keep alive quarrels between proprietors and between tenants and their landlords. This class naturally possess greater powers and cannot be kept under adequate control when their masters live far away from their properties.

Most of the large zamindars are non-resident, and with the exception of Maharaja Sir Jotindra Mohan Thakur, K.C.S.I., and Babu Kali Krishna Thakur of Calcutta, are said to manage their estates badly. Maharaja Sir Jotindra Mohan Thakur, Babu Kali Krishna Thakur, the Narail Babus, Maharani Svarnamayi of Kasimbazar, Barnamayi Dasya of Calcutta, and Kumar Pran Sankar Chaudhri of Teota, though non-resident, subscribed money for the relief of the distressed people of the district. The resident landlords are generally well spoken of. Babu Rajendra Chandra Rai Chaudhri of Chandya Russi distributed a considerable quantity of rice to the people in distress during the months of September and October last. He and his cousin, Babu Mahim Chandra Rai Chaudhri, also subscribed handsomely for the completion of the annual agricultural exhibition and mela buildings at Faridpur.

In general the conduct of the zamindars of this district has not during the year been such as to call for special praise or blame. No prominent acts of liberality have distinguished any member of the landed interest. Here and there loans have been granted to tenants to relieve them during the hard times caused by partial failure of crops in the Bil country, and in some places zamindars and talukdars distributed rice free to those of their tenants who suffered most from the distress; but the expenditure was in no case such as to call for special notice. On the other hand, with the exception of certain zamindars, whose quarrels are interminable, the zamindars of the district have during the year not given much employment for the police, and have shown a disposition to live at peace with their neighbours.

The District Board having reduced the rate of road cess from  $4\frac{1}{2}$  to 3 pies, enquiry was made as to the rate at which this and the Public Works cess were levied from the raiyats by the landlords. It was proved that they levy the full rate of one anna per rupee at least, and that two annas, two annas six pies, and even three annas, are not unknown rates, while legally they are only entitled to  $4\frac{1}{2}$  pies. I confess to some surprise, not that the landlords should make these cesses an excuse for further illegal exactions, but that the peasantry of Backergunge, reported to be so independent, should submit to them.

#### XXXVII.—STATIONERY AND FORMS.

260. Of recent years the subject of the increase in expenditure on and in consumption of stationery has received attention. I have had returns prepared showing the consumption in 1892-93 and 1893-94. Only in Mymensingh is there decrease. This is creditable to Mr. Earle, or discreditable to his predecessor, under whose régime there was increase. The increase in Dacca is attributed to the police sub-inspectorship examination. In Backergunge and Faridpur scarcity is said to be answerable. There is increase in all these districts in foolscap and draft paper. In Dacca there is increase in quills. It must be remembered that officers are not entirely responsible for consumption of stationery any more than they are for telegrams. They are obliged to answer letters.

In consumption of forms, too, special care is now taken since the issue of the Government orders No. 1460J., dated 6th March 1894, circulating Board's Resolution No. 2235B., dated 20th December 1893. Regular account books of forms issued have been opened and the forms have been kept under the charge of a special clerk or muharrir.

The Magistrate of Backergunge raised a discussion regarding the use of quills both in English and vernacular offices. All the Magistrates were of

opinion that goose quills should be supplied instead of steel nibs. Mr. Savage found on enquiry that with steel nibs the amla are not able to write as rapidly as they do with quills, and that the decrease of speed, which is a serious matter in a hard-worked office, is not merely a temporary result of the change of pen, but is certain to be permanent unless better paper be supplied. He added that in deciding the question the Government seem to have lost sight of the fact, known to every writer, that for coarse paper quills are better than steel nibs; and as better paper is not used except for fairing letters, it is necessary that quills should be supplied for writing on ordinary paper. All the other Collectors agreed entirely with Mr. Savage. I used to use goose quills, but some 15 years ago I found, according to the office register, I consumed many quills a day. I accordingly took to steel nibs, and did not find that I wrote slower. I have tried all the different kinds of paper used in the Dacca and Backergunge offices. So far as the writing of English is concerned, my experience does not corroborate the statement made by the Collector of Backergunge regarding the fact known to every writer. In schools I find steel nibs commonly used. I am inclined to agree with my Collectors in the view that the transfer from quills to steel pens has to a certain extent retarded work, especially in vernacular offices. But I differ from them altogether when they assert that this retardation is irremediable as long as steel pens are used. I think experience will teach clerks to write with facility, at any rate English, on rough paper with steel pens, as it has taught me.

#### XXXVIII.—GENERAL REMARKS.

261. The year has been a most unprosperous one. With short crops, amounting in some parts of the Division to absolute failure, we have had general depression. We have actually had to import food. Compared with ordinary times, there has been what may be called scarcity, though in less prosperous countries our depression would hardly be so entitled. In face of this general depression, that the administration has been so generally successful as is shown in the above paragraphs is, I think, creditable to the officers responsible for it. In my report for 1892-93, I was obliged to make Mymensingh an exception to my record of success. This district, under the able conduct of Mr. A. Earle, is now rapidly recovering. The police, especially the rural police, are better supervised; partition cases are more promptly disposed of. I would refer especially to paragraphs 12, 44, 47, 48, 50, 55, 130, 132, 133, 136, 144 above. I am sorry that I must again make an exception this year. Faridpur comes out very badly. The administration of this district has been weak from almost all points of view, as is amply shown in paragraphs 18, 35, 37, 42, 46, 49, 52, 53, 58, 59, 130, 132, 133, 134, 136, 141, above. In a less degree I have found occasion for criticism in the case of Dacca in paragraphs 7, 114, 134, 135, 147, above. Neither in Dacca nor in Faridpur have we made as much progress in rural police matters as we ought to have done. Backergunge is terribly behind-hand in the matter of Honorary Magistrates. In other respects this district comes out very well. Generally, if we have made any progress during the year under report, it has not been such as we might have made. My apology is that the seasons have worked against us.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE  
STATIONERY DEPARTMENT FOR THE YEAR 1893-94.

FINANCIAL DEPARTMENT,—MISCELLANEOUS.

*Darjeeling, the 12th September 1894.*

RESOLUTION—No. 245T.—F.

READ—

Letter No. 620B., dated the 31st July 1894, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1893-94.

The following statement compares the value of the stocks, receipts and issues of the Stationery Office for the year under review with that for the two preceding years:—

	1891-92.	1892-93.	1893-94.
	Rs.	Rs.	Rs.
Value of stores at the beginning of the year ... ..	6,23,856	5,12,445	5,60,515
Value of stores received and credited during the year ... ..	21,55,719	24,63,500	25,02,217
Total ... ..	27,79,575	29,75,945	30,62,732
Deduct value of stores issued during the year ... ..	22,67,130	24,15,430	23,75,259
Value of balance in stock at the close of the year ... ..	5,12,445	5,60,515	6,87,473

2. Compared with the figures of the previous year, there was an advance of Rs. 38,717 in the value of stores received, while the value of stores issued declined by Rs. 40,171. This occasioned a rise in the value of the stock in hand from Rs. 5,60,515 to Rs. 6,87,473. Referring to the amount of stationery in reserve, which is said to be slightly in excess of three months' consumption calculated on the average monthly consumption of the past year, the Board observe that most of the articles in stock are necessarily of country manufacture, and, if they could be promptly supplied by the local contractors, any increase in the reserve would not only represent loss of interest on the price paid, but also unnecessary occupation of space in the warehouses. They add, however, that most of the contractors are "small dealers who cannot be expected to keep large stocks always ready to hand against the demands of Government." This remark is scarcely correct, as the Bally, Titagar and Bengal Mills, which have each contracted for the supply of over 1,000 tons of paper in 1894-95, cannot be called small dealers, and may be expected to be able at short notice to meet promptly such demands as are made upon them by the Stationery Department. The increase in the value of the closing balance of the year is stated to be due partly to the fall in exchange and adjustments made during the year on account of variation in the rates of 1892-93 and 1893-94, and partly to the receipt during March 1894 of certain articles imported and locally manufactured, required for consumption during 1894-95. The portion of the increase attributable to the rise in the nominal rupee value of imported goods since they were received, amounting apparently to Rs. 14,012, is unavoidable. The true increase in the value of the closing stock appears to be Rs. 1,12,946 (Rs. 1,26,958—Rs. 14,012), and this, after allowance for the higher value in rupees of the articles imported during the year, indicates a considerable growth in actual stock since the beginning of 1892-93. The Lieutenant-Governor desires that this growth should be checked and the balance kept within reasonable limits.

3. It is satisfactory to notice that there was a decrease in the quantity of stores imported, and also in the expenditure on English articles purchased locally. The value of country-made paper purchased was also slightly less, but that of other articles of local manufacture rose by Rs. 5,640, the increase being ascribed to larger supplies of sealing-wax, tags, wax-cloth, &c., for the Central Provinces, Burma, State Railways, and the Postal Department. The issues to

Local Governments show a net decrease of Rs. 95,819 in value. In Bengal there was a very satisfactory reduction of Rs. 1,55,684, which was due to smaller demand from the printing presses and the substitution to a large extent of country-made for imported articles.

4. The Board refer to the difference in the rates at which water-marked paper is sold to the public in Bengal and the Punjab, which has formed the subject of correspondence. The advisability of having a uniform rate for all Provinces is unquestionable. It seems impossible to sell at less than a pice per sheet, and, in the Lieutenant-Governor's opinion, this rate should be maintained.

5. *Out of 4,817 reams of hand-made paper which were obtained for the use of the High Court and the Inspector-General of Registration, but were not issued to them owing to the general substitution of machine-made foolscap paper, and which the Superintendent of Stationery was authorised to dispose of to the best advantage, 3,415 reams are reported to have been utilized for Government purposes, a balance of 1,402 reams being left in hand.* The paper was received at the end of 1892-93, and should have been entirely disposed of before this. The balance should be utilized as soon as possible, as the paper cannot improve by keeping.

6. The income and expenditure of the Stationery Office, the former consisting of commission on the value of locally-purchased articles and on sales for cash to public officers who are not entitled to free supplies, sale-proceeds of unserviceable stores and petty miscellaneous items, and the latter of the cost of establishment, packing cases, freight and other items, amounted to Rs. 97,833 and Rs. 1,01,998 respectively, against Rs. 1,14,876 and Rs. 95,068 in the previous year. The falling off in the receipts is said to be due to the fact that charges for packing and coolies were excluded during 1893-94 from the value of stationery supplied on payment, and that a smaller quantity of unserviceable and surplus stock was sold. No reason has been assigned for the omission to make any charge for packing and coolies, and the discontinuance of the practice should be explained. The increase in expenditure is mainly accounted for by heavier charges for packing cases and freight, which were unavoidable.

7. The total value of the different articles of stationery issued during the year, exclusive of adjustments, was Rs. 23,73,060, against Rs. 23,72,973 in 1892-93. The issues of quill pens rose in value from Rs. 8,820 in 1892-93 to Rs. 9,163, this being due, as the Superintendent explains, not to a larger number of quills supplied, but to a rise in the price. In his General Administration Report the Commissioner of the Dacca Division refers to a remark made by the Magistrate of Backergunge, that with steel nibs the amla are not able to write as rapidly as they do with quills, particularly on inferior paper, and that this decrease of speed is a serious matter in a hard-worked office. The Commissioner differs from this view, and thinks that experience will teach clerks to write with facility. The Lieutenant-Governor is in accord with him, and also agrees with the Board that it is possible to effect great economy by the substitution of steel pens for quills. The special attention of the Superintendent of Stationery should be given to the matter. An important step, and one which entirely meets with the approval of the Lieutenant-Governor, was taken during the year in entrusting the manufacture of the full supply of cream-wove note and foolscap-size envelopes required by the Stationery Office to the Superintendent of Government Printing, Bengal, the necessity of indenting for these articles from England in future being thus dispensed with. Economy demands that the policy of substituting stationery obtained in India for supplies from England should be steadily pursued.

8. The Superintendent has reported fully on the administration of the Form Branch of the Stationery Office. The details furnished relate almost entirely to Bengal, and, as already suggested in the Government order No. 1454 of the 14th March 1893, they should appear in the report on the Bengal expenditure of the Department. They will, therefore, be reviewed when that report is received. It is sufficient to notice here that during the year stringent orders were issued to secure a check over the consumption of printed forms. Heads of Departments had power previously to introduce a new form or alter an old one at any time, and it was found that this added largely to the expenditure in stationery and printing. It has, therefore, been ruled that no form shall be revised nor any new form introduced except at or

before the time of the annual indent, save with the special sanction of Government. The attention of Government having also been drawn to the large average cost of forms for each indenting office, orders have been issued impressing on all officers the necessity of strict economy in the expenditure of forms. As an additional safeguard against waste, a register has been prescribed, in which an account of the stocks and issues of every kind of form in use is to be kept in all offices, one clerk in each office being held personally responsible for keeping up the register. It is difficult to conceive how the offices could have hitherto got on without such a register. Another source of waste is the practice which obtains in many offices of opening a new book or register every year, and leaving the greater part of the closed book blank. The attention of inspecting officers has been drawn to the standing orders enjoining that a register should be used until it is full. These measures contain the elements of a much-needed reform, and should result in an appreciable saving to Government.

9. The Lieutenant-Governor has perused with satisfaction the remarks recorded by the Superintendent regarding the manner in which his office establishment have discharged their duties. The energy and spirit of economy evinced by Mr. Beames encourage the hope that he will carry out considerable reforms in the administration of the Department.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Board of Revenue for information and necessary action on points noticed.

Ordered also that a copy of this Resolution, with a copy of the report, be submitted to the Government of India, in the Department of Finance and Commerce, for information.

Ordered also that a copy of this Resolution be forwarded to the Superintendent, Government Printing, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

# **RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE SALT DEPARTMENT FOR THE YEAR 1893-94.**

## **FINANCIAL DEPARTMENT—SEPARATE REVENUE.**

*Darjeeling, the 13th September 1894.*

**RESOLUTION—No. 259T.-F.**

**READ—**

The Report of the Board of Revenue on the Administration of the Salt Department for the year 1893-94.

The receipts and charges of the Salt Department during each of the last six years were—

(a) Includes the cost price of salt manufactured under the direct management of Government in Orissa.  
(b) Details are given in the statement in paragraph 48 of the Report.

2. After a steady rise for four years, the receipts last year showed a decrease amounting to Rs. 5,10,908, or 2·1 per cent. as compared with those of 1892-93. The decrease is due to smaller clearances from shipboard, owing to a considerable advance in the price of salt, and also to a falling off in the local manufacture. The imports, however, rose from 93,83,308 maunds in 1892-93 to 1,03,58,803 maunds, and it is apparent from this that importations sometimes depend more on the state of the shipping trade than on the immediate demand for salt. The charges of the year show a decrease of Rs. 89,910 as compared with 1892-93, but this is mainly accounted for by two heavy and exceptional items having been paid in the latter year.

3. The following statement illustrates the fluctuations of the salt trade in Bengal during the last two years:—  
The salt trade.

	1891-92.	1892-93.	1893-94.
1	2	3	4
Opening stock	Mds. 24,97,492	Mds. 14,52,226	Mds. 7,19,316
... { Sea-imported salt in bond ...	59,299	37,938	20,159
... { Excise salt in bond ...	25,56,791	14,90,164	7,39,475
Import and manufac- ture.	90,52,997	93,81,887	1,03,61,985
... { Sea-imported ...	8,985	67,202	15,430
... { Manufactured or added ...	91,61,982	94,52,089	1,03,77,415
Clearances	59,00,244	63,47,425	60,65,233
... { Sea-imported salt from ship board ...	41,33,501	37,10,170	39,01,968
... { Sea-imported salt from bond ...	18,866	81,329	24,460
... { Excise salt from bond ...	1,00,52,611	1,01,38,924	99,91,661
Closing stock	14,52,226	7,19,317	10,66,459
... { Sea-imported salt in bond ...	37,938	20,158	10,197
... { Excise salt in bond ...	14,90,164	7,39,475	10,76,656

The stock of salt in the godas at the close of the year, though larger than in the previous year, was still much below that of the four preceding years. In addition to this stock, however, there were 4,50,909 maunds afloat in the port of Calcutta ready to be sold direct to purchasers.

4. The combined imports into Calcutta and Chittagong show a net increase of 9,75,495 maunds, or 10·3 per cent. over those of 1892-93, but Chittagong had a decrease of 34,679 maunds. The shipments were received from the following countries:—

	1891-92.	1892-93.	1893-94.	Percentage of quantity imported for each group in 1891-92.	Percentage of quantity imported for each group in 1892-93.	Percentage of quantity imported for each group in 1893-94.

Total	90,51,276	93,83,308	1,03,58,903	100·0	100·0	100·0

Chittagong received cargoes from the United Kingdom only in the past year. There were larger importations into Calcutta from the United Kingdom, Ras Rawayah and Aden, and for the first time shipments also came from Trieste, Adelaide, Rio de Janeiro and Linga. Hamburg, Muscat, Madras and Bombay, however, sent smaller consignments. The increase shown under group IV shows that the production of salt in those parts is cheap, and the trade with India increasingly profitable.

5. The total clearances of salt of all kinds fell from 1,01,38,924 maunds in 1892-93 to 99,91,661 maunds in the past year. Deducting from these clearances the excess of exports by land and river over the imports by the same routes,

amounting to 4,93,539 maunds, and adding 27,182 maunds of saltpetre salt brought into use, the balance of salt left for consumption in the Province was 95,25,304 maunds, against 94,33,923 maunds in 1892-93. The increase occurred mainly in the saliferous tracts, and was due to greater prosperity, as those parts were free from the disastrous floods which did serious damage to crops elsewhere in the province. The consumption of the saliferous tracts, excluding Orissa, was 10·52lbs. per head, while in Orissa and the rest of the province the average rates were 10·54 and 10·26 respectively.

6. The total imports by land and river—such salt having paid duty in the provinces from which it was brought—rose from 4,23,188 maunds in 1892-93 to 5,52,228 maunds.

Inland trade.

This increase is attributed partly to reduction in local manufacture in Orissa, which led to larger importation from Madras, and partly to the higher price of sea-imported salt, which stimulated importation from Rajputana and the Punjab. The latter cause operated at the same time to reduce exports from Bengal to other provinces, and these fell from 11,62,549 maunds to 10,45,767 maunds, giving an excess over the imports of 4,93,539 maunds, against 7,39,361 maunds in 1892-93.

7. Prices were generally higher than in the previous year, the increase being mainly due to a rise in the price of Liverpool salt, which is attributed to the coal strikes in England. The wholesale price (exclusive of duty) of 100 maunds of Liverpool salt ranged from Rs. 96-10-2 to Rs. 55-6-11, against a variation from Rs. 68-12 to Rs. 57-8 in 1892-93.

8. Including the Orissa districts, the total number of seizures of contraband salt fell from 2,015 to 1,124 during the past year, and the quantity attached from 1,671 to 693 maunds. In Midnapore there were 176 seizures

Working of the salt laws and rules.

to 12 unsuccessful searches, against 441 and 363 respectively in 1892-93. While the very high proportion of unsuccessful searches to seizures in the previous year indicated haste and want of judgment on the part of the police, it is evident from the figures of the past year that they have, as the Board remark, gone from one extreme to the other, and have practically given up making searches for illicit salt, except when the evidence is complete and the case is ready. It is obvious, however, that the prevention and suppression of offences against the law and rules demand prompt action on reliable information and reasonable suspicion, and if the police proceed with discretion, such action will seldom afford ground for complaint. There were altogether 1,005 prosecutions, chiefly for illicit manufacture and possession, against 1,472 in the previous year, and 932 persons were convicted out of 1,042 apprehended. The rewards disbursed amounted to Rs. 4,608. The Lieutenant-Governor agrees with the Board that rewards should be granted on a more liberal scale than they have been, and he will be prepared to raise the allotment sanctioned for 1894-95, if necessary, on receipt of a separate representation from the Board.

9. The receipts of the Orissa Salt Department fell from Rs. 2,17,409 to Rs. 66,353 during the year, the decrease being due to the failure of local manufacture. The expenditure (Rs. 1,29,277) was nearly twice the revenue, the percentage of the charges to the receipts being 194·8. The Madras salt authorities claim that the Department should get credit for the duty realised elsewhere on salt consumed in Orissa, on the ground that but for the existence of the preventive establishments, this revenue would not have been realized. On this calculation the total receipts would amount to Rs. 19,03,496, and the percentage of the charges on the receipts would be 6·79. The Lieutenant-Governor cannot, however, accept this argument. Revenue was realised elsewhere on salt imported into Orissa before the preventive establishments came into existence, and although the amount has increased largely since, its growth has been counterbalanced by a reduction in the receipts from local manufacture, and is, in the main, the

Salt in Orissa.

		Rs.
* 1885-86	...	6,84,133
1886-87	...	7,44,420
1893-94	...	7,59,317

outcome of the great falling off in such manufacture. The total sales\* of all descriptions of salt in Orissa before the Madras authorities took charge of the Department were nearly the same as now, and the consumption per head of the population was greater, being 10·73

in 1885-86 against 10·54 in 1893-94. The Government thus obtained almost the same revenue when the preventive work was in the hands of the police. The Board in their 52nd paragraph state the indictment against the Madras management in clear and forcible terms. Though the transfer of the salt administration to Madras was decided on for the express purpose of developing the local industry and making excise salt cheaper and more plentiful, they show that only 15,000 maunds of salt were produced last year, against several lakhs in former years, that the salt is bad and dear, that the consumption per head is slightly less than in 1885-86, that the retail price has remained stationary and is not much below the prices that prevail in the rest of Bengal, that the *malangis* who make salt at the factories are in debt to Government, and that not a single case of illicit wholesale manufacture was detected during the year. The charges, on the other hand, even after credit is given for the entire amount of duty realized on Ganjam, Madras and Liverpool salt, have been out of all proportion to the receipts, the cost for levying less than 20 lakhs of revenue having been 1½ lakhs, while in the rest of Bengal a revenue of Rs. 2,36,63,962 was collected at a cost of Rs. 26,778. In the presence of these facts, there can be no room for doubt that the Madras system has not been successful in Orissa. The view expressed by Sir Charles Elliott in the Resolution on the annual report for 1891-92 has been confirmed, and he is constrained to reiterate his conviction that the system pursued is a mistake, and that, though it may be desirable to place under Madras control the making of salt on the Chilka lake, the establishment entertained to prevent and detect the illegal manufacture of salt has been a waste of money.

10. The thanks of the Lieutenant-Governor are again due to the Board for their careful supervision of the department.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

**RESOLUTION ON THE STATISTICAL INFORMATION FURNISHED BY  
THE BOARD OF REVENUE REGARDING THE STAMP  
DEPARTMENT FOR THE YEAR 1893-94.**

**FINANCIAL DEPARTMENT—SEPARATE REVENUE.**

*Darjeeling, the 14th September 1894.*

**RESOLUTION No. 272T.F.**

**READ—**

A memorandum No. 668B., dated the 15th August 1894, from the Board of Revenue, Lower Provinces, submitting statistical information regarding the Stamp Department for the year 1893-94.

The memorandum shows the receipts, charges and net revenue in 1893-94 under both the Indian Stamp Act I of 1879 and the Court-fees Act VII of 1870 to have been respectively Rs. 1,59,71,845, Rs. 6,70,998, and Rs. 1,53,00,847, against 1,55,45,461, Rs. 6,58,937, and Rs. 1,48,86,524 in the preceding year. It appears, however, from the latest figures supplied by the Accountant-General, Bengal, that the approximate receipts and charges in 1893-94 were Rs. 1,59,76,000 and Rs. 6,32,000 respectively. The probable net revenue of the year was therefore Rs. 1,53,44,000.

2. The increase in the receipts occurred under both judicial and non-judicial stamps. According to the return furnished by the Superintendent of Stationery, which will have to be reconciled with the final figures compiled by the Accountant-General, judicial stamps show an increase of Rs. 2,98,523, the largest contributions to which were made by Mymensingh (Rs. 47,970), Calcutta (Rs. 45,242), Bhagalpur (Rs. 25,935), Midnapore (Rs. 22,809), Cuttack (Rs. 20,407), Burdwan (Rs. 18,854), and Saran (Rs. 17,310). Fluctuations in the districts are not unfrequently due to the institution of one or two suits of high value (for instance, in Calcutta Rs. 45,000 are reported to have been paid as probate duty on a single estate), but a steady advance in the revenue under this head is observed from the figures for the Province as a whole for the past five years. In sales of non-judicial stamps, marked improvement occurred in fewer districts, but there was an increase in the majority of districts. The largest increases were in Mymensingh (Rs. 26,637), Muzaffarpur (Rs. 20,791), and Patna (Rs. 11,225), while in Faridpur there was a decrease of Rs. 12,737. These fluctuations were doubtless due to special local circumstances, which should have been explained.

3. The number of cases in which deficient stamp duty and penalty were levied during the year was 4,375 against 3,902 in the preceding year, and the amount of duty and penalty realized amounted to Rs. 37,727 as compared with Rs. 34,353 in 1892-93. Prosecutions were instituted in 710 cases against 803 persons: in 1892-93 the numbers were 667 cases and 703 persons. The increase in cases does not necessarily indicate greater care in checking the stamp duty on the documents which came before the officers and Courts, for the number of insufficiently stamped documents detected must vary from year to year. The Lieutenant-Governor trusts that vigilance will be steadily maintained in this matter in all districts. In 11 districts the sale of receipt stamps declined, and the Board are not satisfied that in some districts sufficient care is always exercised in the examination of account books and receipts produced before the income-tax assessors and other officers.

4. Rewards were paid for the detection of evasions of the Stamp Law in 14 districts against 11 in 1892-93 and 9 in 1891-92; but the amount paid was only Rs. 1,455 against Rs. 1,563 in the year before. As observed in the Resolution on the Report of the Stamp Department for the three years ending on the 31st March 1893, detection of infringements of the Stamp Law must largely depend on the encouragement afforded by a liberal distribution of rewards; and although the past year shows some improvement as compared with the preceding two years, the Lieutenant-Governor thinks that sufficient attention has not yet been paid to this important subject.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secy. to the Govt. of Bengal.*

**RESOLUTION ON THE ANNUAL REPORT ON THE GOVERNMENT  
CINCHONA PLANTATION AND CINCHONA FACTORY IN  
BENGAL FOR THE YEAR 1893-94.**

FINANCIAL DEPARTMENT,—MISCELLANEOUS.

*Darjeeling, the 14th September 1894.*

RESOLUTION—No. 266T.—F.

READ—

The Annual Report on the Government Cinchona Plantation and Cinchona Factory in Bengal for the year 1893-94.

Read also—

The Report for the year 1892-93 and the Resolution recorded on it.

1. The number of trees uprooted during the year was 698,850, against 466,430 in 1892-93; these comprised 260,000 red (or febrifuge-producing) barks and 438,850 yellow (or quinine-producing) barks. The policy steadily observed for several years past has been to reduce the trees which yield the febrifuge, and to plant out only the quinine-producing varieties. No trees of the former kind were, therefore, planted out during the year, and their number fell from 1,020,000 on the 31st March 1893 to 760,000 on the 31st March 1894. The renewals, which numbered 183,700, consisted mainly of the "Calisaya Ledgeriana," with about 7,000 hybrids. The result of the year's operations was that the total number of cinchona plants in the plantation at the close of the year (excluding the nursery stock, which amounted to 84,000), was 3,572,501, as compared with 4,087,651 trees at the close of the preceding year.

2. The crop collected during the year amounted to 330,025 lbs. of dry bark, against 304,390 lbs. in 1892-93. It consisted of 92,605 lbs. of red bark and 237,420 lbs. of yellow bark. The whole of this crop, with the exception of 1,594½ lbs., which were supplied to medical institutions and sold to the public, was made over to the Cinchona Factory. The quantity of bark was small compared with the number of trees uprooted, but the majority of the trees are stated to have been dwarfed and feeble, being the residue of the harvests of former years.

3. The outturn of the Factory was 4,765 lbs. of sulphate of quinine, the produce of 230,100 lbs. of yellow bark and 3,848 lbs. of cinchona febrifuge, for the manufacture of which 91,800 lbs. of red bark were required. The outturn of 1892-93 amounted to 5,242 lbs. and 3,481 lbs. respectively. The falling off of 477 lbs. in the outturn of quinine was due partly to the suspension of manufacture during additions and alterations to the Factory, and partly to a decrease in the proportion of quinine produced from the bark. Regarding this diminution in produce, Dr. King has explained that the percentage of quinine in cinchona bark varies very much, and vegetable physiologists have not yet been able to explain the cause of the variation.

4. The Government purchased during the year the Bhutan Cinchona Association's plantation at Nimbhong, together with a stock of dry bark and manufactured quinine, at a cost of Rs. 1,57,336, payable in three annual instalments, and Rs. 15,763 for the prepared quinine. The latter amounted to 1,157 lbs., the whole of which was disposed of during the year. The number of quinine-producing trees on the plantation exceeds 1,000,000, and Dr. King proposes to gradually cut them down and utilize the bark. When cleared of cinchona, the land can be utilized for other purposes.

5. The following table compares the issues of the past two years:—

	1892-93.		1893-94.	
	Sulphate of quinine.	Cinchona febrifuge.	Sulphate of quinine.	Cinchona febrifuge.
1	2	3	4	5
	lbs. oz.	lbs. oz.	lbs. oz.	lbs. oz.
To Medical Department, Calcutta ...	1,150 0	500 0	1,300 0	500 0
To Medical Department, Mian Meer ...	1,270 0	500 0	1,500 0	900 0
To Inspector-General of Civil Hospitals, Bengal (for District Medical Officers, Bengal).	.....	200 8	.....	295 8
To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal).	6 12	52 4	7 0	51 0
To Inspector-General of Jails, Bengal (for making into pice packets).	475 0	.....	1,490 0	.....
To Inspector-General of Jails (for compensation for loss of weight in conversion into pice packets).	.....	.....	14 12	.....
To Surgeon-General with the Government of India.	.....	2 0	.....	.....
To Commissariat Department for Port Blair	50 0	.....	50 0	.....
Sold to Government officers ...	2,558 13½	.....	2,552 10½	.....
Ditto ditto and to the general public.	.....	2,390 14	.....	2,453 11
Given as samples ...	7 10½	1 6	2 6½	0 5
Total ...	5,518 3½	3,647 0	6,916 13½	4,200 8

The consumption of the year exceeded the quantity manufactured during the year by nearly 1,200 lbs. of quinine.

The Inspector-General of Civil Hospitals was supplied with no quinine during the year for issue to District Medical Officers, and the Inspector-General of Jails took a very small quantity for the jails and lock-ups in the Province, but both officers received supplies of the cinchona febrifuge. They will be asked to explain why, in the one case, there was no indent for quinine; and in the other only so small an amount was taken. Details of the sales to Government officers are given in Appendix I attached to the report. The Panjab was the chief customer, taking 1,047 lbs. of quinine against 653 lbs. in the previous year. The demand for Bengal dispensaries rose from 137 lbs. to 186 lbs., but it was exceeded by that of the dispensaries in the North-Western Provinces, Central Provinces, and Native States.

6. The following statement exhibits the revenue derived from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantation during the past two years:—

	1892-93.	1893-94.
	Rs.	Rs.
By sale for cash ...	64,454	65,808
By credit from the Medical Depôts and the Commissariat Department ...	43,305	54,370
By credit from the Inspector-General of Civil Hospitals, Bengal ...	2,005	2,955
By credit from the Inspector-General of Jails, Bengal—		
For jails ...	631	622
" pice packets ...	6,333	19,930
By credit from the Surgeon-General with the Government of India ...	20	.....
Total ...	1,17,768	1,43,684

7. The expenditure on the plantation, excluding the sum of Rs. 50,000, which was paid on account of the first instalment of the purchase-money of the Nimbong Cinchona Plantation, and the expenditure on the Factory, including the price of the quinine taken over from the Bhutan Cinchona Association, amounted to Rs. 73,235 and Rs. 54,013 respectively, against Rs. 68,650 and Rs. 36,697 in the previous year. The increase in the Factory expenditure was partly due to the renewal of machinery. For the plantation there were higher charges on account of the establishment.

8. The result of the year's working (allowing for the value of the stock sold) was a net profit of Rs. 1,117 against Rs. 3,171 in 1892-93. As stated in previous Resolutions, it is not the object of the Government to make a profit out of this industry, but to provide the people of the country, at the lowest possible rate, with an efficient remedy for fever, the most prevalent of all the diseases of the country. The financial result of the year must therefore be considered satisfactory. It was, however, accompanied by a very serious decrease in the stock of quinine, which fell from 2,379 lbs. to 1,384 lbs., and stood at the end of the year at about one-fifth of the year's consumption. This is much too low, and the Lieutenant-Governor understands that Dr. King has taken measures not only to manufacture during the present year a quantity equal to the demand, but also to increase the reserve.

9. The scheme for the extended sale of Government quinine in Bengal through the medium of the Postal Department has, as stated by Dr. King, proved a most gratifying success. During the year under review, 1,490 pounds of quinine were issued to the Inspector-General of Jails to be made up into pice packets. The Lieutenant-Governor trusts that, as the arrangement becomes more widely known amongst the people, the demand for Government quinine will largely increase.

10. The acknowledgments of the Lieutenant-Governor are due to Dr. King and to Mr. Gammie for the efficient management of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 15th September, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
<b>BENGAL.</b>			
BURDWAN DIV.	1 Burdwan Sept. 15, '94	0.05	Weather—seasonable. Prospects of <i>aman</i> and sugarcane good. Harvesting of <i>aus</i> commenced. Fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... 11 to 15 Kulna ... 9 to 13 Katwa ... 13½ Raniganj ... 11½ } per rupee.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1894.

THE meteorology of the month of August has been in rather striking contrast with that of July. During the former month there was a succession of storms formed in the Bay, each one exceeding the former one in intensity, and towards the end of the month two very severe storms advanced to the head of the Bay. Also during July the distribution of the rainfall was exceptionally irregular, and particularly heavy rain was received in Orissa, Chota Nagpur and South-West Bengal, and very light rain in North Bengal. In August, on the other hand, not a single storm of importance has been formed, and only two very feeble barometric depressions have been generated, one of which was formed over the north-west angle of the Bay and advanced westwards into the Central Provinces, while the second, which, however, existed for no less than eight days, was formed over the land in the south-east of the province, and gradually advanced in a north-westerly direction to Nowgong, where it filled up, but throughout its existence it was an extremely feeble storm and gave rise to only light to moderate winds, though it brought with it a rather heavy burst of rainfall. Also in August, Orissa and South-West Bengal, which had received rather large excess falls in July, received somewhat scanty falls, the falls varying from 18 to 11 per cent. in defect of the normal; while again North Bengal, which received a fall 20 per cent. in defect of the normal in July, received an excess of 11 per cent. in August. The two months, therefore, have been rather opposite in their character. August, however, has been on the whole a month of well-developed monsoon character, except perhaps during the last week when the rainfall became light and local, and a slight and partial break in the rains set in, but generally the rainfall of the province for August has been above the normal by about eight per cent.

At the end of July the meteorological conditions over Bengal were fairly normal, except that on the 30th of that month a feeble barometric depression accompanied by a distinct cyclonic circulation of winds had formed near Dinajpur. On the 31st the feeble depression had moved in a westerly direction, and was lying along the foot of the hills from about Purnea westwards, and on the 1st of August it had practically ceased to exist as a definite depression, and had become merged into the monsoon trough of low pressure which was lying almost along the foot of the hills. The low pressure area remained in this position for several days, and for the first few days of August also the pressure over Bengal continued below the normal. With the slightly increased indraught towards this low pressure, conditions remained favourable for a rather strong monsoon to blow over the province, and good general rainfall was received up till the 6th of August, when the first feeble barometric depression which was formed in this month occurred.

*Feeble barometric depression of August 6th to the 9th.*—On the 6th instant pressure rose slowly except at the extreme southern stations, and it became decidedly low over the centre and north of the Bay and over Orissa, while winds round the north-west angle of the Bay showed a very distinct indraught towards the sea area. It was thus clear a feeble depression had formed off the Orissa Coast on the 6th. On the 7th pressure had again fallen slowly in the south of Orissa, but had risen elsewhere, and the feeble depression which had formed in the Bay on the 6th had become more definite, and was lying off the South Orissa Coast with a centre to the south-east of Puri. It was still a feeble disturbance, and had not intensified since the 6th. It passed inland during the afternoon of the 7th, the centre crossing the coast near Puri, and at 8 A.M. of the 8th the centre was a little to the south of Sambalpur, and had therefore moved in a west-north-westerly direction. It was still a very shallow depression, but it was of large extent and affected a large part of North-Eastern and Northern India, and a fairly heavy wave of monsoon winds advanced over Bengal in connection with it. On the 9th the feeble depression had again advanced in a west-north-westerly direction in the Central Provinces, but it had become very feeble, and had practically ceased to exist.

On the 9th and 10th, pressure fell rather briskly over the greater part of Bengal and Assam, and on the 10th it was in defect by from 0·06" to 0·08". This again caused an increase in the strength of the monsoon winds blowing from the Bay over Bengal, and at this time very strong monsoon winds were reported. On the 11th an inrush of westerly and north-westerly winds commenced in the west of the province, partially driving back the strong southerly and south-easterly winds which were flowing in over Bengal from the Bay. By the interaction thus produced, heavy rain was precipitated over the western districts. Pressure also began to fall briskly to rapidly, the fall equaling a tenth of an inch at some of the south-eastern stations, and by the opposing north-westerly and westerly winds with the south-easterly and easterly winds a distinct cyclonic circulation began to set up over the south and south-east of the province.

*Feeble barometric depression of August 11th to the 19th.* The feeble low pressure area with the cyclonic circulation of winds, which had commenced on the 11th, developed into a definite barometric depression on the 12th, for on this date pressure had fallen over the eastern half of the province and at some of the central and northern stations, while it was rising in the west of the province. Hence the barometric depression which had been forming on the previous day had become more prominent, and pressure was in defect by

amounts ranging up to 0·17" at Faridpur and 0·162" at Barisal and Narayanganj. A distinct circulation of winds also set up round the low pressure area, and by the indraught towards the depression, winds became rather strong at the head of the Bay. General and rather heavy rain was also being received in connection with the depression. On the 13th the feeble depression had moved in a west-north-westerly direction into West Bengal, and the centre was a little to the north of Raniganj. It had not, however, intensified in any way and was still very feeble, though it was giving good general rain over the whole province. Hence on the 13th with the movement of the depression pressure had fallen at the western and south-western stations, while it was rising at the eastern, northern and central stations. It was also accompanied by an almost perfect cyclonic circulation of winds, though the wind force was light. On the 14th the depression had again moved away in a west-north-westerly direction, and the centre was probably near Hazaribagh, but it was a very extensive and shallow depression, and was giving moderate winds only with general and fairly heavy rain. On the 15th the barometric changes in Bengal were particularly small, and the very feeble depression had continued to drift very slowly westwards and covered Baghelkhand and part of Chota Nagpur, so that conditions in Bengal remained unchanged, and moderate general rain with a moderately strong monsoon prevailed. On the 16th pressure was rising slowly at all except a few of the eastern stations, and the feeble depression had moved slightly westwards, and was mainly over the North-Western Provinces with a centre perhaps to the south of Benares, so that it had practically little effect on the conditions in Bengal. A fairly strong monsoon, however, continued to blow over Bengal towards the depression, and rainfall continued general. On the 17th pressure continued to increase very slowly over the greater part of Bengal, and the feeble depression had again extended slightly in a westerly direction, but the general weather conditions in Bengal were quite unchanged. On the 18th, pressure had again risen moderately to rather briskly over Bengal, though it was falling in Assam, but notwithstanding the steadily increasing pressure, a defect usually ranging from 0·05" to 0·08" was still registered over the province. The feeble depression had again moved westwards, and the centre was near Nowgong, but it was unchanged in general character, and was a very shallow diffused depression extending over a large area and accompanied by a distinct cyclonic circulation of winds. From the 18th to the 19th, however, the depression appears to have felled up rather rapidly, for on the latter date it had practically ceased to exist. As before, moderate monsoon winds were blowing over Bengal into the depression, and hence fairly general rain continued to be received up till the 19th instant.

After the disappearance of the depression pressure began to rise moderately to briskly, and by the 26th pressure had become considerably above the normal, the excess ranging up to more than a tenth of an inch at many stations. Hence the pressure distribution became decidedly unfavourable for the free flow of the monsoon current over Bengal. From the 20th to the 26th good general rainfall continued to be received, but from about the latter period the rainfall began to fall off decidedly in amount, and conditions became those which usually precede a slight and partial break in the rains. From the 27th to the 30th August, however, pressure again began to fall in Bengal, so that on the latter date pressure had again become in defect, though on the 31st a moderate to brisk increase of pressure again occurred, so that up to the end of August the monsoon current was still influencing the whole of Bengal to a moderate extent, though the rainfall in the last week was very much lighter than it had been in the previous part of the month.

On the other hand, certain changes occurred in the Bay towards the close of the month which were important. Up till nearly the 23rd of August the strength of the monsoon in the extreme south of the Bay, as judged by the wind velocities at the Ceylon stations, was rather small. From the 24th instant, however, a considerable increase occurred, and a strong monsoon current was blowing in Ceylon up till the end of the month. This strong advance gradually passed on the Bay, and from about the 30th instant a barometric depression of a feeble diffused nature appeared to form in the centre of the Bay. This feeble depression moved slowly towards the North Madras coast, and on the 1st September it was lying almost over the North Madras coast. The diffused depression was giving strong winds and squally weather in the east and south of the Bay, but by the indraught towards it the monsoon current was also partially prevented from flowing up to the north of the Bay and over Bengal.

*Pressure.*—The variations of pressure during the month have been of little practical importance. The mean pressure for the whole month has been in defect at all stations, the defect usually equalling about 0·015", and ranging between only 0·028" at Dacca and 0·027" at Darbhanga, and about 0·05" to 0·010" at some of the eastern and south-western stations.

*Temperature.*—The variations of temperature during the month have also been small, and of comparatively little importance. The averages of the maximum or day temperatures during the month have shown temperature to be usually between 1° and 2° below the normal, the greatest defect being 2·3° at Bankipore, while nearly normal temperatures have been registered at Chittagong, Balasore, and Pulo Point. In the case of the night or minimum temperatures, also, the averages for the month show a defect of usually less than a degree. One or two stations, on the other hand, near the foot of the hills, such as Purnea, Jalpaiguri, and Darjeeling itself, have shown slight excess minimum temperatures.

The mean temperature of the whole of Bengal has been in defect by 0·7°, and the largest defects, averaging 1·1°, have been registered in Bihar.

**Rainfall.**—The general rainfall for the month has equalled about nine inches in Orissa, eleven inches in South-West Bengal, fifteen inches in Bihar and North Bengal, and about seventeen to eighteen inches in Chota Nagpur and East Bengal. Excess falls of from one and-a-half to three and-a-half inches have hence been recorded in North Bengal, East Bengal, Bihar, and Chota Nagpur, and defects of one to two inches in South-West Bengal and Orissa. In the case of the number of rainy days, that is, days on which at least a tenth of an inch of rain fell, excess numbers were recorded in every district except Orissa, and even in South-West Bengal, where the rainfall was defective, rain fell on one day more than usual in the month. In such districts as Bihar and Chota Nagpur, indeed rain fell during August on nearly five days more than the average number. This would seem to point to the falls themselves being rather lighter than usual, though decidedly more numerous.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1894 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	0	55	42	97	58	104	121	89	95
North Bengal ...	0	61	16	177	83	77	80	111	88
East Bengal ...	0	87	164	79	70	95	118	112	101
Bihar ...	3	163	24	98	29	121	108	126	109
Orissa ...	30	19	27	128	20	137	154	82	108
Chota Nagpur ...	3	110	4	144	31	149	138	126	124

The falls in August, it will be seen, have been decidedly defective in both Orissa and South-West Bengal which show defects of 18 and 11 per cent. respectively, while all other divisions have received rather abundant rainfall, the excess ranging from 11 to 26 per cent., and the general excess rainfall for August for the whole province has equalled eight per cent. In the case of the rainfall for the year up to the end of August also the average fall for the whole province has been four per cent. in excess, and the only divisions which show any considerable variation from the normal are North Bengal with a defect of 12 per cent., and Chota Nagpur with an excess of 24 per cent.

Considering the rainfall of August more in detail, the falls have varied from amounts of 30 to 40 inches in parts of South-East Bengal and in and near the Darjeeling Hills to falls of less than 10 inches in the centre and south of the province, as is the case of parts (or in some cases the whole) of the following districts:—Howrah, Hooghly, Calcutta, 24-Parganas, Jessore, Faridpur, Pubna, Murshidabad, Malda, Dinajpur, Southal Parganas, Gaya, and Monghyr. Generally the province has received falls of between 15 and 20 inches. One band of rather heavier rainfall than usual stretches in a north-westerly direction from Saugor Island towards Panna, and probably was partly produced by the second of the barometric depressions previously described.

Compared with the normal, the areas which show considerable defect embrace a large part of Orissa, parts of Midnapore, Howrah, Hooghly, Calcutta, 24-Parganas, Jessore, parts of Pabna, Murshidabad, Malda, and Dinajpur and Kuch Bihar. Here the defects in many cases exceed five inches of rain. On the other hand, by far the larger part of Bengal has received an excess fall, and over a large area the excess has been more than five inches of rain.

The following table gives full data for comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means gives in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; the fourth column states as a percentage how much the district rainfall of the month varied from the normal:—

Percentage Table for August 1894.

DIVISION.	DISTRICT.	Normal district rainfall for August.	Actual district rainfall for August 1894.	Percentage of actual to normal rainfall.	Percentage excess (+) or defect (-).
South-West Bengal	Burdwan	12.36	13.20	107	+ 7

**Explanation.**—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the remaining corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when 0.10 inch of rain has fallen.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 15TH OF SEPTEMBER 1894.**

At the close of the previous week the monsoon current blowing over Bengal had become light, and a feeble low-pressure area also existed over the North Madras coast and a large part of the Central Provinces. The indraught towards this low-pressure area was partially drawing the monsoon current away from Bengal, and hence rainfall had become much lighter and decidedly local at that time. On the 9th, or the first day of the week under review, the feeble low-pressure area had practically disappeared from the North Madras coast, and pressure was falling briskly in Bengal, though it still continued above the normal, the excess usually equalling from 0.02 inch to 0.06 inch. The monsoon current blowing over the province continued very feeble, and rainfall was very local and very light, except in the districts in and near the hills in North Bengal. On the 10th pressure had again fallen moderately to slowly, and had become in defect by small amounts; winds also became decidedly less regular in direction than they had been, and were very light in force, and again rainfall was to a great extent absent except in and near the hills, where heavy falls were reported. On the 11th a brisk to moderate increase of pressure occurred, and a very light monsoon only was reported. Winds were decidedly irregular at the northern stations, and particularly heavy rain fell in and near the hills, though elsewhere only a few local showers were reported. On the 11th Bhagatpur (Jalpaiguri district) registered the heavy fall of 9.40 inches of rain, Siliguri 5.26 inches, Jalpaiguri 4.83 inches, and Buxar 3.48 inches. On the 12th the increase of pressure continued, and pressure again became in excess by amounts ranging up to 0.07" to 0.09," while a particularly light monsoon current continued to flow over the province. Rainfall was still general, but much lighter in and near the hills, while over the remainder of the province only light local showers were reported. On the 13th pressure had commenced to fall briskly, and the distribution became nearly normal, but in Bengal the conditions as to the monsoon current and rainfall were practically unchanged.

In the Bay, however, some rather more important changes of conditions had been occurring. In the early part of the week the monsoon current blowing in the south of the Bay had been decidedly feeble. From about the 8th or 9th, however, wind velocities at the Ceylon stations began to increase rapidly, and these strong winds continued to be reported up till practically the end of the week. This probably represented a fresh advance of monsoon winds up the Bay, and this gradually penetrated northwards during the week. On Friday, the 14th, a feeble low-pressure area appeared in the north-west angle of the Bay, which was accompanied by a decided circulation of winds. This feeble area of low pressure probably formed in front of this advance of monsoon winds, and pressure had fallen briskly round the head of the Bay and over the western half of the province in connection with it, while it had fallen slowly only over the eastern half. The conditions as to rainfall in Bengal, however, remained unchanged, and light local showers only occurred, except in the north of the province and in and near the hills, where again heavy general rain was received. On the 15th the very feeble low-pressure area had advanced inland, and was in the south of Chota Nagpur, probably to the south-east of Chaibassa. It was still accompanied by a distinct cyclonic circulation of winds, but it had not increased to any extent in depth, for pressure was increasing over the whole of Bengal except in the immediate neighbourhood of the depression. With the inland advance of the feeble low-pressure area, however, the monsoon current again began to advance more freely over Bengal, and on the morning of the 15th fairly general rain was reported over the greater part of the province.

*Pressure.*—The variations of the mean pressure for the week from the normal have been particularly small, and they have not averaged more than about a hundredth of an inch. At the majority of stations the pressure has been in excess, but at a considerable number about equal defects have been reported, so that pressure on the whole has been slightly in excess.

In Assam the average pressure for the week has been 0.013 inch above the normal.

*Temperature.*—Owing to the partial break in the rains which has occurred, the mean temperature of the whole of Bengal for the week has been 0.7° above the normal. In the case of North Bengal, on the other hand, owing to the heavy rain a defect of 0.8° has been recorded, while the excess registered in South-West Bengal, Behar and Chota Nagpur has been equal to one degree and upwards.

In Assam the mean temperature has been in defect by no less than 2.7°.

*Rainfall.*—The average falls in North Bengal have equalled more than four inches, or one inch more than usual. In East Bengal and Bihar the falls have varied between one inch and one inch and-a-half, while in South-West Bengal, Orissa, and Chota Nagpur the falls have varied from half to one inch only. The defects in these districts have usually varied from about one to two inches.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following—South-West Bengal, 24 per cent., North Bengal 133 per cent., East Bengal 50 per cent., Bihar 62 per cent., Orissa 31 per cent., and Chota Nagpur 28 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 55 per cent. of the normal only.

At a few stations in the northern districts exceptionally heavy falls have been received during the week. Thus Bhagatpur (Jalpaiguri district) has recorded 27·62 inches of rain and Buxar 17·00 inches, while falls above ten inches have been registered at Jalpaiguri, Alipore Dooar, Falacotta, Siliguri, Mickliganj, Fulbari, Mathabhanga and Kishanganj. In Assam during the week Silchar has received 8·23 inches, Sibsagar 6·31 inches, and Dhubri 2·98 inches of rain.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 15th of September 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.				Average mean of week above or below normal mean of week.	Of week.			Rainy days.		Since 1st of month.	Since 16th May 1894.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.	...	...	...	1.05

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; d, drizzling rain; Δ, dew; ∅, lunar corona.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, SEPTEMBER 19, 1894.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 173.

[First Publication.]

BAY OF BENGAL—BURMA COAST.

*Eastern or Kalwin point beacon about to be replaced.*

THE Deputy Commissioner, Mergui, has given notice that the Eastern or Kalwin point beacon, which was carried away on the 2nd December 1893, is about to be replaced during this month.

A further notice will be issued when it is completed.

H. B. HOOPER, *Comdr., R.I.M.,*  
*Acting Port Officer of Calcutta.*

Published for general information.

G. C. MACONCHY,  
*Under-Secretary, Marine Department.*

CALCUTTA, the 15th September 1894.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 174.

[First Publication.]

BAY OF BENGAL—BURMA COAST.

*Rangoon river entrance—Spit light-vessel placed in position.*

WITH reference to Notice to Mariners, No. 81, dated 30th April last, issued by this office, the Port Officer, Rangoon, has given notice that the Spit light-vessel at the entrance to Rangoon river has been placed in position in 20 feet low-water springs on the bearings noted:—

Eastern Grove Light-house	...	...	...	N. 16° E.
Elephant Point Obelisk	...	...	...	N. 44° W.

The Eastern Grove light-house in line with the Spit light-vessel N. 16° E. leads 100 yards west of the lower eastern buoy. Therefore on the flood tide an allowance must be made to clear the buoy.

(All bearings are magnetic.)

H. B. HOOPER, *Comdr., R.I.M.,*  
*Acting Port Officer of Calcutta.*

Published for general information.

*Germein bay—Withdrawal of light-vessel and alteration in jetty light.*

WITH reference to Notice to Mariners, No. 120, dated 18th June last, issued by this office, the British Admiralty has given further notice (No. 426 of 1894) that, on 1st August 1894, the light-vessel in Germein bay (*fixed white light*) would be withdrawn; and the light shown from the extremity of Germein jetty would be altered from *red* to *red and white* :—

Germein jetty light is a fixed light, showing *white* from N.  $80^{\circ}$  E. (southward of Ward spit) to N.  $66^{\circ}$  E. (northward of the dry part of Cockle spit); *red* from N.  $66^{\circ}$  E. to N.  $12^{\circ}$  E. (over Cockle spit); and *white* from N.  $12^{\circ}$  E. (eastward of Cockle spit) through north to N.  $10^{\circ}$  W.; it is visible in clear weather from a distance of 10 miles.

The light-house is an iron tower, painted red, with a white lantern.

Approximate position, jetty light, lat.  $33^{\circ} 2' 15''$  S., long.  $137^{\circ} 5' 30''$  E.

Approximate position, light-vessel, lat.  $33^{\circ} 3' 45''$  S., long.  $137^{\circ} 52' 15''$  E.

*Hainan strait—Flashing light in Hoi Hau bay.*

THE British Admiralty has given notice (No. 427 of 1894) that a light was exhibited from a light-house recently erected in Hoi Hau bay.

Hoi Hau light is a sixth order, dioptric, *group flashing white and red light*, with a total period of *forty-five seconds*; the flashes are exhibited in the following order:—*white flash, one and-a-half seconds*; *eclipse, six seconds*; *white flash, one and-a-half seconds*; *eclipse, six seconds*; *white flash, one and-a-half seconds*; *eclipse, thirteen and-a-half seconds*; *red flash, one and-a-half seconds*; *eclipse, thirteen and-a-half seconds*. It is elevated 73 feet above the sea, and visible 10 miles in clear weather.

The light-house, 22 feet high, is a cylindrical iron tower, painted white, as are the dwellings and boundary wall, and is situated 464 yards from high-water mark on the south side of the bay.

Approximate position, lat.  $20^{\circ} 1' 15''$  N., long.  $110^{\circ} 16' 10''$  E.

NOTICE TO MARINERS—No. 169.

[Second Publication.]

AFRICA, EAST COAST—GULF OF TAJURA.

*Jibuti bay—Light-house constructed and buoyage.*

THE British Admiralty has given notice (No. 419 of 1894) that a light-house has been constructed at fort Ayabele, situated southward of Jibuti bay, exactly on the line joining Direction hill and Pyramid, and with Ambuli house, bearing E. by N.  $\frac{3}{4}$  N. (N.  $70^{\circ}$  E.), distant  $1\frac{1}{2}$  miles; and Manga Daffa N. W.  $\frac{3}{4}$  W. (N.  $54^{\circ}$  W.).

Approximate position, lat.  $11^{\circ} 33' 15''$  N., long.  $43^{\circ} 8'$  E.

Also, that the undermentioned buoys have been moored in Jibuti bay and its approach; entering from seaward, the red buoys should be left on the starboard hand, and the black buoys on the port hand:—

1. A large flat-topped bell buoy, painted black, has been moored in  $8\frac{1}{2}$  fathoms at the north-west extreme of the reef, which dries north-westward of Mashah islands, in a position

with Scorpion Point, bearing E. S. E. (S. 68° E.), distant 2½ miles; and west extreme of Maskali, S. S. W. ¼ W. (S. 28° W.).

Approximate position, lat. 11° 44' N., long. 43° 10' 40" E.

2. A large flat-topped buoy, painted black, has been moored in 6 fathoms at the north-west extreme of the reef southward of Maskali, in a position with Maskali west extreme, bearing N. E. by N. (N. 34° E.), distant 9 cables; and south extreme east, Mashah island, E. ¾ N. (N. 81° E.).

3. The small conical buoy, painted black, at the north-west extreme of the coral flat westward of plateau du Heron, is now numbered 3, and has been moved to a position in 5½ fathoms with Heron Point bearing E. by S. ¾ S. (S. 70° E.), distant 8½ cables; and Pyramid S. by W. ¼ W. (S. 14° W.).

4. A small conical buoy, painted black and numbered 2, has been moored in 6 fathoms southward of buoy No. 3, in a position with Heron Point, bearing E. ¾ N. (N. 81° E.), distant 9½ cables; and Pyramid S. by W. (S. 11° W.).

5. A large flat-topped buoy, painted black and numbered 1, has been moored in 7 fathoms further southward, in a position with Heron Point, bearing N. E. by E. ¾ E. (N. 66° E.), distant 11½ cables; and jetty light-house S. E. by S. (S. 34° E.).

6. A large flat-topped buoy, painted red, has been moored in 5½ fathoms at the south-east extreme of Meteor reef, in a position with plateau du Heron centre, bearing S. E. ½ E. (S. 52° E.), distant 2⅞ miles; and Manga Daffa, S. W. ¾ S. (S. 36° E.).

7. A large flat-topped buoy, painted red, has been moored in 6 fathoms at the east extreme of Penguin bank, in a position with plateau du Heron centre bearing S. E. ¾ E. (S. 53° E.), distant 2 miles; and Manga Daffa, S. W. ¼ W. (S. 48° W.).

8. A small conical buoy, painted red, has been moored in 5½ fathoms at the east extreme of the shoal south-west of Penguin bank, and now named Etoile bank, in a position with plateau du Heron centre bearing E. ½ S. (S. 83° E.), distant 3½ miles; and Manga Daffa S. S. W. ¾ W. (S. 29° W.).

9. A large flat-topped buoy, painted red, has been moored in 6 fathoms on the east side of the large coral bank in Jibuti bay, in a position with Heron Point, bearing E. by N. ½ N. (N. 73° E.), distant 14½ cables; and jetty light-house S. E. ¼ E. (S. 48° E.). This replaces the former conical red buoy.

10. A small conical buoy, painted red, has been moored in 5½ fathoms at the east extreme of the southern coral reef in Jibuti bay, in a position with jetty light-house, bearing E. by S. ¼ S. (S. 76° E.), distant 7½ cables; and Heron Point N. E. ¾ E. (N. 49° E.).

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

### RULES FOR THE APPOINTMENT OF SUB-INSPECTORS OF POLICE.

THE next divisional examination of candidates to fill 75 vacancies in the rank of Sub-Inspector of Police will be held on the 17th and 18th December 1894, at the following centres:—at Calcutta for the Presidency, Rajshahi, and Burdwan Divisions; at Bankipore for the Patna, Bhagalpur, and Chota Nagpur Divisions; at Dacca for the Dacca and Chittagong Divisions; and at Cuttack for the Orissa Division. The following classes of candidates will be admissible to the examination:—

- Persons who have passed the Entrance Examination of the Calcutta University, provided they are not more than 25 years of age.
- Persons now serving as head-constables and writer-constables in the police, who have obtained the permission of the District Magistrate to appear at the examination, provided that they are not more than 30 years of age, and are of not less than two years' standing in the Department. This permission will only be given to persons who satisfy the conditions laid down in Rule 2.

2. No person will be deemed qualified who does not satisfy the following conditions:—

I.—That he has no disease, constitutional affection or bodily infirmity unfitting him, or likely to unfit him, for police duties, and that he is up to the physical standard prescribed for the area in which he wishes to serve.

NOTE.—“Stuttering or stammering” is a constitutional defect, and represents a physical disqualification.

II.—That he is of good moral character.

III.—That he belongs to a respectable family.

IV.—That he produces a certificate of ability to ride signed by a district officer.

3. Applications for permission to appear at the examination must be submitted, not later than one month before the date fixed, to the Magistrate of the district in which the candidate resides, stating the place at which he desires to appear for examination. Each application from class (a) candidates must be accompanied by a fee of Rs. 5 and by satisfactory proof that the candidate fulfils the conditions specified above. The certificate of health should be signed either by the Civil Surgeon of the district in which the candidate ordinarily resides, or in Calcutta by one of the Professors of the Calcutta Medical College.

The Magistrate should require a personal identification of each candidate by some known person, whose name should be recorded, and satisfy himself that the certificates of respectability and moral character refer to the individual applying for permission to appear at the examination, and send him to the District Superintendent for certificate as to physical fitness. This certificate should contain the applicants' descriptive roll, thumb impression, signature and address for purposes of identification. The District Superintendent will then obtain a health certificate, the fee for which will in all cases be Rs. 4 from the Civil Surgeon, and send it, together with the certificate of physical fitness, to the Magistrate, who will, after subjecting the candidate to an examination in riding and noting the fact, grant a written permission to appear at the examination.

As these certificates form the verification rolls of candidates, they should be very carefully examined and enquiries made when necessary.

The above papers with the examination fee will be forwarded by the Magistrate of the district in which the candidate resides to the Magistrate of the centre at which the candidate wishes to be examined.

The Examination Committee before the examination will compare the descriptions, thumb impressions, duplicate impressions being taken for the purpose, if necessary, and signatures, and satisfy itself about the identity of the person appearing.

At the examination the candidate will be required to sign the papers in every subject, writing his father's name and his own address on them to avoid confusion arising out of a similarity of names.

After the result of the examination is known the certificates of passed candidates will be forwarded to the Inspector-General's office, and will then be treated as verification rolls.

The certificates of unsuccessful candidates will be returned if asked for within two months or destroyed at the end of that period.

4. The subjects of examination will be as follows:—

I.—Dictation, letter-drafting, precis-writing, and a short translation from Bengali, Uriya or Hindi into English. Europeans and Eurasians will be allowed to choose one out of these three languages to be examined in. No candidate failing to obtain half-marks in this paper will be considered qualified for appointment.

II.—Paper on general knowledge. The questions will be set so as to test the general information and intelligence of candidates.

III.—Mathematics, including arithmetic and algebra, and account-keeping.

IV.—Law, including the Penal Code, the Criminal Procedure Code, and the Evidence Act.

N.B.—Class (b) candidates will be exempted from passing in algebra.

5. The marks will be given on the following scale:—

1. Dictation and language	...	...	...	200
2. General knowledge	...	...	...	200
3. Mathematics	...	...	...	200
4. Law	...	...	...	200

6. The number of candidates to be selected by the Examiners for each Range will be notified in the *Calcutta Gazette* on or before the 21st November 1894. This number will be determined by the Inspector-General of Police with reference to the number of vacancies existing or estimated as likely to occur within the course of the following year.

7. After the results of the examination have been ascertained, a list will be prepared for each Division of the candidates selected for appointment during the year. Those who have not obtained half-marks in dictation and language, and one-third marks in the aggregate of the remaining papers may be struck out as ineligible for appointment. Of the remaining candidates a list will then be composed as follows—(a) one-half of the candidates who stand highest on the list in order of merit; (b) one-half of candidates selected from among those candidates who have obtained not less than one-third of the marks. At least two-thirds of the appointments will, if qualified candidates are available, be given to outsiders.

8. Natives of Bengal Proper will be eligible for appointments in all Bengal districts and in Manbhum; natives of Bihar in Bihar districts and in Hazaribagh and Lohardaga; and natives of Orissa in the Orissa Division and the district of Singhbhum. Selected candidates will be liable to be transferred to any district.

9. Selected candidates on appointment will undergo a two months' course of instruction at a centre to be selected by the Inspector-General. This course will include drill, elementary surveying, anthropometry, instruction in prosecuting cases in Magistrates' Courts. At the end of the two months all probationers obtaining a certificate of proficiency will be posted to districts and receive appointments in due course as 5th grade Sub-Inspectors. During the period of probation candidates will receive 20 rupees a month as salary. Candidates who fail to display due diligence during their period of probation will be liable to lose their appointment.

10. Candidates resident in any of the districts of the Patna, Bhagalpur, and Chota Nagpur Divisions, who take up Hindi at this examination, will be considered to be natives of Bihar. Candidates competing at Cuttack, who take up Uriya, will be considered natives of Orissa.

11. Information as to the hour and place of examination can be obtained 15 days before the examination by applying to the District Magistrates of the 24-Parganas, Dacca, Patna, and Cuttack.

## PUBLIC WORKS DEPARTMENT,—BENGAL.

*for Insp.-Genl. of Civil Hospitals, Bengal.*

## HIGH COURT NOTICE.

## HIGH COURT—Original Side.

## NOTIFICATION.

*Dated 21st September 1894.*

THE Hon'ble the Chief Justice of the High Court of Judicature at Fort William in Bengal has appointed Harold Edmund Petherick, Esquire, of 9, 10, 11, and 12, Melbourne Chambers, at 418, Chancery Lane, Melbourne, in the colony of Victoria, Barrister and Solicitor, a Commissioner within all parts in the colony of Victoria for the purpose of taking under the law in force in British India the acknowledgments of married women of deeds to be executed by them in respect of property in India.

By order,  
R. BELCHAMBERS, *Registrar.*

## NOTIFICATION.

THE additions detailed below are made by the High Court of Judicature at Fort William in Bengal to the "Rules of the High Court, Appellate Side," and are published for general information.

T. W. RICHARDSON, *Offg. Registrar.*

FORT WILLIAM, the September 1894.

At page 99, after the functions, etc., described in Rule 4 in *Part II* of section 11 of Chapter XVI, insert the following:—

To apply for copies of any paper from the record of any case and receive them after paying fees.

To identify persons before the Court Officers.

To communicate with the Court Officers for information regarding any case.

## NOTIFICATION.

*The 18th September 1894.*

THE following additional rules having been framed by the High Court of Judicature at Fort William in Bengal, under Act XVIII of 1879 (the Legal Practitioners Act) are published for general information.

By order of the High Court,  
T. LEWIS, *Asst. Registrar,*  
*For Offg. Registrar.*

*Rule No. , dated the September 1894.*

1. After the 3rd clause of Sub-rule (5) of Rule I at page 379, Chapter VII of the General Rules and Circular Orders (Civil), insert the following:—

4th.—Any person at present enrolled and practising as a Mukhtar in the High Court, Appellate Side, may practise, that is, act as a Mukhtar in the Civil Courts subordinate to the High Court, but not in the Criminal Courts, provided that his functions, powers and duties in such Courts shall be restricted to those enumerated in Rule 5A. at page 391 *infra*.

2. After Rule 5 at page 391, *ibid*, insert the following :—

5A. [Rules as to the functions, etc., of *Mukhtars of the High Court practising in Civil Courts subordinate to the High Court*, section 11, Act XVIII of 1879,—Rule No. of September, 1894.]

(1) The following are the functions, powers and duties of *Mukhtars of the High Court practising in Civil Courts subordinate to the High Court*, subject to the instructions of their client :—

To communicate with his client.

To instruct Advocates, Vakils, Pleaders, or Attorneys during the trial of the client's case.

To make such applications as can be made to an Officer of the Court, but not to the Court itself, provided that he shall not be entitled to apply to inspect records.

To pay money into, or deposit money in, Court, and, where specially empowered by his *mukhtarname*, to receive and give receipts for payment of money out of Court.

(Sections 160, 162, 257, 306, 307, 339, 376, 379 (and generally), 549 of the Code of Civil Procedure.)

To deposit security when required under section 549 of the Code of Civil Procedure.

To apply for copies of any paper from the record of any case and receive them after paying fees.

To identify persons before the Court Officers.

To communicate with the Court Officers for information regarding any case.

(2) The instructions contained in Rule 5, clause (3), page 390 *supra* shall also apply to *Mukhtars of the High Court practising in Civil Courts subordinate to the High Court*.

## EDUCATION DEPARTMENT, BENGAL.

### Subordinate Educational Service.

The 22nd September 1894.—Babu Kamal Krishna Sen, Second Master of the Jalpaiguri Zilla School (class VII), is appointed to be Second Master of the Rangpur Zilla School, with effect from the date on which he joins that appointment, *vice* Babu Prosanna Kumar Ghosh, promoted.

ERRATUM.—The 24th September 1894.—In the notification published at page 848, Part I, of the *Calcutta Gazette* of the 1st August 1894, declaring that Babu Narayan Lal, Departmental Sub-Inspector of Schools, Muzaffarpur (substantively *pro tempore* in class VII), continued to be substantive *pro tempore* in that class with effect from the 6th December 1893, *vice* Munshi Jamman Ram, seconded; for “continued” read “will continue.”

A. CROFT,  
Director of Public Instruction, Bengal.

### Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

1. On account of the Ramzan, the F. A. and B. A. examinations in 1895, instead of being held on the 25th February and following days, will be held on the days notified below :—

F. A. Examination—Will commence on the 19th February 1895, and will be held on the 20th, 21st, 25th and the 26th of that month.

B. A. Examination—Will commence on the 18th February 1895, and will be held on the 19th, 20th, 21st, 25th and the 26th of that month.

2. S. B. Mukerjee's Elementary Hydrostatics has been prescribed as a text-book in Mathematics for the B. A. examination in 1897 as in 1896.

W. GRIFFITHS, Registrar.

SENATE-HOUSE, the 25th September 1894.

## ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CAL- CUTTA UNIVERSITY.

1. The following changes in the University Regulations have been adopted by the Senate and approved by His Excellency the Governor General in Council:—

- (a) The word "Civil" wherever it occurs in the Regulations for Master in Civil Engineering (Calendar for 1894, page 83) has been omitted and "B. E." has been substituted for "B. C. E." in the same Regulations.

*This change comes into operation at once.*

- (b) The 2nd foot-note in page 31 of the University Calendar for 1894, specifying the extent of the work in Geometrical Conics for the F. A. examination, has been omitted.

*This change comes into operation at once.*

- (c) In the Regulations for the First Examination in Arts (page 33 of the University Calendar for 1894), the subject of Deductive Logic has been defined as in the following syllabus:—

### LOGIC—DEDUCTIVE LOGIC.

Definition of Logic. Relation of Logic to other Sciences. Logic, Formal and Material, Inductive and Deductive. Fundamental Principles of Deductive Logic.

Names and their Import. Terms and their various divisions. Denotation and Connotation of Terms. Opposition of Terms. Division and Definition.

Propositions, their import and their various Divisions. Opposition of Propositions. Distribution of Terms. Predicables.

Inference, Immediate and Mediate, Inductive and Deductive.

Different Forms of Immediate Inference. Syllogism, its Canons, its Rules, its Figures and Moods; Reduction; various kinds of Syllogism and their Rules. Trains of Reasoning. Fallacies.

*The above change in the Regulations will come into operation at the examination in 1897.*

- (d) In the Regulations for the B. A. examination (page 35 of the University Calendar for 1894) for—

II. Mental and Moral Science, i.e., Psychology, including the Psychology of Ethics and the History of Moral Systems.

II. In addition to the Pass Course, the History of Modern European Philosophy and either—

(a) Pure Logic,

or

(b) Natural Theology,

the following have been substituted:—

II. Mental and Moral Science, as defined below. II. In addition to the Pass Course, the History of Philosophy and Natural Theology, as defined below."

- (c) In the Regulations for the B. A. examination (page 36 of the University Calendar for 1894) under the heading "Definition of subjects", the following have been inserted:—

### \* MENTAL AND MORAL SCIENCE.

The Pass Subjects shall include—

- (a) *Psychology*—

Philosophy and Psychology. Scope and Method of Psychology. Relation of Psychology to Metaphysics and Physiology.

\* The questions in Mental and Moral Science will have no special reference to the writings of any one author or school of authors. In matters of opinion answers will be judged according to their accuracy of thought and expression. The Honour papers in the subjects of the Pass Course shall consist of more advanced questions than the Pass papers.

Mind, Consciousness, Self-consciousness. Analysis and Classification of Mental Processes and Products. Development of Mental Life. Laws of Mind.

*The changes in (d) and (e) will come into force at the examination in 1897.*

- (f) In the Regulations for the examination for the degree of M. A. (page 44 of the University Calendar for 1894), the following has been substituted for paragraph 7:—

"The examination in Mental and Moral Philosophy shall include Psychology, Logic, Ethics and Natural Theology as in the B. A. Honour examination, but more fully developed; together with Political Philosophy and the History of Indian and European Philosophy (both General and Special), the subjects in Political Philosophy and History of Philosophy (Special) to be selected from year to year."

*The above change will come into force at the examination in 1896.*

- (g) In the Regulations for the examination for the degree of Doctor in Medicine (page 63 of the Calendar for 1894), the following clause under paragraph 2 has been rescinded:—

"(a) Of having been admitted to the degree of Bachelor of Arts."

Also for the word 'can' which occurs in paragraph 2 of the Regulations the following words have been substituted :—

"shall produce a thesis approved by the President of the Faculty of Medicine for the time being on some subject connected with Medical Science and shall also "

*The changes in the Regulations for the M. D. degree will come into operation at the examination in 1895, but candidates who have already passed the B. A. examination will be exempted from submitting the thesis required under the new Regulations at the examinations in 1895 and 1896.*

2. The practical examination in Chemistry for the B. A. Honour examination in Physics and Chemistry will be held only in Calcutta. Candidates who take up the Honour Course in those subjects must present themselves for examination in Calcutta.

3. In supersession of the orders of the Syndicate, dated the 19th August, 1893 (Minute for 1893-94, page 162), the following text-book has been prescribed in Physics for the B. A. examination (Pass Course) in 1896 :—

*Deschanel*—Elementary Treatise on Natural Philosophy (12th edition, 1891) omitting Arts. 1—100, 102—105, 112—120, 131—275, 461—464, Chaps. 38 and 39 (excepting Arts. 518—524), Chap. 40, Arts. 760, 771—776, 833 A. B. C., 925, 934, 935, 974, 975, 990, 1064, 1066 C, 1071—1077, and Chap. 84 to the end.

4. In supersession of the orders of the Syndicate, dated the 25th July, 1894, the following text-book has been prescribed in Physics for the B. A. examination (Pass Course) in 1897 :—

*Deschanel*—Elementary Treatise on Natural Philosophy (13th edition, 1894), Part I, omitting Arts. 1—100, 102—105, 112—120, 131—275.  
Part II, omitting Arts. 186—189, 202—258, 261—279.  
Part III, omitting Arts. 132—147, 213—217, 228—234, 291—295, 324—354.  
Part IV, omitting Arts. 60, 69, 70, 119, 120, 130—132, 136, 145, 146, 191—211, 238—244, 275—295.

5. The following books have been prescribed as text-books in German for the F. A. examination in 1896 :—

*Schiller* . . . . . Wilhelm Tell.  
*Goethe* . . . . . Knabenjahre, edited by Wagner (Pitt Press Series)

6. The following alterations have been made in the list of text-books prescribed for the B. L. examination, 1895 :—

*Subject 2.*—For "Ameer Ali's Students' Manual of Mahomedan Law, Part II, Chapter III (Wills)," has been substituted "Ameer Ali's Students' Manual of Mahomedan Law, 2nd Edition, Part III, Chapter III (Wills)."

## NOTIFICATION.

*The 25th September 1894.*—In supersession of the rules made under the provisions of section 75 of the Sea Customs Act VIII of 1878, and published under notification of the 2nd March 1887, at page 149, Part I of the *Calcutta Gazette* of the 9th idem, the following rules are notified under the said section:—

The fee to be charged under Rule 6 has been sanctioned by the Lieutenant-Governor.

1. Baggage includes all packages imported by a passenger for his own use or that of his family, which are not part of the cargo and are not manifested.

Baggage is not exempt from duty except under the circumstances mentioned below.

2. Baggage is exempt from duty only when it consists of articles free from duty or of *bonâ fide* wearing apparel and other articles of personal use, the property of the person whose baggage is being passed, or of any members of his family such as are in actual use at time of importation, or have been actually in use previously. It is in the discretion of the proper officer of Customs to determine, subject to the above rules, whether any goods shall be treated as baggage exempt from duty, or as goods liable to duty.

3. In Calcutta baggage officers will examine on board only such free baggage, not contained in soldered or nailed-down cases, as the passenger offers for examination; all other baggage will be sent to the baggage shed at the jetties in the case of vessels lying at the jetties; at the close of the day on which the vessel arrives, baggage landed from her will be sent to the Custom House. In the case of other vessels, baggage will be sent direct to the Custom House if unexamined.

4. It is optional with the proper officer of Customs to allow the cases of persons about to proceed up-country immediately to be passed without being opened. This discretion will never be exercised except on personal application of the owner of the baggage, or his or her representative: a detailed statement of contents and value signed by the owner must always accompany the application.

5. The Preventive officer should report at once whenever he detains any dutiable articles in order that a peon may be deputed to convey them to the Custom House.

6. A landing fee of eight annas per package will be charged on goods sent into the Custom House.

7. Preventive officers will, as far as practicable, see baggage put over the ship's side immediately after examination.

8. Preventive officers posted to passenger vessels are directed to land with as little delay as possible all baggage intended for the Custom House or import shed.

9. Preventive officers are not authorised to pass passenger's baggage after it has been placed in the jetty shed.

10. Officers are authorised to pass from on board all firearms in reasonable quantities and other dutiable goods belonging to passengers from a British Indian port, upon signature of the following declaration, reporting the number and nature of the articles so passed:—

"I hereby declare that my baggage includes no firearms or other dutiable articles belonging to a passenger from a foreign port, that is, from a port other than a British Indian port."

Name \_\_\_\_\_

Address \_\_\_\_\_

The above order does not apply to ammunition, which Preventive officers are not authorised to pass.

11. They are further authorised to pass from on board ship, reporting having done so, (1) uniform and accoutrements belonging to a public servant for his personal use, (2) arms forming part of the equipment of an officer entitled to wear diplomatic, military or police uniform, &c., upon signature of the following declaration:—

"I hereby declare I am a \_\_\_\_\_ officer serving in India."

12. Passengers' baggage need not be detained owing to arms and ammunition or other dutiable articles being found in their boxes, unless they have in any way attempted to conceal them: in such cases the articles should not be passed.

13. Shipping bills are not required for the shipment of *bonâ fide* passengers' baggage.

14. Preventive officers should examine baggage brought for shipment to China, the Straits, Mauritius and Ceylon, and should report for orders any case in which they have good reasons to suppose that baggage for other ports contain dutiable or contraband articles.

15. Passengers are allowed to embark and disembark at Diamond Harbour.

(a) It will be the duty of the Preventive officer in charge of the station to see that neither opium nor ganja is taken on board of outward-bound vessels.

(b) Passengers landing at Diamond Harbour may be allowed to take their own baggage containing free articles only. Passengers desirous of leaving inward-bound vessels with the intention of embarking on board outward-bound ones will not be permitted to take with them any other than personal baggage, which must be examined in the usual way.

(c) No nailed-down packages, arms, ammunition, spirits or dutiable articles of any kind will be allowed to be transhipped. Any articles transhipped in defiance of this order will be seized and detained.

By order of the Board of Revenue, L.P.,

N. K. Bose, *Offg. Secretary.*

## CUSTOM HOUSE NOTICE.

THE Durga and Lakshmi Puja holidays this year are from the 4th to the 15th October inclusive.

On the 4th, 5th, 10th, 11th, 12th, and 13th October the Custom House will be open during the usual hours for transaction of all business.

The Treasury on these days will be open.

On the 6th, 8th, 9th, and 15th October the Custom House will be open (on a day's notice being given) free of charge from 11 A.M. to 12 noon for entering or clearing any vessel, and for the issue of bills-of-entry or shipping bills covering free goods from or to the same.

The Treasury on these days will be closed.

C. R. MARRIOTT,  
Collector of Customs.

PART I A.

## Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders, issued by the Government of India in the Finance and Commerce Department, are republished for general information.

H. J. S. COTTON,  
Chief Secy. to the Govt. of Bengal.

### FINANCE AND COMMERCE DEPARTMENT.

#### NOTIFICATIONS.

##### ACCOUNTS AND FINANCE.

##### PUBLIC DEBT.

No. 4770.

*Simla, the 20th September, 1894.*

[In the following Notification "Notes" means "Promissory Notes of the Government of India," and includes "Stock Certificates" issued in lieu thereof:]

1. Notice is hereby given that all the Notes of the following Four per cent. Loans, namely:

Four per cent. Loan of 1st May 1865, so far as not notified for discharge in Notification No. 4092, dated 13th August,  
Reduced Four per cent. Loan of 1879,

will be discharged at the General Treasury of Fort William (Public Debt Office, Bank of Bengal, Calcutta) on December 31st, 1894, on which date the interest on such Notes will cease.

2. Proprietors of Notes hereby advertised for discharge have the option, which must be exercised before noon of Wednesday, October 3rd, 1894, of tendering their Notes for reduction of interest from 4 per cent. to  $3\frac{1}{2}$  per cent.; such reduction to have effect from July 1st, 1894.

3. The reduced loans thus constituted will be known as the  $3\frac{1}{2}$  per cent. Loans of 1st May 1865 and of 1879 respectively, and no part of them will be paid off or discharged before August 1st, 1904, nor until the expiration of three months after notice of payment to be given by the Governor General of India in Council in the *Government Gazette*.

4. Notes may be tendered for reduction of interest at the Public Debt Office, Bank of Bengal, Calcutta, or at any other Bank (including the Bank of England) or

Treasury to which they are for the time being enfaced for payment of interest. Notes so tendered must bear the following endorsement duly signed :

“ This Note (or Stock Certificate) is tendered for reduction of interest in terms of Notification of September 20th, 1894.”

5. (a) On Notes of the Four per cent. Loan of 1st May 1865 so tendered, interest for the half-year ending 31st October 1894 will be paid at once as follows :

	R	a.	p.
For two months at 4 per cent. . . . .	0	10	8
For four months at 3½ per cent. . . . .	1	2	8
TOTAL PER R100	1	13	4

And the next half-yearly payment of interest will be due on 1st May 1895.

- (b) On Notes of the reduced Four per cent. Loan of 1879 so tendered, no payment in adjustment of interest will be made, and no demand will be made for refund of the excess four pie being the interest at ½ per cent. for the period from July 1st to July 15th, 1894, included in the half-yearly payment due on 16th July 1894, but the next half-yearly payment of interest, namely, R1-12-0 per R100, will be due on January 16th, 1895.

6. Every Note so tendered will be enfaced in the following terms before it is returned to the proprietor :

“ The interest payable on this Note is reduced to 3½ per cent., and the principal amount will not be discharged before August 1st, 1904.”

7. All future payments of interest on any Note so enfaced will be made on the usual half-yearly dates as if the Note bore interest at 3½ per cent. instead of 4 per cent.

8. When a Note so enfaced comes in ordinary course under renewal, it will be renewed in its original form, save that—

(1) For “ four per cent.” will be substituted “ three-and-a-half per cent.”

(2) A clause will be added at the end—“ The Governor General in Council hereby engages that this Note shall not be discharged before August 1st, 1904.”

9. If by reason of the duly certified absence from India of the proprietor or of one of the proprietors of a Note included in the terms of this Notification a legal signature to the endorsement mentioned in clause 4 cannot be given by noon of Wednesday, October 3rd, 1894, then in such case the tender will be accepted if the Note be left before such time in the custody of the Public Debt Office, Bank, or Treasury (as the case may be), and the tender be legally signed within twenty-one days thereafter. This clause does not apply if the proprietor has an Attorney in India empowered to sell.

10. A payment of two annas per R100 will be made as brokerage or commission to the receipt of the person, whether proprietor or agent, who tenders the Note for reduction of interest.

11. The Secretary of State will issue a notification in London stating the terms on which Notes hereby advertised for discharge will be received for reduction of interest by the Bank of England.

## No. 4771.

*Simla, the 20th September, 1894.*

Notice is hereby given that all the Notes of the following Four per cent. Loans, namely :

Four per cent. Sicca Rupee Loan of 1832-33 ; outstanding balance about R16 lakhs,  
Four per cent. Loan of 1835-36 ; outstanding balance about R55 lakhs,

will be discharged at the General Treasury of Fort William (Public Debt Office, Bank of Bengal, Calcutta) on December 31st, 1894, on which date the interest on such Notes will cease.

2. Proprietors of Notes hereby advertised for discharge have the option, which must be exercised before noon of Wednesday, October 3rd, 1894, of tendering their Notes for transfer to the  $3\frac{1}{2}$  per cent. Loan of 1st May 1865 on the following terms :

(1) In the case of Notes of the 4 per cent. Sicca Rupee Loan of 1832-33, the excess over an even hundred of rupees will be paid in cash, and the new Note will be issued for the balance only. The payment in adjustment of interest and future payments of interest will be made as provided in clause 5 (a) of Notification No. 4770 of this date.

(2) In the case of Notes of the Four per cent. Loan of 1835-36 interest will be paid at once as follows :

	R	a.	p.
From March 31st, 1894, till June 30th, 1894, at 4 per cent.	1	0	2
From July 1st, 1894, till October 31st, 1894, at $3\frac{1}{2}$ per cent.	1	2	8
TOTAL PER R100	2	2	10

And the next half-yearly payment of interest will be due on May 1st, 1895. (If the interest instalment due on September 30th has been paid before tender, then only the excess of 2 annas 10 pies will be paid.)

3. Notes may be tendered for transfer at the Public Debt Office, Bank of Bengal, Calcutta, or at any other Bank (including the Bank of England) or Treasury to which they are for the time being enfaced for payment of interest. Notes so tendered must bear the following endorsement duly signed :

“Received the amount of this Note by transfer to the  $3\frac{1}{2}$  per cent. Loan of 1st May 1865 under Notification of September 20th, 1894.”

4. If by reason of the duly certified absence from India of the proprietor or of one of the proprietors of a Note included in the terms of this notification a legal signature to the endorsement mentioned in clause 3 cannot be given by noon of Wednesday, October 3rd, 1894, then in such case the tender will be accepted if the Note be left before such time in the custody of the Public Debt Office, Bank, or Treasury (as the case may be), and the tender be legally signed within twenty-one days thereafter. This clause does not apply if the proprietor has an Attorney in India empowered to sell.

5. In addition to the above payment of interest, a further payment of two annas per R100 will be made as brokerage or commission to the receipt of the person, whether proprietor or agent, who tenders the Note for transfer.

6. The Secretary of State will issue a notification in London stating the terms on which Notes hereby advertised for discharge will be received for transfer by the Bank of England.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

## NOTIFICATION.

No. 3870M.—*The 20th September 1894.*—It is hereby notified for general information that, in exercise of the powers vested in the Local Government by section 9 of the Bengal Municipal Act, III of 1894, as amended by Bengal Act IV of 1894, and in accordance with the recommendation of the Commissioners of the Raghunathpur Municipality, in the district of Manbhn, made at a meeting, the Lieutenant-Governor intends to revise the existing boundaries of the Municipality so as to exclude the village of Nandnara from those limits, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

2. The boundaries of the Municipality, after the exclusion of the said village, will be as follow :—

*On the North.*—The river Utlā.

*On the East.*—Bhutuhar Jore up to the Bankura road.

*On the South.*—The Bankura road from the Bhutuhar Jore to the junction of this road with the Barrakar road.

*On the West.*—A line drawn from the junction of the Barrakar and Bankura roads to Gaighata Jore, and continuing along the jore until the northern boundary is reached.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

No. 3881L.S.-G.—*The 21st September 1894.*—It is hereby notified for general information that, under rule 32 of the rules framed under section 138 (a) of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to fix Monday, the 26th November 1894, as the date for holding an election under section 19 of the Act in thana Harirampur, in the district of Dacca, for the purpose of filling the vacancy in the representation of that thana on the Local Board of Manikganj, caused by the death of Babu Madan Mohan Mitra.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

No. 3883M.—*The 21st September 1894.*—It is hereby notified for general information that, in exercise of the power conferred on the Local Government by section 221 of the Bengal Municipal Act, III of 1884, and on the recommendation of the Commissioners of the Baranagore Municipality, in the district of the 24-Parganas, made at a meeting, the Lieutenant-Governor intends to extend to that Municipality the provisions of Part X of the said Act as amended by Act IV of 1894, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

**Advertisement of sale.**

NOTICE is hereby given that the undermentioned plots of canal surplus land no longer required by Government, in the district of Shahabad, will be put to sale at 11 o'clock on the 30th October 1894.

The purchasers of the several plots of land will be subject to the following conditions:—

1. If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
2. If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited; if the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
3. The plots of land will be sold revenue free to the highest bidders.
4. The purchasers will have to respect the right of the raiyats and collect rent from them in accordance with the rent-roll prepared and filed with the record of the case.
5. The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale—

C. A. OLDHAM, Collector.

Shahabad Collectorate, Arrah, the 12th September 1894.

## Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned revenue-free property situated in the district of Puri, pargana Kotdes, mauza Pratapsasun, will be put up to sale at the Puri Collectorate on the 2nd October 1894, corresponding with 18th Asin 1302, Tuesday.

The purchasers will be subject to the following conditions of sale:—

## Conditions of sale.

1st.—The property to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchaser of this property will be considered as the proprietor of the property, and the entire proprietary right of Government in such property will be transferred to him.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government) and the property to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number in statement of Government estate.	Number on the district register B of revenue-free properties.	Name of property and pargana.	Approximate area in acres.	Government revenue assessed.	REMARKS.
1	2	3	4	5	6
	32145 General.	Ratnakar Khand in mauza Pratapsasun, pargana Kotdes, district Puri.	18 poles	.....	Declared an escheat under orders of Government No. 1408 L.R., dated 14th March 1894, the proprietor, Anand Chandra Das having died intestate. The property forms a part (viz., 2 gds. 13 b.) of the entire property, 12 g. 5 b. 5 g. 1 k., entered in the name of Maguni Das in register B.

PURI, the 21st June 1894.

M. M. Roy, Deputy Collector in charge.

NOTICE is hereby given, under section 6, Act XI of 1859, that the undermentioned estates or shares of estates in the district of Hooghly, will be put up to public and unreserved sale at the Collector's office of that district on the 26th day of September 1894, for arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue due.

When in columns 5, 7 and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share and the other share or shares in the estate are excluded from the sale:—

Midnapore Collectorate, the 17th August 1894.

D. B. ALLEN, Collector.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates or shares of estates in the district of Patna will be put up for sale at the Collector's Office of that district on the 23rd October 1894 (Tuesday) for arrears of revenue and other demands, which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue.

When in columns 5, 7, and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and that the other share or shares in the estate are excluded from the sale:—

Patna Collector's Office, the 12th September 1894.

GOPI KRISHNA LALL, for Collector.

NOTICE is hereby given, under section 6, Act XI of 1859, that the undermentioned estates in the district of Shahabad will be put up to public and unreserved sale at the Collector's Office of that district on the 26th day of September 1894 at 12 A.M., for the arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue due on the 7th day of June 1894.

When in columns 5, 7, and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are exempted from the sale:—

## The Commissioners for the Port of Calcutta.

## NOTIFICATION.

THE following rates and conditions framed by The Commissioners for the Port of Calcutta, under section 105, Act III (B.C.) of 1890, and approved by the Local Government in letter No. 2078 Marine, dated 18th September 1894, for shipping jute from the Kidderpore Docks and from the Jetties, is published for general information under the provisions of section 107, Act III (B.C.) of 1890:—

(1) The shipping rate to be 2 annas a bale of 400 lbs., whether brought direct to the Jetties or Docks by railway or cart, or delivered into the Commissioners' wagons at any of the stations on their Tramway.

(2) The same rate of 2 annas a bale will be charged for cargo put into boats or flats at the Docks for shipment in the stream.

(3) An extra rate of  $\frac{1}{2}$  anna a bale for removal from one shed to another or from the Docks for shipment at the Jetties.

(4) The shipping rate of 2 annas a bale will be charged for goods brought into the Docks by boats or flats, stored in the sheds and re-shipped in a vessel lying alongside the dock quay.

(5) Boats and flats will be allowed to go alongside and discharge free of charge into a vessel lying in the Docks.

(6) Shippers will be allowed 14 days' shed accommodation at the Docks rent-free, counting from midnight of the date of arrival in shed until shipped. After the 14 days, the goods will be liable to shed-rent at the rate of 8 annas a ton a month.

(7) To any shipper guaranteeing shipments of his own at the Docks during the season up to 28th February of a minimum of 75,000 bales (not including any shipment made under rule 5), a shed will be assigned for his special use, for which no rent will be charged, but the shipper must take full responsibility of the goods after they have been tallied and stored in the sheds allotted to him by the Commissioners, who will then supply labour only for shipping, the shipper tallying into the ship or steamer and obtaining Mate's receipt.

(8) To such shippers, if the minimum quantity of 75,000 bales is reached, a rebate of  $\frac{1}{2}$  anna per bale will be refunded on all jute shipped by them through the Docks within the season ending 28th February 1895.

## Oudh Forest Department.

## BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

**FROM** this date the prices of sāl beams and scantlings supplied from this depot will be as follows:—

**BEAMS**—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

**SCANTLINGS**—From 12 to 20 feet, at Rs. 2-8 per c. ft.

Under 12 and over 7 " 2-4 "

Under 7 feet " "

The above prices are for ordinary building purpose.

For *Planking Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still taken orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

*Second and Third Class Timber* will be sold and price fixed by agreement.

*Auction Sales* will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N.-W.P. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1886.

## Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGAL GOVERNMENT  
CINCHONA PLANTATION.

The price of this quinine is as follows:—

1 pound tin Rs. 16. or, post free, Rs. 16-12.

$\frac{1}{2}$  " " " 8. " " " 8-8.

$\frac{1}{4}$  " " " 4. " " " 4-8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

## Cinchona Febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, Rs. 2, *ans.* 8; per eight-ounce tin, Rs. 5; per pound tin, Rs. 10. The general public can be supplied by the Superintendent, Botanic Garden, for *Cash only* at the undernoted rates—per four-ounce tin, Rs. 3; per eight-ounce tin, Rs. 6; per pound tin, Rs. 12. This medicine is also sold by the principal European and native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

## Notice.

### Notice.

**NOTICE** is hereby given that six graves in the Bankura Cemetery, bearing the undermentioned inscriptions, are in a ruinous condition and need immediate attention. If no communication is received from any friend or relation of the deceased undertaking to restore them, the Magistrate of the district will take the necessary measures to level them with the ground as laid down in rule XIX of the rules and regulations relating to cemeteries:—

No.	Description of monument.
1	2
1	Sacred to the memory of Lieutenant James Awdry, 65th Regiment, B. N. I., Assistant to the Political Agent at Raughur, died 31st May 1846, aged 31. Erected by his brother officers and other friends by whom he was sincerely beloved and who deeply lament his untimely fate.
2	Sacred to the memory of the late Lieutenant-Colonel A. Shuldham, Commanding 31st Regiment, N. I., who departed this life on the 23rd day of February 1835, aged 46 years. Erected by the officers of his regiment as a mark of their respect and esteem.
3	Sacred to the memory of Ensign W. F. Alexander, 50th Regiment, N. I., who departed this life on the 25th day of March 1833. This monument is erected by the officers of his Regiment as a mark of the regard and esteem in which he was held by them, and in whom the regiment has lost a young officer of the brightest promise.
4	Here are interred the remains of Lieutenant James Henry Beck of the 24th Regiment, N. I., who departed this life at Bankura on 29th March 1833, aged 23 years. This monument is erected by his brother officers as an unaffected tribute to departed worth and in testimony of sincere regard.
5	To the memory of Captain Stephen Mercer of the 35th Regiment, N. I., who departed this life on the 20th November 1827, aged 37 years.
6	Sacred to the memory of Ann, the beloved wife of George Earl, Esq., born 9th January 1800, died 6th December 1833.

ROBERT CORNISH, Magistrate.

Bankura Magistracy, the 18th September 1894.

MOTTER LALL MOOKREJER, *Accountant, for*  
*Esq. Engr., Nadia Rivers Division.*  
 Berhampore, the 24th September 1894.

Catalogue of Books Printed at Thomason College Press, and procurable from Thomason College Book Depot.

*Application to be made to Curator. Cash must accompany order. Articles will be sent by Value-payable Post to persons in Government employment only. It is advised that letters containing remittances be registered.*

*N.B.*—The Revised Prices herein entered cover the cost of packing, postage and other incidental charges (except commission for value payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments, drawing materials, &c., are not available at the College Book Depot, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee.

## ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous plates.

First two volumes are published in separate convenient-sized Sections, as below, but can be bound up in Volumes if required.

## VOLUME I.\*

SER.	Rs. A.
I.—Building Materials (in the Press).	
II.—Masonry (1891) ...	1 8
III.—Carpentry (1889) ...	1 8
IV.—Earthwork ...	1 8
V.—Tools and Plant (never published).	

## VOLUME II.\*

VI.—Buildings (1891) ...	1 8
VII.—Bridges (in the Press).	
VIII.—Roads (1888) ...	2 0
IX.—Railways (1891) ...	1 8
X.—Irrigation Works (1873) ...	2 0

## ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I.—Direct and Transverse Strain, principally by Analytical Methods (in the Press).

„ II.—The Stability of Structures, mostly by Graphic Methods (in the Press).

## MANUALS.

VII.—Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table	3 8
XIII.—Drawing (by Lieut. R. Pulford, R.E.)†	8 0
XIIIA.—Drawing, First Principles of Geometrical (by Lieut. R. Pulford, R.E.), (4th edition) ...	1 4
XIV.—Simple Applied Mechanics, Parts I and II (in the Press).	
XV.—Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition) ...	3 12
XVI.—Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. ...	1 0
XVII.—Specimens of Printing used in the College Drawing Course and Entrance Examinations ...	0 8

*Note.*—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

#### PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

##### SECOND SERIES.

Quarterly Numbers of Vols. II, VIII, and IX of the Series are available at Rs. 3-8 each, and Vol. XI at Rs. 2.

Cloth covers for Volumes at Re. 1 each.

##### THIRD SERIES.

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15 at Rs. 2-8 each.

Index to Professional Papers, 1st and 2nd Series, annas 8.

#### FERROTTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomson College Book Depot. Application to be made to the Curator.

Apparatus for printing can be made up at the Koorkee Workshops, and all particulars obtained from the Superintendent.

#### CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

J. CLIBBORN, MAJOR, I.S.C.,

Principal, Thomson College.

### The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	.....	2 0 0
" part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied of subscribers when required in place of copies lost in transit:—

For town. For mofussil.

	Rs. A. P.	Rs. A. P.
For the Calcutta Series, per copy	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series, per copy	0 5 3	0 5 9
" the Calcutta Series. For the year 7 2 6	8 6 3	
" each of the Madras, Bombay and Allahabad Series. For the year 4 4 6	4 11 3	

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	Rs. 20	Rs. 14	Rs. 9
" three issues	55	36	24
" six "	100	68	45
" nine "	145	96	64
" twelve "	180	120	80

SEVERAL volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS Parts I and II, are available at the following rates:—

Without postage. With postage.

	Rs. A. P.	Rs. A. P.
Bengal Law Reports for one year	20 0 0	22 8 0
Single copies, Rs. 2 per copy.		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

#### Notice.

The 29th March 1886.—The subscription to, and postage for the Calcutta Gazette will henceforth be at the following rates, payable in advance:—

For the Mofussil.

	Per annum.		Per annum.
	Rs. A. P.		Rs. A. P.
Entire Gazette ...	15 0 0	Par* III, IV, V,	
Postage ...	5 0 0	and VI ...	5 0 0
Supplement ...	6 0 0	Postage ...	2 8 0
Postage ...	3 0 0		
Part I or II ...	5 0 0	For a single copy—	
Postage ...	2 8 0		
Part IA ...	2 0 0	Entire Gazette ...	0 8 0
P. stage ...	1 12 0	Postage ...	0 2 0
Par IB ...	3 0 0	Supplement ...	0 4 0
Postage ...	2 0 0	Postage ...	0 1 0

Parts I A, IB, II, III, IV, V, and VI as also important rules and extracts, 1 anna for 4 sheets or under, with an additional charge of 1 anna for every 4 sheets in excess of 4.

Postage one anna.

For Calcutta.

The same rates as those for the Mofussil, with the exception of the charge for postage.

\*Containing the Acts and Bills of the Legislative Council of India and Bengal.

NOTE.—Rate for advertisements in the Calcutta Gazette:—

Full page, per issue	Rs. 20
Half "	10

Casual advertisements, 4 annas per line.

The List of Books available for sale at the Secretariat Press will in future be published once only in each month. Spare copies of the List will, however, be kept in stock ready for issue on receipt of applications for them.

SUPPLEMENT TO  
The Calcutta Gazette.

WEDNESDAY, SEPTEMBER 26, 1894.

OFFICIAL PAPERS.

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on payment of Six Rupees per annum if delivered in Calcutta, or Twelve Rupees if sent by Post.*

**RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT  
OF THE CHOTA NAGPUR DIVISION FOR THE YEAR 1893-94.**

GENERAL DEPARTMENT—MISCELLANEOUS.

*Darjeeling, the 25th September 1894.*

RESOLUTION—No. 106T.G.

READ—

The Annual General Administration Report of the Chota Nagpur Division for the year 1893-94.

The Report submitted by Mr. Grimley is of a more moderate length than those of some other Commissioners, and is pleasantly written, especially his narrative of his own tour and of the matters which then came under his attention. But it does not present many points requiring special notice, or contain many suggestions for administrative reform.

2. The District Officers of the five districts were practically unchanged during the year, with the exception of short intervals of leave. The Lieutenant-Governor has read with pleasure Mr. Grimley's evidence as to the excellent services rendered by Lieutenant Colonel A. E. Gordon and Mr. W. R. Bright in charge of their districts.

3. The Lieutenant-Governor has perused with interest the account given in paragraphs 24 and 133 of the Report of the collections of *chanda* or forced subscriptions in Lohardaga for the purpose of establishing the claim of the Munda and Oraon cultivators, that, as their ancestors cleared the jungle and were anterior to the zamindars, they are not bound to pay rent to any one except the Government. He agrees with the Commissioner that Colonel Gordon deserves credit for his successful effort in stamping out this fraudulent practice and mischievous theory from the district.

4. The Lieutenant-Governor wishes the special attention of the District Officer to be called to the extreme backwardness in collecting the chankidari tax in the Palaman district, and the irregularity with which the chankidars were paid. When inspecting the Division in 1892, His Honour pointed out that it was the duty of the Inspector-General and Deputy Inspectors-General of Police to look into this matter.

5. In comparison with the previous year, there was an increase of 488 cases in the number of criminal cases disposed of by Stipendiary Magistrates. The Lieutenant-Governor is glad to observe that the witnesses were disposed of more promptly than in the last year, the percentage of detention over two days being 5 against 6. There was a slight increase in the number of A cases remanded six times and over. The results of Sessions work in the Division were almost the same as in the previous year. The total number of such cases disposed of was 53 against 55, and the number in which conviction was obtained was 34 against 37. Mention has already been made of these unsatisfactory figures in the Resolution on the Police Report, and the cause has been attributed to the great delay in holding the Sessions, which gives time for the witnesses to be bought over or to forget the facts. Although a large number of Sessions cases was tried by the Deputy Commissioners under the special power vested in them under section 20 of the Code of Criminal Procedure, the effect is not apparent in diminishing the number of cases. The attendance of Honorary Magistrates was fairly good in all the districts of the Division, especially in Palaman, where the attendance was very satisfactory.

6. The progress of land acquisition work in connection with the Jharia extension of the East Indian Railway, which is given in paragraph 71 of the report, is not clearly stated. It would have been more useful if the Commissioner had shown what rate of compensation has been awarded per mile as compared with the original estimate, how that rate was composed, how much was paid to proprietors, tenants, &c., and on what basis it was calculated. It

should also have been stated how long the Deputy Collector has been engaged on this work, what portion of the work has been finished, and what remains to be done. This is a class of work which requires close inspection, but it is too much left without supervision.

7. With regard to improvements in Wards' estates, the Lieutenant-Governor has noticed those made in the Dhanwar estate in the Hazaribagh district; but he regrets that the Commissioner did not say more on the subject. The tabular statement for the Wards' and Attached estates shows that a sum of over Rs. 31,000 was spent on improvements, which is a fairly large amount. The largest sum, Rs. 23,581, was spent in the Jharia estate in Manbhum; but of this expenditure no particulars are given in the report. The progress made in the payment of debts in encumbered estates was satisfactory.

8. The Lieutenant-Governor has noticed with approval the statement in paragraphs 92 and 121, that improvements have been made in the water-supply of the Hazaribagh and Lohardaga districts, but regrets that very little has been said on the subject.

9. The statement appended to paragraph 99 of the Report shows that there was a satisfactory increase both in the number of primary schools in the Division and in the number of pupils attending those schools; and the Lieutenant-Governor is glad to find that the municipal grants to these institutions have increased, and that further aid from this source is expected. His Honour desires to draw attention to the account that is given of the interest that is taken by the boys in physical exercises and the benefit arising wherever their English superiors share in their games, and do not think their duties are confined to attendance in the class-room.

10. Mr. Grimley has made some useful remarks in his 123rd paragraph regarding the difficulty in finding Muhammadans sufficiently educated for appointments in the superior service, and their backwardness in taking advantage of the facilities offered to them by the award of scholarships, and by readiness to give appointments to those of them who may be found eligible.

11. The account of the Chota Nagpur Mounted Volunteer Rifle Corps, given in paragraph 140 of the Report, has been read with much interest, and His Honour is satisfied with the progress it has made in the short space of three years.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Government of Bengal.*

ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR  
DIVISION FOR 1893-94.

No. 288J., dated Ranchi, the 29th June 1894.

From—W. H. GRIMLEY, Esq., Commissioner of the Chota Nagpur Division,  
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following report on the general administration of the Chota Nagpur Division during the year 1893-94.

2. The reports of the district officers were received in my office on the dates mentioned below—

Hazaribagh	...	...	29th May 1894.
Lohardaga	...	...	4th June "
Palamau	...	...	2nd " "
Manbhum	...	...	2nd " "
Singhbhum	...	...	29th May "

I.—CHARGE.

3. I was in charge of the Division throughout the year.

(a) Division. The districts were in charge of the officers mentioned below:—

Hazaribagh	...	Colonel C. H. Garbett, throughout the year.
Lohardaga	...	Lieutenant-Colonel A. Evans Gordon, from the 1st to the 7th April 1893, and again from the 27th May 1893 to the end of the year. During the interval Mr. C. H. Bompas, c.s., officiated as Deputy Commissioner.
Palamau	...	Mr. W. R. Bright, c.s., from the 1st April to the 1st May 1893, and again from the 31st July 1893 to the end of the year. During the interval Mr. E. G. Drake-Brockman, c.s., officiated as Deputy Commissioner.
Manbhum	...	Mr. C. A. S. Bedford, from the beginning of the year to the 21st March 1894, and Mr. J. Windsor, c.s., during the remainder of the year.
Singhbhum	...	Mr. R. H. Renny, from the beginning of the year to the 29th March 1894. Mr. C. A. S. Bedford on the 30th and 31st March 1894.

(c) Subdivisions.

Giridih	...	Mr. W. H. Rattray, Deputy Magistrate and Deputy Collector, throughout the year, with the exception of the last two days of March 1894, when Babu Upendra Chandra Mukerjee, Deputy Magistrate and Deputy Collector, was in charge.
Gobindpur	...	Babu Mohendra Nath Mukherjee, Deputy Magistrate and Deputy Collector, from the beginning of the year to the 10th June 1893. Mr. N. Warde-Jones, Deputy Magistrate and Deputy Collector, during the remainder of the year.

II.—TOURS AND INSPECTIONS OF OFFICES.

4. I made a prolonged tour, which began on the 28th October and ended on March 5th. I first visited Purulia; and

(a) Commissioner's tour. after inspecting the public offices and courts, the jail, dispensary, Municipality, cooly-depôts, the progress of work in the construction of the Madhab Bandh, left with the Deputy Commissioner (Mr. Bedford) for Gobindpur on the 6th November. The Jharia Railway extension was not open to the public, but by the courtesy of the District Engineer we were enabled to travel by the line to the rail-head within six miles of Gobindpur, thus shortening the journey by several days. The railway runs through the heart of the coal district, as yet unopened out, though there has been much activity in connection with mining leases, the registration records showing as many as twenty-five transfers in the course of the year; but these do not represent all the transactions, many documents having been registered at head-quarters. The leases are perpetual, and subject to the payment of

a bonus and a rental, without any provision in any case for the payment of a royalty. The brisk demand for mining lands is said to have caused persons to part with titles which they did not possess, to have led to forged titles being prepared, and to have been accompanied by a temporary influx into the district of a number of Europeans, who came in search of concessions from Calcutta firms or syndicates. Troublesome disputes arose in consequence, and the appointment of a European officer to the charge of the subdivision was a very wise measure, and should certainly be continued for the present. The cutcherry buildings do not provide sufficient accommodation, the Magistrate being required to hold his court in the same room in which his clerks sit, and their busy hum must have a disturbing influence. The fortuitous presence of Mr. Clöete, the Superintending Engineer at Gobindpur, during my visit enabled me to explain to him the cutcherry requirements, namely, the addition of two rooms by lengthening the building at the north end—a proposal which, I was glad to find, Mr. Clöete thought feasible. The result of the court inspection was distinctly favourable to Mr. Norman Warde-Jones, whose records of evidence and judgments are remarkably clear and concise.

5. From Gobindpur we went to Barrakar, where we halted for the night, and drove thence across the river to Raghunathpur, which we reached on the 12th November. Here I inspected the thana, the dispensary, and Municipality, and in a general way the magisterial work of the Munsif, leaving the more detailed inspection to be done by the Deputy Commissioner. Thence we travelled across country in a part of the district on the south-eastern border, which I had not seen before, till we came to Manbazar, halting by the way at Santuri, Gourangdih, and Hura, where there are police-stations or outposts, and at other villages, where the Deputy Commissioner had some local enquiries to conduct. Here I accommodated my movements to those of the Deputy Commissioner, who, not having so much ground to cover, travels more leisurely than the Commissioner is accustomed to, and this was perhaps wise, as I had not fully shaken off the fever from which I had for some time suffered before starting on tour. Beyond the police-stations and outposts and one or two excise shops, there were not many local matters to engage my attention, the country being jungly and sparsely populated, but I was fully employed on my own office work. At Manbazar I inspected the police-station, the tahsil office, and a rest-house for coolies, while on the return to Purulia, which I reached on the 26th November, I inspected a cooly-depôt on the south side of the railway, where I was surprised to find men collected not only from Chota Nagpur districts, but also from the Central Provinces, Burdwan, Bankura, and the Sonthal Parganas. It appears that Purulia is fast taking the place of Raniganj as a centre for carrying on the recruiting business. On the 28th I left for Ranchi, which I reached on the following day.

6. On the 8th December I set out for Palamanu, and accomplished the distance, 103 miles, riding and driving, in 48 hours—a good record, considering there were two heavy ghâts to descend, and that for the last half of the road all the culverts and bridges had been washed away by the rains. My first halt was at Chandwa, where I found the police outpost in a very bad state of repair. Though money had been provided, measures had not been taken to see that it was properly spent. The pay of the chaukidars was in arrear from three to nine months, but at Latchar, where I next stopped, things were worse. There seemed to be an entire absence of supervision in respect of the collections, and the payments to the chaukidars were shown to be greatly in arrear, until, as I discovered on reaching Daltonganj, the matter was taken up by Mr. Bright, who, with his accustomed energy, had bestirred himself and pushed forward the collections, and secured payments to the chaukidars of a large amount of the dues. I went to the Police office with Mr. Bright, and decided what forms should be introduced for chaukidari collections and payments in order to place the matter on a better footing. Before reaching Latchar I was met by Rai Thakurai Bhagobad Dyal Sing Bahadur of Chainpur, who lives about two miles from Daltonganj. He is Chairman of the Road Cess Committee, Honorary Magistrate, and a most excellent gentleman and a good landlord, and had come a long journey from home to show his loyalty.

7. I visited the jail, which is now finished and a very fine building—too large, however, for the requirements of the place. One of the wards was improperly being used for the storage of cereals. The land around the jail, which has been acquired, is far too large for the jail requirements, even if it were possible to bring it into cultivation, but there is a large portion of it which is absolutely sterile, and some of this high land might, without any inconvenience, be given up to the town, which is getting cramped for want of building sites. The Assistant Surgeon, Babu Kunja Lal Sanyal, appeared to take a keen interest in the management of the jail and also of the dispensary, which I next visited.

8. The thana inspection disclosed a remarkably low incidence of crime, and this is true for the whole district. A sad thing happened. The Sub-Inspector in charge of the thana, a fine, healthy-looking man, though suffering from fever, had insisted on being present at the inspection, but the moment I saw his state he was made to return to his quarters. A few days later the report of his death reached me.

9. The Forest Ranger, Gurudas Chatterjee, came to see me, and produced his maps showing the situation of the reserve. There are two foresters under him and 16 guards, and 188 square miles of forest. He was about to start for Barasand, some twenty miles away, to make roads, for which Rs. 2,000 had been sanctioned, to clear the boundary lines and the interior fire lines. This necessitates the removal of the jungle within a space of ten feet from the boundary. The Forest Ranger seemed to be an intelligent man. I warned him not to allow the people to use saplings for fences and to girdle trees for resin.

Mr. Bright, I recollect, mentioned at the time that he was doubtful if the forest roads were really required, and I observe from a recent diary of his that he has lately passed over the new road from Garu to Barasand, and considers that money has been misspent on it. He writes:—"The road from Garu to Barasand is mere waste of money, as it has been carried up and down hill regardless of the gradients, which are sometimes extraordinarily steep, more like the side of a house, and absolutely impassable for anything but pack-bullocks, for which it was not required. I have already recommended to the Conservator of Forests to stop this road-making for the present. The country is a difficult one to run a road over, and wants a skilled man to lay the line out properly."

10. I had a talk with the Munsif about the effect of the order directing the trial of Small Cause Court suits above Rs. 100 in value at Ranchi, and he was of opinion that it caused great inconvenience and loss, as the people, rather than undertake the journey, forego a portion of their claim, or make an adjustment out of Court at a great sacrifice. I addressed the Judicial Commissioner on the subject, and the arrangement has since been modified. I made the usual inspection of the Courts and offices, and set out on the 15th on a short tour with Mr. Bright. He afterwards accompanied me with his family to spend Christmas at Ranchi, which we reached on the 23rd of December. Before he left a Conference was held, at which Colonel Gordon, the Deputy Commissioner of Lohardaga, and Mr. Schurr, the District Superintendent of Police, were present. When the chaukidari forms, which had been prepared in Daltonganj, were considered and approved.

11. On the 31st December I started for Hazaribagh, halting on the way at Ormanjhi, Ramgarh, and Mandoo. From the 3rd January to the 7th I was occupied in the usual inspection work, including visits to the Jail, the Reformatory, Dispensary, and Mr. Lotteri's dépôt, while Colonel Garbett drove me round the town, the streets and drains of which, as usual, were a model of cleanliness. The jail is now largely populated, and full use is made of the accommodation which remained empty for so long a time. The orders of the Inspector-General about cultivating the jail lands had been partially carried out, but there is a good deal of high land which will not be very productive. The boundary had not been quite closed up. There were still some gaps, large enough to admit cattle, and these I ordered to be closed. Surgeon-Captain Nott is the Jail Superintendent, and, notwithstanding one or two irregularities, which I felt bound to notice, is deserving of praise for his earnest and excellent management. Mr. Hill of the Reformatory continues to manage this institution with his characteristic zeal and energy. My visit to the Dispensary

was very timely, for the Civil Hospital Assistant in charge, Syed Wahed Ali, had that morning received orders of transfer. This had been done without the Deputy Commissioner and Municipal Commissioners being consulted, and naturally caused inconvenience; and in the present instance there was some reason why the Civil Hospital Assistant should have been warned beforehand, as he had taken root in Hazaribagh, where he had been for eight years and made himself very useful to the people and the authorities. However, I undertook to make a representation to the Inspector-General of Civil Hospitals, who was kind enough to cancel the order of transfer.

12. Leaving Hazaribagh on the 8th, I reached Giridih on the 12th, halting on the way at Tatijharia, Bagodar, Dumri, and Pirtand. At Dumri I found Mr. Patch, the District Superintendent of Police, who was making his last tour preparatory to retirement, and also met Dr. Nott, who was returning to Hazaribagh from a vaccination round. At Pirtand, which is near the Parasnath Hill, I received a visit from the Raja of Palganj, who owns lands in the neighbourhood. The Subdivisional Officer, Mr. Rattray, also came in, and we drove together to Giridih, where I found the local zamindars present, including Raja Sarada Narain Singh, the newly-created Raja of Serampore, whose estate is near Giridih and whose liberal contributions to the Rattray Dispensary are known to Government; Tikait Toral Narain Singh of Gawan, whose property lies some 42 miles to the north-west, and Tikait Jang Bahadur of Jamtara in the Sonthal Parganas, part of whose property is in pargana Khargadiha in the Hazaribagh district. I discussed local matters with these gentlemen connected with the management of their property. Besides inspecting the lock-up, the Treasury, I examined the subdivisional courts and offices in every department, and found the work to be conducted in a highly satisfactory manner. The Rattray Dispensary, which I visited, has fully justified its existence, for, notwithstanding the dispensaries belonging to the collieries, the number of patients treated has been very large. The building is most excellent, and there is a good stock of medicines and appliances. I visited the Scotch Mission at Pachamba, and was shown over the church and schools by Dr. Dyer. I also inspected the office of the Manager of the Dhanwar estate at Pachamba. The new Manager, Mr. E. B. Clair Smith, is learning his work, and at the time of my visit had only visited a portion of the estate. The accounts and records appeared to be in fair order.

13. From Giridih I went to Calcutta, and remained there from the 15th to the 26th, while a portion of my camp was being conveyed to Suadi in Gangpur. While in Calcutta, besides carrying on my own work, which was daily forwarded from Ranchi, various important matters came up for discussion with His Honour the Lieutenant-Governor, the Secretaries to Government, and the Board of Revenue, and on the 26th I attended a Conference at the Board with reference to the Bill to extend the Bengal Tenancy Act to Chota Nagpur. On the 27th I returned to Purulia, and after picking up my servants there went to Raghunathpali, and afterwards to Suadi in the Native State of Gangpur, and my proceedings there will be chronicled in the report on the Political States. On the 4th February I proceeded to Chaibassa, and was occupied there until the 10th in inspecting the courts and offices, visiting the Jail, Dispensary, and police lines. The line buildings were in very good order, and capable of accommodating 80 men. Mr. Walker, the District Superintendent, put the men through their drill. They were smart in their movements, and seemed to be well practised in the old form of drill, but require to be exercised in the new drill. The butts are being altered and the range extended, and will, it is hoped, prove serviceable for the Chaibassa portion of the Mounted Rifle Volunteers under my command. I managed to secure three recruits at Chaibassa, and throughout my tour I enlisted a trooper or two where I could, but Europeans are very scarce in Chota Nagpur, and live at great distances from head-quarters, so that it is rather uphill work keeping the corps together. The Raja Bahadur of Seraikela and the Thakur of Kharsawan came in with several of their dependants and relatives, and a good deal of my time was taken up in settling matters connected with their states.

14. Leaving Chaibassa on the 10th, I reached Ranchi on the 15th, and after halting a day set out for Jushpur. It was necessary to make unusually long marches, in order to get back in time to prepare the volunteers for the yearly

inspection by the General Officer Commanding the Presidency district, which, I had been warned, would take place on the 15th March. Until we reached the confines of the Jushpur State there was not much to notice, except the roughness of the road, with its abrupt ascents and descents and bridgeless rivers. This retarded our progress, and heavy rain, which fell on two days, did not improve matters. At Lohardaga I made some special enquiries among ganja-smokers and at Ghagra, the next halting-place, wrote my replies to the questions of the Ganja Commission. At Toto, where there is a police-station, Jairam Tewari, a local landholder, came forward with a grievance. He had been directed, he said, by the District Superintendent of Police to provide land for a new thana building, but was unwilling to do so, the site fixed upon being the spot where he had begun the foundations of a house for himself four years ago. I looked into the matter, visited the spot, and decided that there was nothing to prevent his proceeding with the building, as there were other sites available for the thana. The Deputy Commissioner had selected a mango grove to the north-west of the present station-house, but this will not do, as it is the camping ground of the district officer and the Commissioner. At Gumla I found the Bara Lal awaiting me. He had come in from Palkot, some fifteen miles away, to pay his respects. He is extremely anxious for his estate to be again taken under the protection of Act VI, the fact being that his creditors are now pressing him for payment of debts contracted while the estate was formerly under management. He mentioned that the country about Palkot—mostly jungly, with a good deal of trap-rock—was infested by tigers that were killing men, horses, and cattle, having been driven in from the south in consequence of the jungle having been taken for the railway by timber contractors of Gangpur and Singhbhum. The Reverend Dr. Nottrott and the Reverend W. Hahn, members of the German Mission, who were making a pastoral visitation in the district, came to see me, but the interview was abruptly interrupted by a heavy downpour of rain, which quickly soaked through the *shamianah* and threatened to bring it down on our heads, when a retreat was made into the tents until the storm cleared off.

15. On approaching Raidih, Father Cardon of the Roman Catholic Mission passed us. His work is carried on in a distant part of the district, and he rarely comes to Ranchi. Later in the day he paid me a visit. He was formerly stationed at Chachwani, north of Chainpur, but is now near Bassia at Nawatoli, the place I would select for the site of subdivisional head-quarters, should it ever be decided to have the much-needed subdivision in the southern part of the Lohardaga district. He remarked that the police were having it all their own way in Biru, and that the Magistrate's, the Deputy Commissioner's, and Commissioner's authority was not felt there owing to the long distance from Ranchi, and, curiously enough, a similar remark had been made to me the day before by the Reverend Mr. Hahn of the German Mission. He also gave me information regarding the progress of a long-standing land dispute in the neighbourhood of his former mission abode, between a well-known Marwari of Ranchi and the ilaquadar. On my way back, a week later, Mr. Echart, of the German Mission, came in just as I was sitting down to dinner. He was travelling back with a fellow-missionary from Biru to his own head-quarters at Chainpur. He complained of having been stopped by a large body of Biru men armed with bows, arrows, swords, and battle-axes, who refused to let him proceed to Kochedega, and made him pay them Rs. 7-8 and his companion Re. 1-8—all they had with them. He was on his way to enquire into certain complaints of maltreatment made by his catechist. As Mr. Echart spoke English imperfectly, I caused his complaint to be taken down in Hindi, and forwarded to the Kochedega Sub-Inspector for enquiry and report to the Deputy Commissioner. The result was the conviction of two of the accused persons for rioting. The trial, which has only just been finished—more than three and-a-half months after the occurrence—necessitated two visits to Ranchi by the parties and their witnesses—a distance of over one hundred miles, and exemplifies the need there is of a Magistrate's Court for Biru nearer than Ranchi.

16. Debi Sahoo of Armai paid me a visit, and I was able to do him a slight service and save him the trouble of a long journey of 84 miles to Ranchi, where

he had been summoned to undergo examination before the Deputy Commissioner regarding a servant of his who had been detained by the Allahabad police on suspicion. Debi Sahoo had been travelling up-country; and just before leaving Allahabad had sent his servant, who is nothing but a simple villager of the Ahir caste, to make some purchases. Unfortunately he fell into the hands of the police, and having some twenty rupees about him was detained on suspicion, while his master, ignorant of what had befallen him, had to make his journey alone. I explained all this to the Magistrate of Allahabad to his satisfaction, and took upon myself to tell Debi Sahoo that he might for this once disregard the summons to Ranchi. Eventually the servant was released. This Debi Sahoo long ago expressed his willingness to contribute towards the construction of roads in his neighbourhood, and offered then and there to give Rs. 2,000 for a road from Biru outpost to Gumla, a distance of 30 miles, passing through Bharno, Sisai, Bhararia, and Bharsa. I communicated this excellent offer to the Deputy Commissioner, and left the matter in his hands.

17. At Ghagra Bhupal Ram Deogharia, the zamindar of Samjana, came to press the question of his being brought under Act VI of 1876, and two of his younger sons accompanied him for the manifest object of gaining my sympathy in the cause. His estate is, I fear, too small, but he pleads the antiquity of his family, which he says was induced some 500 years ago to leave Bhojpur and settle in Chota Nagpur at the request of the Maharaja, who had no Brahmin at hand to attend to the Puja services. He has four sons and five daughters, and it would certainly be a hardship for them to be deprived of their property. I have since looked into the matter, and recommended the estate being brought under protection. At Lohardaga I received a deputation, headed by the Revd. Mr. Hahn, the Chairman of the Municipality, and various local questions of administration were considered and discussed. The chief object of this visit was to obtain my consent to the removal of the market from its position near the police-station, and to get me to rescind an order directing the Municipal Commissioners to remove their office from the Dispensary. On the first point there was nothing to prevent my agreeing to their request, as the present site of the market exposed the shopkeepers to unnecessary interference on the part of the police; but the second matter was not so simple, as the Commissioners are very loth to comply with the order, and in fact wish to displace the Dispensary entirely, offering to locate it in the old school-house, but, I regret to say, I could not accept this as a reasonable settlement of the matter. I visited the proposed building along with Mr. Hahn, and found it to be in a very dilapidated condition, and situated in the middle of the bazar, with a stagnant pool of water behind—a most unsuitable spot for sick persons. It would be a very poor exchange for the present Dispensary building, which is not only in good repair, but is healthily situated. The Municipal Commissioners are mostly mukhtars, and wish to retain it as their office, because of its proximity to the cutcherry, where they practise. All I could agree to was to allow them a reasonable time to find suitable quarters for their office.

18. From Lohardaga I hastened back to Ranchi, being warned by the increasing heat that it was time to bring my tour to a close, and arriving there by the 5th March, at once set about preparing the Mounted Volunteers for the General's visit of inspection and the Rifle Meeting to follow.

19. My inspection of the various courts and offices was not confined to a mere examination of the prescribed registers, but I looked into the records of cases as well as the correspondence, and noticed in what manner the business was carried on. The inspection of the criminal records was directed to ascertain whether cases were disposed of with sufficient promptitude, intelligence, and care; and those cases specially came under notice in which there had been repeated adjournments, in order to see whether they had been granted on reasonable grounds, for nothing tends more to break down a case than unnecessary postponements and the prolonged detention of witnesses. There had been a marked improvement in the procedure of the Courts in these respects, and officers are found to sit to late hours in the evening, rather than subject witnesses to inconvenience by an extra day's detention. Sometimes the order-sheets were

found not to be written by the presiding officer himself, and I took occasion to point out how important it is that they should be so written, inasmuch as the personal record serves to direct his attention to the reasons for adjournment, and in this way acts as a check on irregular remands. I enquired into the working of the Bench, and the most irregular attendants were requested to be punctual. The cases I examined appeared to have been carefully tried by the Bench Magistrates, and there can be no doubt that they render valuable assistance to Government in the dispensing of justice. The case of Mr. Maseyk in Purulia is a special example of this, for he is exceedingly laborious and conscientious in the discharge of his duties. On the revenue side of the Deputy Commissioners' offices, I examined all the registers, ascertained whether they are punctually and neatly kept, and pointed out any error or mistaken practice that came to light. I also examined the record-room and library, found but little requiring notice, except a large number of old and useless reports required to be weeded out, so as to set free space on the book-shelves for newer and more important publications. The attendance of certain Magistrates in their Courts is not as punctual as it might be, and I pointed out the necessity of some improvement in this respect, for unless the presiding officers attend punctually, the clerks fall into lazy habits and work suffers. In examining rent-suit cases, the necessity for promptly disposing of them and avoiding frequent adjournments was pressed on the district officers and their subordinates.

20. The result of my inspection of the excise offices was on the whole satisfactory. In Manbhum I had occasion to take the inspecting staff to task for inferior work, and the Deputy Collector in charge for faulty supervision. The inspectors were allowed to go about when and where they pleased without giving the Deputy Collector beforehand any idea of their movements, while the information contained in their diaries was meagre and insufficient to enable the controlling officer to form a correct estimate of their work. They had failed in detecting offences where the police had succeeded. I inspected the distillery at Giridih, and found everything in good order. The Wards' and Encumbered Estates Departments also came under observation, attention being directed to the collections and the payment of the debts in accordance with the scheme. It was necessary to insist on the Managers moving about constantly in the estates under their charges. The Encumbered Estates Tahsil offices at Gobindpur and Manbazar came under inspection.

21. All the district and subdivisional treasuries were inspected. I examined the treasury accounts and books, and satisfied myself that the rules regarding the custody of treasure, currency notes, and opium were duly observed. I visited every jail and enquired into matters connected with the safe custody, health, and general supervision of the prisoners. I made an outdoor inspection of the Municipalities at Hazaribagh, Palamau, Purulia and Chaibassa, examined the account-books, &c., commented on the state of collections, and pointed out delay in issuing warrants on defaulters. The state of the roads and conservancy arrangements were generally satisfactory, especially in Hazaribagh, which is the best kept town in the Division. In Chaibassa the latrine which I visited was in a filthy condition, and no proper system, it appeared, was followed in arranging the trenches. Holes are dug anywhere, and are filled up as occasion requires, instead of trenches being prepared beforehand of the regulation depth. The matter was at once taken by the Vice-Chairman, Dr. Manook, and a better system put into force.

22. With the exception of Lohardaga, where the tour of the Deputy Commissioner fell short of the prescribed period by thirteen days, the number of days spent in camp by all the district officers was either equal to or in excess of the periods fixed for their respective districts. As in the previous year, the longest tour was made by Mr. Bright in Palamau, who spent 131 days in camp. The tours of the Deputy Commissioners of Hazaribagh, Manbhum, and Singlibhum covered 120, 115, and 99 days respectively. Of the Subdivisional Officers, Mr. N. Warde-Jones made an unusually long tour of 182 days in Gobindpur, while in Giridih the tour of

(b) Tours of district officers.

Mr. Rattray fell short of the prescribed period by five days. In the case of Colonel Gordon the serious illness of one of his children and the necessity for coming in for the inspection of the Chota Nagpur Mounted Volunteer Rifles, of which he is second officer in command, in March, are the causes which prevented his passing the prescribed number of days in camp. As he came in for the volunteer inspection under my orders, I must take the responsibility for the abridgment of his tour on this account. The disputes which arose in connection with coal-exploiting in the Gobindpur subdivision compelled Mr. Warde-Jones to spend in camp a much longer period than is ordinarily necessary in a subdivision; while the sudden illness of Mr. Rattray prevented him from spending the full period of 90 days in the interior of his subdivision.

23. In Hazaribagh Colonel Garbett's tour was spread over portions of six months of the year. In August he spent 12 days in visiting Bagodar, Dumri, and Giridih, and in inspecting the Subdivisional Office and other public institutions at Giridih and the Dhanwar Manager's office at Pachamba. Between the 1st and 19th November he visited the jurisdictions of Barhi, Chowparan, Itkhori Kanha-Chatti, Gidhour, and Katkamsundi, and inspected the thanas and outposts at those places, the charitable dispensary at Barhi, and the registers and accounts of the tahsildars of the Bursore, Chowparan, and Persowan encumbered estates. From the 24th November to the 22nd December he visited the jurisdictions of Burkagaon, Tandwa, Simaria, Chatra, Jori, and Hunterganj, and inspected the thanas and outposts and the accounts of the chaukidari tahsildars of those places. From the 9th January to the 18th February 1894 he visited the Doranda, Chakmango, Digghi, and Karharbari encumbered estates, and the Dhanwar Court of Wards' estate, and examined the registers and accounts of the tahsildars of those estates. In the course of this trip Colonel Garbett paid a second visit to Giridih, and made his second half-yearly inspection of the Subdivisional Office and other public institutions at Giridih and the Dhanwar Manager's office at Pachamba. His last trip commenced on the 21st of February, and ended on the 12th of March. In the course of this journey he visited Mandu, Jaggeswar, Ramgar, Gola, and Kasmar, and inspected the thanas and outposts at those places, besides many ghatwali road-posts along his route. Colonel Garbett visited the greater portion of his district, and travelled over and inspected 841½ miles of the district roads and noted their defects and requirements; visited and inspected 26 police-stations and outposts, a large number of ghatwali outposts, 21 pounds, 60 primary and other schools, and 75 outstills. He visited the Government villages in Kodarma, Kharagdiha, and Kurgali, the Dhanwar ward's estate, and seven out of ten encumbered estates in his district. In all these estates he inspected a large number of bandhs, or irrigation reservoirs, either newly constructed or under construction, inspected the accounts of the tahsildars, and compared numerous receipts given to the raiyats with the counterfoils, and pushed on the collection of arrears. At Chatra he inspected the office of the Munsif-Magistrate, the Registration office, the Municipality, and the Ganja Gola and the school. Throughout his tour he took care to test the operations of the vaccinators, and caused a large number of operations to be performed in his presence, and made enquiries regarding the income-tax and chaukidari assessments, outturn of crops, health and material condition of the people, and the conduct of the police and zamindars. His tour was well arranged, and his diaries were full and interesting. He spent altogether 120 days in camp.

24. In Lohardaga Colonel Gordon spent two days in May in taking over charge of the moveable property of the minor, Thakur Devendra Nath Sahi of Jeria. On the 16th July he proceeded to the Lalganj encumbered estate to enquire into a dispute regarding a tract of the Paika forest belonging to the estate. In October he spent two days and in November one day in inspecting the police-station at Silli and the outpost at Jonha. Between the 9th and 14th November he visited Khunti and Murhu. On the 20th November he again proceeded to Khunti, and made a short trip through Dorma, Tapkara, Pairaonahag, Jeria, and Karra. The chief object of this tour was to superintend the preparation of the jammabandies of the Jeria Court of Wards' estate by the Manager of the estate. The jammabandies of several villages were prepared at

the dictation of the raiyats, and were read out to each of them, and when admitted were initialled by him. In nearly every one of the villages that were settled there had been long-standing disputes regarding rates of rent, and the raiyats either used to pay no rents at all or to deposit merely nominal rents into the Treasury. All these disputes were amicably settled, and the raiyats made to admit the rents previously paid by them. Between the 8th and 22nd December Colonel Gordon visited Karra, Jeria, Kamdera, Torunda, Urikel, Uyar, Kunjla, Rotadih, Tumar, Bundu, and Timara. In this tour he was chiefly engaged in making enquiries into the collections of *chanda*, or forced subscriptions, and in trying *chanda* cases. For years past certain persons of the Munda race, calling themselves 'sardars,' have been extorting money from the cultivators under the name of '*chanda*.' The ostensible object of the collection, as understood by the common people, was the recovery of the "Munda raj," but the better informed described it as made in order to carry on litigation in the High Court, which was to obtain for the Christian Kols rights which had been wrested from them by the ticcadars, though this is of course pure fiction, as there are no suits before the High Court. Colonel Gordon made it his business in the quarters where the *chanda* agitation was most rife to disillusionize the misguided people, and to punish with the utmost severity those of the sardars who were proved to have committed acts of extortion and terrorism. The result of this prosecution of the sardars has been very successful, and it is now believed by the Deputy Commissioner that the practice of *chanda* collection has been stamped out of his district, at any rate for the present. Colonel Gordon certainly deserves credit for his efforts in this respect. From the 4th January to the 13th March Colonel Gordon passed through Rantu, Mandar, Opa, Kuru, Lohardaga, Gamharia, Toto, Armai, Palkote, Bassia, Doisa, Sassai, Bharno, Khunti, Murhu, Tilma, Bundu, Rahe, Silli, Jonha, Getalsud, and Mahilon. At Lohardaga he inspected the Munsifi, the Registration office, the Municipality, thana, and opium and ganja shops. During all his tours Colonel Gordon inspected police-stations and outposts, excise-shops and schools, and made enquiries regarding income-tax assessments, state of the crops, condition of the roads, and the relations between landlords and tenants. He spent altogether 107 days in camp, and made a very useful tour.

25. In Palamau Mr. Bright's tour was spread over portions of nine months of the year. He spent four days in April in inspecting the outpost and school at Hariharganj, in interviewing some zamindars, and in making some income-tax enquiries. In September he made a short tour of ten days through Lesliganj, Manatu, Nowa, and Patan. In October he spent 14 days in visiting Rajhera, the Punjri Kallan ward's estate, Nowa bazar, Chhatarpur, and Hariharganj. In the last-named place he inspected the Gorakshini, the bazar and schools. On the 29th of the same month he visited Manatu for the purpose of inspecting the new diversion, and after halting at Lesliganj returned to head-quarters on the 1st November. On the 12th he started on his regular cold-weather tour, visited Gurhwa, and thence proceeded along the new road to Manka. Here he made a local enquiry in a criminal case, and inspected the bazar. He then proceeded to Majhiwan, and thence to a hamlet of Domes, who had been reported against by the police. Here he contented himself with making arrangements for their effective supervision, and left for Haidarnagar, and went thence to Husainabad, where he looked over the new sub-registry office which had just been started, inspected the police-station and school, opium, ganja and outstill shops, held chaukidari parades, and tested the correctness of the entries in the land registration registers. He also made a local enquiry and settled a number of complaints by chaukidars, and arranged with two local zamindars for the restoration of the jagirs which had been attached by them on the introduction of Act V (B.C.) of 1887. Here he noticed that some 24 rupees worth of Government quinine had been sold from the local post-office. From Husainabad Mr. Bright marched along the bank of the Sone to Pansa, and thence to Sonapura, Hariharpur, Kudawan, Kotar, and Bhounathpur, and thence proceeded across the hills to Rumma, and then returned to Daltonganj *via* Meral in order to be present there during the inspection of his office by me. After the inspections were over he accompanied me to Ranchi,

visiting in the way all outstills, thanas, and outposts that lay on his route. At Ranchi he was present at a Conference held in connection with the ghatwali and chaukidari assessments, and went into the chaukidari accounts of the district with the District Superintendent of Police, with a view to the introduction of a regular system of account registers and books.

Leaving Ranchi, Mr. Bright passed into pargana Tori and visited Balumath, Harhanj, and Dwarka, and then proceeded to the valley of the Amanat. At Panki he met Mr. Berkeley of the Palamau survey, and thence was occupied in partalling the survey and khanapuri at various villages which lay within access of his camp, and finally returned to head-quarters to meet Colonel Sandeman. He accompanied Colonel Sandeman to Lesliganj, inspecting khanapuri at three villages, and then returned to head-quarters on the 28th of January. After a few days' stay at head-quarters, he again started on a tour to the south, "which was pleasantly diversified by some excellent tiger-shooting," inspecting *en route* the thana, outstill, and the middle English school at Ranka, which was just started through the exertions of Thakurai Gobind Prosad Singh. He then marched towards the south-western parts of his district, but was obliged to return to head-quarters in order to correct the figures of the crime report, and after a day's halt at Daltonganj, again returned to camp and marched along the southern parts of his district to Bhandaria and Ker, and finally returned to head-quarters on the 7th March. The principal subjects which received the attention of Mr. Bright during his cold-weather tour were the improvement of land registration, the inspection of thanas and outposts, inspection of schools and pathsalas, inspection of outstills and other excise shops, inspection of roads, local enquiries into various matters, enquiries regarding chaukidari assessments and jagirs, supervision of survey and khanapuri of the Palamau Government estate, checking the chaukidari accounts with the receipts held by the raiyats, checking the receipts held by raiyats and ticcadars with the accounts of the Wards' and Encumbered Estates Departments, enquiries regarding income-tax assessments, and the interviewing of most of the leading native gentlemen of the district. Mr. Bright visited all parts of his district, and altogether made an excellent tour.

26. In Manbhum Mr. Bedford's tour was spread over all the months of the year from June to February inclusive, excepting September. In June he spent three days in inspecting, with the District Engineer of the Bengal-Nagpur Railway, the level-crossings between Purulia and Jharsagra. In July he spent nine days in the Gobindpur subdivision; and inspected the Subdivisional office and other public institutions at Gobindpur. In August he spent three days at Barrakar in making certain local enquiries, and ten days in making a short tour to Jhalda, where he inspected the Municipality, the Rural Sub-Registrar's office, the Bench Magistrates' Court, the charitable dispensary, the school, and the cooly-depôts. In October he paid a short visit to the south of his district, and made enquiries regarding the state of the crops. His regular cold-weather tour commenced from the 6th of November. In his first trip he visited with me the Gobindpur subdivision and the parganas of Chowrasi, Bonchas, Barpara, Bankhandi, Ladhorka, Bagda, Manbazar, and Racab, or, in other words, the whole of the east and south-east of his district. At Raghunathpur he inspected the Munsifi, the Municipality, and other public institutions of the place, and was glad to find that there were no complaints either from the Municipal Commissioners or the rate-payers. From Raghunathpur he marched *viâ* Biru to Santuri, the last outpost of the Manbhum district on the Raniganj side; and thence proceeded across country to Gourangdih. At Manbazar he inspected the police thana and the office of the tahsildar of the Manbazar encumbered estate. In his next trip he visited the south and south-west of the district, comprising the parganas of Barabhum, Patkum, Bagmundi, Hensla, Torang, Jhalda, Begoonkudar, and Kassaipur. At Barrabazar he inspected the Munsifi, the Sub-Registrar's office, the thana, and the charitable dispensary. From Barrabazar he drove to Chandil *viâ* Bulrampur and Adardih, and there found the cooly-depôts and rest-houses empty, as the year was not at all favourable for cooly-recruiting, owing to the excellence of the crops. From Chandil to Ichagurh the march was very rough, the road being in very bad order, and in some parts impassable. A considerable portion of it was through dense jungles and very sparsely-populated country. From Ichagurh to Bagmundi there is practically

no road, but a cross-country track. The Bagmundi thana is situated at the foot of a hill and near the mouth of a gorge. It is the unhealthiest thana in the district, and is said to serve the purpose of a "penal settlement." The removal of the thana from its present site is under contemplation. The raiyats of Bagmundi were very badly off in 1892-93 owing to the failure of crops, and many of them were in consequence allowed small sums as loans from Government. They appeared before Mr. Bedford in a body and expressed their gratitude for the pecuniary assistance rendered, without which they would not have been able to tide over their difficulties. At Kalamati he saw the Manki, whose estate had been released from management under Act VI of 1876 (the Encumbered Estates Act) only about two years ago, but who is becoming again involved in debt. At Jhalda Mr. Bedford discussed several important questions with the Chairman of the Municipality, and inspected the books and accounts of the tahsildar of the Begoonkudar ward's estate.

On the 3rd January 1894 Mr. Bedford again left Purulia and spent five days in inspecting the level-crossings of the Bengal-Nagpur Railway to Jharsogra. In his next trip he proceeded towards the north of his district, comprising parganas Para, Khaspail, Jharia, Nagarkhari, Tundi, Pandra, and Dumurkunda. At Para he inspected the police outpost, and noticed a slight increase of crime, due probably to scarcity. At Jharia he inspected the dispensary, thana, and excise shops, and received several visits from the zamindar who had lately attained his majority. The coal-fields belonging to the zamindar had not yet been settled, and merchants and companies from different quarters had come in, and negotiations had been in progress for the acquisition of mineral rights. Some persons had already started mining operations in villages held under mukarrari or brahmottar titles from the former zamindars. At Gobindpur Mr. Bedford inspected the subdivisional office in all its branches and the other public institutions of the place. At Tundi he saw the zamindar and his son, and tried to bring about a reconciliation between the two. The house which had been built for the zamindar some time ago was found to have partially fallen down. At Pandra he met the Manager of the Wards' and Encumbered estates, and found that the settlement operations in the Pandra  $\frac{1}{2}$  encumbered estate were going on very badly, for the recusant raiyats refused to come to terms. He inspected the accounts and books of the tahsildar of the Pandra  $\frac{1}{2}$  encumbered estate, and found that the collections were not satisfactory. He visited the dispensary and school at Pandra, and found them both in good condition. He was particularly struck with the gentlemanly behaviour of the boys of the school, whose natural modesty and general absence of self-sufficiency appeared to him particularly pleasing. The maintenance of the dispensary, school, and hostel, where the school-boys are fed and lodged, reflects great credit on the liberality of Babu Madhu Sudan Singh, who has succeeded to the estate of the late Maharani Hingun Kumari of Pandra. Mr. Bedford held a Conference at which Babus Madhu Sudan Singh and Sibnarain Singh and Babu Ramdayal Mozoomdar, Pleader on behalf of the former, and Babu Paresh Nath Ghosh, Manager of Wards' and Encumbered estates, on behalf of the latter, were also present. The object of this Conference was to bring about an amicable settlement of the civil suit instituted by Babu Madhu Sudan Singh for Debsheba lands. It was pointed out to the Babus that a prolongation of the litigation would mean financial ruin to one or the other, if not both. Mr. Bedford returned to Purulia on the 31st January *via* Nirsha and Chirkunda, where the police-station and outpost and the schools and pathsalas were all inspected by him. On the 6th February he again left head-quarters and proceeded to Beliapur, where he tried a case of forgery and then proceeded to Cheliamia, and there inspected the office of the Honorary Magistrate and the school. In his last trip, which commenced on the 16th of February and lasted till the 24th idem, he visited the parganas of Khaspail, Joytora, and Joypur. During his tour, which extended to all parts of the district, Mr. Bedford inspected police-stations and outposts, excise shops and schools, most of the district roads, and made enquiries regarding the condition of the people, the state of the crops, public feeling, income-tax and chaukidari assessments.

27. In Singhbhum Mr. Renny spent one day in June and two days in August at Chakradharpur on inspection work. In September he spent four

days in going to Purulia to consult the Judicial Commissioner of Chota Nagpur regarding civil work. On the 2nd November he started for his regular cold-weather tour, and did not return to Chaibassa until the 15th December. During this long trip, which was one of 44 days, he visited the Seraikela Political State and pargana Dhalbhum. In Seraikela he tried a number of rent-suits brought by the Raja against the under-tenure-holders of Kochangpir, which is said to have resulted in bringing about a settlement of the long-standing dispute which had existed between the Chief and his tenants. He also inspected the roads and schools, and the office of the Raja. In Dhalbhum Mr. Renny inspected police-stations and outposts, ghatwali road-posts, roads, schools, offices of the Dhalbhum tahsildars, as well as the accounts of the tahsildars employed under the Chota Nagpur Rural Police Act, started the Forest Settlement Officer of Dhalbhum on his work, assisted the Manager of the Dhalbhum encumbered estate in his collection work, and inspected the works at Rajdoha and Rukka of the Rajdoha Copper Mining Company, Limited, made enquiries concerning postal arrangements, and arranged for starting some new post-offices. His second trip, which was one of 48 days, commenced on the 20th December 1893, and lasted till the 5th February 1894. In the course of this trip Mr. Renny visited Bonai under special orders, for the purpose of enquiring into some charges of a serious nature brought against the Raja, and on his way back enquired into a boundary dispute between Saranda in Singhbhum and the Gangpur Tributary State, inspected schools, roads, and police-stations, and made enquiries into the material condition of the people, working of the Excise and Opium, Income-tax and Forest Acts, inspected the Government reserved and protected forests and the forests in the Bandgaon Pir, visited and made enquiries into the gold-mining operations at Somij in Anandpur Pir in pargana Porahat. In the course of his tour Mr. Renny did a large amount of useful work.

28. In the Giridih subdivision Mr. Rattray spent seven days in September in visiting Moheshmunda, Tilodih, and some other large villages in Gadi Serampur. In October he spent eight days in pargana Kharagdiha and two days in visiting Barrakar and Kulwaldih. On the 7th November he inspected the Dumri thana, and between the 8th and 30th of the same month he toured through the Palganj estate, and through Gandey, Deopur, Serampur, and other villages. In December he spent 22 days in visiting the northern portion of his subdivision, and in February he made an extensive tour towards Kodarma.

In the course of his tour Mr. Rattray visited three out of six police-stations, and six out of eight outposts in his subdivision. He also visited a large number of villages, making enquiries regarding the material condition of the people and the character and action of zamindars. Mr. Rattray's time was also largely occupied in making enquiries into income-tax objections and in inspecting roads, excise shops and schools, and in visiting a large number of Government villages in Khoorchoota and Duma.

29. In Gobindpur Mr. N. Warde-Jones was out 14 days in June, 22 days in July, 21 days in August, 11 days in September, and 15 days in October, and 99 days in the camping season. During the early part of his tour he was engaged in dealing with breaches of the peace in certain places in his subdivision, tracing forgeries, enquiring into complaints against the Tikait of Tundi, and inspecting crops. He visited all places of importance within his jurisdiction, and was compelled to spend a much longer period in camp than is usual in a subdivision, in consequence of the disputes which arose in connection with coal-mining transactions.

Inspection of district offices and treasuries—

(a) By Commissioner.

30. All the district offices and treasuries were inspected by me once during the past year.

31. All the district offices and treasuries were twice inspected by the Deputy Commissioners, chiefly in September and March only. In the September inspection, through

(b) By Deputy Commissioners.

oversight, Mr. Bright omitted to inspect the few registers in the Wards' Department of the general office.

Inspection of subdivisional offices and treasuries—

(c) By Commissioner.

32. The Gobindpur subdivisional office and sub-treasury were inspected by me in November 1893, and the Giridih subdivisional office and sub-

treasury in January 1894.

The Gobindpur subdivisional office and sub-treasury were twice inspected  
(b) By Deputy Commissioners. by the Deputy Commissioner of Manbhum, viz., in July and January.

33. The Giridih subdivisional office and sub-treasury were inspected twice by the Deputy Commissioner of Hazaribagh, viz., once in August and again in February. The results of all these inspections were satisfactory.

### III.—WEATHER AND CROPS.

34. The year was characterized by excessive rainfall all over the Division. The rains set in regularly in May, and lasted till October. As a consequence of this, the temperature was on an average much cooler than in the preceding year. In Hazaribagh the highest maximum temperature in the shade was 102° on the 15th April 1893, against 108·8° on the 20th May of the preceding year. In Manbhum the thermometer never rose to 100° in April except on the 19th at 4 p.m., whereas in the same month of the preceding year the mercury rose to 100° and over on more than ten days, and the highest record was 104° on the 25th April 1892. In May and June the heat was not so intense as in previous years. In Singhbhum the average mean temperature was below normal throughout the year. From April to August it was much lower than in the corresponding period of the previous year, but from December to February it was unusually warm.

The average rainfall of the Division was 62·68 inches in the past, against 52·19 inches in the preceding year.

In Hazaribagh the regular monsoon began in June with a heavy shower on the 2nd, and ended on the 17th October 1893. The heaviest rainfall in any one month during the year was 22·8 inches in July, against 26·0 inches in the same month of the previous year. The heaviest rainfall in any one day was 4·69 inches, against 3·97 inches in the previous year. The total number of days on which rain fell was 122, against 112 in the previous year. Rain fell during every month up to November, and after the setting in of the regular monsoon, the weather was continually cloudy, with incessant and abnormally heavy showers. According to the daily reports of the Bengal Meteorological Department, the regular monsoon rainfall from the 16th May up to the end of September exceeded the normal rainfall of the district by 28 inches.

In Lohardaga the rainfall was abnormally heavy in June and July, and the total quantity registered at Ranchi during the year was 70·79 inches, against 57·64 in 1892-93 and 40·08 in 1891-92, and there was also heavy rain in October followed by a long period of rainless weather, which, with the exception of a few light showers in November, continued uninterruptedly till January, but in February there was a heavy fall.

In Palamau there was fair rain in the beginning of June, and from the middle of that month, there were constant showers up to the end of July. During August and up to the end of September there was excellent rainfall, which was interrupted by only one small break. Again, after the middle of October, there was good rain throughout the district; but from that time onwards there has, practically speaking, been no rain. The average rainfall of the district during the past year was 59·34 inches, against 48·49 inches in the preceding year, and only 38·80 inches in 1891-92.

In Manbhum the quantity of rain registered at Purulia was 70·03 inches, against 54·08 in 1892-93 and 49·54 inches in 1891-92. In April the fall at Purulia was 2·45 inches, but in May it was as much as 8·07 inches, against 1·74 in the previous year. In June, again, the rainfall was copious, being 21·6 inches, against 12·46 in the previous year. On the 24th June there were heavy showers with thunder and lightning all day and night, and the rainfall was 8 inches. In July, August, and September the rainfall was normal, and fully equal to the requirements of cultivation. From the 21st October to the end of the year there was practically no rainfall with the exception of three light showers on the 3rd January and the 20th and 23rd February.

In Singhbhum the rainfall commenced in February 1893, and continued to be heavy till September. There were light showers in October and November, and subsequently little or no rain at all. The total average rainfall of the district was 63·81 inches, against 48·65 in the previous year. As might be expected, the excessive rainfall in June and July injuriously affected the bhadoi;

and the outturn, taking the Division as a whole, was only 9 annas, against 14 in the previous year. Indian-corn and marua suffered most, especially in Palamau and certain parts of Hazaribagh, where they proved an almost total failure, and their average outturn in Hazaribagh and Manbhum was only  $4\frac{1}{2}$  and 6 annas, against  $19\frac{1}{2}$  and 12 annas respectively in the preceding year.

The partial failure of these crops was particularly regrettable, as the bulk of the poorer classes depend on them.

The gora, or early upland rice crop, also suffered to some extent in all the districts except Manbhum, and its average outturn in the Division was 13 annas, against 15 annas in the preceding year. On the other hand, the winter rice was a remarkably good one in the greater part of the Division, and its average outturn was 15 annas, against 13 in the preceding year. In Hazaribagh the character of the weather was very favourable for the winter rice up to the end of September, and a bumper crop was expected, but the unseasonably heavy rainfall in October caused some damage and reduced the yield to an average of 15 annas. In Lohardaga the crop at first promised a 16-anna outturn, but the excessive and continued rainfall in October hampered the growth and development of the young plants, with the result that the outturn was only 14 annas. In Palamau the unusual wetness of the season suited the winter rice best, and its outturn was excellent. In Manbhum the heavy rainfall in May and June was at first alarming, and it was everywhere apprehended that the seedlings would be spoilt by excessive moisture, but the fall in July and August was generally beneficial to the rice crop, though in some places the crop was attacked by blight in some of the low lands. Taken all round, the winter rice crop in Manbhum was a fairly good one, and the outturn of the district can be safely put down at 12 annas. In some parganas it was excellent, in others good or very good, and nowhere was it an absolute failure, as in the preceding year. In Singhbhum the outturn of the winter rice was almost an average one.

In the majority of districts the heavy rainfall in October interfered with the timely cultivation of the land for the rabi crops, which were again seriously damaged by the total absence of rain or irregular rainfall in November and December, so that the average outturn of the Division was only 9 annas, against 10·2 in the previous year. The oilseed crops also suffered to a certain extent in certain parts of the Division, but the average outturn of the Division was on the whole 13 annas, as in the previous year. The wheat crop was fairly good in Hazaribagh and Palamau, where the outturn was 11 and 12 annas respectively, against 10 and 8 in the previous year. The outturn of mohwa was good in Hazaribagh, Lohardaga, and Singhbhum, and fair in Palamau and Manbhum. Sugarcane yielded a good 16-anna outturn in Hazaribagh and a fair 12-anna outturn in Palamau and Manbhum. In Singhbhum excessive rains damaged this crop.

#### IV.—PUBLIC HEALTH.

35. Compared with the two preceding years, the past year was decidedly healthy in the Division. Not only did the districts enjoy an almost perfect immunity from epidemic cholera, but the number of deaths from small-pox and fever was considerably lower than in either of the two preceding years. Cholera was almost entirely absent in the three districts of Hazaribagh, Lohardaga, and Palamau, and the total number of deaths reported from them as due to this cause was 38, 11, and 42 respectively. In the previous year the number of deaths from this cause in Hazaribagh and Lohardaga was 5,675. In Manbhum there was no violent epidemic of cholera anywhere except in the town of Jhalda, where during the last cold weather the disease raged as an epidemic for some days. The total number of deaths from cholera in Manbhum was, however, 400 only, against 2,952 in 1892.

In Singhbhum there were only a few sporadic cases, and the number of reported deaths was only 71, whereas in the previous year the disease prevailed as an epidemic throughout the district. In Hazaribagh small-pox accounted for 462 deaths, against 683 in 1892. The majority of these occurred in thanas Hunterganj, Giridih, Kharagdiha, and Kodauma, where the disease was prevalent almost throughout the year. In Lohardaga there were 170 deaths from small-pox as against 2,232 in the previous year. Most of these occurred in the early months of the year, and in Palamau there were 322 deaths, against 662 in

1892. In Manbhum small-pox appeared in an epidemic form only in the Raghunathpur town in the early part of the year. The total number of deaths from small-pox in the district was, however, 662, against 185 in 1892. In Singhbhum small-pox accounted for 121 deaths, against 182 in 1892. In Hazaribagh the mortality from fever was 22,806, against 31,013 in 1892, and that from dysentery and diarrhoea 337, against 662 in 1892. In Lohardaga there was a decrease of 7,346 deaths from fever and 1,984 from bowel-complaints; the number of reported deaths from these causes having been 13,782 and 1,698, against 21,128 and 3,682 respectively in 1892. In Palamanu the total number of deaths from all causes was only 16,949, against 33,182 in the previous year, the ratio per mille thus dropping from 37·40 to 28·40. In Manbhum fever accounted for 15,936 deaths, against 20,307 in the preceding year. Influenza broke out towards the end of the year in the Gobindpur subdivision, and was fatal in a few cases. In Singhbhum fever accounted for 6,741 deaths and diarrhoea 303.

#### V.—MATERIAL CONDITION OF THE PEOPLE.

36. In a country like Chota Nagpur, where the bulk of the people live on agriculture, their material well-being always depends largely on the state of the seasons and the outturn of the crops. Consequently, with the exception of certain parts of Manbhum, where, owing to the failure of crops in 1892-93, the people were somewhat weighed down in the early part of the year, and in certain parts of Singhbhum, bordering on Keonjhar, the past year was one of prosperity and ease throughout the Division. In Hazaribagh there was indeed a partial failure of the bhadoi crops, but the mohwa crop—the mainstay of the poorer classes—was abundant and cheap throughout the year, and the winter rice crop was also a good one. The people of the district were thus in fairly easy circumstances. The majority of the non-agriculturists, however, are very poor, and as regards the bulk of them, the margin between bare sufficiency and actual want is perilously narrow. The extensive emigration, which has been going on for several years, has been the salvation of the district. A small section of the people, viz., those residing in the vicinity of towns and trade centres, such as Hazaribagh and Chatra, and in the neighbourhood of the coal and mica mines are well off, as the wages they receive are comparatively high. In Lohardaga the prosperous condition of the people was testified to by the large expansion of the excise revenue, which rose from Rs. 3,00,087 in 1892-93 to Rs. 3,15,787 in 1893-94.

In Palamanu, owing to the excellent harvest of the year, prices ruled much lower than usual, while the extremely abundant lac harvest brought a large sum of money to the hands of the low-caste people who engage in this particular business. Mr. Bright writes:—"There are signs that the condition of the people is improving; weekly markets are being established in new villages, which are often crowded, and the comparatively large sums which are invested in metal-ware at the annual Daltonganj fair seem to show that there is a certain amount of spare cash available. Of course, the poorer classes are almost to a man in the hands of their mahajans, but that is the rule everywhere. The mahajans are perhaps a little grasping, but then the people are more ignorant than elsewhere, and the only remedy is improvement in education."

In Manbhum, in certain parts of the district, notably in parganas Bunkhandi, Hesla, Baghmundi, and Torang, the people were somewhat pinched in the early part of the year owing to the partial failure of the rice crop in 1892-93, but there was nothing approaching actual famine, though the circumstances of the poorer classes were somewhat straitened. Their difficulties were, however, tided over by judicious grant of loans under the Land Improvement and Agriculturists' Loans Acts, and by the opening of road works in the especially affected parts; and their circumstances are now reported to be flourishing. In November 1893, while passing through one of these parganas, Mr. Belford recorded the following remarks in his diary:—

"As far as the eye can reach, the country is covered with crops, and dotted here and there are seen villages knee-deep amidst the smiling grain. About this time last year I passed through the same part of country: the people then were in a very despairant mood regarding the *dhan* crops. Now, when discussing the prospects of crops, their faces were radiant with joy. I was not fortunate to catch any of the people at *chhola hazri*, so I cannot say if they are

in the habit of drinking tea well seasoned with milk and sugar every morning. *It is, however, possible that the simple peasantry of these parts have not yet acquired the luxurious habits of Happy Howrah!*"

The excellent lac crop of the year also tended to improve the material condition of the people of Manbhum.

In Singhbhum the condition of the people in most parts of the district has improved, for what with the good outturn of crops and the high prices of labour and food-grains, they are said to have fared very well indeed, and to continue to be prosperous and happy. The only people whose condition is not so satisfactory are those living in parts of the district bordering on Keonjhar and Mourbhunj. In a note left by Mr. Renny it is said that the punitive expedition sent against the Keonjhar rebels not only prevented them from cultivating their lands, but few of these rebels prevented those who were peacefully inclined from cultivating their lands also; so that a large population of Keonjhar had been left without a food-supply of their own, with the result that they had to beg, borrow or steal from their immediate neighbours in Singhbhum, who had not been blessed with an over-abundant harvest of their own, but on the contrary had reaped a very indifferent harvest, notwithstanding the good harvests in other parts of the district.

#### VI.—EMIGRATION AND IMMIGRATION.

37. Recruiting of emigrants under Act I of 1882 is carried on in the three districts of Hazaribagh, Lohardaga, and Manbhum, and the following statement compares the number of registered emigrants who left these districts during the past three years:—

DISTRICTS.	Recruited under Act I of 1882 in 1891-92.	Recruited under Act I of 1882 in 1892-93.	Recruited under Act I of 1882 in 1893-94.
1	2	3	4
Hazaribagh ...	2,177	1,429	1,962
Lohardaga ...	3,300	3,065	3,072
Manbhum ...	3,092	6,708	7,046
Total ...	8,569	11,202	12,080

The increase in Hazaribagh as compared with 1892-93 is said by the Deputy Commissioner to be probably due to the partial failure of the bhadoi crops on which the bulk of the labouring classes mainly depend. The very slight increase in Lohardaga and Manbhum calls for no remarks.

Besides the coolies recruited and registered under Act I of 1882, a large number of coolies is said to be recruited under the free-labour system. The exact number of free emigrants from each district cannot be ascertained, as no record is kept, but from reports received from some of the agents stationed in the districts, it appears that during the past year 1,164 free emigrants were recruited from Hazaribagh, 971 from Lohardaga, 6,263 from Manbhum, and 534 from Singhbhum, against 923, 1,551, 5,588, and 197, respectively, in the previous year. The large increase in the number of free emigrants from Singhbhum is no doubt due to the bad harvest of the previous years. The opening of the Bengal-Nagpur Railway has changed the recruiting grounds and the centres from which coolies are despatched. Formerly Raniganj was the principle centre of operations, and the coolies taken there were chiefly recruited in Lohardaga and Manbhum. Now Raniganj has become of less importance in the recruiting world, and Purulia and Chakradharpur have taken its place. The *arkatis* having partially exhausted the districts of Chota Nagpur have found fresh areas of supply in the Central Provinces and in the Chota Nagpur Tributary States.

The Deputy Commissioner of Singhbhum says that a large number of coolies are quietly removed from that district and registered either at Purulia, Calcutta, or Dhubri, and that several coolies, recruited from the political states, who pass through the Chailassa depôts, are returned as recruited from the Singhbhum district. Whatever recruiting takes place in the tributary states is carried on clandestinely and against the wish of the Chiefs, who are opposed to their raiyats leaving them, and sometimes resent the action of the recruiter by putting him into jail.

In Palamanu whatever emigration there is from the district is carried on by unlicensed recruiters under the free-labour system. Their business cannot, however, be very profitable, for the owner of the largest, and in fact the only depôt in Daltonganj, has had his house sold over his head by the Civil Court. The Deputy Commissioner of Hazaribagh reports that during the past year no evils or abuses in connection with emigration of a serious nature or on a large scale came to his notice. Some complaints of abduction of minors were made from time to time in the course of the year, but in most cases enquiry showed that the so-called minors were persons of full age and free agents. The Deputy Commissioner of Lohardaga does not make any special mention of any cases in which any serious abuses in connection with free emigration were brought to light, but states that the Emigration Act does not provide for all practical safeguards for detention and prevention of malpractices inherent in the system. He adds that under the free system recruiters enjoy entire freedom from official supervision, so that boys and girls are persuaded to leave their guardians and married women to desert their husbands and children; and the circumstances under which they are decoyed and the ease with which their names, castes, and residences are changed render it practically impossible to trace them. Even in any cases in which any clue of the persons enticed away is obtained, the chances in favour of the recruiters are large, the expense of legal proceedings almost prohibitive to the classes from which recruitment is made, and the complainants are easily gained over by the payment of a small amount of compensation. All this is true, but it is not always that the complainants are so complaisant. I have known several instances in which women, whose young daughters have been spirited away, have come to me not once, but two or three times after fairly long intervals to make known their grievances and enquire why their children had not been traced out and brought back. Even if identity can be established, the question of age presents a difficulty after a girl has once left her home. A child becomes a woman by the time she reaches Assam, and once she is pronounced to be about sixteen, the father's, mother's or husband's complaint is useless unless she herself complains. The Deputy Commissioner of Palamanu says that during the past year he did not come across any complaint of any villainy connected with emigration, but speaks of one case in which a young woman, aged about 15 or 16 years, found in one of the Ranchi depôts, was on enquiry found to have left her home at Palamanu without the consent of her husband, but as neither the girl herself nor her husband made any complaint, nothing was done in the matter. The Deputy Commissioner of Manbhum reports that during the past year 121 applications were made at Purulia for search in cooly-depôts for missing wives, children, and other relatives, but that in only 20 cases were the searches successful. The significance of these figures must not be overlooked, meaning as they do that there were 121 families a member of which mysteriously disappeared, and that in only one-sixth of this number was a trace found of the missing persons. Mr. Windsor writes:—"One of the facts which to my mind tells most against this system of so-called free emigration is that if a man or woman comes and complains of the loss of a relation, my only way of finding out what has become of the missing one is to apply to the registering officer at Dhubri. If the Government requires accurate statistics of free emigration from this district, it is the Deputy Commissioner, not of Manbhum, but of Goalpara, who can supply the information." In Singhbhum fifteen cases of abuses in connection with cooly-recruiting were instituted during the past year.

During the past year the inspection of depôts was made with fair regularity in all districts, and their sanitary arrangements were on the whole found satisfactory. In Hazaribagh the depôts at head-quarters were regularly in-

spected once a week by the Deputy Magistrates placed in charge of them during the recruiting season, and as long as they remained open, while those in the Giridih subdivision and the interior by the Subdivisional Officer, Assistant Surgeon, and Police Inspectors. In Lohardaga the depôts were regularly inspected by the Joint-Magistrate, Deputy Magistrates, Assistant Superintendents, and Police Inspector, and the Deputy Commissioner, Colonel Gordon, made a thorough inspection in January last. In Palamau, in August 1893, at the half-yearly inspection all rest-houses were found closed. In November one was found to be open, but neither then nor in two subsequent visits were any coolies found in it. In Manbhum the depôts were regularly inspected by the Civil Surgeon, but the inspections by the Deputy Commissioner and the Subordinate Magistrates were insufficient. I was not satisfied with the arrangements at Purulia for medically examining and registering coolies. One reason for appointing the Civil Surgeon to be registering officer was that the registration and medical examinations could be simultaneously conducted, but under Dr. Basu's arrangements at Purulia, the coolies have to appear before him twice, and as his house is a long distance from the depôts, this must occasion inconvenience. Then, again, he fails to note the distinguishing marks of the labourers in the contract, which are very necessary in order to establish identity, and he does not insist on those who hold special licenses under section 62 of the Act personally appearing before him with their coolies, though it is a condition of their license that they should do so. All these errors in procedure were pointed out to Dr. Basu, and some reform may now be expected.

38. There was no immigration worth the name into the districts of Hazaribagh, Lohardaga, Palamau, and Manbhum. A large number of persons, dissatisfied with administration in the adjoining tributary state of Keonjhar, are said by the Deputy Commissioner of Singhbhum to have taken up their permanent residence in that district during the year under report. The correct number of such immigrants is not available.

#### Immigration.

### VII.—PRICES OF FOOD AND LABOUR.

39. Under ordinary circumstances the generally good harvests of the year ought to have been attended with a corresponding fall in the prices of the principal articles of food. But this result was not obtained everywhere. In Hazaribagh alone the average prices of all articles of food except salt ruled lower than in either of the two preceding years. In Manbhum they were, no doubt, much easier than in 1892-93; but with the exception of wheat they were higher than in 1891-92. In Hazaribagh the fall in prices was due not only to the good harvests of the district, but also to the good outturn of crops in all neighbouring districts. In Manbhum the large exportations through the Bengal-Nagpur Railway prevented prices from falling lower. In Lohardaga, notwithstanding the good harvest of the year, the average prices of the principal food-grains remained much the same as in the previous year, for there was a brisk export of all food-grains from the district owing to the increased facility of transit afforded by the Bengal-Nagpur Railway. In Palamau the prices of wheat and gram ruled lower than in either of the two preceding years; but in spite of the excellent outturn of the rice crop, its average price was steadily higher than in 1892-93, owing, it is said, to heavy exports to other districts. In Singhbhum the average prices of wheat, rice, gram, and salt were 12, 13, 14, and 9 seers per rupee, and were thus higher than those of the previous year. The general rise in the prices of all articles of food in this district is said to be due to the large exportations through the Bengal-Nagpur Railway. Prices of labour remained almost unchanged in Hazaribagh and Singhbhum. In Lohardaga, owing to the increased demand for masons in the town of Ranchi, in consequence of a rise in the standard of comfort, there has been a rise in the wages of common masons. Similarly, in Palamau, owing to the increased demand in Daltonganj and the smallness in the number of artisans and labourers available, prices of labour have generally risen in the Sadar station. In Manbhum there has been a decrease in the wages of common masons, owing, it is said, to the advent of a large number of their class from other parts of the country, but the wages of coolies, women, and boys have slightly risen in this district.

In the Gobindpur subdivision the opening of the Jharia extension of the East Indian Railway has caused a general rise in wages, except in the case of masons and head-carpenters. In Singbhum the wages of labour continued to be as high as in the previous year. The Singbhum-Kols, who belong mostly to the class of agriculturists, and whose material condition is generally good, are said to be a most independent class who will hold out for a certain rate of wages and decline to be beaten down. They, however, do their work honestly, and a full day's work can always be got out of them, resembling in this respect John Chinaman!

#### VIII.—MANUFACTURES AND MINES.

40. The chief articles of manufacture in this Division are—lac, tea, indigo,

(a) Manufactures.

soapstone bowls and plates, *Ghi*, and tussar silk. Lac factories exist in the two districts of

Lohardaga and Manbhum. In the former the industry is reported to be flourishing, and the quantity of shell-lac manufactured is said to have increased from 3,182 maunds in 1892-93 to 33,018 maunds in the year under report. The total value of the manufactured article is also said to have increased from Rs. 76,504 to Rs. 7,14,434. In Manbhum factories for the manufacture of lac exist at Illu, Jhalda, Raghunathpur, Chas, and Gobindpur. Lac in the raw state is also exported from the district in large quantities to Mirzapur. During the past year the number of shell-lac factories in Manbhum increased to 47; and in spite of the large exports of the raw material through the Bengal-Nagpur Railway, there was a large increase in the business, the value of the manufactured article in 1893-94 amounting to Rs. 6,10,145, against Rs. 5,06,350 in the previous year. In Hazaribagh the extensive jungles of the district yield lac, catechu, sabai-grass, extensively used in the manufacture of paper and tussar cocoons, which are annually exported in large quantities to other districts *via* Chatra and Giridih. In Palaman the lac harvest was specially good during the past year, and large quantities of stick-lac were exported from the district. Indigo is manufactured in Manbhum, but the outturn of the manufactured article is never large. One of the four indigo factories of Patkum did not work during the year, and owing to the heavy rainfall, the outturn of indigo both at Patkum and Barrabhum was small as compared with the previous year. The total value of indigo manufactured in 1893-94 was Rs. 19,196, against Rs. 52,420 in the previous year. Tea-plantations exist only in Hazaribagh and Lohardaga. In the former district the total outturn of the past year of five gardens, which have furnished returns, was 92,658 lbs., against 94,830 lbs., the outturn of six gardens in 1892-93. There was an increase of 18,828 lbs., in the outturn of the same gardens. The average yield per acre of mature plants was 138 lbs., against 110 lbs. in 1892-93. In Lohardaga the total area under cultivation in 23 gardens was 2,320 acres, against 2,494 acres in the preceding year, and the total outturn of the year 357,678 lbs., against 271,127 lbs. in the previous year. The average yield per acre of mature plants was 156 lbs., against 112 lbs. in 1892-93. The good outturn in both districts was due to the favourable rainfall. The prospect of the tea industry in Chota Nagpur is, however, anything but encouraging. The prices paid for the Chota Nagpur tea both in London and Calcutta are too low to allow a margin of profit over the cost of manufacture. The dry climate of Chota Nagpur is also unsuitable, while the soil is too sandy and poor and the rainfall uncertain; consequently the outturn per acre is absurdly small; the tea therefore is much disfavoured in the market, and sells barely at  $4\frac{1}{2}$  annas per pound. It can never compete with the tea of other and more favoured districts in India, or with the ever-increasing production in Ceylon. Tussar cloth is manufactured only at Raghunathpur in Manbhum, and the value of the manufactured article in the past year is estimated at Rs. 23,600, against Rs. 22,500 in 1892-93 and Rs. 19,980 in 1891-92, while tussar cocoons are unreeled in Hosir, Saran, and certain other villages in the district of Hazaribagh. Most of the silk thread thus produced is sent to Murshidabad. In Singbhum considerable business in tussar is carried on every year, and most of the tussar cocoons produced in the district are sent to the silk filatures in Murshidabad. Firearms, swords, and sword-sticks are manufactured on a small scale in certain parts of Manbhum. A blacksmith at Katras, the Subdivisional Officer of Gobindpur

says, turns out good muzzle-loading single-barrel fowling-pieces, while double-barrel guns, swords, and sword-sticks are manufactured at Jhaldia and Begoonkudar. In Palamau what manufactures there are are practically confined to inferior iron and brass work, coarse cloth, rough blankets, mats, baskets, rope, and rude pottery utensils. In Singhbhum soapstone quarries exist in pargana Dhalbhum, from which soapstone bowls and plates are manufactured. Some of the quarries are said to have been worked underground to a depth of 278 feet. Work in these quarries is carried on in the crude native fashion. Brass utensils are manufactured at Lohardaga and Chatra in the two districts of Lohardaga and Hazaribagh, and *gilt* in certain parts of Palamau.

41. As reported in previous years, the principal coal mines in the Division exist in the Giridih and Gobindpur subdivisions of the Hazaribagh and Manbhum districts. The total quantity of coal raised from

(b) Mines—

(1) Coal mines.

the Giridih mines was 562,037 tons, against 563,976 tons in 1892 and 558,407 tons in 1891. The average number of work people employed in them was 7,613, against 7,563 in 1892 and 6,398 in 1891. In the Gobindpur mines the output in 1893 was 65,226 tons, against 73,576 and 77,534 tons respectively in the two preceding years. The average number of work-people employed in them was 2,207 in 1893, against 2,112 in 1892 and 2,506 in 1891. The Laikdih and Kumardubi coal mines are worked with success by Europeans. The Patlabari coal mine, worked by the South Barrakar Coal Company, is said to be doing fairly well, though it is not in a flourishing condition yet. There are several other coal concerns in the Gobindpur subdivision, but none of them are deserving of special notice. In the Katras coal-fields, mentioned in paragraph 38 of last year's report, operations have not yet regularly commenced. As anticipated, there has been a great rush for settlement of the Jharia coal-fields, and some lands are reported by the Deputy Commissioner of Manbhum to be already settled by private individuals under mokarrari and brahmottar titles. Negotiations are said to be in progress with merchants and influential firms. There are coalpits in the Damodar valley in the Sadar subdivision of Hazaribagh, principally at Ramgar and along the Bokaro river and at Mandoo. The coal dug out of these pits, which are only superficially worked, is used for brick-burning and such like purposes. A portion of the coal taken from these pits is taken to Ranchi and other places in Lohardaga. In Palamau the coal mines were not worked during the past year, and the Deputy Commissioner reports that he has not heard of any new mining rights having been recently acquired by any one. In fact, now that the chance of a railway through Palamau has gone, this industry is completely stagnant.

42. The mica mines worked in the Division are all situated in the Giridih subdivision of the Hazaribagh district. The majority of these are in the Kodarma Government

(2) Mica mines.

estate, both inside and outside the Government reserved forests, and the rest are scattered over portions of gadis Gawan, Domchanch, Khesmi, Musnudih, Byrea, Doranda, and Satgawan. The majority of the mines situated within the above-mentioned gadis are worked by Messrs. Christian and Company. During the past year fifteen new mines, covering an aggregate area of 22·57 acres within the Kodarma Government estate, were settled by the Deputy Commissioner of Hazaribagh at an aggregate rental of Rs. 1,252 per annum. The aggregate current demand of the rent due to the Government amounted to Rs. 9,692, out of which Rs. 9,554 was realised, and only Rs. 137 remained due from one lessee. The total output of all the mines, whether situated within the Government estate of Kodarma or in the estates of private zamindars, was 3,086 maunds 25 seers, against 2,236 maunds in the previous year.

43. No work was carried on during the past year in the Baraganda copper mines in Hazaribagh, while that in Rajdoha mine, in Singhbhum, has now been practically stopped, and

(3) Copper mines.

there is no prospect of the company renewing operations until they succeed in raising money by the issue of fresh shares.

44. In Lohardaga the Sonapet Gold Syndicate have again begun prospecting operations on the Sonapet valley since

(4) Gold mines.

January last, and Mr. Hubert Belletti, Manager of the Syndicate, reports that he is at present prospecting old native workings.

The Deputy Commissioner of Singhbhum reports that the Pahardial block in Annandpur was taken charge of by the Oriental Prospecting Syndicate, Limited, on the 7th October 1893, and from that date to the 25th idem their employes were engaged in making the preliminary arrangements. From the 25th October 1893 actual mining operations were commenced, and work was carried on night and day in three shafts. About one hundred men were employed underground, and as many on the surface. In Manbhum the Western Patkum Gold Prospecting Syndicate continued their operations during the past year, but with what result is not known.

45. The only tin mines known to exist are those at Norenga in the Giridih subdivision of Hazaribagh, but their prospects do not appear to be very hopeful.

(5) Tin mines.

#### IX.—TRADE AND COMMERCE.

46. The Bengal-Nagpur Railway, which passes through the districts of Manbhum and Singhbhum, has effected a remarkable change in the Division not only by bringing within the influence of civilisation parts of the country which quite recently were completely shut out from its sphere, but by opening out fresh trade routes. The people have now fully realised the importance of the railway and the great facilities for communication afforded by it, and whenever they can take advantage of the railway, they have given up the slow method of sending things by means of pack-bullocks and bullock-carts. The trade of Lohardaga and South-Eastern Hazaribagh, which used to pass through the latter district, has now been diverted to Manbhum, and both exports from and imports to those portions of the Division, which formerly used to be carried on through Hazaribagh, now pass through Jhalda and Purulia. The trade of the Singhbhum district, which used to pass through Manbhum, is now carried on by rail. The Purulia-Barrakar road and the Purulia-Chaibassa road *via* Balrampur and Chandil, which, previous to the opening of the Bengal-Nagpur Railway, were important trade communications, have now ceased to be so, and are now used for the conveyance of local traffic. As reported in previous years, the chief articles of import in the Chota Nagpur Division are—salt, European and country piece-goods, tobacco, twist and yarn, spices, cocoanuts, brass and bell-metal utensils, kerosine oil, gram and paper, while the principal articles of export are—rice, oilseeds, pulses, mohwa, coal, lac, tea, tussar silk and cocoons, hides, horns, timbers, sabai grass, lime and limestone. During the past year there was a marked increase in the quantity and value of imports, while there was a corresponding decrease in the quantity and value of exports. The increase in imports is observed chiefly in Manbhum in most of the articles, but specially in tobacco, brass, and bell-metal utensils, gunny-bags, gram and paper, while the decrease in exports is most marked in rice in Singhbhum and in oilseeds in all districts except Lohardaga. The aggregate value of all articles imported into and through Manbhum was Rs. 56,47,655, against Rs. 45,15,976 in 1892-93, showing an increase of Rs. 11,31,679. The quantity of salt imported into Manbhum was 4,53,980 maunds, against 4,43,420 maunds in the previous year. The quantity of tobacco imported was 1,00,000 maunds, against 75,492 maunds in the preceding year. The quantities of cocoanut, cocoanut oil, kerosine oil, bell-metal and brass utensils, gram and gunny-bags imported were—94,389, 2,932, 32,534, 6,952, 93,220, and 54,968 maunds respectively, against 83,212, 1,861, 16,350, 5,754, 77,300, and 21,650 maunds respectively in the previous year. Paper of the value of Rs. 80,000 was imported in 1893-94, against Rs. 5,225 in the previous year. In Hazaribagh the quantity of salt imported during the year was only 96,000 maunds, against 1,00,000 maunds in 1892-93 and 1,91,000 maunds in 1891-92. The quantity of rice imported into this district was 1,35,000 maunds, against 1,39,000 maunds in the previous year. Rice is imported into this district chiefly from Lohardaga and Palamau, and is locally consumed within the district. The quantity of tobacco imported was 60,000 maunds, against 40,000 maunds in the previous year. Cocoons to the estimated value of Rs. 98,000 were imported from pargana Tori in Palamau, and were partly manufactured within the district into tussar silk and partly re-exported to other districts. Both in Hazaribagh and Lohardaga European piece-goods are reported to be fast supplanting the locally-manufactured cloth. The aboriginal tribes, however, still prefer to wear the cloths manufactured locally. The estimated value of European piece-goods

imported into the Hazaribagh district is said to be Rs. 2,80,000, against Rs. 2,00,000 in the previous year. In Singhbhum there was a slight increase in the value of European piece-goods imported, as the aggregate value of such goods imported during the year is estimated at Rs. 2,22,307, against Rs. 2,20,669 in the previous year, but the quantity of salt imported into the district fell off to 57,050 maunds from 1,42,600 maunds in the previous year, while the quantities of tobacco and twist and yarn fell off to 8,500 and 4,705 maunds respectively from 14,019 and 6,920 maunds in the previous year. The total value of all sorts of articles imported into the district is estimated at Rs. 7,04,410, against Rs. 11,18,881 in the previous year. In Lohardaga the number of blankets imported during the past year was 16,085, against 4,500 in the previous year, while the quantities of sugar and brass utensils imported were 10,635 and 34,150 maunds respectively, against 1,700 and 4,800 in the previous year. The trade in salt and tobacco was not, however, as brisk as in the previous year, and the quantities of salt and tobacco imported decreased from 1,06,200 and 2,700 maunds in 1892-93 to 96,629 and 2,382 maunds in the year under report.

There was some increase in the exports of rice, shell-lac, hides, and mohwa from the districts of Manbhum and Lohardaga, but this increase, except in the case of hides, was not considerable, and was more than counterbalanced by the large decrease in the export of rice from Singhbhum and of oilseeds from almost all parts of the Division. The exports of limestone from Manbhum have increased from 6,000 tons to 20,000, and of sabai grass have doubled from twenty to forty thousand tons owing, it is believed, to the increased demand of this grass as a raw material for the manufacture of paper. The outturn of the rabi crop was not at all good; and hence there was a large decrease in the quantity of oilseeds exported from the Division. The quantity of oilseeds exported from Hazaribagh, Manbhum, and Singhbhum was only 39,500, 30,000, and 78,342 maunds, respectively, against 1,05,000, 98,550, and 1,32,258 maunds in the previous year. Lohardaga alone shows an increase of 56,815 maunds in the quantity of oilseeds exported. The quantities of rice, shell-lac, and mohwa exported from Manbhum were 4,05,720, 9,500, and 60,000 maunds respectively, against 3,94,450, 7,233, and 50,000 maunds respectively in the previous year; the quantities of rice, mohwa, and lac exported from Lohardaga were 1,73,878, 14,129, and 31,010 maunds, respectively, against 1,27,660, 8,040, and 16,610 maunds respectively in 1892-93. The quantity of mohwa exported from Hazaribagh was 80,000 maunds, against 75,000 maunds in the previous year. In Singhbhum the total quantity of rice exported was only 12,500 maunds, against 2,46,111 maunds in 1892-93, while the total value of all articles exported from the district amounted to Rs. 13,75,240, against 30,60,994 in the previous year. Trade in timber is still carried on in this district on an extensive scale both from Government and private forests. In Manbhum the aggregate value of all articles exported from the district amounted to Rs. 33,85,596, against Rs. 35,03,030 in the previous year. In Palamau Gurhwa is the most important trade centre through which the surplus produce of the Sirguja and other neighbouring tributary states is distributed to other parts of the country. Lac, resin, catechu, cocoons, hides, oilseeds, *ghi*, and cotton are collected there for exportation, while rice and other food-grains, brass utensils, piece-goods, blankets, salt, tobacco, and spices are brought there for local consumption and to supply the stocks of itinerant vendors who, in the absence of local shop-keepers, supply the local weekly markets. During the past year the trade in lac and cocoons was extraordinarily brisk in Palamau. Large quantities of the former were exported to Imanganj and Raniganj in Gaya, to Chapra, Mirzapur, and Dinapur. It is not manufactured into shell-lac in the district. Cocoons were exported to Benares, Mirzapur, Calcutta, Fatwa, and Arrah.

The Bengal-Nagpur Railway has, no doubt, given a great impetus to the trade of Lohardaga, but the distance from Ranchi to the nearest station at Purulia is 74 miles, and traffic carts cannot reach Purulia in less than five days. The want of some quicker means of conveyance placing Ranchi within easy reach of the railway is very keenly felt. The construction of a steam-tramway from Purulia to Ranchi will prove extremely advantageous to the trade of Lohardaga.

#### X.—ADMINISTRATIVE CHANGES.

47. The only administrative changes made during the past year worth mentioning are—the establishment of a Bench of Honorary Magistrates at

Lohardaga, and the curtailment of the powers of the Gurhwa Bench in the district of Palamau: the Bench can now of its own motion only take up cases under section 34, Act V of 1861; the introduction of Nagri as the character in which all Court papers were to be written (the orders directing this change have since been withdrawn); the creation of separate incorporated local funds for the chaukidari and ghatwali collections under Act V (B.C.) of 1887 in the districts of Hazaribagh, Lohardaga, and Palamau, and for the chaukidari collections in Manbhum and Singhbhum; the transfer of 61 villages from Burrabhum to the new outpost in Bularampur, and its subordination to the Purulia thana; the constitution of a munsifi, comprising thanas Chaibassa, Chakradharpur, Ghatsilla, and Monoharpur, and the abolition of the Dumaria outpost within the jurisdiction of the Ghatsilla thana; the appointment of Mr. W. H. Rattray, Subdivisional Officer, Giridih, as a Justice of the Peace under section 22 of Act X of 1882; the investment of the Munsif of Chatra and the Bench at Hazaribagh with the powers of a Magistrate of the second class; the appointment of a second Inspector of Police in the district of Palamau; the posting of a Sub-Deputy Collector with third-class powers at Hazaribagh, and the investment of the Sub-Deputy Magistrates of Giridih and Ranchi with second-class powers.

The system under which the Special Sub-Judge at Ranchi was authorised to try civil cases belonging to the Palamau district from Rs. 50 to Rs. 500 in value has been found by experience to be defective, and a report has recently been submitted by the Judicial Commissioner to the High Court recommending that these suits should be tried at Daltonganj by the Munsif, but that his summary powers should be confined to suits of Rs. 10 in value. The change will undoubtedly be a boon to the community at large in the district, as the trouble and expense involved in taking witnesses to Ranchi was practically a bar to the institution of suits of values ranging between Rs. 50 and Rs. 500. The effect will be best illustrated when it is said that during the past year only 43 such suits were instituted before the Special Sub-Judge as against 115 instituted in Palamau in the previous year.

#### XI.—STATISTICAL AND OTHER ENQUIRIES.

48. Vital statistics both in the towns and in the interior continued to be registered through the agency of the police. The birth results in Hazaribagh show a preponderance of males. There is undoubtedly room for improvement in the work of registration. As noticed in another section of this report, the death-rate is considerably lower than in the preceding year, and is attributable to the general healthiness of the year and the entire absence of epidemics.

A Special Deputy Collector was employed in testing the pedigree of the heirs of the original grantees of the jagirdari and ijardari tenures in the Palamau Government estate, and in tracing the devolution by inheritance or transfer of such tenures or portions of them. The Deputy Commissioner's report on the enquiry has been received by me, and is under consideration.

Survey operations in the Palamau Government estate were also commenced during the year. The average number of amins employed was 78, working in two parties—one under Mr. Berkeley, the Assistant Superintendent of Survey, and the other under his assistant, Mr. Vaughan. The amins had all to be trained before taking the field. The original estimate of cultivated area (110 square miles, which was based on the assumption that it had doubled during the last 26 years) has proved to be far below the mark, for, up to the end of March, the area traversed was 188 square miles, and after allowing for the villages remaining to be traversed and uncultivated plots included within the traverse of cultivated area, the latter may be estimated at 179 square miles for the 383 villages under settlement. This large excess has disturbed the progress estimated. The sanctioned scheme to the end of March provided for 110 square miles of traverse and 80 square miles of cadastral survey, but the actual result was 188·43 square miles of traverse and 62·75 square miles of cadastral survey; while record-writing covered 43,593 fields, against an estimate of 1,01,664, the cost amounting to Rs. 14,174·13·8, against Rs. 19,000 estimated. Laziness, incompetency, and sickness among the amins retarded the work, and Mr. Bright apprehends that the settlement cannot be finished before the 31st March 1896,

though there should be no difficulty in completing by the 31st March 1895 the settlement of the villages in which survey and khandapuri may be concluded by the end of this field season.

## XII.—CIVIL JUSTICE.

49. Appendix VI shows the amount of original civil work disposed of by District Judges, Subordinate Judges, and Small Cause Court Judges (not including Munsifs), and from this it appears that on an average  $7\frac{1}{4}$  officers worked in the Division during the past year, against  $7\frac{3}{4}$  in the preceding year, and that altogether 317 ordinary and 967 Small Cause Court cases were disposed of by them during the year, against 690 ordinary and 728 Small Cause Court cases in the previous year. Of those disposed of, 467 were contested and 817 were otherwise disposed of. Title-suits declined from 378 in the previous year to 206 in the year under report, while suits for money increased from 1,040 to 1,078. No special reason can be assigned for the decrease in title-suits. The small increase in suits for money calls for no remarks. The total number of witnesses examined was 3,478, of whom 314, or about 9·02 per cent., were detained over two days. The number examined in the previous year was 3,104, and of these 401, or nearly 13 per cent., were detained over two days.

50. Appendix VII shows that on an average  $10\frac{1}{2}$  Munsifs were employed in the Division, against  $9\frac{3}{4}$  in the previous year, and that altogether 4,140 ordinary and 1,122 Small Cause cases were disposed of by them during the past year, against only 4,748 ordinary cases in the previous year. There was thus a large increase in the number of cases tried by Munsifs due, no doubt, to the fact of most of them being vested with Small Cause Court powers. Of the cases disposed of, 1,391 were contested and 3,871 otherwise disposed of, against 1,110 contested and 3,638 otherwise disposed of in the previous year. The number of suits for money increased from 3,899 to 4,170, while title-suits rose from 849 to 1,092. The total number of witnesses examined was 8,996, against 7,083 in the preceding year. The average percentage of witnesses detained over two days was 11·6, against 17·05 in the previous year. The average number of cases disposed of by each Munsif was 501, against 410·6 in the previous year.

51. Appendix VIII shows the number of rent-suits disposed of in the several districts by Deputy Commissioners and Deputy Collectors during the calendar year 1893. On an average about  $23\frac{3}{4}$  officers worked in the Division during the year, and disposed of 5,002 cases, or 208·4 cases each, against 226 cases in the previous year. As in 1892, the disposals were largest in Manbhum, where each officer on an average tried 353 cases, against 343 in the previous year. Altogether 5,952 witnesses were examined in rent-suits, of whom 480, or about 8 per cent., were detained over two days. As regards the detention of witnesses, the worst results are shown against Babu Mahendra Nath Ghosh, Munsif of Giridih, over 66 per cent. of the witnesses examined by whom were detained over two days; and after him come Babu Khirode Chandra Sen, Deputy Collector, Chaibassa, with a percentage of 38·6; the Munsif of Raghunathpur with a percentage of 21·1; and Babu Nirajan Bhattacharjee, Deputy Collector, Ranchi, with the percentage of 20·2.

52. Appendix IX shows that the number of civil appeals disposed of during the year was 698, out of which in 387, or over 55 per cent., the decisions of the lower Courts were confirmed, in 118, or about 17 per cent., modified, and in 155, or over 22 per cent.; they were reversed.

53. In Hazaribagh the Special Sub-Judge of Lohardaga, Hazaribagh, and Palamau held his sittings from the 7th February to the 31st March 1893, and again from the 5th December 1893 to the 6th January 1894, and disposed of nine title-suits and two money-suits. He was vested with the powers of a Judge of a Court of Small Causes for the trial of suits up to the value of Rs. 500, within the local jurisdiction of the Hazaribagh Munsifi under the Government Notification No. 14A of the 13th February 1893, and he disposed of 27 Small Cause Court cases out of 35 instituted in his Court. In Lohardaga the investment of the Special Sub-Judge with similar powers is said to have removed the complaint, which existed among civil litigants, of the great delay in the disposal of civil suits. The appointment of a Special Munsif for Purulia and Chaibassa has so far proved beneficial to both the judicial staff

and suitors, especially in Singhbhum. The Deputy Commissioner of Singhbhum writes that suitors and witnesses in his district are no longer required to attend Civil Courts several times only to find their cases postponed. Their cases are now heard regularly on the fixed dates, and they are thus saved from the endless trouble and annoyance which they had to experience before the appointment of the Munsif.

### XIII.—CRIME.

54. The total number of cognizable and non-cognizable cases reported during the past calendar year was 8,544 and 4,088 respectively, against 7,583 and 3,611 in the previous year, showing an increase of 961 in cognizable and 477 in non-cognizable cases. The increase in cognizable cases is distributed over all the districts, and of non-cognizable cases over all except Lohardaga, where there was a slight decrease of 31 cases. The incidence of crime in the Division was one case to every 371 persons, against one case to every 413 persons in the previous year. Out of the 8,544 cognizable cases reported, 120 were offences against public justice, 469 offences against persons, 5,826 offences against property, and 2,129 other offences, compared with 120, 496, 4,650, and 2,317 respectively in the previous year. There was a remarkable increase of nearly 25 per cent. in the number of offences against property, which deserves attention, and which is more or less due to the opening of the Bengal-Nagpur Railway, the prevalence of agricultural distress in certain parts, a rise in the price of food-grains, and to better reporting of crime—all of which causes are to some extent intermixed with or inter-dependent on each other. In Hazaribagh, in 1892, both the mohwa and the bhadoi were bumper crops, but in 1893 the latter was almost a total failure, so that many of the offences against property were committed under the pressure of poverty by the poorer classes. In Lohardaga the increase in the number of offences against property, especially in burglaries and thefts, may be accounted for by the prevalence of high prices of food-grains in the Panch parganas bordering on the Manbhum district. These five parganas are differentiated from the rest of the district by the fact that the munda and manki system of administration still obtains there. In Palamau the increase is attributed by the Deputy Commissioner to better reporting consequent on the more efficient supervision of the police by the district authorities. So long as it was a subdivision of the Lohardaga district there used to be a considerable suppression of crime in Palamau, and this is indicated by the fact that cases are now freely reported from those parts of the district from which hardly any cases used to be ever reported before. I have no doubt that the cause of increase is correctly stated, and one of the grounds in fact on which I recommended the conversion of Palamau into a district was the defective police administration. In Manbhum the increase is chiefly in burglaries owing to the high prices of food-grains in the early part of the year. It is partly attributed to the influx into the Gobindpur subdivision of bad characters, who were attracted there by the construction of the Jharia extension of the East Indian Railway. In Singhbhum the increase, which is most marked in burglaries and thefts, is due to the high prices of food-grains brought about by the partial failure of crops, but occasioned in a large measure by the facility for export of food-grains afforded by the Bengal-Nagpur Railway. Before these facilities existed people did not guard their surplus produce as they do now, having learnt their value for export purposes. This makes them more careful of their own and ready to run in persons caught pilfering and stealing.

In Lohardaga under class VI there was a large increase in cases of public and local nuisances and in bad livelihood cases. The increase under the former head was due to the large number of prosecutions instituted in the Municipality of Ranchi. The increase under the latter head was due to an attempt made to obtain security from a gang of suspicious characters of the *Huri* caste in the Silli thana, who had no ostensible means of livelihood and were yet found to live in greater comfort than their means warranted. The increase in extortion cases in this district was due to the prosecution of the so-called munda sardars, who levied forced contributions from the people under the false pretext of fighting out cases for the common good of the Kolarian aborigines.

A curious case of what is supposed to be human sacrifice was reported from this district during the year. On the morning of the 29th December 1893 the headless body of one Narku Nunia, aged about 16 years, was found propped

up on the outer wall of one Kishen Sahu. He was a youth somewhat proud of his personal appearance, and given to flirtation with Mundari girls. It was therefore at first supposed that the case was one of murder committed by some person or persons of the Munda race for interference with their girls. Subsequently, however, the case turned out to be one of human sacrifice committed with the further object of putting into trouble one Achaibar Sahu, a new comer to the village of Jamuday, who had managed to acquire all the lands of the village. One Buchu Ghassi and a Kol, named Rathu Mundari, were suspected of having committed the murder. The latter, a simple-minded Kol pointed out the place where the murder was committed, as well as the spot where the head of the deceased was hidden. He was convicted and sentenced by the Judicial Commissioner to seven years' rigorous imprisonment. The chief offender, Buchu Ghassi, who killed the deceased, was, however, acquitted, as there was no evidence against him. The committing Magistrate offered a conditional pardon to Rathu Kol to secure the conviction of Buchu Ghassi, but the statements made by the former were so palpably false that the conditional pardon had to be withdrawn. The person by whom the murder was instigated had been unsuccessful in a civil suit, and, it is believed, thought that a human sacrifice would improve his fortunes, and by way of killing two birds with one stone attempted to have the corpse thrown into the premises of an enemy.

Including 104 cases of the previous year enquired into in 1893, the total number of cognizable offences reported in 1893 was, as stated before, 8,544, out of which 361 were declared false. The total number of cognizable cases reported by the police was 7,286, out of which 5,856 were actually enquired into by them. The incidence of cognizable crime in the Division was thus one true case to every 565 persons, against one case to every 645 persons in the previous year. The total number of cognizable cases disposed of by Magistrates during the year was 3,731, out of which 3,090 ended in conviction. The total number of persons brought to trial for cognizable crime was 7,952, of whom 4,650 were convicted. Excluding sanitary offences, the number of true cases reported from the several districts during the past two years is compared below—

DISTRICTS.	1892.	1893.	Increase.
1	2	3	4
Hazaribagh ...	1,531	1,697	166
Lohardaga ...	1,360	1,467	97
Palamau ...	590	745	155
Manbhum ...	1,653	1,939	286
Singhbhum ...	762	1,135	383

55. The following table compares the number of non-cognizable cases instituted in the several districts during the past two years:—

DISTRICTS.	CASES INSTITUTED IN—		Increase.	Decrease.
	1892.	1893.		
1	2	3	4	5
Hazaribagh ...	798	1,008	210	.....
Lohardaga ...	999	960	.....	39
Palamau ...	369	492	123	.....
Manbhum ...	1,005	1,090	85	.....
Singhbhum ...	440	538	98	.....

There was thus an increase in the institutions everywhere excepting Lohardaga. No satisfactory reason can be assigned for the increase, though, as regards Hazaribagh, the Deputy Commissioner hazards the following explanation:—“The mohwa and rice crops of the year were excellent, and the possession of a little extra cash often tempts people of the better classes to indulge in the excitement of a little litigation by taking into Court petty cases of assault, use of abusive language, and such like. This has probably something to do with the increase in non-cognizable crime.” In Palamau the increase is chiefly under section 352, and is, according to Mr. Bright, probably due to the fact that the year was prosperous, and people had enough spare money to indulge in the luxury of litigation.

#### XIV. — POLICE.

56. The police force was strengthened during the year by the posting of an additional Inspector to the Palamau district. The general conduct of the force, taking the Division as a whole, was much better than in previous years, and, with the exception of Lohardaga and Singhbhum, in which the District Superintendents speak of the generality of their subordinates in terms of disparagement. This is borne out by the statistics furnished from the several districts of punishments awarded during the year. I cannot, however, speak in terms of praise of their conduct in the investigation of cases. In reviewing the special reports of the past year, I have had occasion several times to deplore their inability to trace out serious crimes. In Manbhum dacoities and burglaries baffled their energies; in Lohardaga a glaring case of drugging and another of murder remained undetected; in Hazaribagh robbery, dacoity, and murder investigations came to nothing, while Palamau and Singhbhum also contributed in some measure to the general failure. These results confirm the opinion expressed in paragraph 58 of my last year's report of the low standard of detective ability of the Chota Nagpur police force, and the suggestions then offered for improving its efficiency are still applicable. I referred to the responsibility which rested with the District Superintendent of educating his officers up to their duties, and by a judicious system of approval and commendation of infusing into them a spirit of activity, zeal, and enthusiasm for their work, and indicated how all this might be accomplished. As regards Chota Nagpur, there is not a steady flow of serious crime sufficient to keep alive and in full training the limited capacity for making investigations which the police possess, and a sudden outbreak of dacoities, highway robberies or burglaries will find them slack and unprepared. It is then that the District Superintendent proves his worth by promptly appearing on the scene of crime, not so much for the purpose of taking part in the enquiry as to give his subordinates moral support, and inspire them with zeal and confidence. The wearing of uniform by the superior officers when inspecting police-stations is a much-needed disciplinary measure, for the exemplary effect of laxness in this respect on the subordinate officers must tend eventually to impair the general efficiency of the force. The districts of this Division are so extensive that an officer must be very brisk and active to get over the ground quickly, and it is useless sending any officer here who is not inured to the fatigue of long and rapid marches on horse-back. Some of the Inspectors are experienced and useful officers, though somewhat addicted to filling the inspection books with laboriously lengthy notes for the benefit of the station staff. Occasionally the book is carried off from the station to enable the notes to be prepared and elaborated; but being in English they can be of little use to the Sub-Inspectors, head-constables, and constables for whose guidance and improvement they are intended. The object of the notes is two-fold—first, to bring to the notice of the station staff defects and other matters requiring attention; and, secondly, to show the District Superintendent in what manner the Inspector himself is carrying on his duties. The first object might be attained just as well if the Inspector called up the station staff and orally explained to them the matters requiring attention, and merely noted down in the inspection book the chief heads or points of enquiry. As regards the second, I consider that an officer of the rank of an Inspector ought to be trusted to perform his duties without being required to record the fact at every step in minute detail. The chief want in the force is detective ability, and the visits of the higher inspecting officers should be more and more directed to testing this capacity in individual members, and seeing how it can be brought out, trained and improved. •

Mr. Schurr, the District Superintendent of Police, Lohardaga, has recorded the following remarks in his last departmental report:—

“The large size of the investigating areas combined with the extreme difficulty of moving freely about the country, and the slow moving of mails induce to a slack performance of duty on the part of station and outpost officers. The work per man is exceedingly light, and yet in almost every instance is badly done, and the absence of any public feeling induces many officers, who in their own district would no doubt be perfectly sober and hard-working, to become drunkards and habitual shirkers of their duty.

“Further, so many officers who have done badly in other districts have in the last eighteen months been sent here that the general low tone is further reduced, and no improvement can be looked for until a better class of officers is obtained. There are several notable exceptions, but the general level of service is bad and unreliable.”

On the same report Colonel Gordon's remarks were as follows:—

“I consider the general working of the force to have been very fair. What is chiefly absent is detective acumen and energy, and this has resulted in the failure of a large number of investigations.”

Mr. Bright has recorded the following remarks regarding the regular police force of the Palamau district:—

“There has been improvement in some respects during the year. Cases have been much more speedily investigated; *badmashes* have, except in one or two flagrant instances, been much better looked after, and night supervision is fairly well carried out; reporting of crime has also still further improved, but there is still much room for improvement; supervision has not been sufficiently strict even now, for too many cases sent up by the police have been declared to be either maliciously false or false through mistake of fact or law. The reasons for these failures have not been sufficiently investigated, and inspection has been very short.” Mr. Bright adds:—“On the whole the police are improving, I think, but still there is far too little intelligence shown in enquiries, and the work has suffered no doubt, from the fact that junior men have had to act in superior posts, which they were really not fit to occupy. The district is pre-eminently one (owing to the intense heat of the weather and the difficulties of locomotion) which requires an energetic, active, young officer at its head.” In this I most emphatically agree.

In Manbhum, in the opinion of Mr. Bedford, the police worked fairly well, but the detective ability is reported to be at a low standpoint.

57. Before 1893, Act V (B.C.) of 1887 was in force in the districts of Hazaribagh, Lohardaga, and Palamau, in thanas Purulia and Gobindpur in Manbhum, and in pargana

Rural police.

Dhalbhum in Singhbhum. During the past year the Act was further extended to the rest of Manbhum, excepting certain isolated and jungly tracts. The work of assessment was nearly finished during the year, and the Act has been brought under operation from the beginning of the current year. During the past year there were altogether 10,311 chaukidars employed in the Division, of whom 5,115 were enrolled under Act V (B.C.) of 1887 and 5,016 under Regulation XX of 1817. As a rule, the chaukidars enrolled under the Act of 1887 were paid with regularity. In Hazaribagh the assessments are regularly collected, and the chaukidars are paid their salaries with great punctuality. One tahsildar was, however, found to have been pursuing a course of peculation by making collections with manuscript receipts in addition to the printed forms of receipts. This had been going on since 1888, and the sums thus fraudulently obtained amounted to Rs. 600. The question of responsibility for this loss is being enquired into, but there can be no question that the thana police did not exercise sufficient scrutiny over the accounts and collections. In Lohardaga the chaukidars enrolled under Act V (B.C.) of 1887 are paid with great regularity, but the remuneration received by them is thought by the Deputy Commissioner to be inadequate. He writes:—

“The pay of the chaukidars was fixed in Act V (B.C.) of 1887 upon considerations of the rates of wages then locally prevailing. Circumstances have, however, materially altered by the construction of the Bengal-Nagpur Railway,

and by the gradual opening out of the roads, which have since given access to many inaccessible parts of this district." There is a large balance to the credit of the Chaukidari Fund of this district under the Act of 1878, but as this balance has under Government orders, merged into provincial revenue, there is no immediate prospect of raising the rate of pay or of supplying the chaukidars with uniforms until the assessments are raised. In Palamau there was a large balance of Rs. 21,096 to the credit of the Chaukidari Fund at the close of the year. This was due to the chaukidars having been paid with extreme irregularity, owing to the confused state in which the chaukidari and ghatwali accounts of the district were kept in the District Superintendent's office. On my way to Palamau in December last, my attention was attracted to the extreme backwardness of the collections, and the irregularity with which the chaukidars had been paid, the arrears extending from six months to two years; and on going into the question with Mr. Bright, it was discovered that this deplorable state of things was due to extreme laxity in the office of the District Superintendent. There was an entire absence of any proper system of collection and payment, and the latter officer seemed quite unable to grasp the details of the subject. Mr. Bright, however, with his characteristic energy, set to work and placed the system on a proper basis, and the collections and disbursements are now going on satisfactorily. There was no clear statement of arrears, demands, and collections or of payments made to chaukidars. We visited the District Superintendent's office and prepared a set of sample forms, which will contain all the information required, and on my return to Ranchi for Christmas, Mr. Bright accompanied me there, and the Deputy Commissioner of Lohardaga and the District Superintendent of Police were called to a Conference, at which the proposed forms were approved. Mr. Bright was then authorised to bring them into use subject to a report in six months regarding their practical utility. In Manbhum matters now have generally been brought to a more satisfactory footing in thanas Purulia and Gobindpur, in which the Act was in force in 1893. The tahsildars have been made to work more energetically, and the collections have been much more regular. In Singhbhum, when I inspected the District Superintendent's office in February last, there was no clear account kept of the demands, collections, and balances of the Chaukidari Fund, nor was there detailed account of the payments to the chaukidars. I advised the District Superintendent to procure a copy of the forms of account which had been approved of provisionally for Palamau. A case of defalcation by a tahsildar came to light in the Singhbhum district during the year, with the result that the tahsildar was prosecuted and sentenced to two and-a-half years' rigorous imprisonment. The exact amount of defalcation has not yet been ascertained. The matter is still under enquiry.

58. There was no change in the Ghatwali Police force of Hazaribagh, which consisted of 113 sardars and 345 digwars. Road patrols. They are posted along the main roads as well as in jungly tracts, where their presence is intended to give a sense of security to travellers and wayfarers. The conduct of the force was on the whole satisfactory. The condition of the Hazaribagh Ghatwali Fund is also satisfactory, as there was always a large working balance after meeting the necessary expenditure. In Lohardaga, besides eight constables stationed at Jonha to watch the traffic of the Ranchi-Purulia road, there were 114 ghatwals enrolled under Act V (B.C) of 1887 for patrol duty. These are remunerated at the rate of Rs. 3 each per month from collections made from certain zamindars. The yearly collection had hitherto been Rs. 4,104, while the expenditure amounted to Rs. 4,296, or Rs. 192 in excess. There are 68 ghatwali bungalows for the accommodation of the ghatwals, which were hitherto maintained from the police contributions levied from certain zamindars and tenure-holders in the district. These contributions have now, under the orders of the Government, been merged into provincial revenue, and steps have accordingly been taken to revise the ghatwali assessment of the district so as to meet the necessary charges fully out of the fund, and it is hoped that when this division is made, not only the salaries of the ghatwals will be placed on a more satisfactory footing, but all cost for the maintenance and upkeep of the ghatwali bungalows, as well as for the supply of uniforms and other incidental charges, will be met out of the fund. In Palamau the assessments under part III of the Chota Nagpur Revenue

Police Act used to be supplemented by what is known as the Untari Fund. But under the orders of the Government, the latter fund is now being treated as entirely separate from the Ghatwali Fund of the district. There were 73 ghatwals in 43 ghâts during the past year, but the number of ghâts has since been reduced by the abolition of several which were unnecessary, and further attempts are now being made to render the Ghatwali Fund of the district self-supporting. In Manbhum the Ghatwali Police is said to have as usual rendered little or no service worth the name. Mr. Windsor writes that, although it is true that they give no special trouble, it is equally certain that much of the Deputy Commissioner's time is taken up in connection with the appointment, dismissal, &c., of the ghatwals, who are 1,772 in number and are remunerated with service lands. The Government have again taken up the question with the view to the preparation of some scheme of commutation. In Singhbhum the Ghatwali Police force consists of 29 sardar ghatwals, 197 naiks, and 426 paiks. They are employed chiefly in pargana Dhalbhum, where they hold service lands. Their conduct during the past year was on the whole satisfactory. In this last-named district the Mankis and Mundas constitute the rural police of the Government Kolhan. There is no police-station in this large tract of country, covering an area of nearly 1,257 square miles. A scheme for establishing regular thanas in it is before the Government.

## XV.—CRIMINAL JUSTICE.

59. The working of the Criminal Courts is shown below :—

DISTRICTS.	CLASS OF OFFICERS.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to persons disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases modified or reversed on appeal to total appeals.	Number of A cases disposed of.	Number remanded six times and more.	Average of cases disposed of per officer.	Average of witnesses examined per case disposed of.	Ratio per cent. of column 11 to column 10.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Hazariabagh	Stipendiary	7	1,403	2,114	61.7	6,358	2.9	21.8	794	8	213	4	1.007

	Honorary	15½	1,474	1,858	53.6	3,315	3.3	40.0	35	4	94	2	14.4

60. The average number of Stipendiary Magistrates employed during the past year exceeded the number in 1892 by about 9 per cent. The number of criminal cases disposed of by them was 6,533, against 6,045 in the previous year, each officer's average being 202 against 205—certainly not a high rate of work, but it must be borne in mind that several officers also try civil and rent suits. Of Stipendiary Magistrates' disposals, the highest average (245) appears against Singhbhum, the lowest (145) against Palamau. The total number of witnesses examined was 26,050, which gives on an average 801 to each officer and nearly 4 to each case. The average number of Honorary Magistrates and Benches employed was 16 against 17, and of cases tried 1,478, giving an average of 92 cases for each Court, against 108 in 1892. The total

number of witnesses examined by these tribunals was 3,345, or on an average 209 for each Court and 2·2 witnesses per case. Amongst Stipendiary Magistrates the largest number (485) of disposals fall to Mr. Rattray, the Subdivisional Officer of Giridih, and after him comes Babu Upendra Chunder Mukherjee at Purulia (432 cases), and then Dr S. J. Manook (404 cases), Babu Khirode Chunder Sen (370 cases) at Chaibassa, and Babu Sarat Chunder Mukherjee (320 cases) at Chatra. In the case of Babu Upendra Chunder Mukherjee the figures are swelled by 126 cases under section 34 of Act V of 1861 and the Municipal Act and bye laws. Mr. Rattray examined the largest number of witnesses—1,859; Dr. Manook, 1,647; and Babu Rakhal Mohun Banerjee, 1,552. Considering the number of cases disposed of by the two former, the number of witnesses examined by them was certainly not large. But Babu Rakhal Mohun Banerjee's average exceeded 6 per cent. The proportion of witnesses detained over two days to the total number of witnesses examined is highest in the case of Mr. Manson (34·4) and Colonel Gordon (28·8) in Lohardaga, and Mr. Drake-Brockman (25·2) in Palamau. The result of appeals shows a slight improvement. Out of 676 cases in which the appeals were decided, in 477, or about 70·5 per cent., the orders of the lower Courts were confirmed, against 69·6 per cent. in the previous year. Taking the districts separately, Palamau comes out best with an average of 83·5 per cent. in the number of decisions confirmed in appeal, and after it Hazaribagh with a percentage of 78·2, against 76·1 and 59·7 per cent. respectively in the previous year. The results in Hazaribagh would have been better still but for the low percentages of 63 and 20 respectively against Babu Sarat Chunder Mukherjee, Munsif of Chatra, and Mr. Ramkamal Gupta, Sub-Deputy Magistrate. In Lohardaga, amongst Deputy and Sub-Deputy Magistrates and Munsifs, the best results are shown against Babu Krishna Kali Mukerjee (90 per cent.), Babu Soshi Bhushan Sen (77·7 per cent.), and Babu Jadu Nath Chatterjee (75 per cent.). In Palamau the results would have been still more satisfactory had the decisions of the Munsif been passed with greater care. In Manbhum among subordinate officers the percentages against Babu Rakhal Mohun Banerjee, Maulvi Abdas Samad, Babu Niranjana Bhattacharjee, and the Munsif of Barrabazar fell below the recognized standard of 75. In the case of the last-named officer the percentage was as low as 16·6. In Singhbhum the results against the Deputy Commissioner, Mr. Renny, and Dr. Manook are not satisfactory, as the percentages of confirmations in their cases were only 40·0 and 64·7 respectively. Of Honorary and Bench Magistrates, as in 1892, the largest number (299) of cases was decided by the Hazaribagh Bench, and next by the Benches at Chaibassa (251) and Purulia (118) and Giridih (103). There was a decided falling off in the number of cases made over to the Honorary and Bench Magistrates, for there were altogether 1,478 cases disposed of by the Bench and Honorary Magistrates of the several districts, against 1,764 in the previous year.

61. The following Honorary Magistrates and Benches deserve special commendation, not a single witness examined by them having been detained for more than two days:—

Hazaribagh Bench.  
 Giridih Bench.  
 Kumar Jagat Mohun Nath Sahi Deo, Honorary Magistrate of Ranchi, in Lohardaga.  
 Rai Bhagabat Dayal Singh Bahadur, Honorary Magistrate, Palamau.  
 „ Raj Chunder Dass Bahadur, Honorary Magistrate, Cheliana, in Manbhum.  
 Jhalda Bench.  
 Rev. A Campbell, Honorary Magistrate, Pakhuria, Gobindpur.  
 Mr. R. Mitchell, Honorary Magistrate, Chirkunda, Gobindpur.  
 „ H. C. Veasey, Honorary Magistrate, Kumardubi, Gobindpur.  
 Gobindpur Bench.

The work of the Chaibassa Bench was also good, as out of 237 witnesses examined, only one was detained over two days. The number of appeals from the decisions of the Bench and Honorary Magistrates was comparatively small, being only 4·4 per cent. of the number of cases decided. Of these 39, or 60 per cent., were confirmed—a result which, taken all round, must, I think, be considered satisfactory and creditable to all the Honorary and Bench Magistrates concerned.

## RESULTS OF SESSIONS WORK.

62. The following table shows that in sessions cases there has been a further falling off in the percentage of average convictions, which in 1893 was only 64·1, against 67·3 in 1892 and 75·64 in 1891 :—

	DISTRICTS.					
	Hazaribagh.	Lohardaga.	Palamau.	Manbhum.	Singhbhum.	Total.
1	2	3	4	5	6	7
Number of cases committed, but pending at the beginning of the year.	2	11	3	3	...	19
Number committed during the year ...	9	15	4	15	6	49
Total number for disposal ...	11	26	7	18	6	68
Number disposed of ...	7	23	5	14	4	53
Number in which conviction was obtained ...	5	15	3	8	3	34
Number in which sentence was modified or reversed by High Court.	...	4	...	1	1	6
Number of cases acquitted by Sessions Judge.	2	8	2	5	1	18
Percentage of cases resulting in conviction to cases disposed of.	71·4	65·2	60·0	57·1	75·0	64·1

63. The results are satisfactory only in Singhbhum and fairly so in Hazaribagh. In Lohardaga the proportion of cases ending in conviction to cases ending in acquittal compares favourably with the figures of 1892, but the number of persons acquitted was 40, against 23 convicted during the year. This unsatisfactory result was due to the breaking down of two cases, viz., one a case of attempt at murder, in which 8 persons, and another, a case of arson, in which 13 persons, were wholly acquitted. In Palamau out of five cases disposed of by the Court of Sessions, three ended in conviction and two in acquittal. The cases disposed of being so few, any inference based merely on percentage must be misleading. One of the cases ending in acquittal in Palamau was committed by the Deputy Commissioner himself after careful enquiry. It was a most brutal case of murder, but between the time of commitment and the time of trial some of the witnesses changed their story, and in addition to this a false reason for the murder was grafted on to the true story in order to save the reputation of the family in which the murder was committed. It was a case in which the murder was committed with great secrecy inside a house and the body buried in a well which was subsequently filled up with earth. In the other case, also one of murder, the medical evidence left no doubt as to the murder, but the evidence for the prosecution appeared to bear marks of manipulation, the witnesses at first denying all knowledge of the facts of the case when examined by the head-constable who first took up the investigation, but subsequently giving accounts as eye-witnesses before a Sub-Inspector. Before the Court of Sessions they utterly broke down. In Manbhum the bad results were due to the acquittal of no fewer than 38 persons in seven police cases. It is satisfactory to observe that during the past year the Deputy Commissioners were able to relieve the Court of Sessions of a certain amount of work by taking a large number of cases under the special powers which they possess under section 30 of the Code of Criminal Procedure. The Deputy Commissioners of Hazaribagh, Palamau, and Manbhum were able to take up 12 such cases each, while Colonel Gordon in Lohardaga took up 15. In Singhbhum only two byes were tried by the Deputy Commissioners under their special powers given under section 30. The results of sessions trial are extremely bad in Manbhum, and of things. causes appear to be at work to produce such an unsatisfactory state

months, between the committal and trial, sufficient to render the most truthful witness forgetful of some minor points. Secondly, the police do not watch over the prosecutions with sufficient keenness, so as to prevent a witness who is truthful as to the main points being badgered into discrepancies on some immaterial issue, such as the direction from which a witness appeared or how he was dressed. A wavering Judge may be influenced by these minor discrepancies in determining the credibility of a witness. Thirdly, too high a standard of proof may be required. There was a case of brutal murder committed in broad daylight, in which five persons were acquitted in Manbhum because certain discrepancies were remarked between the informant, a chaukidar, and the witnesses' statements at different times, full allowance apparently not being given for the frailty of human memory, when ignorant persons are required to recall what they have seen after a long interval of time, and when they are exposed to cross-examination regarding every detail of the facts to which they depose.

64. The figures for fine realizations are given below:—

	Districts.				
	Hazaribagh.	Lohardaga.	Palamau.	Manbhum.	Singbhum.
1	2	3	4	5	6
Amount due at commencement of the year ...	Rs. A. P. 4,138 15 0	Rs. A. P. 7,170 1 1	Rs. A. P. 805 3 6	Rs. A. P. 5,117 3 10	Rs. A. P. 4,564 3 11
Amount imposed during the year ...	9,457 0 0	8,713 11 0	1,074 0 0	9,014 16 0	8,275 10 0
Amount collected during the year ...	7,829 14 3	6,912 2 9	1,863 0 0	8,085 5 9	5,634 6 0
Amount pending at end of year ...	5,768 0 9	6,466 11 8	897 11 6	5,255 11 7	6,398 2 8

There is some difference between the closing balances shown in the previous year's report and the opening balances shown in the above statement under Lohardaga and Manbhum. The difference is due to the following causes:—

*Lohardaga.*—The balance outstanding at the close of 1892 did not include the figures for the Court of the Munsif-Magistrate of Lohardaga.

*Manbhum.*—There was a mistake in the figures supplied by the Subdivisional Officer of Gobindpur in 1892.

With the exception of Lohardaga, the closing balances are everywhere larger than the balances with which the year opened.

#### ATTENDANCE OF HONORARY MAGISTRATES.

65. The attendance of Honorary Magistrates is given below:—

DISTRICTS.	Number of times asked to attend.	Number of times actually attended.	Absence with leave or notice.	Absence without leave or notice.	Total absence.
1	2	3	4	5	6
Hazaribagh ...	877	774	63	40	103
Lohardaga ...	282	262	67	23	90
Palamau ...	177	171	9	14	23
Manbhum ...	698	779	52	107	219
Singbhum ...	205	160	11	31	45

In Hazaribagh there are two Benches, both of which are independent and sit at intervals on fixed dates. It has not yet been found possible to organise Benches to sit singly. The Bench at Hazaribagh is composed of 12 and that at Giridih of 15 Magistrates. The Hazaribagh Bench has now been vested with second-class powers, and has also been empowered to try cases summarily. It is said to have proved an unqualified success. The Giridih Bench did excellent work. Most of the Honorary Magistrates composing the Benches are reported by the Deputy Commissioner to take an intelligent interest in their duties. Some of them were unable to attend regularly, owing to the distances at which they live from the Court and the press of professional duties. In Lohardaga, the Bench Magistrates of Ranchi have, with few exceptions, done fairly well, and the services of Honorary Magistrate Kumar Jagat Mohun Nath Sahi Deo have been especially acknowledged by Colonel Gordon in his last report on the criminal administration of the Lohardaga district. In

Palamau the Bench at Gurwah had so lost the confidence of the public that it was found necessary to ask the Government to withdraw its powers to take up complaints direct. Two of the members composing it resigned since the close of the last calendar year, and the only member who, from his knowledge of English and general intelligence, was capable of conducting the duties of the Bench has tendered his resignation since the close of the last official year, and I have accordingly recommended the abolition of the Bench. The independent Honorary Magistrate, Rai Thakurai Bhagabat Dyal Singh Bahadur, has, as usual, performed his duties with zeal and efficiency. In Manbhum the Honorary Magistrates composing the Purulia Bench and Mr. C. H. Maseyk and Babu Jagobandhu Roy, who were empowered to sit singly, have also rendered great assistance in the disposal of criminal work. The attendance of the Honorary Magistrates composing the Gobindpur Bench was very poor, but the Subdivisional Officer, Gobindpur, reports that no Bench is required there, as the Rev. A. Campbell and Mr. Voasey try cases, sitting singly at Pakhuria and Kumardubi respectively. In Singhbhum the Chaibassa Bench has its sittings on Wednesdays and Saturdays. Of the Honorary Magistrates composing the Bench, Babu Shib Chunder Ganguli and the Rev. W. Luther Daud Singh deserve commendation for the regularity of their attendance and for the interest taken by them generally in the work of the Bench.

## XVI.—REGISTRATION OF DEEDS.

66.

DISTRICTS.		Deeds registered in 1892-93.	Deeds registered in 1893-94.
1		2	3
Hazaribagh ...	...	5,209	6,277
Lohardaga ...	...	5,100	5,524
Palamau ...	...	1,153	1,392
Manbhum ...	...	13,527	14,865
Singhbhum ...	...	451	654
Total ...	...	25,440	28,712

Compared with the past year, there has been an increase of 3,272 in the total number of deeds registered in the Division. This is shared by all the districts, the largest proportional increase being contributed by Hazaribagh and Manbhum. The marked increase in the number of deeds registered in the Hazaribagh district is due partly to the reduction of the *minimum ad valorem* fee from annas twelve to annas eight in the case of documents the value of which does not exceed Rs. 50, partly to the scanty bhadoi crops, which compelled a large number of people to obtain money either by sales or on the security of land mortgages, and partly to the resettlement of a number of villages in the Palganj estate. In the Manbhum district the large increase is due chiefly to the very indifferent harvest of the two preceding years, when the prices of food-grains ruled very high. Mr. Windsor says the poorer agriculturists were compelled by necessity to mortgage their petty holdings in order to procure money. When the rains set in and appeared to be favourable, the agriculturists obtained leases of lands from the maliks, and this caused an increase in the number of "other leases." The increase in the number of deeds registered in the districts of Lohardaga, Palamau, and Singhbhum is due to the lowering of the *ad valorem* fee from annas twelve to annas eight, to the natural development of the registration system, and the general material progress of the districts. Owing to the increase of work in the Hazaribagh district, proposals have been made to the Inspector-General of Registration for the formation of two new registration sub-districts, which will be likely to afford increased facilities for registration.

My inspection of the registration offices has usually disclosed a highly satisfactory state of things, the work being neatly and correctly done, and more

or less up to date. Babu Aghore Nath Chatterjee, the Special Sub-Registrar of Purulia, deserves very favourable mention in this respect, his work being always up to date without a single arrear of any kind. When inspecting the Giridih Sub-Registrar's office, I noticed with regret that the Sub-Registrar and his establishment had not received their pay for six months, owing, as it appeared, to the unreasonable and inconsiderate action of the Sadar Sub-Registrar, first, in raising the most trivial objections to the bills, and, secondly, to the inordinate delay in his replies to queries regarding the form of the bills and the certificate by which they are accompanied. It must have caused serious embarrassment to the officers concerned to be kept out of their pay for so long a period. I took the necessary steps to put matters right, and the bills are now being passed with sufficient promptness.

# XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

67. The following statement compares the demands and collections of land revenue of the several districts for the past two years :—

DISTRICTS.	NUMBER OF ESTATES.		DEMANDS.						COLLECTIONS.					
			1892-93.			1893-94.			1892-93.			1893-94.		
	1892-93.	1893-94.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	Total.

Total ... ..	453	454	3,82,741	8,015	3,90,756	3,83,896	6,963	3,90,860	3,75,206	7,035	3,82,241	3,75,560	6,708	3,81,268

\* Includes demands and collections on account of tributary states.

Except in Hazaribagh and Palamau, the revenue-roll of the districts remained unaltered. In Hazaribagh two estates in class II were transferred to class III, the villages having been brought under direct management owing to the relinquishment of their leases by the ticcadars. In Palamau a new estate has been added to the rent-roll under the class of Government estates, consisting of a ten annas share of a village included in a revenue-free estate. The property was originally attached in 1872 under section 319 of the Criminal Procedure Code, but on no one claiming it within the period of limitation allowed by law, it was transferred to the revenue roll as a separate Government estate. Recently, however, one Ranjit Singh, pretending to have claims to six out of the ten annas share held by the Government, served a notice on the Deputy Commissioner, intimating his intention to bring a suit against the Government for recovery of the said six annas.

The increase of Rs. 18 in the current demand of the Hazaribagh district is due to the settlement of fallow lands in the Government estates of pargana Khafagdiha and in the Hazaribagh Sarkari Hatta. In Lohardaga the increase of Rs. 1,035 is due to the revision of the settlement records of 17 villages and the settlement of one village in the Barkagurh Government estate. The increase in Palamau is attributed to the village Jungir being brought under khas management, revision of its jammabandi, resulting in a large increase of rent, and to mauza Baldihari being taken on to the revenue roll. In Singbhum the decrease of Rs. 3 is due to the lands acquired by the Public Works Department.

The percentage of the total current collections on the current demand of the year is 97·8, against 98·03 in the previous year. Except in Lohardaga, the collections in all the districts are satisfactory. Including arrears, the total demand amounted to Rs. 3,90,899, while the total collections, including collections on account of arrears, amounted to Rs. 3,81,268. The percentage of total collections on the total demand is 97·5. In Lohardaga alone the percentage

of gross collections was as low as 90·5, owing to the illness of the tahsildar in the collection season of January and March.

In Hazaribagh the whole of the recoverable arrears was realized. In Lohardaga Rs. 1,458 out of Rs. 1,700 were realized, Rs. 35 are bad and irrecoverable, and the rest is good and under realization. In Palaman, out of the arrear demand, Rs. 4,147 have been realized, and Rs. 77 remitted. In Manbhum, in addition to the entire current demand, Rs. 634 were realized in advance. In Singhbhum the arrear demand amounted to Rs. 833, which, excepting Rs. 24, has been remitted as irrecoverable.

68. In Hazaribagh eight estates fell into arrear, but four of these, as well as three estates remaining from the previous year, were exempted from sale, the arrears due being paid before the dates fixed for sale. In the remaining four cases the sale day had not arrived when the year closed.

69. The demands, collections, remissions, and balances of road and public works cesses in the several districts for the year are shown below :—

DISTRICTS.	DEMANDS.			COLLECTIONS.				BALANCES.			Deduct remission.	Net arrear.	Percentage of balance on gross demand.

In Hazaribagh, out of the arrears outstanding at the close of 1892-93, Rs. 3,733 were realized during the year, leaving a balance of Rs. 11 outstanding on the 31st March 1894. This sum is due from one of the proprietors of mica mines. The defaulter has left the district and gone to Calcutta. Certificates have been sent to the Collector of the 24-Parganas for recovery of the arrear. Out of the current balance, Rs. 1,522 have since been realized, and the residue is in course of realization. In Lohardaga the arrears outstanding at the close of 1892-93 have been realized in full. Out of the net balance of Rs. 16,659, Rs. 16,616 have been realized since the close of the year, and for the realization of the remainder certificates will be issued.

In Palaman, out of the net balance of Rs. 2,766, a sum of Rs. 827 has been realized since the close of the year, and certificates for the recovery of the remainder have been issued.

In Manbhum, out of the net balance of Rs. 6,503, a sum of Rs. 1,561 has been realized since the close of the year. Rupees 1,897 represent the arrears of the kist of March 1894, the payment of which could not be enforced before the close of the year, and certificates have been filed for the realization of the remainder.

In Singhbhum the net balance at the close of the year amounted to Rs. 177, and is under realization.

70. The revaluation of eight estates in the district of Manbhum, sanctioned in January 1892, was completed in July 1893. The total amount of cess leviable under the revaluation of the estates is Rs. 17,467-6, against Rs. 13,270-6-6 under the former revaluation, showing an increase of Rs. 4,196-15-6.

71. In Hazaribagh no fresh case was instituted. The Barrakar wire tramway case is still pending. Government has been asked to cancel the notification. In Lohardaga two cases were instituted to acquire lands, of which one has been disposed of. Of the four cases referred to the Civil Court, as noticed in the last year's report, three have been disposed of. Five final reports were pending confirmation by the Board, when the year opened, and three have been submitted. Of these eight reports, one has been confirmed. In Palamau there is nothing to report under this head. In Manbhum the final report of the proceedings taken up for the acquisition of land required for the Purulia cart sarai were confirmed by the Board during the year. The case of acquisition of land for the enlargement of the Madhub Bandh in the Purulia town, which was referred to the Civil Court in 1892-93, has not yet been disposed of. The Subarnarekha bridge case referred to the Civil Court has been disposed of, and a final report submitted, but it has been returned for resubmission after the disposal of the appeal preferred to the Judicial Commissioner against the order of the Court. There are two projects in this district for which lands are required for railway purposes, viz., the Jharia extension of the East Indian Railway, and the Chanch Branch of the Jharia extension line. Babu Sashi Bhusan Sen, Special Land Acquisition Deputy Collector, is in charge of these cases. The first project comprises 1,227 acres, and the estimated cost is Rs. 1,12,121. The measurement of the land under section 8 of the Land Acquisition Act of 1870 was completed during April 1893, but the schedules and khatians remained to be prepared. The schedules and abstracts of measurements have since been completed. The project was divided into 693 cases. General and special notices were issued, and 469 cases, comprising 957 acres of land, were disposed of under section 14 of the Act. No reference has yet been made to the Civil Court. The total compensation awarded in these cases is Rs. 50,976, out of which Rs. 22,234 have been paid to the persons interested. The Chanch Branch comprises 23 acres of land, and the estimated cost is Rs. 2,366. The acquisition orders were received on the 23rd August 1893, and the District Engineer was at once requested to demarcate the land, and this being completed by the 11th October was followed by measurement and the preparation of the schedules and khatians. The project was divided into 42 cases. Fifteen cases comprising 13 acres of land were disposed of at a cost of Rs. 463, but no payment has been made, as the interested persons could not come to an amicable understanding regarding the apportionment of compensation awarded. In Singhbhum the acquisition of land for the 3rd section of the Ranchi-Chaibassa road and for the construction of inspection bungalows and temporary quarters on this road was commenced in January 1894, but only 154 acres were measured before the close of the year. Rupees 2,730-2-1 were paid away as compensation, and 11 cases were disposed of.

XVIII.—WARDS' AND ATTACHED ESTATES.

72. The number of private estates under the management of the revenue authorities is shown below:—

DISTRICTS.		Number of wards' estates.	Number of enumerated estates.
Hazaribagh	...	1	10
Lohardaga	...	1	28
Palamau	...	1	5
Manbhum	...	4	7
Singhbhum	...	...	3
		—	—
Total	...	7	53
		—	—

73. The total number of estates under management in this Division on the 31st March 1894 was 59, against 60 in the preceding year. In Hazaribagh the Jagodih encumbered estate was released during the year. In Lohardaga there were 28 encumbered estates under management in the beginning of the year, but of these one was released, while the Jeria estate was for the first time brought under the management of the Court of Wards during the year. There was no change in the number of estates under management in Palamau and Singbhum. In Manbhum the Jharla ward's estate was released on the 4th December 1893. The Government revenue and cesses due from the estates, aggregating Rs. 66,234, were paid in full during the past year. Out of Rs. 61,866 due to superior landlords on account of rents and cesses, Rs. 56,276 were paid. The balance was not paid, either because the parties to whom the amount was payable did not come forward to take payment, or because there were disputes which required to be previously settled, or because the superior landlord refused to take payment, or because there were not sufficient funds available.

74. The following statement compares the demands, collections, and balances of wards' estates during the past three years:—

Wards' estates.

DISTRICTS.	Estates.	Total current demand in—			Total collections in—			Balances in—			Percentage of collections in—		
		1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

The collections in the Dhanwar, Jerla, Jhalda and Begoonkudar estates were satisfactory, as they exceeded the usual standard of 95 per cent. of the current demand. The Punjrikullan estate consists of a half-anna share of village Punjri belonging to the Bistrampur estate in Palamau. The ward died during the past year, and the superior landlord, the proprietor of the Bistrampur estate, who holds lands worth Rs. 185 in the village, not only declined to pay any rents himself, but induced the other raiyats to withhold payment, because, as superior landlord, he considered himself entitled to resume the property in consequence of the death of the late ward without any male issue. In the Jharla estate the collections were low, because the estate had to be made over to the proprietor at the time of reaping the winter harvest, when collections are best made from the cultivating raiyats. In the Nagarkhari estate the greater portions of the balances are due from certain ilaquadars, who have no means of paying.

In the Dhanwar ward's estate the construction of six bandhs or irrigation reservoirs, and the repairs of six old silted-up tanks, were undertaken at a cost of Rs. 4,348, while the estate spent Rs. 550 more on sanitary and other works of public utility. The estate maintained at its cost a middle English school at Dhanwar and two patshalas at Nawagurh and Chatra, and contributed liberally towards the maintenance of the high English school at Giridih and the middle vernacular school at Kharagdiha.

As there is no local demand for English education at Dhanwar, and as the sons of the lunatic ward no longer receive their education there, the middle English school has been abolished and converted into an upper primary school, while from the saving effected 15 new primary schools in different parts of the estate have been started. The estate maintains no dispensary, but contributes liberally towards the maintenance of the Rattray Charitable Dispensary at Giridih. The eldest son of the lunatic ward resides at Bankipore, and prosecutes his studies under a special tutor. The second son attends the Giridih High English School. In Lohardaga the affairs of the Jerla estate, which com-

prises the entire pargana of Sonpur, on taking over charge, were found to be in a state of the utmost confusion. There was no demand register kept in the zamindari sharista, nor was there anything from which a correct jamabandi of the estate could be prepared. The raiyats of most of the villages were refractory, and they had either paid no rents at all to the zamindar for several years past or had deposited a mere nominal rent into the district treasury. With the utmost difficulty an approximately correct jamabandi has been prepared of almost all the villages comprising the estate except six, the raiyats of which have obstinately refused to come to terms. The estate has a debt amounting to Rs. 35,191, while the amount of debt due to it is ascertained to be Rs. 10,375. The minor proprietor with the eldest of his three younger brothers has been brought to Ranchi, and arrangements have been made for their education in the Ranchi Zila School. Steps have also been taken to open a middle English school at Jeria, where the other two brothers of the proprietor will receive their education.

In Palamau, as already stated, the lunatic proprietor of the Punjrikullan estate has died without male issue, but the estate has been retained under the management of the Court until the zamindar of Bistrampur succeeds in establishing his right of resumption. In Manbhum the Jharia ward attained his majority on the 3rd December 1893, and his estate was accordingly made over to him on the 4th idem. The Jhalda minor did not do well in the last annual examination. The Begoonkudar succession case was taken up in February last, but only a few of the witnesses for the plaintiff were examined. The senior widow of the late proprietor, who is now recognised as the proprietress of the estate, made fair progress in her education during the past year.

75. The demands, collections, remissions, and balances of the 54 estates managed under Act VI of 1876 are shown below :—

DISTRICTS.	Number of estates.	DEMANDS.			Collections.	Remissions.	Balances.	Percentage of collections.
		Current.	Arrear.	Total.				
1	2	3	4	5	6	7	8	9
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Hazaribagh ...	31	91,354	42,380	1,36,814	96,775	8,094	30,801	102.4
Lohardaga ...	28	91,622	58,000	1,50,222	92,302	2,094	55,744	100.7
Palamau ...	5	15,096	4,898	19,964	16,930	373	2,661	112.1
Manbhum ...	7	95,619	31,145	1,26,764	85,245	1,241	40,407	89.1
Singhbhum ...	3	87,347	1,00,450	2,47,797	78,663	8,882	1,65,491	84.1
Total ...	54	3,84,118	2,07,448	6,81,561	3,64,716*	21,584	2,95,104	92.3

\* Exclusive and inclusive of advance collections made in the previous year as well as in the year under report.

The collections were satisfactory in Hazaribagh, Lohardaga, and Palamau. In Manbhum the collections were bad in almost all the estates under management. In the Pandra  $\frac{1}{2}$  estate, the tenants withheld payment on the prospect of the expected release of the estate, consequent upon the liquidation of debts from the compensation money which was expected from the Land Acquisition Deputy Collector of the Jharia extension of the East Indian Railway. In the Manbazar estate the frequent absence of the tahsildar at head-quarters to give evidence in rent-suits against tenants of the hikimali lands, recently resumed by the estate, told much upon the collections. In Tundi the tahsildar's illness in March retarded the collections. In the Hensla and Sinsa estates the partial failure of the crops on account of a blight called *kharika* affected the collections. In Singhbhum the low percentage is due to the bad collections in Dhalbhum, on account chiefly of the failure on the part of the Pairagori and Holdipookur Sadar ghatwals to pay off the heavy arrears which have accumulated against them since some years past. A large sum was also due to the estate from the tenants of the Ambicanagar parganas, against most of whom decrees have been obtained. Arrangements are being made for granting a sub-ijarah lease of the pargana to Raja Sir Sourendra Mohan Tagore, and if this sub-ijarah lease is executed, the Raja will pay off the entire arrears due on account of the pargana, minus 25 per cent. for irrecoverable and bad items and cost of collection.

76. The following statement shows the extent to which the debts due by the several estates in the five districts were paid during the past year:—

DISTRICTS.	Debts due at the commencement of the year.	Debts ascertained or incurred during the year.	Total.	Payment.	Reductions by compromise.	Balances at the close of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ... ..	6,51,828	28,074	6,79,902	2,42,656	11,741	4,21,681
Lohardaga ... ..	2,24,435	43,332	2,68,267	30,427	2,076	2,20,764
Palamu ... ..	1,21,558	2,731	1,24,289	12,235	...	11,264
Manbhum ... ..	2,81,807	13,051	2,94,858	37,412	...	2,57,446
Singhbhum ... ..	1,77,368	6,131	1,83,499	20,059	...	1,62,740
Total ... ..	11,57,006	93,319	12,50,325	3,32,719	13,837	11,80,635

In Hazaribagh in five estates the creditors received Rs. 9,374 in excess of the amounts payable to them in accordance with the sanctioned schemes, while in four others there was a deficiency of Rs. 25,998 in consequence of the non-realization of anticipations regarding the periodical increase on the assets, and short collections on account of bad harvests of previous years. In one estate (Karharbari) the scheme provided for the payment of Rs. 1,75,815 by the sale of 41 villages, but the sale-proceeds of only 39 of these villages amounted to Rs. 1,73,520, or nearly Rs. 18,000 in excess of the estimated receipts from their sale. It has, therefore, been determined not to sell the remaining two villages, but to make up the small deficiency from the ordinary collections. In Lohardaga in thirteen estates the payments have exceeded the provision in the sanctioned scheme by Rs. 25,587, while in the remaining estates there has been a deficiency of Rs. 46,619 partly on account of bad collections, and partly owing to failure on the part of the Manager to effect suitable arrangements for the sale of portions of some of them. In Palamu the payments of debts due by all the estates except Gurlwa have exceeded the provisions in the sanctioned schemes. The deficiency in the Gurlwa estate is due to the inability of the Raja of Ramgarh to pay the full amount of his promised contribution of Rs. 2,000 per annum. In Manbhum the unsatisfactory collections prevented debts being paid in accordance with the schemes in the three estates of Pandra ( $\frac{1}{2}$ ), Tundi, and Nowagurh (3rd), while in the Manbazar estate the deficiency was due to the fact of a large sum having to be paid to meet the cost of the succession suit still pending before the Sub-Judge of the district. In the Hensla estate it is due to the fact of a sum of Rs. 363 requiring to be paid for the excavation of a tank and the construction of walls around the residence of the proprietor. In Singhbhum there was a deficiency of Rs. 13,027 in the Dhalbhum estate, but this was due not to want of funds, but to the inability of certain creditors who, though entitled to receive payment during the year, failed to produce the necessary powers-of-attorney, or proof of transfer to them of the debts registered in favour of the original creditors. There was a cash balance of Rs. 25,354 to the credit of the estate when the year closed.

In many respects the management of encumbered estates is a Sisyphean task, for while the authorities are laboriously striving to pay off all the debts in the time allowed, the proprietor is heaping up fresh liabilities at ruinous rates of interest, which are extravagantly enhanced by his disability under the law to incur any pecuniary obligation.

#### XIX.—EXCISE.

77. The revenue derived from the different excisable articles during the year is shown in statement XXVIII. Compared with 1892-93, the demand for the past year shows an increase of 8·4 per cent. The increase is partly due to keener competition at the auction sales, and partly to the generally good harvests of the past year. The excise revenue of the Division is mainly derived from country-spirits. Next to it come opium and ganja. A sum of Rs. 9,000 was paid as duty for opium purchased at the Purulia Treasury by the retail vendor of the tributary state of Gangpur, where opium is largely consumed by the people. The outstill system is in force throughout the Division except a small area in the Giridih subdivision, where the distillery system is maintained to meet the requirements of a large mining population working in the collieries. Hilly and

comparatively sparsely-populated as the Division for the most part is, the outstill system is the best suited to its requirements. The expansion of revenue from pachwai is to some extent prevented by the concession granted to certain aboriginal tribes to brew pachwai for their home consumption without restriction. A proposal was made by Mr. Renny, the Deputy Commissioner of Singhbhum, to take away this privilege from the residents of Chaibassa, but it has been exercised by them for a long period and is highly prized, and any attempt to interfere with it would be viewed with strong opposition, and is to be deprecated. In Hazari-bagh 66 cases were instituted for the infringement of the excise laws, of which 44 were detected by the police and 22 by the excise inspecting staff. The number of persons brought to trial was 71, of whom 61 were convicted. In Lohardaga 136 cases were detected during the year, namely, 57 by the police and 79 by the excise officers. The percentage of conviction obtained by the police is 87·7 and by the excise officers 91·1. In this district the inspecting officers were active in carrying out their duties, and succeeded in detecting a fairly large number of offences, but though successful in finding out cases of illicit manufacture of pachwai, they failed to discover a single case of illicit distillation of country-spirits. This is remarkable, and seems to indicate that they do not go about with their eyes and noses open. The tour of the Special Excise Deputy Collector might perhaps have been more useful, had he found time to visit the outlying parts of the district adjoining the tributary states. It is there that smuggling is likely to be carried on. There were several important outstills which have not at any time been visited by him. In Palamau it is believed that opium-smuggling is carried on very largely in certain parts of the district, notably in Husainabad, which is the abode of a large number of Muhammadan opium-eaters. There were altogether ten cases of illicit possession of opium detected during the year. Fifty-six persons were brought on trial during the year, of whom 55 were convicted. The very satisfactory results of the year's operations in this district are no doubt due to the fact of the Department being in the personal charge of the Deputy Commissioner, Mr. Bright. In Manbhum 67 persons were prosecuted, of whom 46 were convicted. When examining the excise arrangements of this district, I noticed that the inspecting officers were not sufficiently on the alert, for in the six months covered by a statement prepared for my information, not a single case of illicit manufacture, sale or possession of country-liquor was detected. The police had discovered some few cases, and appeared to be more successful than the special excise agency. In Singhbhum 105 persons were arrested for breach of excise laws, viz., 94 by police and 11 by excise officers, and 92 of these were convicted. The information given in the diaries of the inspecting staff, which came under my observation, was full, and shows that the Inspectors were usefully employed.

## XX—STAMPS.

78. The following comparative statement shows the receipts under the stamp laws in the several districts of the Division during the past two years:—

DISTRICTS.	1892-93.				1-93-94.			
	Receipts from stamps of all kinds.	Miscellaneous receipts.	Duty and penalty.	Total.	Receipts from stamps of all kinds.	Miscellaneous receipts.	Duty and penalty.	Total.
1	2	3	4	5	6	7	8	9
Hazari-bagh ... ..	Rs. 83,414	Rs. 1,072	Rs. 302	Rs. 84,788	Rs. 1,01,321	Rs. 1,207	Rs. 614	Rs. 1,03,202
Lohardaga ... ..	1,12,270	1,546	401	1,14,207	1,24,402	1,730	627	1,26,759
Palamau ... ..	25,700	202	116	26,198	29,087	367	242	29,696
Manbhum ... ..	1,56,220	1,003	667	1,58,600	1,57,358	2,038	516	1,59,912
Singhbhum ... ..	17,880	380	126	18,406	17,822	465	58	18,345
Total ... ..	3,05,592	5,203	1,422	4,02,307	4,29,090	5,807	2,057	4,37,914

Taken as a whole, the results of the past year, when compared with those of the previous one, appear to advantage. The gross revenue of the Division amounted to Rs. 4,37,914, against Rs. 4,02,307 in the previous year. The total

charges incurred during the year amounted to Rs. 10,791, against Rs. 8,530 in 1892-93 as detailed below:—

		1892-93.	1893-94.
		Rs.	Rs.
Hazaribagh	...	1,991	2,210
Lohardaga	...	2,073	2,650
Palamau	...	606	733
Manbhum	...	3,561	4,343
Singhbhum	...	299	855
Total	...	8,530	10,791

The net revenue thus amounted to Rs. 4,27,123, against Rs. 3,93,777 in the previous year, showing an increase of Rs. 33,346, or 8·5 per cent. The increase is partly due to the increase in the number and value of rent and civil suits, and partly to the execution of a larger number of bonds, mortgage deeds, &c.

79. The following table shows the number of cases in which deficient stamp duty and penalty were levied under sections 34 and 37 of the Indian Stamp Act during the past two years:—

DISTRICTS.			NUMBER OF CASES.	
			1892-93.	1893-94.
1			2	3
Hazaribagh	...	...	47	84
Lohardaga	...	...	46	72
Palamau	...	...	14	43
Manbhum	...	...	53	57
Singhbhum	...	...	9	7
Total	...	...	169	263

Except in Singhbhum all the districts show an increase which is no doubt due to the increased watchfulness exercised by the Courts.

80. The number of criminal prosecutions instituted during the year for infringement of the provisions of the stamp law was 18, against 28 during the preceding year, and the number of persons brought to trial was 13 against 31, and the number of persons convicted 10 against 22. •

81. During the past year a case of stamp fraud was brought to notice in Palamau, in which old stamps were found to have been abstracted from certain records of cases already decided, and subsequently used again with the object of appropriating process fees. A thorough enquiry was held by the Deputy Commissioner, but the real culprit could not be detected. The certificate muharrir, however, who had charge of the records, and another muharrir who used to assist him occasionally in his work, were dismissed.

#### XXI.—INCOME-TAX.

82. Appendix XXIX shows the number of persons finally assessed, and the demands, collections and balances of tax and penalties imposed during the year. The total number of persons finally assessed in the Division was 4,350 against 4,316, and the total assessment was Rs. 87,243, against Rs. 83,250 in the previous year. There has thus been an increase of Rs. 3,993 in the demand

and of 34 in the number of assesses. The increase in the demand is shared by the districts of Hazaribagh, Palamau, and Manbhum, and that in the number of assesses by the first two districts only.

83. The aggregate demand, including arrears and penalties and costs, &c., amounted to Rs. 91,074, against Rs. 89,491 in the previous year. The gross collections during the year were Rs. 88,018. Excluding from this Rs. 621 on account of excess collections and advance payments, Rs. 1,221 on account of arrears of the previous year, and Rs. 1,060 on account of penalties, cost, &c., the net collections of the tax amounted to Rs. 85,116, against Rs. 81,566 in the previous year. The balance outstanding at the close of the year was Rs. 3,677.

84. The following table gives a classification of assesses who have paid tax according to incomes:—

AMOUNT OF INCOME ASSESSED.	HAZARIBAGH.		LOHARDAGA.		PALAMAU.		MANBHUM.		SINGHBHUM.		TOTAL.	
	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.
1	2	3	4	5	6	7	8	9	10	11	12	13
		Rs.		Rs.		Rs.		Rs.		Rs.		Rs.
Rs. 500 to Rs. 750 ...	845	8,427	823	6,203	501	5,005	486	4,840	217	2,159	2,672	26,643
.. 750 to .. 2,000 ...	407	8,230	336	7,129	205	4,112	274	5,775	84	1,763	1,306	26,940
.. 2,000 to .. 5,000 ...	54	4,423	55	4,014	18	1,299	64	4,951	10	749	201	15,436
.. 5,000 to .. 20,000 ...	19	4,173	9	1,580	1	182	18	4,231	4	1,018	51	11,184
.. 20,000 to .. 40,000 ...	1	549	...	...	...	...	...	...	1	609	2	1,158
.. 40,000 to .. 1,00,000 ...	1	1,064	...	...	...	...	...	...	...	...	1	1,094
.. 1,00,000 and more ...	...	...	...	...	...	...	1	2,682	...	...	1	2,682
Total ...	1,327	26,806	1,023	18,926	725	10,598	843	22,488	316	6,238	4,234	85,116

Of the total number of assesses, nearly 94 per cent. belong to classes with incomes from Rs. 500 to Rs. 2,000 per annum, and they paid about 66·1 per cent. of the tax.

85. The following table classifies the incomes on which tax has been levied during the year:—

DISTRICTS.	PART I.		PART II.		PART III.		PART IV.		TOTAL.	
	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.	Number of asses.	Tax paid.
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.		Rs.		Rs.		Rs.

Lohardaga ...	44	1,416	...	...	...	...	979	17,510	1,023	18,926
Palamau ...	6	88	...	...	...	...	719	10,510	725	10,598
Manbhum ...	32	1,278	...	...	...	...	811	21,210	843	22,488
Singhbhum ...	12	456	...	...	...	...	304	5,782	316	6,238
Total ...	144	4,827	5	632	...	...	4,085	79,657	4,234	85,116

The figures in columns 3 and 5 do not represent the entire amount of tax levied in the Division under Parts I and IV, as the tax on salaries and pensions of Government officials are adjusted in the office of the Accountant-General, and several companies who work mines or carry on business in the Division pay their tax in Calcutta and other places. Part III is blank, as the tax under that part is levied by the Accountant-General, Bengal, direct.

86. The following table shows the results of objections preferred against the assessments made:—

DISTRICTS.	Number of objections filed.	Number of objections in which the original assessments were upheld.	Number of objections in which the assessments were modified.	Number of objections in which the assessments were cancelled.	Number of objections pending at the close of the year.	Percentage in which the original assessments were upheld.
1	2	3	4	5	6	7
Hazaribagh ...	171	118	27	26	...	69.0
Lohardaga ...	76	45	17	14	.....	59.2
Palamau ...	141	95	26	20	.....	67.3
Manbhum ...	161	107	22	32	.....	66.4
Singhbhum ...	31	28	.....	3	.....	90.3
Total ...	580	393	92	95	.....	67.9

Of the 4,451 persons originally assessed to tax in the Division, 580 filed petitions of objection, the percentage of objections to assessments being 13.03, against 12.4 in the preceding year, but the percentage of objections rejected to those preferred was 67.9 against 62.4. Most of the objections were made under part IV, and related to assessments of persons having incomes ranging from Rs. 500 to Rs. 750. Out of the 580 objections filed during the year, in 393 the petitions were rejected, in 92 the assessments were modified, and in 95 the assesseees were entirely exempted, against 346, 79, and 129, respectively, in the previous year. The number of objections is fairly high, but is no precise measure of the public feeling with regard to the assessment. There are some who object on principle year after year, notwithstanding repeated failures, in the bare hope that the wheel of fortune may turn in their favour, and in the case of an increased assessment, there is almost certain to be an appeal. The incidence of the tax is really very light, and when moving about the districts and freely associating with the people, only once in the course of five years has a complaint been made to me on the subject, and that came from an indignant Kabuli, who, as an itinerant trader, thought himself beyond the reach of our fiscal system.

#### XXII.—MONETARY ARRANGEMENTS.

87. The following table compares the receipts and disbursements in the district treasuries during the last two years:—

DISTRICTS.	Receipts.		Disbursements.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	16,44,902	18,16,747	16,51,364	17,02,914
Lohardaga ...	15,56,506	16,22,689	15,75,498	15,37,817
Palamau ...	5,63,871	7,63,974	5,62,617	7,92,246
Manbhum ...	16,35,912	15,97,781	16,82,073	16,71,654
Singhbhum ...	6,57,669	7,10,277	7,08,559	7,17,777
Total ...	60,58,860	65,11,468	61,80,111	63,22,408

There was an increase in the receipts in all districts except Manbhum. The increase in Hazaribagh is due to remittances from encumbered estates, chiefly the Karharbari estate, in which the sale of a number of villages in order to secure the estate's solvency brought in a large sum to the treasury. The increase in Lohardaga is due to the gradual development of the excise revenue, as well as to the estate of the minor Thakur of Jeriu being brought under the management of the Court of Wards. The increase in Palamau and Singhbhum indicates the growing importance of the districts. The decrease in Manbhum is due to the discontinuance of the practice of remitting the surplus money from the Sirguja post-office to the Manbhum Treasury.

88. The subjoined table compares transactions in currency notes:—

DISTRICTS.	Receipts.		Issues.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	2,92,515	3,86,755	2,66,120	3,46,990
Lohardaga ...	4,10,800	3,62,140	4,17,520	3,59,260
Palamau ...	1,99,155	2,96,388	2,19,775	2,99,180
Manbhum ...	5,75,820	5,21,645	6,71,350	4,85,945
Singhbhum ...	2,47,100	2,40,395	2,61,955	26,582
Total ...	17,25,390	18,07,323	18,39,720	15,17,957

There was an increase in the receipts in Hazaribagh and Palamau, due in the former district to the payment of public dues, and in the latter chiefly to favourable lac harvests, the traders and mahajans freely exchanging currency notes for silver to enable them to carry on their dealings. The decrease in the other three districts is probably due to the facilities given by the Bengal-Nagpur and Jharia railway lines to bring cash instead of currency notes for the purchase of the raw products of the district. The decrease in issues is largest in Manbhum, and is due to the fact that in the previous year a remittance of Rs. 4,22,500 in currency notes was made from Purulia to the reserve treasury, against Rs. 1,65,900 only of the year under report.

89. The following table shows the transactions in the Post Office Savings Bank:—

DISTRICTS.	1892-93.		1893-94.	
	Amount deposited.	Amount withdrawn.	Amount deposited.	Amount withdrawn.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	52,360	35,187	55,024	39,117
Lohardaga	63,209	41,162	53,211	42,446
Palamau	15,585	7,736	22,534	9,237
Manbhum	73,851	68,235	76,131	63,951
Singhbhum	31,155	23,513	33,654	23,837
Total ...	2,36,160	1,75,863	2,40,584	1,78,588

Lohardaga shows a large decrease in the amount deposited as compared with the previous year. This is due to the fact that in that year large sums were deposited in the Ranchi Post Office Savings Bank on account of the Lady Dufferin Fund. The fluctuations in the amounts deposited and withdrawn in the other districts do not call for any remarks.

90. The following table exhibits money-order transactions:—

DISTRICTS.	1892-93.		1893-94.	
	Issued.	Paid.	Issued.	Paid.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	7,40,653	6,32,226	6,48,560	5,88,336
Lohardaga	8,03,977	3,38,955	7,78,157	3,84,853
Palamau ...	1,49,279	1,03,192	2,24,999	1,51,290
Manbhum...	5,83,584	2,96,096	6,76,776	3,08,617
Singbhum	4,71,533	2,68,764	5,14,690	2,18,521
Total	27,49,026	16,39,233	28,43,152	16,51,617

The falling off in Hazaribagh and Lohardaga is attributed to a decline in the cooly-recruiting business, and to the public generally receiving and sending remittances by means of registered and insured letters, as evidenced by a considerable increase in the number of registered and insured letters during the year. In Manbhum the increase in money-order transactions is attributed to the growing popularity of the system.

91. The Chota Nagpur Banking Association, Limited, continues to be the only bank in the district of Hazaribagh. It is a joint-stock company registered under Act XI of 1882. During the year under report the nominal capital of the Company was raised from Rs. 20,000 to Rs. 50,000. The paid-up capital of the Company at the close of the year was Rs. 37,630 and Rs. 11,854 were in the Reserve Fund, together making a total of Rs. 49,484. The business of the Company is chiefly confined to money-lending and to discounting bank cheques. The deposits of the year increased the funds of the Association from Rs. 2,19,738 to Rs. 3,08,906. The gross income of the Association amounted to Rs. 23,040, and the expenditure to Rs. 13,955, giving a net profit of Rs. 9,085. Out of this sum, Rs. 5,644 were distributed among the shareholders as dividends at 15 per cent., and the balance (Rs. 3,441) was credited to the Reserve Fund. In addition to the amount paid as dividends, Rs. 18,739 were paid as bonus to the shareholders out of the Reserve Fund of the year 1892-93. The total amount of loans granted during the year was Rs. 2,23,002, against Rs. 1,37,342 in the previous year. The amount unrealised, including the outstanding of the previous year, was Rs. 1,60,690, namely, Rs. 1,41,572 on account of principal and Rs. 19,118 on account of interest. Deposits amounting to Rs. 1,96,824 were received during the year, and Rs. 1,19,998 were refunded. In addition to the branch office at Giridih, the Company opened another branch office at Chatra.

#### XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

92. The Jharia extension of the East Indian Railway, referred to in paragraph 100 of the previous report, is almost complete. The road has been finished and rails have been laid up to Katras, and station buildings are now being erected. Material trains ran up to Katras during the year. The line has been opened for coaching and goods traffic with effect from the 20th May 1894. The Chanch branch of the East Indian Railway is still under construction, and it will take some time more before the line is open. The Bengal-Nagpur Railway Company run two "up" and two "down" trains daily, and better

time is now kept than formerly, though the line is still worked on the same cheap system as before. The application for a concession to lay and work a steam-tramway between Purulia and Ranchi, referred to in last year's report, was returned to the applicant for revision under Government orders specifying the lines on which it should be prepared. It has recently been received back, and the proposed scheme is under examination. The District Engineer of the Bengal-Nagpur Railway, stationed at Purulia, is also desirous of preparing a scheme, and I have supplied the Chief Engineer and Agent to that line with information regarding the traffic to be expected, to enable him to decide whether the line would pay. I may repeat what I have said before, that a rail or tramway to Purulia would enable Ranchi, with its moderate temperature and not over-abundant (though sufficient) rainfall, to become a sanitarium from July to October, when the heat and moisture of the plains are particularly trying and exhausting.

In Hazaribagh 24 bandhs or irrigation reservoirs were constructed, repaired or improved in the Government estates at a cost of Rs. 2,585-8-2. Sixteen other bandhs and one pucker well were also constructed in the Government estates at a cost of Rs. 1,469-15 for the supply of good drinking-water. In Lohardaga the District Road Cess Committee improved twelve natural springs by protecting them with masonry walls. These springs supply drinking-water to the inhabitants of the places where they are situated. The Mahta bandh in Manbhum was completed during the year at a total cost of Rs. 2,478. The enlargement of the Madhub Bandh in the Purulia town is approaching completion.

## XXIV.—COMMUNICATIONS.

93. The following roads are maintained by the Public Works Department in this Division:—

- |                                |                              |
|--------------------------------|------------------------------|
| (a) Provincial roads.          |                              |
| (i) Giridih-Dumri road.        | (iv) Barhi-Hazaribagh road.  |
| (ii) Grand Trunk road.         | (v) Hazaribagh-Ranchi road.  |
| (iii) Bagodar-Hazaribagh road. | (vi) Ranchi-Purulia road.    |
|                                | (vii) Ranchi-Chaibassa road. |

The surface of the road between Giridih and Dumri, particularly the portion between Giridih and Chirki, is reported by the Deputy Commissioner of Hazaribagh to be cut up in many places owing to heavy cart traffic. Colonel Garbott is of opinion that unless trap is used as road metal in place of quartz, this road will need constant and extensive repairs. The Khako bridge, which collapsed in August last, has been reconstructed, and will shortly be opened for traffic. The stone causeway across the bed of the Barrakar river needs improving, as the surface is very rough, and the large rocks at the heads of the ferry crossing need to be blasted and removed, as they cause much damage to the ferry boats, particularly in rough weather owing to the velocity of the stream. The Grand Trunk road was maintained in fair condition. It has a metalled surface of 9 feet width in the centre of a crest 30 feet wide. The 31st and 32nd miles of the Bagodar-Hazaribagh road should, like the other portion of it, be metalled with quartz, as the present gravelled surface cannot resist heavy traffic. These two miles are very heavy, and almost impassable during the rainy season.

It is proposed to construct a stone causeway across the bed of the Damodar river on the Hazaribagh-Ranchi road in order to facilitate traffic. and an estimate amounting to Rs. 12,330 has been sanctioned for the purpose.

The metalled surface of the Barhi-Hazaribagh road is worn and rough in many places, owing to the heavy traffic.

In Lohardaga the approaches of the three rivers, Subarnarekha, Kanchi and Tajna, have been eased and the survey of the road from Ranchi to the Kalinga Railway station *via* Basia and Lodhma has been completed. The timber top of a bridge on the 5th mile of the Ranchi-Chaibassa road was also reconstructed during the year.

In Manbhum the two provincial roads, viz., Purulia to Barrakar and Chas to Golbora, were transferred to the District Road Committee during the year under report.

The road from Chaibassa to Chakradharpur was maintained in a thoroughly efficient condition, and carriages drawn by animals are now plying between the two places to the great relief and convenience of travellers. The third section of the Ranchi-Chaibassa road from Chakradharpur to Bandgaon was under construction, and a portion of it in the plains (about 11 miles in length) has been opened out for traffic.

94. *Original works.*—In Hazaribagh an inspection bungalow has been constructed at Doodhimati on the Gola and Dakurgurha road at a cost of Rs. 399, and a pucca well is being sunk at Jubra on the Balumath and Sherghaty road at a cost of Rs. 120. Two inspection bungalows have also been commenced on the Gaya and Deoghur Pilgrim road at Nasirganj and Khejari respectively. No other original work could be taken in hand for want of funds.

In Lohardaga the Road Cess Committee provided Rs. 10,500 in the budget estimate for the year 1893-94 for the construction of a road from Chapka to the boundary of the district towards the Sirguja Political State, but owing to their funds being inadequate, the proposal was subsequently abandoned. The fact is a large expenditure is not required for this road. All that is necessary is to mark it out and level the surface, and if a certain portion is taken up each year and treated in this way, the cost will not be great. A sal-wood railing, 120 feet in length, at the approaches of the Pandra bridge on the 4th mile of the Ranchi-Lohardaga road, was constructed during the year.

The original works constructed were a 20 feet bridge on the Manatu road, two small culverts on the Hariharganj road, and two diversions on the Manatu road. This road has been practically reconstructed from Manatu to Eghara, so that it is now passable for carts and wheeled traffic up to the Hazaribagh border. Plans and estimates were also prepared for the construction of a new road, 32 miles in length, from Gurhwa to Sirguja.

In Manbhum a feeder road to the Bengal-Nagpur Railway, from Bagmundi to Bularampur, 18 miles in length, was commenced during the year. Rupees 17,056 was sanctioned early in April 1893, but the District Road Committee was unable to grant more than Rs. 3,500 for it. A contribution of Rs. 2,500 has since been made from the Estates Improvement Fund under the disposal of the Board. The road passes through jungles and over hills, and when complete will open out a large track of country which is still very backward.

In Singhbhum the principal items of original works executed were gravelling heavy portions of the Chaibassa-Band road, the Chaibassa-Anda road, the Chaibassa-Jagannathpur road, and Chakradharpur-Koksinga road, and the construction of a masonry bridge at Ghatsilla at a cost of Rs. 1,500. The Subarnarekha ghát-cutting has nearly been finished, and the expenditure incurred on it up to the end of 1893-94 amounted to Rs. 4,203.

95. *Repairs.*—In Hazaribagh 34 miles of metalled, 65 miles of gravelled, 402 miles of fair-weather, and 78 miles of village roads were maintained at a total cost of Rs. 34,485, against 34 miles of metalled, 73 miles of gravelled, 420 miles of fair-weather, and 190 miles of village roads maintained at a cost of Rs. 41,271 in the previous year. In Lohardaga 451 miles of district roads were thoroughly repaired at a cost of Rs. 25,628.

The repair works consisted chiefly of gravelling, turfing, surface-dressing, sloping banks of streams, and repairing and renewing temporary bridges. Ten miles of new village roads were constructed in this district in place of village tracks, and two miles were gravelled over, and over 145 miles were kept up passable by petty repairs at a cost of Rs. 5,611. The income of the Lohardaga Road Cess Committee was Rs. 42,910, of which Rs. 34,711 was made available for improvement and repair of roads.

In Palamau, out of Rs. 10,000, the budget grant for roads in class III, Rs. 8,887 was expended in repairs.

In Manbhum the District Road Committee took up the repair works of 30 roads of a total length of  $403\frac{1}{3}$  miles at a cost of Rs. 27,731. The Subdivisional Officer of Gobindpur wishes some of the main roads to be bridged, but is doubtful whether the funds will permit of the outlay. Mr. N. Warde-Jones has managed to improve the condition of some of the village tracks with the assistance of the villagers.

96. *Arboriculture*.—In Hazaribagh 4,242 existing trees were maintained and 230 new ones planted out during the year at a cost of Rs. 597, which includes Rs. 84 (spent on the maintenance of a nursery at Hazaribagh containing nearly 1,600 plants).

In Lohardaga 1,189 seedlings of karanj, mango, teak, mahogany, jack, jamûn, and tûn were newly planted, and all the existing roadside trees were maintained. One thousand three hundred and ninety-two new bamboo-gabions of approved size and 1,633 of smaller dimensions were supplied for the protection of young trees. A nursery was kept up at Ranchi, where 881 seedlings were raised, consisting of teak, mango, jack, mahogany, mohwa, karanj, sal, tûn, peepal, jamûn, bar, and tamarind. A small nursery was also maintained in the compound of the road cess bungalow at Lohardaga, where 95 plants were grown. The total expenditure on arboriculture amounted to Rs. 1,802. In Palamau 250 seedlings were transplanted and 400 gabions of an improved pattern were made and put down for the protection of existing roadside trees. A number of karmaini and asoke seedlings were transplanted from brier in the Deputy Commissioner's compound into the nurseries, but the latter have perished. The two nurseries contain now several hundreds of seedlings, which should be fit for transplantation in another year or so. In Manbhum four miles of road in the Chas-Gûlbera line were under tree plantation, and 123 young trees were maintained and 426 trees planted. Two nurseries have been started in the compounds of inspection bungalows, each with 500 seedlings. In the Purulia-Barrakar road 100 trees were established and 1,110 newly planted. For the district roads a nursery has been opened in the compound of the Jubilee Town Hall, containing 1,000 seedlings of indigenous and exotic plants. The total expenditure on arboriculture was Rs. 1,847 (Rs. 297 from District Road Fund and Rs. 1,550 from Provincial Funds). In Singhbhum 976 young trees were planted on the first four miles of each of the Chaibassa-Subarnarekha, Chaibassa-Bend, and Chaibassa-Jagarnathpur roads. These trees were provided with gabions of stone and earth, and were generally well protected.

97. The subjoined table shows the receipts from ferries in the several districts of the Division, during the past three years:—

(c) Ferries.

DISTRICTS.	Names of ferries.	Receipts.		
		1891-92.	1892-93.	1893-94.
1	2	3	4	5
Hazaribagh	Damudar	Rs. 378	Rs. 425	Rs. 500
	Barrakar	795	800	851
	Total	1,173	1,225	1,351
Manbhum	Hijooli	300	310	618
	Chinakari	100	100	168
	Telkupi	2	2	2
	Sarisakuri	5	5	5
	Manikui	100	55	53
	Total	507	472	846

In Lohardaga the ferry of the Subarnarekha on the Old Purulia road has been abandoned since the construction of the new bridge.

#### XXV.—WORKING OF THE LODGING-HOUSE ACT.

98. The Act is not in force in this Division.

## XXVI.—EDUCATION.

99. The following statement compares the number of schools of all kinds in this Division during the past two years and the number of pupils attending the same:—

SCHOOLS.	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
<i>Public Institutions.</i>				
High English schools ... ..	7	1,268	7	1,303
Middle „ „ ... ..	26	1,752	32	2,130
Middle vernacular ... ..	34	2,073	30	1,865
Upper primary ... ..	95	4,461	110	5,234
Lower „ ... ..	1,814	49,698	1,896	52,147
Special ... ..	32	252	44	311
Female ... ..	116	3,212	136	3,633
Total of public institutions ...	2,124	62,716	2,245	66,623
<i>Private Institutions.</i>				
Arabic or Persian ... ..	35	432	27	350
Sanskrit ... ..	10	148	13	147
Elementary—				
Teaching vernacular only ... ..	77	521	84	594
Teaching the Koran ... ..	5	81	3	89
Other schools ... ..	3	88	.....	.....
Total of private institutions ...	130	1,270	127	1,180
GRAND TOTAL ...	2,254	63,986	2,372	67,803

The total number of schools of all kinds was 2,372, against 2,254 in the previous year, showing an increase of 118 schools. Public institutions increased from 2,124 to 2,245, and the number of pupils from 62,716 to 66,623. The largest gain has been in lower primary schools. There has also been a satisfactory increase in the number of girls' schools. There was no fluctuation in the number of high English schools, but the number of pupils attending them rose from 1,268 to 1,303, middle English schools have advanced from 26 with 1,752 pupils to 32 with 2,130 students, while middle vernacular schools have declined from 34 to 30, and their pupils from 2,073 to 1,865.

100. The subjoined statement shows the fluctuations in the number of schools of all classes and in that of the pupils attending them during the last two years, district by district:—

NAMES OF DISTRICTS.			1892-93.		1893-94.	
			Schools of all classes.	Pupils.	Schools of all classes.	Pupils.
1			2	3	4	5
Hazaribagh	...	...	534	15,867	548	16,059
Lohardaga	...	...	492	12,569	601	14,482
Palamau	...	...	200	4,317	197	4,585
Manbhum	...	...	622	15,578	606	15,394
Singhbhum	...	...	406	15,655	420	17,283
Total	...	...	2,254	63,986	2,372	67,803

The increase in the number of schools and pupils is chiefly noticeable in the district of Lohardaga. Hazaribagh and Singhbhum show only slight advances, while the remaining districts show a small decline. The Singhbhum district, though backward in many respects as compared with the other districts except Palamau, has the largest number of pupils attending the schools.

101. The results of the last Entrance Examination were very favourable. Out of 56 candidates who appeared in the examination, 30 were successful, 6 being placed in the first and 12 each in the second and third divisions. Of the seven high English schools which sent up candidates for competing in the examination, the best results were obtained by the Ranchi Zilla School, in which out of the 17 candidates sent up, 10 passed, viz., 4 in the first, 2 in the second, and four in the third division. Three of the Ranchi boys have obtained scholarships, one taking the ninth place in the list of successful candidates, and thus obtaining one of the ten first-grade junior scholarships thrown open to general competition in the province, another obtaining a second-grade scholarship, and third a third-grade scholarship. For the first time in the history of English education in Chota Nagpur a boy of the Ranchi Zilla School has obtained a junior scholarship of Rs. 20 a month. The credit of this and of the general excellent result in Ranchi is due to the exertions of the Head Master, Babu Kesab Lal Basu, who is a good teacher and disciplinarian. The fortunate candidate is Nagendra Nath Ghosh, the son of my Personal Assistant; and now that his name comes before me, I recollect at the last prize distribution having had the pleasure of handing to him a number of valuable books which he had won by his ability and diligence. Out of 19 boys who competed from the Purulia School, 11 passed, viz., 1 in the first division, 6 in the second, and 4 in the third. Hazaribagh passed four boys, viz., one in the first, two in the second, and one in the third division. One of the Hazaribagh boys has obtained a second-grade junior scholarship, and another a third-grade scholarship. Of the 30 boys who passed the Entrance Examination, 28 are Hindus, 1 a Muhammadan, and 1 an aboriginal Christian. This last passed the examination from the Ranchi School.

102. The middle English schools have advanced from 26 to 32, and their pupils from 1,752 to 2,130. Out of 32 middle English schools which existed in the Division during the past year, only 19 sent up 59 candidates for the last middle scholarship examination, of whom 25 from 14 schools were successful, viz., 17 with middle English and 8 with middle vernacular certificates. The results were not satisfactory. There has been a decline of 4 schools and of 208 boys under head "Middle vernacular schools." Out of 30 middle vernacular schools, 17 are departmental and 13 aided. The departmental schools are thus distributed—4 in Hazaribagh, 4 in Lohardaga, 1 in Palamau,

3 in Manbhum, and 5 in Singhbhum. Of the 13 aided institutions, 1 is in Lohardaga, 1 in Palamau, 9 in Manbhum, and 2 in Singhbhum. Twenty-six schools sent up candidates for the middle vernacular scholarship examination, viz., 16 departmental and 10 aided. Seventy-eight candidates competed at the examination, of whom 39 passed. The successful pupils were 22 from the departmental schools, and 17 from aided institutions.

103. The number of upper primary schools increased from 95 to 110. The increase of 15 schools was brought about by an increase of 3 institutions in Hazaribagh, 5 in Lohardaga, 2 in Palamau, 2 in Manbhum, and 3 in Singhbhum. Of the 110 upper primary schools, 78 sent up 186 candidates, against 75 schools and 155 candidates in the previous year. Of these, 75 were successful from 47 schools at the last examination, against 78 from 53 schools in 1892-93. The percentage of competing to successful schools and scholars for the year under report was thus 60·2 and 40·3 respectively. On the result of this examination seven upper primary scholarships were awarded, viz., two to Hazaribagh, two to Manbhum, and one to each of the other three districts.

104. Under the head of lower primary schools there were 1,608 aided and 278 unaided schools, against 1,543 aided and 271 unaided schools in the previous year. The increase of 72 schools and of 2,449 pupils was distributed thus—Hazaribagh, 12 schools and 75 boys; Lohardaga, 60 schools and 1,288 pupils; Palamau, 6 schools and 243 pupils; and Singhbhum, 8 schools and 1,120 pupils. Manbhum has lost 14 schools with 277 pupils. The gain in Lohardaga is marked, and is creditable to the Deputy Inspector, Babu Kalikananda Mukherjee. Altogether 1,626 candidates were sent up from 683 schools in the lower primary examination, of whom 683 from 382 schools were successful.

105.

## FEMALE EDUCATION.

DISTRICTS.	UPPER PRIMARY GIRLS' SCHOOLS.		LOWER PRIMARY GIRLS' SCHOOLS.	
	Number of schools.	Number of pupils.	Number of schools.	Number of pupils.
1	2	3	4	5
Hazaribagh ...	2	97	34	951
Lohardaga ...	4	247	26	411
Palamau ...	...	...	5	82
Manbhum ...	5	146	9	183
Singhbhum ...	2	125	49	1,391
Total ...	13	615	123	3,018

The number of girls' schools has advanced from 116 to 136, and their pupils from 3,212 to 3,633. The increase is thus contributed—Hazaribagh, 2 schools and 60 pupils; Lohardaga, 9 schools and 125 pupils; Manbhum, 2 schools with a loss of 1 pupil; Singhbhum, 8 schools and 272 pupils; and Palamau, loss of 1 school and 35 children. In the upper primary scholarship examination 16 girls competed, of whom 8 passed and 2 obtained scholarships. In the lower primary scholarship examination 87 girls competed; of whom 53 were successful, against 82 and 71 respectively.

106. On the 31st March last the Ranchi Industrial School had on its rolls 27 pupils, against 24 in the previous year. The school continues to improve under Mr. D'Silva, the Superintendent. During the past year the income from the sale-proceeds of manufactured articles amounted to Rs. 1,139, against Rs. 503 in 1892-93. Hindi reading and writing, a little arithmetic, as well as sketching, free-hand and lineal drawing, are being taught regularly by the munshi and the

Superintendent. The latter appears to be a practical man who has sound ideas about instructing the boys and getting a good quality of work out of them, and now that he has been provided with a house as his residence close to the school and is settled down, there is every chance of the school thriving. There is however, a constant difficulty which has to be overcome of obtaining a sufficient supply of timber—a matter which the Managing Committee will do well to look to.

107. The cost of education during the past two years is compared below—

	1892-93.			1893-94.				
	EXPENDITURE FROM PUBLIC SOURCES.		Expenditure from private sources.	Total.	EXPENDITURE FROM PUBLIC SOURCES.		Expenditure from private sources.	Total.
	Provincial revenue.	Municipal Fund.			Provincial revenue.	Municipal Fund.		
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Secondary ... ..	27,433	1,797	48,284	77,464	27,333	1,556	50,995	79,884
Primary ... ..	48,763	872	70,128	1,19,563	48,862	1,470	71,239	1,21,631
Female ... ..	5,749	374	7,655	13,778	6,269	398	8,076	15,343
Special ... ..	7,103	.....	1,037	9,040	7,240	.....	2,019	9,259
Scholarships ... ..	6,859	.....	594	7,454	6,012	.....	502	7,444

Furniture and apparatus ... ..	1,054	.....	.....	1,054	.....	.....	149	1,025
Miscellaneous ... ..	9,996	29	489	9,914	9,045	39	485	9,569
Superintendence ... ..	30,937	.....	261	37,198	37,881	.....	288	38,169
Total ... ..	1,46,901	3,047	1,31,450	2,80,498	1,48,731	3,525	1,35,959	2,88,215

There has been an increase of Rs. 7,717 in the total educational expenditure of the Division. The increase of Rs. 2,730 in the expenditure from provincial funds was under the heads of buildings and superintendence, due to the erection of additional rooms in connection with the Ranchi Zilla and Industrial Schools as well as to the entertainment of the services of a second Inspector of Schools in Palamau. There has been an increase of Rs. 822 in the expenditure from municipal funds. The increase of expenditure from private sources, from Rs. 1,31,450 to Rs. 1,35,959, is satisfactory.

108. For a backward country like Chota Nagpur, the educational results may be regarded with a certain amount of satisfaction. The principal need is an extension of primary education, and the addition of 89 primary schools to the list, though not much to boast of, is a healthy indication of progress. It is also satisfactory to find that the municipal grants to these institutions have more than doubled, though some further aid from this source may be reasonably expected. There has also been a fair advance in female education. The aim of Government being to cheapen education in all elementary schools, I should like to see some real effort made to lessen the number of books required and to reduce the cost—a subject touched upon in paragraph 116 of my report last year. The population being mostly agricultural, there is frequently a difficulty in securing the attendance of boys in the cultivating season, and in distant tracts an attempt to open a school will sometimes arouse the strongest opposition from parents who require their children's aid both in the tilling of the ground and the pasturing of cattle. There has, however, notwithstanding these drawbacks, been a marked increase in the number of aboriginal boys of all classes attending school, and as regards these, a considerable share of the educational work (22 per cent.) is borne by the various missions. There was a great falling off of aboriginal pupils in the Ranchi Government School, owing to the imposition of fees from the sixth class downwards. I had to point out that this imposition was not only ill-advised, but was contrary to the direct orders of His Honour the Lieutenant-Governor, and the order having been withdrawn, it is expected that the number of aborigines attending the school will increase.

It is a healthy sign that increased attention is being paid to physical exercises—cricket, football, hockey, and performances on the parallel bars. In all these games the boys of the Ranchi Anglican Mission School come well to the front, thanks to the exertions of the Rev. E. H. Whitley. They play hockey so effectively as to be more than a match for a picked team of officers and men of the regiment at Doranda, and they enter into the contest—unquestionably a

very severe one—with such vigour and pluck that they can afford to smile at the Purulia Head Master's description of the danger of the ancient game of tipcat—“The last-named is nevertheless a dangerous sport, and can, at any moment, give rise to accidents. The missile that has to be thrown violently, as a ball is done in the case of cricket, by one of the players, and is tried to be intercepted by several others when passing through the air, is made of a piece of hard wood of the size of a weaver's shuttle. If this happen to strike at the head of some one of the players, it might cause a severe wound, and perhaps kill him on the spot.”

#### XXVII.—DISPENSARIES AND HOSPITALS.

109. No new dispensary or hospital was opened during the past year in any of the districts of this Division. Those that exist are situate in the towns of Hazaribagh, Chatra, Barhi, and Giridih in Hazaribagh, Ranchi and Lohardaga, Daltonganj in Palamau, Purulia, Pandra, Gobindpur, Topchansi, Raghunathpur, Jhalda, Jharia, and Barabazar in Manbhum, and Chaibassa in Singhbhum. The dispensaries at Hazaribagh, Chatra, Ranchi, Purulia, Raghunathpur, Jhalda, and Chaibassa are maintained chiefly by the several municipalities of those places. The rest are supported either by private individuals or by local subscriptions.

110. The annexed statement (No. XXXI) gives the income derived by the several dispensaries of the Division from different sources, the number of in and out-patients treated in them, and the total cost incurred in maintaining them. The total income of the dispensaries mentioned above amounted to Rs. 18,288, out of which Rs. 7,252 was contributed from municipal funds and Rs. 9,288 from private subscriptions and donations; while only Rs. 1,748 was contributed by Government, against Rs. 7,107, Rs. 7,724, and Rs. 1,372, respectively, in the previous year. In the case of the majority of the dispensaries, the Government contribution consisted of diet expenses in police cases and the cost of registers and forms supplied from the Government stores. Altogether 1,386 in-patients and 50,543 out-patients were treated in the dispensaries mentioned above, against 1,274 and 43,736 in 1892-93. The daily average of in-patients was 60.09 and of out-patients 418.85, against 56.69 and 383.53 in the previous year. The average cost of diet per in-patient was only one anna and  $8\frac{3}{4}$  pies, against one anna and 9 pies in the previous year. The total expenditure incurred in the maintenance of the dispensaries amounted to Rs. 16,903 in round numbers, against Rs. 15,397 in the previous year. In Hazaribagh the municipal dispensary at Hazaribagh was in charge of a second-grade Civil Hospital Assistant on a monthly salary of Rs. 35. The income of the dispensary amounted to Rs. 1,644, and the expenditure to the same amount. Sixteen major and 198 minor operations were performed in the dispensary during the year, against 11 major and 211 minor operations in 1892. The Chatra Dispensary was also in charge of a native doctor, who received Rs. 35 per month from municipal funds and Rs. 10 per month from Government for looking after police patients of four thanas. The number of minor operations performed in this dispensary was 77, against 66 in 1892. The Barhi Dispensary was in charge of a native doctor who received Rs. 30 per month from the Dispensary Fund, which was contributed mainly by subscriptions paid by the European and native gentlemen residing in the neighbourhood.

111. The dispensary at Giridih was in charge of the Assistant Surgeon in medical charge of the Giridih subdivision, who received an allowance of Rs. 20 per mensem from the Dispensary Fund. The dispensary is supported mainly by subscriptions paid by the Raja of Serampur, the Tikait of Gowan, the Dhanwar Court of Wards' estate, and a few other zamindars of the neighbourhood. The total income of the dispensary amounted to Rs. 2,162, and the total expenditure to Rs. 910. Altogether 6,057 out-patients were treated in the dispensary during the past year, the daily average of the patients treated being 56.8. Besides the dispensary mentioned above, there are four other private dispensaries in and about the town of Giridih, three of which are supported by the East Indian Railway Company, the Bengal Coal Company, and the Raniganj Coal Association for the benefit of their employés. The fourth, which is open to the public, is managed by the Scotch Mission at Pachamba. There is also a private dispensary at Hazaribagh, which is open to the public, and is maintained by

the Dublin Mission. In Lohardaga the charitable dispensary at Ranchi was maintained at a total cost of Rs. 2,611, the bulk (Rs. 2,099) of which was contributed by the local Municipality, and Rs. 446 by private subscriptions. There was a slight decrease in the number of "in" and "out" patients treated in it on account of the comparative healthiness of the town during the year. The dispensary is in charge of an Assistant Surgeon.

112. The Lohardaga Dispensary is in charge of a Hospital Assistant, half of whose fixed salary of Rs. 25 per mensem is paid by the Government and the other half by the local Municipality. The Government also pays him Rs. 10 per mensem for police cases. The number of out-patients treated in the dispensary during the past year was 1,646, against 1,829 in the previous year, the decrease being attributed to the absence of any epidemic disease during the year under report. The dispensary subscriptions are still largely in arrears, and the Municipal office is still held in a room of the dispensary building. The Commissioners now propose to appropriate the dispensary building entirely for the purposes of their office, and to remove the dispensary to an old school-house which they have purchased in the heart of the town; but this of course cannot be permitted, as it would neither be fair to the original subscribers to the dispensary who, before the Municipality came into existence, provided the present excellent building, which stands on high ground, on an excellent healthy site, removed from the crowd, bustle, and smell of the bazar; whereas the old school-house, which, by the bye, has been purchased without any authority and for a sum considerably less than the cost of the dispensary building, is a tumble-down place, in the middle of the bazar, with a nasty cess-pit of green stagnant water behind, and most unsuitable for the treatment of sick persons. The majority of the Municipal Commissioners are mukhtars or otherwise employed at the Munsif's Court, which is near the dispensary, and that is the secret of their wish to retain the present building for their office. The Municipal Commissioners know themselves to be trespassers, and, when on tour, I explained to them that they ought in common fairness to turn out, and I offered to help them in securing a piece of land for building an office conveniently situated with regard to the catcherry. I also undertook to address certain native gentlemen, residents of the district, on the subject of their subscriptions, which are specially in arrear.

113. In Palamau the Daltonganj Dispensary was in charge of the Civil Medical Officer there. The number of both "in" and "out" patients treated in it considerably increased during the past year. The dispensary has recently been placed in charge of a Civil Hospital Assistant, and the Deputy Commissioner fears that its popularity will suffer, as patients much prefer to be habitually treated by a physician of a superior rank.

114. In Manbhum, notwithstanding the withdrawal of their subscription by Messrs. Robert Watson and Company, the dispensary at Barabazar was maintained as before mainly through the exertions of the Munsif-Magistrate there. It is the only institution of its kind on the south of the district, and its abolition will be a severe loss to the people of that part of the district. The dispensaries at Purulia, Jhalda, and Raghunathpur were maintained by the municipalities of those places. The last two are said to be gaining in popularity. The appointment of an Assistant Surgeon to take charge of the Purulia Dispensary is considered highly desirable. The dispensary at Jharia is supported entirely at the cost of the zamindar of Jharia, while that at Pandra at the cost of Babu Madhu Sudan Singh, who has succeeded to the estate of the late Maharani Hingan Kumari of Pandra. The zamindars of Katras and Nawagur are the main supporters of the dispensary at Topchansi. The Gobindpur Dispensary is maintained by private subscriptions. The last two, as being situated on the side of the Grand Trunk road, are largely resorted to by travellers.

115. In Singhbhum the Government grant of Rs. 200 per annum has enabled the Municipal Commissioners of Chaibassa to open a regular indoor ward in the Chaibassa Dispensary, and, as a consequence, the number of in-patients treated in the dispensary rose from 13 in 1892-93 to 95 in the year under report. The number of out-patients was, however, only 1,855, against 1,886 in the preceding year. Ophthalmia, malarial fevers, local injuries, skin diseases, and diseases of the ear were the chief ailments treated.

116. The Lohardaga Loper Asylum is now in charge of the Revd.

Loper asylums.

O. Gensky. It provides accommodation (1) for lepers, (2) for other incurables, and (3) for untainted children of lepers or syphilitic parents. There were 23 inmates in the asylum for lepers, 18 in the asylum for other incurables, and 7 boys and 4 girls in the house for children. The expenses during the year for the support of the lepers and incurables, for doctors and medicines, for carpenters and servants, for repairs to buildings and for children's home, amounted to Rs. 2,175.

The Purulia Loper Asylum had 127 male and 123 female inmates during the year under report. Segregation of sex is strictly observed, and 48 untainted boys and girls are kept apart from their parents and relatives. Great care is taken of these unfortunate people. The total expenditure of the institution was Rs. 11,294, of which Government contributed Rs. 100.

117. The services of the midwife formerly employed at Daltonganj were

Lady Dufferin's Fund.

dispensed with for misconduct, and her place was taken by Mussamat Massi Jaey, sent from Ranchi in September 1893. During the whole year the two midwives between them attended only seven cases of confinements, so that there is very little to show for the expenditure. The scheme has so far not proved very successful in Palamau. In Ranchi the midwife attended altogether 37 cases, out of which 17 were cases of confinement and 20 of sick-nursing. The amount of fees earned by her was Rs. 143-8.

118. Mrs. Grimley is still the Honorary Secretary of the Committee for the administration of the Marchioness of Dufferin's Fund, and looks after the management generally, but the interest taken by the native community is at a low ebb, for the last two meetings to decide on the estimates and plans for the construction of a zanana hospital at Ranchi were only attended by two native gentlemen, and one of them came under orders. The zanana hospital question hung fire for some time, owing to the non-receipt of a standard plan. When it at last arrived, it was submitted to the Committee and approved, and as Commissioner I was requested to obtain estimates from the Executive Engineer, who kindly prepared them. They have been approved, and include provision for a house for a lady-nurse; but as the Committee's funds will not suffice to meet the cost of the nurse's salary and other incidental charges, it was decided to solicit a special grant of Rs. 50 per mensem from Government.

The proposed construction of a zanana hospital at Hazaribagh will most probably have to be abandoned. To save the cost of building, Rai Jadunath Mukherji Bahadur offered to let a house for the purpose at the low rental of Rs. 12 a month. I inspected the house last cold weather, and finding it in every way suitable, as it had separate cook rooms and the necessary privacy for the inmates, and there were rooms that would serve for a residence for the lady-nurse, I talked the matter over with Dr. Kennedy, a member of the Dublin Mission, who then seemed both willing and anxious to assist in the hospital, and disposed to offer the services of a lady-nurse attached to the mission, and the result of my interview with him was that I advised the Dufferin Fund Committee to accept the offer of the house, and to invite Dr. Kennedy to become a member of the Branch Committee at Hazaribagh, and to place at his disposal all the medicines and medical appliances required for the use of the zanana hospital, and in fact to place the hospital generally under his control and management. This advice was accepted, and money was provided, but after waiting several months the Deputy Commissioner now reports that the matter has fallen through, as the Dublin Mission have declined to accept the charge, having decided to carry on a work in the Hazaribagh town itself on similar lines to the proposed zanana hospital, but entirely under their own management, and as a part of the medical mission. Upon this the Dufferin Fund Committee have come to the conclusion that there will hardly be any necessity for a separate zanana hospital under their own Branch Committee at Hazaribagh, and intend asking the donors of the Rs. 9,000 provided for its construction, if they have any objection, the funds being diverted to other districts in this Division.

#### XXVIII.—LIBRARIES.

119. The libraries attached to this office and the offices of the Deputy Commissioners of the several districts are in good order. There are some old

and useless reports in the library attached to the Manbhum Deputy Commissioner's office, which will be got rid of very soon. There are two semi-public libraries in the town of Hazaribagh, one of which is supported by the Europeans and the other by the native community of the station. The funds are raised by donations and monthly subscriptions by the residents of the town. There is a library at Ranchi attached to the club for the European members of the town. It contains an excellent collection of books of travel, biographies, historical works, and old novels. There is another public library at Ranchi supported by the native community. The Purulia Public Library, opened last year, has a few but well chosen books. The zamindar of Jharia, on attaining his majority, made a donation of Rs. 500 to the institution. The Bar library at Purulia was opened in March last. The cost of constructing the library building was paid by a local zamindar.

#### XXIX.—MUSEUMS.

120. There is no museum in this Division.

#### XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

121. The Local Self-Government Act, III (B.C.) of 1885, is not in force in any of the districts of this Division. The question of extending it to the districts of this Division, except in Singhbhum, was considered during the past year, with the result that it was considered undesirable to extend it to the districts in their present backward state. There exist Municipal, District Road, and District Education Committees at the head-quarters of each district. Giridih and Gobindpur have both a Branch Road Committee. Municipal Committees have been constituted at Chatra, Lohardaga, Jhalda, and Raghunathpur. The system by which two-thirds of the Municipal Commissioners are elected by the rate-payers and one-third appointed by Government obtains in the municipalities of Hazaribagh, Chatra, Ranchi, and Purulia. In the other municipalities as well as in the District Road and Education Committees the members are appointed by the Government. The Chairmen of all the municipalities are also appointed by Government.

Hazaribagh town has a second-class Municipality with a population of 16,672 souls, of whom 2,059 are rate-payers. Since the introduction of the election principle in 1888, only two general elections have been held, viz., one in September 1888 and the other in September 1891. During the year under report 12 municipal meetings were held at Hazaribagh, and quorums were obtained in all of them. The average attendance was 8·25, or 55 per cent., against 7·8 in the previous year. The total income of the year under report was Rs. 9,622 including Rs. 56, the balance of the previous year. The total expenditure of the year amounted to Rs. 9,233, leaving a balance of Rs. 389.

There is also a second-class Municipality at Chatra. The population of this Municipality as ascertained at the last census is 10,783, and the number of rate-payers 1,179. The third general election was held in December 1893. The total income of the Municipality during the year under review amounted to Rs. 5,896, excluding Rs. 414 on account of the balance of the preceding year. The total expenditure was Rs. 5,751, leaving a balance of Rs. 560 on the 31st March 1894. During the year under report 12 municipal meetings were held with an average attendance of 8·08, or 50·52.

The District Road Committee of Hazaribagh held two meetings, in both of which quorums were obtained. The average attendance was 6·5. The majority of the members who live in the interior take very little interest in their duties, and are deterred from coming to meetings by the distance, the risks, fatigue, and expense of the journey to head-quarters.

The Giridih Branch Road Committee held four meetings with an average attendance of 3, against 4·2 in the previous year. The Subdivisional Officer of Giridih reports that the majority of the members of the Giridih Branch Road Committee take very little interest in their duties. The District Education Committee consists of 12 members, and assembled twice during the year. The average attendance was 5.

In Ranchi the Municipal Committee held 14 meetings during the year, with an average attendance of 42·3 per cent., against 17 meetings with an

average attendance of 51·5 per cent. in the preceding year. The Lohardaga Municipality held 13 meetings during the year, against 20 in the preceding year. The income of the Municipality is very small, but the Municipal Commissioners made laudable efforts to improve the town. Street-lighting was introduced during the year. A bullock serai and two branch roads, about one-quarter mile in length, were constructed.

The Lohardaga District Road Committee held five meetings during the year with an average attendance of 40 per cent., against six meetings with an average attendance of 33·5 per cent. in the previous year. The attendance of the non-official members is reported to be unsatisfactory. The Education Committee held five meetings during the year, against four in the preceding year.

In Palamau the Municipal Committee held 26 meetings, of which 5 were adjourned for want of a quorum, 9 were Sub-Committee meetings, 3 were special, and the remaining 9 the ordinary monthly meetings. The average percentage of members attending was 43·8. The members, generally speaking, do not take much interest in the management of the town. The Dispensary Committee met eight times during the year as compared with three times in the previous year and twice in 1891. The Education Committee also held meetings. The District Road Committee held 13 meetings during the year. The average attendance out of a total number of 16 was only 7·3, or less than half. The reason is that some of the non-official members live a long way off, and that it is often inconvenient for them to attend on the particular date fixed for a meeting.

In Manbhum the Purulia Municipality is reported to have been working satisfactorily. In Raghunathpur Municipality the Munsif of Raghunathpur was formerly the Chairman, but during the year the Deputy Commissioner has been appointed Chairman. The work of the Municipality is practically left in the hands of the Vice-Chairman, who, as I saw when inspecting Raghunathpur, performs his duties satisfactorily. In Jhalda municipal matters are not so satisfactory, for although the Chairman does all he can, the Commissioners as a body are apathetic and indifferent. The work of enlarging a tank for a better water-supply of the Purulia town is still under construction. It is under the supervision of the District Engineer, and was inspected during the year by the Executive Engineer, Chota Nagpur Division, the Superintending Engineer, Western Circle, as well as by myself. The number of meetings held by local bodies during the year is given below :—

Names of Committees.	Number of meetings held.
District Road Committee	10
Gobindpur B. Road	2
Education	2
Purulia Municipality	17
Jhalda ditto	12
Raghunathpur ditto	10

There is only one Municipality in Singhbhum district, and that is at Chaibassa. It has besides the Chairman 12 Commissioners to form the Committee. The Municipal Commissioners take much interest in their duties, and owing to their attentive supervision improvement has been made in sanitation, conservancy, and collection of tax. There were 1,142 rate-payers, against 1,164 in the previous year. The Commissioners held seven meetings, with an average attendance of 6·7. At each of these meetings the attendance was sufficient to form a quorum. The office of the Chairman was held by Mr. R. H. Renny, the Deputy Commissioner. The Singhbhum District Road Committee held five meetings, attended on an average by 5·2 members out of a total number of 10. Only two or three of the members took interest in the work. The District Committee of Public Instruction held only two meetings, attended on an average by 9 out of 16 members.

122. Considering the elements of which the Municipal, Educational, and Road Cess Committees are composed, consisting for the most part of men who are aliens to the country, and beyond their own advancement have no peculiar interest in it or its people, the work of these local self-governing bodies has

been carried on with as much satisfaction and success as could, under the circumstances, be expected. In all these Committees it is a rare thing to find members selected from the people of the country. Here and there one meets with isolated instances of native gentlemen of superior intelligence and education, such, for instance, as Rai Thakurai Bhagabat Dyal Singh Bahadur of Chainpur in Palamau, Tikait Todal Narain Singh of Gawan in Hazaribagh, and Rai Raj Chandra Dass Bahadur of Cheliana in Manbhum, but the number of such indigenous products is exceedingly few. Besides Government servants, the Committees generally consist of pleaders with a sprinkling of traders and tea-planters, whose knowledge of district requirements is limited, and who are frequently too busy with their own concerns to have time to devote to the consideration of public matters. The attention is either fitful or forced, except when self-interest is concerned. Patriotism, 'partly purchased, partly pressed,' is a poor substitute for the real sentiment, but, such as it is, has to be accepted in the present backward state of the country.

#### XXXI.—EMPLOYMENT OF MUHAMMADANS.

123. Statement XXXII gives particulars of the employment of Muhammadans in the public offices of this Division. The number of gazetted appointments carrying salaries above Rs. 100 per mensem was 47, and the number of Muhammadans holding such appointments is five, or, in other words, among officials holding such posts, only one in every nine is a Muhammadan. There are only five gazetted appointments in the Division with salaries of Rs. 100 and under. None of these are held by Muhammadans. The number of ministerial appointments in the Division was 369, of which 38, or 10·3 per cent., are held by Muhammadans. The total number of menial appointments was 596, of which 190, or 31·9 per cent., are held by Muhammadans. The total number of appointments of all classes in the Division was 1,017, and of these 233, or a little less than one-fourth, have fallen to Muhammadans. The percentage of all appointments held by Muhammadans was thus larger than the percentage (5·5) which the total Muhammadan population bears to the total population of the Division, though this is an unfair comparison, seeing that the official posts are chiefly filled by aliens to the districts. There is the same difficulty here as elsewhere in getting Muhammadans sufficiently educated for appointments in the superior service. Attempts are from time to time made to induce Muhammadans to take more advantage of the facilities offered them for the education of their children in the Government schools by the offer of scholarships and by setting aside particular appointments for those among their number who may be found to be eligible, but the results are not always such as could be desired. Improvement must come from within, and if the Muhammadans are slow and apathetic and wanting in application and energy, they must expect to be passed by in the contest for official posts. The time has gone by when the head of an office can look with leniency on the shortcomings of his subordinates, merely for the sake of humouring and encouraging a particular class. The work is ever increasing in quantity and importance, and must be carried on by the best instruments obtainable, and those who show the superior intelligence, ability, and business capacity may expect promotion without distinction of class or race. Under the present high-pressure system of work there is no middle course open, however strong individual sympathies may be with those who have fallen behind in the struggle for existence.

#### XXXII.—POST-OFFICES AND TELEGRAPHS.

124. As in the previous year, the number of Imperial post-offices in Hazaribagh was 27. The mails were carried with fair regularity. The total length of lines over which mails are carried is 629 miles, of which 198 miles are paid from Imperial and 431 from Zamindari Dāk Fund. There was no prosecution under the Post-office Act. Two cases of embezzlement occurred, in which small sums of Rs. 15 and Rs. 5 were defalcated. The offenders were prosecuted and convictions obtained in both cases. The amounts embezzled were recovered from the sureties of the parties. In Lohardaga there was one important change

in the arrangement of mails. The Calcutta mails are now received twice daily instead of once as in the previous year. One new Imperial post-office was opened during the year. There were thus 17 Imperial post-offices, against 16 in the previous year, and the length of the Imperial lines was 118 miles against 114. In Palamau and Manbhum the postal arrangements remained unchanged. The Deputy Commissioner of Manbhum reports that the arrangements in the Gobindpur line are objectionable. Under the present system letters posted at Gobindpur are not received at Purulia till the third day. It is probable that the opening of the Jharia extension of the East Indian Railway will accelerate the Gobindpur mail. In Singhbhum a new postal line was opened from Chakradharpur to Bandgaon.

The introduction of the system of selling Government quinine through the post-office has not yet made much progress, though a good beginning has been made. As noticed elsewhere, in one outlying rural post-office in Palamau, viz., Husainabad, Mr. Bright noticed the sale of Rs. 24 worth of quinine during the past year. I have no doubt there will be a rapid increase in the sale of the drug as its benefits become more widely appreciated by the public.

125. In addition to the two telegraph-offices in Hazaribagh (one at Barhi and the other at Hazaribagh) a new telegraph-office was started at Bagodar. The Hazaribagh and Bagodar offices are managed by the Postal Department. The number of messages received during the year was 2,242, against 2,189 in the previous year, and the number despatched 2,456 against 2,314. In Lohardaga the Doranda sub-office was converted into a combined post and telegraph-office since July 1893. The number of messages received at and transmitted from the Ranchi office was 4,081 and 3,987 respectively, against 3,387 and 3,856 in the previous year. The increase is attributed to telegraphic communication being more largely resorted to in the cooly-recruiting business. The proposal for the construction of a telegraph line from Ranchi to Daltonganj *via* Lohardaga was dropped, as the annual guarantee of Rs. 2,500 desired by Government could not be raised. There are two telegraph-offices in Manbhum—one at Purulia and the other at Gobindpur. The number of messages received in the Purulia office was 3,138, against 3,263 in the previous year, and the number despatched was 2,884 against 2,787. No special reason can be assigned for this fluctuation. The total receipts were Rs. 2,842, against Rs. 2,801 in 1892-93. There is a 3rd-class telegraph-office at Chaibassa, the head-quarters of the Singhbhum district. The number of messages received was 816, against 810 in the previous year, and the number transmitted was 1,051 against 1,343. The income derived was Rs. 814, and the expenditure amounted to Rs. 72.

XXXIII.—ZAMINDARI DĀK, FAIRS, AND POUNDS.

126. The following statement shows the demand and collection on account of the zamindari dāk cess in each district:—

DISTRICTS.	Demand.	Collection.	Remission.	Balance.	EXPENDITURE.		Total expenditure.
					Cost of head-quarter's establishment.	Other costs.	
1	2	3	4	5	6	7	8
Hazaribagh ...	Rs. 7,697	Rs. 7,352	...	Rs. 345	Rs. 300	Rs. 5,900	Rs. 6,200
Lohardaga ...	5,924	5,924	...	...	108	5,189	5,297
Palamau ...	1,900	1,231	320	349	155	6,809	6,464
Manbhum ...	7,706	7,706	...	...	300	6,290	6,590
Singhbhum ...	2,446	2,441	...	5	...	2,672	2,672
Total ...	25,673	24,654	320	699	863	26,360	27,223

In Hazaribagh the gross demand amounted to Rs. 7,697, of which Rs. 7,352, or 95 5 per cent., were collected, leaving a balance of Rs. 345 when the year closed, which is under realization. In Lohardaga and Manbhum the entire demand was realized. In Palamau out of Rs. 1,900 there remains a balance of Rs. 349, which is in course of recovery. In Singhbhum the assessments were not calculated on any fixed rate on the sadar jama, but the sum necessary to meet the total cost of the zamindari dâk lines is levied from the landholders according to their circumstances.

127. In Hazaribagh there were 16 fairs held in different places, but in none, except those at Chatra and Madhuban, were arrangements for sanitation made. At Chatra arrangements were made for the removal of night-soil, &c., by the erection of temporary latrines at the expense of the local zamindar under the supervision of the police and the municipal authorities. At Madhuban the only sanitary arrangement needed and made was the marking off of the boundaries within which the people were not allowed to defecate. The Chatra fair is the great cattle fair of the district. In Lohardaga the Jagarnathpur fair is held on the occasion of the Hindu Car festival, and lasts for one day only. Some 9,000 people assembled at this fair during the past year. A fair was held at Ratu by the Maharaja of Chota Nagpur. It lasted for six days, and is said to have been attended by 12,000 people. A fair is also held at Moorma. During the year it was held on the 26th and 27th October, and was attended by 6,000 people. The principal articles of merchandise exposed for sale in these fairs were cloth, brass utensils, lead ornaments, and other miscellaneous goods. In Palamau the *mêla* at Daltonganj was held in February, and continued for almost a month. A fair at Hurhang is said to have been largely attended, and a number of cattle were brought for sale. In Manbhum there were only two fairs deserving the name, namely, one at Telkupi and the other at Jharibari in the Gobindpur subdivision. They are held once annually, and are nothing more than market gatherings. In Singhbhum the Chaibassa fair was held in December, and continued for a fortnight. Shop-keepers are said to have come to it from Midnapur, Bankura, and Manbhum. As usual the Government contributed Rs. 200 towards its expenses. The money was spent on the construction of corrugated-iron sheds at the *mêla*-site. There was no outbreak of any disease, though the gathering was a fairly large one.

128. The following table shows the receipts and disbursements on account of pound funds in the several districts during the past two years:—

(c) Pounds.

DISTRICTS.	Receipts.		Disbursements.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
Hazaribagh ... ..	Rs. 3,634	Rs. 3,525	Rs. 981	Rs. 1,010
Lohardaga ... ..	3,097	3,359	1,192	1,150
Palamau ... ..	4,004	5,047	519	630
Manbhum ... ..	2,227	3,262	50	72
Singbhum ... ..	1,247	940	260	278
Total ..	14,209	16,133	3,008	3,140

There were 28 pounds in the district of Hazaribagh during the past year. Of these, 2 were within municipal limits and were farmed out by the municipal authorities, 16 were managed direct, and 10 were farmed out. No complaints against the pound-farmers were brought to notice during the year. In Lohardaga all the pounds, numbering 22, were held under khas management. In Palamau there were 24 pounds, of which 2 were farmed out and the rest managed direct.

In Manbhum 2 out of the 36 pounds were held khas and the rest farmed out. In Singhbhum the number of pounds was 8 in the past year, of which 6 were managed direct, 1 was at Kera under the management of the Thakur of that place, and 1 a municipal pound.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS, STATE OF PUBLIC FEELING, AND THE PUBLIC PRESS.

129. The Kayastha Sabha at Hazaribagh, formed some time ago with the commendable object of improving the condition of the Bihari Kayasthas, has not shown any signs of

(a) Social institutions. activity or usefulness, for it held no meeting during the year. The Gorakshini Sabha still exists at Hazaribagh, but displayed no particular activity and zeal, only a few head of cattle being kept and fed at each of the asylums built at Hazaribagh, Chatra, Semaria, and Echak. The Gorakshini Sabha at Ranchi has ceased to exist. In Palaman there were two such sabhas—one at Gurhwa and the other at Hariharganj. Both are reported to be perfectly harmless institutions.

The formation of a society at Ranchi, called the Anjuman Islamiah, was recently made known to me; and after reading the prospectus, I informed the promoters that their aim and objects were excellent, that I wished them every success, and should not fail to bring the Society to the notice of Government in my annual report. The objects which the promoters have in view, as given in their prospectus, are—

(1) To give free education to such Muhammadan children generally as are sons or daughters of parents who are really too poor to afford to bear the cost of their education.

(2) To make necessary provision for board, lodging, and education for such orphans and foundlings among the Muhammadans as are unable during their minority to eke out their own livelihood.

(3) To perform, at the entire cost of the Society, the burial ceremony of such poorer classes of Muhammadans as breathe their last within the precincts of the town, without any means to meet the necessary expenses required for the same or friends or relatives to assist in the disposal of their dead bodies.

(4) To make grants to such an extent as the funds at the disposal of the Society would allow for the performance of marriage ceremony of the poorer classes of the Muhammadan girls—the marriageable daughters of parents who are found from enquiries to be held into their status by the members of the Committee to be in *bonâ fide* need of pecuniary assistance for the purpose in question.

(5) To undertake, at the cost of the Society, the erection of masjids in several parts of the town where, in the opinion of the Committee, necessity exists for them, and also to bear the cost of necessary repairs to masjids and other sacred places within the town belonging to the Muhammadan community. For the proper attainment of the first object, the Committee, composing of the leading men of the Muhammadan community in the town, have established a madrassa in the heart of the town to teach English, Hindi, and Urdu, and also to give religious instruction to the Muhammadan pupils of the institution. The madrassa has been opened since June 1893, and is at present supported by subscriptions raised among the members of the Society. The Committee stand in need of a Government grant or a grant from the Mohsin Endowment Fund, which the Committee are hopeful of obtaining from the Director of Public Instruction.

130. The only political institution in the Division is the Congress

(b) Political institutions. Committee at Hazaribagh with its branches at Ranchi, Purulia, and Giridih. Three meetings were held—one at Hazaribagh, one at Giridih, and one at Purulia—for election of delegates for the ninth Indian National Congress, held in December last at Lahore, and eight delegates attended the Congress.

131. The Deputy Commissioner of Hazaribagh does not say anything in regard to the state of feeling in that district.

(c) State of public feeling. In Lohardaga there was a slight collision between the Hindus and Muhammadans in Ranchi at the time of the Bakrid, and two persons were sent up under section 448, Penal Code. It was, however, only a storm in a teapot, though there was a disposition to magnify it into a *casus belli* between the parties by the engagement of all the local Bar on the one side, and the summoning of a barrister from outside for the other. However, I caused a hint to be conveyed to the parties that it would be adverse to their interests

to convert peaceful Ranchi into a hotbed of dissensions, and that the matter ought to be compromised. To the credit of all concerned this advice was taken.

132. Palamanu adjoins Gaya and Shahabad, and is the only district of this Division in which the cow-killing question has been taken up with any degree of warmth. Though nothing exciting happened during the year, it was hardly closed when a report reached me from Mahuadand in the south of the district bordering on Lohardaga, which showed a dangerous state of feeling on the part of the Hindus towards the Muhammadans in that part. About 400 men headed by the local landholders and assisted by a party of men from the neighbouring pargana of Burway in Lohardaga went about armed with guns, swords, and spears, and threatened the Muhammadans to burn their mosque while they were praying, that there would be a *janjilari* if they attempted to perform *kurbani*. Mr. Bright personally took up the case, and a large number of men are under trial for rioting. We were somewhat apprehensive of a renewal of hostilities at the Bakrid, but owing to the precautionary measures adopted, I have just heard that all passed off quietly.

133. In the Sonapur pargana there was a revival of the subscription movement among the sardars, which received a severe check in 1890 from the measures taken to prosecute some of the ringleaders for cheating. The object of this movement, which has been frequently described in previous reports, is briefly this. The claim of the Munda and Oraon cultivators is that because their forefathers came into the country and cleared the jungle at a time when there were no rajas or zamindars, they are in no way bound to pay rent through any intervener but direct to Government. The sardars assert the existence of a decree which has been granted by the Home Government but suppressed by the authorities out here, and subscriptions are levied with the ostensible object of procuring legal aid from Calcutta for the prosecution of their claim. I have more than once explained to the people the illusory character of the expectations held out to them, and their folly in throwing away money to no purpose, but my arguments were addressed to unwilling ears, and it seemed to me they preferred to remain in a state of delusion to having their eyes opened—*Populus vult decipi*. The advent in the spring of a Calcutta solicitor in the district, followed by that of a barrister, gave rise to all kinds of rumours as to the kind of agitation that was to be expected, but nothing happened at that time of a disturbing character; but in the autumn complaints of extortion and theft against the sardars began to be rife—a welcome indication that at last the people were becoming alive to the fact that they were being cheated. Our previous difficulty had been to get any one to come forward to complain, and it is to be hoped that the result of the prosecutions which ensued will be the suppression of the movement. On this point the Officiating Deputy Commissioner writes:—

“I am credibly informed that large numbers of people were actually ruined by the contributions they were forced to make by the sardars on pain of the destruction of their crops or expulsion from the village.

“Colonel Gordon believed that the oppression caused by the sardars is the principal reason for the flow of emigration to Assam, and not, as is so commonly asserted, the intrinsic destitution of the Lohardaga raiyats. In his opinion it is the duty of Government to leave no stone unturned in the effort to put an end once for all to the mischievous and utterly illusory propaganda of the sardars, viz., that the Mundas still possess the prescriptive and unchangeable right to the soil, and this right will still be acknowledged by Government if money is forthcoming wherewith to carry on the agitation. The sardars, as they are called, are the representatives of a peculiarly mischievous class. They are people, who in becoming Christians did not adopt this faith from any ingenuous conviction, but with an ulterior motive of the strongest and most practical kind, viz., emancipation from their obligation as tenants and the fulfilment of the illusory expectation, viz., the acquirement to the Mundas of the Chota Nagpur Raj and the abolition of all rajas, zamindars, and intermediaries of all kinds holding any place between the Government and the raiyats. These persons expected from the missionaries, in return for the obligation conferred by joining their flock, assistance in these designs, and as the assistance could not be given them to the extent they had expected and demanded, they took umbrage at the missionaries failing them, and deserted the Christian banner. These persons did not,

however, openly disavow the faith of their adoption, but merely the shortcomings, as they deemed them, of its ministers. They continued nominally at all events to be Christians, but carried on the wars against constituted authorities and the missionaries alike—against the former by stirring up discontent and disaffection among the raiyats, and against the latter by seducing away members of the flock and preventing others from joining it. They found the Mundas at large easy victims of their propaganda, and were able to raise incredibly large sums, ostensibly for carrying on the litigation. The major portion of this money found its way into the pockets of certain barristers in Calcutta, but large sums have stuck to the fingers of the sardars in passing. In the face of the positive orders of Government officers, many times repeated for years past and emphasized by convictions under the Penal Code for cheating, the sardars, who largely increased in number, continued their illegal exactions, and increased them to an extent, which, if accurately known, would scarcely be believed. During his cold-weather tour Colonel Gordon was able to induce some of the raiyats to come forward and give evidence, and when the raiyats perceived that they would be protected by the authorities, complaints began to flow into the Courts. A large number of prosecutions were instituted, and most of the leading sardars were convicted and sentenced to long terms of imprisonment. These convictions have had a most salutary effect, and I believe the movement is practically dead. The history of the movement is a salutary lesson of the amount of oppression which will be borne by the people of this district without an effort at resistance or a word of complaint."

The Deputy Commissioner of Manbhum writes:—

"There is no indication that public feeling, as the term is generally understood, exists in the district. The people here, as a mass, have not attained such a high state of education as to be interested in either the Jury Notification or the Municipal Amendment Bill, or to mix with the Congress Association. The uneducated classes have no opinion on public questions unless such questions affect them personally. There are no indications that the recent Hindu revival, whether in its original religious state or in its subsequent political phase, has affected the people of this district. Muhammadans are few in number, and they live at peace with their Hindu neighbours. The Muhammadans do not attempt to wound the religious susceptibilities of the Hindus, nor do the Hindus try to interfere with the equal rights of the Muhammadans. The aboriginal and semi-aboriginal people, who form 13·91 per cent. of the population of the district, are of course Hindus merely by courtesy, and the Bengali Hindus who inhabit the towns and more advanced portions of the country are possessed of more knowledge and common-sense, and less bigotry than Hindus of the North-Western Provinces."

In Singhbhum the state of public feeling was all that could be desired. The Deputy Commissioner of the district reports:—"The people mind their own business, and generally do not trouble themselves about matters beyond their own horizon, and the matter which flows from the public press of Bengal has not as yet, to any appreciable extent, assailed the nostrils of the Singhbhum people."

134. The only papers published in this Division are the *Dharwak*, printed at the Pakuria Mission in Manbhum, and the *Ghurbundhu*, printed by the German Lutheran Mission at Ranchi. They are both religious papers, and are intended for the supply of religious and moral instructions to the Christian converts belonging to the two missions.

#### XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

135. There were five Sub-Deputy Collectors and three kanungos employed in the Division. Of the five Sub-Deputy Collectors, three were employed in Hazaribagh, one in Lohardaga, and one in Manbhum. Of the three Sub-Deputy Collectors in Hazaribagh, one was employed at the head-quarters station of the district, and the other two at Giridih. Of the Sub-Deputy Collectors stationed at Giridih, one was employed on general work and the other held charge of the distillery. The latter officer was transferred in June 1893, and replaced by a

kanungo. In Lohardaga Sub-Deputy Collector Babu Jadu Nath Chatterjee was employed in making local enquiries in connection with rent-suits, and regarding the circumstances of the people who applied for loans under the Land Improvement Loans Act. In Manbhum Babu Surendra Lal Mitra, Sub-Deputy Collector, was employed on general work in the Gobindpur subdivision. In Singhbhum Babu Lalit Chandra Das Gupta was employed as a Sub-Deputy Collector from 1st April to 5th June 1893, when he was promoted to a Deputy Collectorship.

Of the three kanungos, one was employed in Hazaribagh since June 1893, and held charge of the distillery at Giridih, the second was employed in Lohardaga, chiefly in making enquiries into disputed holdings of raiyats in Government estates, and in making survey and measurement of lands acquired under the Land Acquisition Act, and the third was employed in Palamau.

136. \* \* \* \* \*

#### XXXVI.—CONDUCT OF THE ZAMINDARS.

137. With the exception of the zamindar of Jaipur in the district of Manbhum, who is still maintaining his attitude of recusancy towards the authorities, as mentioned in last year's report, the conduct of the zamindars of this Division, so far as their relations with the Government and the Government officers are concerned, has been satisfactory. They are all loyal and faithful subjects of the Crown.

In Hazaribagh the majority of the old landed proprietors are said to be involved in debts. None of them have a correct appreciation of their duties and liabilities as landlords, and do nothing which will directly contribute to the improvement of their estates or the welfare of their tenants. Colonel Garbett writes:—"Debts, vicious habits, the incubus of a host of needy relatives and ragged retainers, natural indolence, inborn apathy, and want of sympathy are the main causes which are constantly at work, preventing the improvement of their estates and the bettering of their raiyats." The Raja of Serampur is the only zamindar of whom the Deputy Commissioner can speak in terms of praise. His estate is said to be now well managed, and his tenantry seem to be on good terms with him. In Palamau Rai Thakurai Bhagabat Dyal Singh Bahadur is a careful Honorary Magistrate, a loyal gentleman, and a good and careful landlord, and fully deserves the title of Rai Bahadur lately conferred upon him. Thakurai Gobinda Prosad Singh of Ranka has taken steps to clear his estate from debts, and is really desirous of managing his estate prudently and well. He has guaranteed the subscriptions necessary for the establishment of a middle English school at Ranka, and is extremely anxious to give his sons the benefit of English education. The younger zamindar of Sonapura is said by the Deputy Commissioner to have become deeply involved in debt, and it is feared that he will never be able to extricate himself. Babu Kishen Bux Roy of Nowa Jaipur, the largest tenure-holder under the Government, who only a few years ago had succeeded to a fine rent-roll and a considerable quantity of money, allowed himself to be seriously involved in debts, and has at last taken warning and appointed a Manager with full powers. His estate should now be cleared of all debts in a few years. In Manbhum the Raja of Pachete made over to the Purulia Municipality some 57 bighas of land for the re-excavation of the Madhub Bandh, and for this act of liberality he has received the thanks of Government. I regret, however, to say that his estate is badly managed, and he has involved himself in debts. His son, locally known as the Chota Raja, has applied to have the estate brought under the protection of the Encumbered Estates Act. The zamindar of Pandra, Babu Madhu Sudan Singh, is said to have fulfilled his obligations as a landlord in an eminently satisfactory manner. He is maintaining on an improved scale the school, hostel, and dispensary which the Maharani Higan Kumari had established at Podderdi, and is reported to be the only zamindar in the district whose liberality is rightly directed. The zamindar of Jharia, who attained his majority during the year, has made a donation of Rs. 500 to the Purulia Public Library. In Singhbhum Babu Satrugan Dhol of Dhalbhum, the Thakurs of Kora and Anandapur, and Babu Jagamohan Singh of Bandgaon are reported to have conducted themselves satisfactorily.

## XXXVII.—GENERAL REMARKS.

138. The foregoing record makes it clear that some progress has been made during the last few years in the administration and development of this backward territory. In those parts, especially to the north and west, where hills and primeval jungles abound, and where transport is chiefly restricted to the lightly-laden pack-bullocks which pick their leisurely way to distant marts along the narrow bridle-paths, which form the rudimentary communications of the country, civilization is at a standstill, though the people are happy, their wants being few and simple, and eked out by the abundant supply of jungle products, which can be had for the taking. But in the most eastern and southerly portions of the Division, however, there has been a distinct improvement in the standard of comfort, consequent upon the opening of the Bengal-Nagpur Railway, and the extension of road communications. The country is comparatively free from invasions of epidemics; and though scarcity may be felt in certain tracts, there can be no apprehension of a general famine. The undulating character of the country, and the fitful and irregular rainfall make this almost impossible, inasmuch as scarcity in one part may be accompanied by sufficiency in another. Besides the advance in commercial prosperity, the character of official work has improved, especially in the administration of civil and criminal justice, in the management of estates, and the general conduct of business. But these changes have not been accomplished without adding considerably to the labour of supervision, and the task of controlling affairs in this vast Division is becoming every year more difficult. The novel questions which the Commissioner is sometimes called upon to decide are extremely complicated, and the experience gained in regulation districts is of little use. With but few guiding materials he may be required to prepare mining or forest leases of large tracts of country, to determine rates of royalty for hitherto unexploited minerals and metals, to draw up an elaborate scheme for the management of protected waste lands, to interpret and determine ancient feudal customs and their modern application, and to decide boundary disputes in uninhabited jungly tracts by a reference to uncertain topographical maps and to landmarks of trees and stones which have long since disappeared. Under the patriarchal system in force every raiyat, every tenure-holder or zamindar, every Raja or Political Chief thinks himself entitled directly to invoke the personal assistance of the Commissioner in the adjustment of his grievances and the settlement of his disputes; and as regards the Native States, now that the railway has rendered them more accessible, a tide of work has set in, which threatens to considerably embarrass the administration. The pressure of work is also being felt in some of the districts, more especially Palamau and Singhbhum. The Deputy Commissioner of the former considers that the year has been marked by a still further improvement in crime-reporting, by some improvement in the management of the police, by a considerable improvement in the disposal of cases and in land registration, by improvement in the construction and repairs of roads, and to some extent in the management of wards' estates, and by a further increase in revenue from land, excise, and stamps. On the other hand, he thinks that there is great room for improvement in the administration of police. The time has come, he says, for considering whether the sanctioned staff of one Deputy Collector is not altogether insufficient. The Munsif-Deputy Collector will, during the coming year, probably have his time more fully occupied than now with civil cases, and will consequently be able to take fewer criminal cases than ever. On the other hand, work is increasing in every branch; and though it is possible to keep things going as long as the Deputy Commissioner is at head-quarters, it is very difficult to prevent the office falling into arrears and confusion when he is in camp. The Deputy Commissioner of Singhbhum reports that the condition of the district throughout the year may be said to have been generally satisfactory. The chief wants of the district, as he understands, are a stronger and better-paid ministerial staff, and improved road communications.

139. Under the orders of His Honour the Lieutenant-Governor, a Durbar was held by me at Ranchi on March 26th for the purpose of delivering to Rai Jadunath Mukherjee and Thakuraj Bhagabat Dyal Singh the *sanads* of His Excellency the Viceroy, conferring upon them the title of Rai Bahadur. The

function was performed in a public manner with the prescribed forms and ceremonies in a shamianah which was put up in my compound. All the residents, civil and military, were invited to attend, as well as native officers of rank and the native noblemen and gentlemen of the neighbourhood. Seats were arranged in the order of precedence, the Europeans on the left of the *dais* and the native gentlemen on the right. The Municipal Commissioners, Honorary Magistrates, and Pleaders all took part in the ceremony, and the clerks of all the Courts and offices were provided with seats behind the *durbars*, and behind them, again, were rows of children (boys and girls) from the different Government and mission schools, who were permitted to witness the spectacle. A detachment of the Chota Nagpur Mounted Volunteers and of the Police formed a Guard of Honour. The recipients of the titles were led up to the *dais* by the Deputy Commissioner; and after the *sanads* were handed to them, I addressed each one in turn, recounting the acts and services for which the distinction was bestowed. The gentlemen selected for preferment are well known and held in high esteem for their public and private acts of benevolence, and the conferring of their honours in a public manner cannot fail to have aroused a spirit of emulation among the rest of the native gentlemen present.

140. This report will not be complete without some reference to the Chota Nagpur Mounted Volunteer Rifle Corps, which is no longer a *nominis umbra*, but has a real existence. The question of raising a corps was first mooted about ten years ago, but nothing could be settled owing to the absence of unanimity on the part of the residents of Ranchi as to the kind of corps they wanted. I took up the matter in 1890, when the idea occurred to me of proposing a mounted corps similar to the Light Horse in Calcutta as it was when it first came into existence. A meeting of the residents was called, and the idea was taken up, and a number of supporters was obtained, which justified me in writing to Government to obtain sanction to the formation of a corps of mounted rifles. The proposal was approved; I was invited to take the command; and before the close of 1891 a beginning was made to enlist members. On the 1st January 1893 the strength of the corps was 37, but rose to 45 on the 1st January 1894; while it now stands at 60, not including honorary members, which must be regarded as very satisfactory, considering how few and scattered the European population is of Chota Nagpur. At the annual inspection in March last, General Lance was pleased to compliment the corps on their excellence in drill, range-firing, and general equipment. After the inspection I was able to arrange a rifle meeting, and the valuable challenge cups and prizes offered were competed for with great keenness. This meeting was an unqualified success and highly creditable to the corps, considering it was a first attempt. Some further stimulus and encouragement to the corps will be given, if Government will only accede to my proposals for the construction of the much-needed rifle-range in Purulia and the holding of a camp of exercise at Ranchi next cold season.

MUHARRAM DISTURBANCE AT RAMPUR BOALIA.

No. 1325J.-D.

RESOLUTION.

JUDICIAL.

*Dated Darjeeling, the 17th September 1894.*

READ—

A Report from the Commissioner of the Rajshahi Division, No. 154Ct., dated 16th August 1894, on the disturbances which occurred at Rampur Boalia on occasion of the late *Muharram*.

Read also—

A Report from the Inspector-General of Police, No. 2500T., dated 26th July 1894, on the same subject.

A copy of the decision of the District Magistrate of Rajshahi, dated 11th August 1894, sentencing four constables to one month and one day's simple imprisonment each, under section 29, Act V of 1861, for firing without orders on that occasion.

A copy of the decision of the Officiating Sessions Judge of Rajshahi, dated 14th August 1894, confirming on appeal the orders of the District Magistrate.

The facts of the case are sufficiently stated in the report of the Inspector-General of Police and in the decision of the District Magistrate. Detailed instructions had been issued by the District Superintendent of Police of Rajshahi regulating the routes to be followed on occasion of the *Muharram* in the town of Rampur Boalia, the hours and dates for which passes were current, and the measures to be taken for the escort of procession parties along their sanctioned routes. No precaution which had been adopted in previous years for the prevention of disturbance was omitted on this occasion. It appears, however, that there has been a growing tendency among the Muhammadans of Rampur Boalia to form themselves into two parties, the members of which, during the *Muharram* season, take every opportunity of quarrelling with their rivals and of resorting to blows. This discord, which led to inconsiderable friction on previous occasions, manifested itself this year with a degree of violence which was not anticipated.

2. Special arrangements were made to ensure that the opposing parties should follow separate routes, but this is not possible altogether in a town where the number of routes is necessarily very limited; and it so happened that at various points it was unavoidable that the two processions should come into contact. The number of processionists is said to have amounted to between 2,000 and 3,000, and most of them carried clubs or *lathies*. The number of constables available was less than 100, of whom it is understood that about one-half were armed with police carbines, and the usual supply of ammunition consisting of blank and buck-shot cartridges. This force was found insufficient to maintain order at the points where the processions converged. At a comparatively early period of the evening blows were interchanged, and at a spot called Talaimari, the police were overpowered and driven back. The armed police were then ordered to fix bayonets and advance on the mob, which retreated for some time, but presently commenced throwing brick-bats, fire-balls and other missiles at the police, several of whom were hurt. The Sub-Inspector in command then gave orders to fire blank cartridge, and this was done, with the effect that both the rival parties temporarily dispersed. At the same time attacks had been made on the police in other quarters.

3. On receiving information of what had occurred, Mr. Moore, the District Superintendent of Police, set out a little after 11 o'clock at night, accompanied by three English friends, to the centre of the town, where he knew he would meet the main body of the rioters. Arriving there, he posted his police along the cross roads at different points, and himself proceeded to

disarm the rioters. He had already collected about a couple of hundred *lathies*, when a shout was raised, a rush of people followed in all directions, and a discharge of firearms was heard. What happened can best be described in the words of Mr. Henry's report:—

"It appears that five constables, on seeing the rush made towards them, apprehended that their lives were in danger, and hurriedly loading, some with blank and some with buckshot, fired in a state of panic. Subsequent enquiry proved that two men fired buckshot and three blank. The result of the firing was that four persons were wounded not seriously; one being struck by a pellet in the lip, another by a pellet in the scalp, a third by a pellet in the ankle, all of which have been extracted, the fourth by a pellet still lodged in the thigh. The personal enquiries I have made at the dispensary satisfy me that three of the four wounded persons have quite recovered, and that the fourth is in no danger. Immediately on hearing the discharge, the District Superintendent went up to the police party, and ascertained that they had fired without orders. Enquiry was also made as to the men who fired and the ammunition they had used. Two of the persons wounded were standing on the roof of a low house some 30 yards distant. On hearing their outcry the police got them down, put them in a conveyance, and sent them off to the dispensary."

4. It has been decisively proved, after full judicial enquiry, that these constables fired without the orders of any superior officer. Two of them had already been roughly handled by the mob at Talaimari, and when the rush was made they lost their heads, loaded and fired. The identification of one of the constables was not considered satisfactory, but a prosecution under section 29, Act V of 1861, was instituted against four men, and they were convicted by the District Magistrate, and each of them sentenced to simple imprisonment for one month and one day. This sentence was upheld on appeal by the Sessions Judge.

5. The Lieutenant-Governor does not consider that any blame can attach to Mr. Moore, the District Superintendent, or to any of the superior officers of the District Police. On the contrary, they appear to have done their duty with coolness and confidence under difficult circumstances.

6. It remains to pass general orders which shall ensure that the arrangements made for the maintenance of order on the occasion of the *Muharram* and other festivals, when large concourses of people assemble together, shall be more effective than proved to be the case on this occasion at Rampur Boalia. The assembling of large bodies of men in procession at night, armed with *lathies* and other instruments capable of being used as weapons of defence, is fraught with danger to the peace. It has been ascertained that in Calcutta and its suburbs, in Patna, in Murshidabad, and in Hooghly, the carrying of *lathies* is strictly forbidden during the *Muharram* procession, and in the Lieutenant-Governor's opinion a similar rule should be enforced in Rampur Boalia and in all other places where there is reason to anticipate disturbance. Under the provisions of section 30 of Act V of 1861, the conduct of all assemblies and processions on the public roads is regulated by the District and Assistant District Superintendent of Police, and whenever there is reason to anticipate disturbance, it should be the invariable condition of a license granted under this section that no weapon, *lathi* or other instrument capable of being used as a weapon of offence, shall be carried by any member of the procession except in such special cases as they may be shown to be required for purposes of display or mimic warfare. It is not intended that the prohibition should be universal, for it must be remembered that as a rule these processions are peaceful and popular, and also that fencing with sticks is by immemorial usage a conspicuous feature in the *Muharram* proceedings. The power given by the law should be exercised with discretion, but in such a town as Rampur Boalia, where the local authorities had reason to expect trouble, the Lieutenant-Governor considers that it would certainly have been a proper precaution on the part of the District Superintendent of Police to have disarmed the great body of the processionists.

7. If assemblages of the public are not permitted to carry weapons of offence, the police with their batons will be sufficiently equipped to be able to maintain and enforce order even against large crowds. The armed police should always be kept in reserve, and only called out when it is necessary to take some specific action, such as to support an arrest or disperse a mob; they should never be entrusted with the routine duty of marshalling the processions. When armed police are necessary, they should go out only by special order of

the District Superintendent of Police, who should consult the District Magistrate if there is time to do so. The District Superintendent should himself be in charge of the party, but if he should be temporarily engaged elsewhere, the command must devolve on his Assistant or on an Inspector. If it is necessary to call out the armed police at a sub-divisional head-quarters, the responsibility must rest on the Inspector in charge, subject to the orders of the Sub-divisional Officer.

8. In all cases when armed parties are sent out, they should keep together in compact bodies under competent officers fully instructed. The officer in charge of the party will be responsible for the order to fire, if the emergency should arise; but in no case should such an extreme measure be resorted to, unless it is absolutely necessary for the protection of life and property.

9. The Lieutenant-Governor trusts that the promulgation of these orders, which will be communicated to all Commissioners and to the Inspector-General of Police for guidance, will be found sufficient to prevent the recurrence of such deplorable incidents as marked the celebration of the *Muharram* in the case under notice.

ORDER—Ordered that a copy of this Resolution be forwarded to all Commissioners, and to the Inspector-General of Police, for information and guidance.

Ordered that a copy of this Resolution, and of the papers cited in the preamble, be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. LANG,

*Offg. Under-Secy. to the Govt. of Bengal.*

No. 154C.T., dated Camp Pabna, the 16th August 1894.

From—P. NOLAN, Esq., c.s., Commissioner of the Rajshahi Division,

To—The Chief Secretary to the Government of Bengal.

I HAVE the honour to forward, for the information of Government, a copy of a report by the Inspector-General of Police, No. 2500T., dated the 26th July 1894, on the disturbances which occurred at Rampur Boalia during the Muharram; also a copy of the decision of the District Magistrate, sentencing four constables to one month and one day's simple imprisonment each, under section 29, Act V of 1861, for firing without orders on that occasion.

2. To the facts stated by Mr. Henry, I have only to add that the persons wounded continue to do well. The constables prosecuted have forfeited any sympathy they might have claimed on the ground that their error was unpremeditated, and almost involuntary, by setting up, at the last moment, a false defence, the purport of which was to shift to their superior officer the responsibility which really attached only to themselves.

3. As pointed out by the Inspector-General, the employment of police armed with guns on the occasion of the Muharram is not a novelty at Rampur Boalia. But hitherto such men have been kept in reserve at one or two convenient points, and constables carrying batons only have been in actual contact with the public. This year a larger force was available, and the experiment was tried of using the armed police in small parties for the work of marshalling the processions, by preventing them from coming into contact with each other. The latter arrangement does not commend itself to my judgment, and I hope it will not be adopted again. Mr. Henry, I am glad to observe, agrees that the precedent set should be avoided next year, and properly recommends that, to render them manageable by the ordinary police, those who follow the processions should be prohibited from carrying *lathies*. But I may remark that even when they had *lathies* they proved amenable to the control of the unarmed constables; while the armed force tried this year was found inefficient for the purpose. From paragraph VI of the Inspector-General's report it will be seen that when first they tried to prevent a collision between two processions, the armed police were driven back, and the fight commenced in their presence. Sub-Inspector Nader Hosein informs me that this occurred because, when he was hit by a missile, his men crowded round him, breaking line, and let the mob pass. The police then fired blank cartridge on the parties who were contending with each other, and this temporarily dispersed the crowd. I cannot approve of the measure, as blank should be fired only as a preliminary to shot in case it is not effectual, and a real volley discharged to separate men merely fencing with sticks would have produced more harm than it could have prevented. On the second occasion of the use of fire-arms no good resulted, as the mob broke through the line notwithstanding the volley. It can, indeed, seldom happen that either bayonets or rifles are appropriate arms for keeping a procession at night-time and during many consecutive hours to a prescribed route. If a line is drawn up across a street, as was twice done on this occasion, those who approach it will often be innocent people pushed from behind, or hurried onwards by panic; and then the police have either to give way or to take life without sufficient reason.

4. I think, moreover, that the presence in many places of an armed force had the effect of distracting the constables from their proper duties, the peaceful marshalling of the processions, and the arrest of those who threatened disturbance. Not a single arrest was effected. I am not surprised to find that some members of a force carrying guns, broken up into small bodies, under very uncertain control, and employed during the whole night in immediate contact with a mob, acted in a manner which cannot be defended.

5. In my opinion the armed police should on such occasion be kept in reserve with arms piled, and appear only when it is necessary to take active measures—to defend, for instance, a prisoner from rescue, or to drive off those assaulting the ordinary police. They will thus escape the provocation which

tries even the best disciplined troops—that which results from standing for long hours in the face of an unfriendly mob. And should their aid be unfortunately needed, they will arrive on the scene fresh and under efficient command, their very appearance indicating to disturbers of the peace the serious consequences to be apprehended from further misconduct.

6. I am glad to observe that Mr. Moore, Mr. Savi, and the two European gentlemen with them, showed a proper coolness and confidence by mixing with the mob when it was most excited, and taking away their sticks from its members.

No. 2500T., dated Rampur Boalia, the 26th July 1894.

From—E. R. HENRY, Esq., c.s., Inspector-General of Police, Lower Provinces,

To—The Chief Secretary to the Government of Bengal (through Commissioner of Rajshahi Division).

I HAVE the honour to submit a report upon the occurrences of the 14th and 15th July at Rampur Boalia, in connection with the Muharram disturbances which took place there.

II. The Muharram lasted from the 5th until the afternoon of the 15th July, when the final act of consigning the *tazias* to the water, after they had been conveyed to the Mukdam Shaheb Darga, was performed. Up to the evening of the 14th July all persons connected with the procession parties had behaved in an orderly manner, or at any rate had not indulged in serious excesses.

Detailed instructions regulating the routes to be followed, the hours and dates for which passes were current, the names of officers responsible for general supervision and for the maintenance of the peace within specified sections of the town of Rampur Boalia (which, it may be noted, extends seven miles east to west), the measures to be taken for the escort of procession parties and for securing to them unobstructed passage along their sanctioned routes, are given in district order, dated 5th July 1894, issued by the Officiating District Superintendent of Police, Mr. Savi, with the approval of the District Magistrate, Mr. Price. These instructions show that all precautions which could be suggested were adopted, and that the regulations issued for the maintenance of order were as complete as possible under the circumstances. Whether the employment of armed constables was or was not required will be considered later on in this report.

III. The following precautionary arrangements were made in advance. No persons were to be permitted to form themselves into a separate procession party unless licensed under a pass. Each pass recited the name of the person in whose favour it was granted, the dates and hours for which it was current, and contained a prohibition against guns, swords, and spears being carried. Twenty-seven applications for passes were received, but as eight were put in late, they were rejected, and finally passes were issued to 19 separate procession parties.

IV. It appears that the 19 procession parties represent two great rival parties, the one known as the Mirkamori or Tufani's, the other as the Mirzapur or Miajan's, eight of the procession parties having ranged themselves under the banner of Tufani, and the remainder under the banner of Miajan. These are names merely, and used for the purpose of differentiating the parties between whom it now appears serious discord exists. This discord led to unimportant rows last year, but this year either side gathered its forces with a view to determining by the arbitrament of fighting which should be held to have the supremacy. In the sketch map No. I adherents of Miajan or the Mirzapur party are marked with a red O; adherents of Tufani or the Mirkamori party with a blue O. The red lines show the routes prescribed for the Mirzapur party, the blue lines those prescribed for the Mirkamori party.

V. It has been customary at Rampur Boalia, as is the case in some other towns, for the processionists to give displays of *lathi khel* at fixed places along their routes. The principal display takes place on the last night of the Muharram. In this instance it would have taken place between midnight of the 14th and dawn of the 15th July. Consequently this was the particular time when a disturbance of the peace, if threatened, might be expected to occur. Mr. Moore, Officiating District Superintendent of Police, who had relieved Mr. Savi a couple of days before, was aware of the state of affairs, and had arranged to patrol the town in person from midnight till dawn. Both Mr. Savi and he had taken this precaution on the preceding nights. He had dined at a friend's house centrally situated (Collector's compound), and had given instructions to the police to furnish him with information from time to time. By midnight the several procession parties were expected to reach the centre of the town, and it was his intention then to collect all the adherents of the two great parties together into two compact bodies, so that they might be escorted under sufficiently strong escorts to the final "*lathi khel*" akhras, and there kept under effective control. This arrangement was required, as the number of processionists was very large—two or three thousand, it is said, exclusive of numerous spectators—and the police force available for keeping order relatively small. Some time after 11 o'clock, information reached Mr. Moore that the adherents of the two parties had attacked each other and the police at a place named Talaimari, and he at once set out to meet them with Messrs. Taylor, Dow, and Savi, whom he had requested to accompany him to render assistance if necessary.

VI. To make this account more intelligible, I must describe what took place between 8-30 P.M. and the arrival of Mr. Moore on the scene.

## Sketch No.

About 6-30 p.m. Sub-Inspectors Nader Hosein and Kunja Behari Banerjea set out from the police-station for Chaddupai, 3½ miles east (marked in the sketch map), their object being to meet the procession parties at the furthestmost limit of their routes. The road marked 22' is known as the Nator road, the circuitous road marked T. S. is the Tikapara road, the junction of the two roads is at T close to Talaimari. The Nator road had been prescribed as the route for the Mirkamori or the Tufani's party; the Tikapara road as the route for the Mirzapur or Miajan's party.

On the way to Chaddupai the Sub-Inspectors posted a guard at Bashpara to keep the Mirkamori party on the main road and prevent them from attacking those of the opposite party assembled at an akhara near the river bank, and to keep the Nator road unobstructed. On reaching Talaimari they posted a guard there to prevent the Jamalpur men (marked red O in sketch I), adherents of the Mirzapur party, from coming on to the Nator road during the passage of the Mirkamori party. They then proceeded on to Chaddupai, and found some of the Mirzapur men doing *lathi khel* on the Nator road, and beyond them to the east, approaching up the Nator road, a body of the Mirkamori men. In order to prevent a conflict, a police guard was placed across the road to obstruct the passage of the Mirkamori men, and during the interval the Mirzapur men were compelled to leave the Nator road, and the police guard being drawn to one side, the Mirkamori party were permitted to pass up it towards the centre of the town accompanied by Sub-Inspector Nader Hosein, head-constable Achabor Singh, and a police guard of armed and unarmed constabulary, Sub-Inspector Kunja Behari Banerjea being left behind with some constables to watch the Mirzapur men. As the two parties passed within a short distance of each other, they exchanged blows. On receiving intimation from Sub-Inspector Nader Hosein that the route as far as Matihar was clear, Sub-Inspector Kunja Behari Banerjea allowed the Mirzapur men to proceed that far. After the exchange of blows at Chaddupai, one Romejan, a leader of the Mirzapur party, a desperate and dangerous character, an ex-convict under police surveillance, went off, vowing vengeance, to collect adherents, and he rejoined at Matihar with about 100 men carrying *lathis*, and urged his party, thus strengthened, forward; and notwithstanding the remonstrances of the police, they all rushed towards Talaimari accompanied by the police, the police bugler, under orders of the Sub-Inspector, sounding his bugle to warn Sub-Inspector Nader Hosein that this contingent were out of control. The police guard at T (see sketch map) tried to force the Mirzapur men up the Tikapara route, but were not strong enough to defeat them, and were worsted and roughly handled in the attempt. Seeing that the Mirzapur men were determined to come into a conflict, Sub-Inspector Nader Hosein divided his armed police into two sections, made them fix bayonets, and then fronted one section against the Mirkamori men, and fronted the other section against the on-coming Mirzapur men. This occurred at Talaimari. As the two bodies were dangerously close, he ordered the two armed police sections to move slowly forward, and the rioters retreated before the line of bayonets for some time, and then they commenced throwing brickbats, fire-balls, and other missiles at the police, who held their ground, though several were hurt, until Sub-Inspector Nader Hosein was placed *hors de combat* by a severe blow on the head, which cut open his scalp and partially stunned him. The police then retreated down the slopes of the road, and the two parties rushed into collision. Sub-Inspector Nader Hosein, realizing the danger, gave head-constable Achabor Singh orders to fire blank cartridge, and this was done, and with excellent effect, as both parties dispersed. They reformed, however, on finding that no one had suffered injury from the discharge of firearms. Sub-Inspector Nader Hosein was sent off from here to have his wound attended to.

Sub-Inspector Kunja Behari Banerjea, who with several other police officers had received blows, stuck to the Mirkamori party, which was the first to reform, and escorted it as far as Shahab Bazar. On their way there, at Bashpara, the rioters observed some men and boys, adherents of the Mirzapur party, doing '*lathi khel*,' and set upon them in spite of the resistance of the police, and beat several of them savagely. One of the victims is still in hospital with two incised wounds in the skull and several cuts all down the back. Having escorted the party as far as Shahab Bazar (A in sketch II), the Sub-Inspector reported what had occurred to Inspector Rukini Kumar Bose, and went off to the police-station, as he felt faint from the effect of the blows he had received in the Talaimari *melee*.

VII. On receiving information from the police of what had occurred at Chaddupai, Bashpara, and Talaimari, Mr. Moore, accompanied by Messrs. Savi, Dow, and Taylor, proceeded to Shahab Bazar, where he knew he would meet the main body of the rioters. Arriving there, he found the Mirkamori party at the spot marked A in the map, with their *tazia*, round which they were brandishing *lathis* and hoisting long bamboos with combustible material at either end. The crowd was very dense; but he found his way through it up to the point X (sketch II), and there he drew up a party of police consisting of 10 armed and 15 unarmed men, with two head-constables, across the road, ordering them to permit none but sightseers to pass towards the north. This was required, as a strong body of the Mirzapur men, armed and ready for a row, had reached C, and if the bodies at A and C had come together there must, in the opinion of all those I have interrogated, have been a serious riot, as the men on both sides were excited to the highest degree. He then forced his way back through the crowd as far as the point marked Y, and there posted across the road a guard of 10 armed and several unarmed constables and a head-constable. This guard was intended to prevent the rival body of men at B from meeting the body at A.

Having completed these arrangements, Mr. Moore, with the assistance of the three European gentlemen above referred to, began disarming rioters at A. When he had collected

thus about a couple of hundred *lathis*, for reasons not known a shout was raised, and a rush made towards the police at X, when a discharge of fire-arms was heard and the body of rioters at A dispersed in various directions, leaving their *tazia* on the ground. It appears that five constables, on seeing the rush made towards them, apprehended that their lives were in danger, and hurriedly loading, some with blank and some with buckshot, fired in a state of panic. Subsequent enquiry proved that two men fired buckshot and three blank. The result of the firing was that four persons were wounded, not seriously; one being struck by a pellet in the lip, another by a pellet in the scalp, a third by a pellet in the ankle, all of which have been extracted, the fourth by a pellet still lodged in the thigh. The personal enquiries I have made at the dispensary satisfy me that three of the four wounded persons have quite recovered, and that the fourth is in no danger. Immediately on hearing the discharge the District Superintendent went up to the police party and ascertained that they had fired without orders. Enquiry was also made as to the men who fired and the ammunition they had used. Two of the persons wounded were standing on the roof of a low house some 30 yards distant. On hearing their outcry, the police got them down, put them in a conveyance, and sent them off to the dispensary.

The party at A having dispersed, the District Superintendent moved the police parties from X to W (sketch II) and from Y to Z, placing them across the roads, thus enabling the parties at C and B, who were of the same faction, to unite, and preventing the rival party at D from obstructing the passage. Mr. Moore and the police remained out until dawn, and no further disturbance occurred in the town; but it appears that numbers of stragglers of the Mirkamori party returning home were set upon by Mirzapur men lying in wait for them in the eastern portion of the town, and were severely handled. No correct list of casualties can be obtained, as the people are anxious to have no enquiry, preferring to settle differences amongst themselves; but up to the present time the police have succeeded in laying hands upon some 20 persons whose wounds, more or less severe, were received between 8 p.m. of the 14th and daybreak of the 15th.

VIII. Having described what occurred on the night of the 14th July at Rampur Boalia, I have now to consider in what respects the measures taken for the preservation of the peace were defective, and in what respect the conduct of the police contravened rules.

The first point which requires investigation is whether any necessity existed for employing armed constabulary. It is laid down in circular orders that if armed police are requisitioned, they shall carry two rounds of blank and eight rounds of buckshot. Referring to the district order regulating the Muharram processions of previous years, I find no reference to the constabulary being armed. I learn, however, that in 1891, 1892 and 1893, an armed force was employed for this duty, though the fact is not stated in the district order. Employing armed police on this occasion was therefore not an innovation, and was in accordance with the practice of preceding years.

The persons who took part in the processions numbered, according to the best information I have been able to get, between 2,000 and 3,000, and a majority of them carried *lathies*. To have sent out a force from 80 to 100 constables, carrying batons only, to maintain order over an area which extends east and west some seven miles, against such strong parties of armed processionists determined to attack each other whenever opportunity offered, would certainly have not been an effective arrangement for the maintenance of the peace. The primary mistake appears to have been made in allowing the processionists to carry *lathies*. In Hooghly and in Murshidabad, where the Muharram festivities are on a very extensive scale, those who take part in them are, I understand, strictly prohibited from carrying *lathies*, and no doubt this prohibition could have been enforced here, and in future will be enforced. It has been customary not to interfere with the carrying of *lathies* in Rampur Boalia, and the custom was permitted to prevail during the Muharram of 1894, because the authorities had received no intimation of the exasperated feeling which existed between the two main parties, and of the probability of serious rioting resulting therefrom. As these large mobs were permitted to come into the town armed with *lathies*, it was necessary that the small police force should possess an equipment superior to theirs, so that in the event of their being called to forcibly maintain the peace, the superiority of their equipment might counterbalance the smallness of their number. In future care will be taken not to permit armed mobs to come into the town or to perambulate its streets, and then constables with batons will prove able to keep order. Further preventive measures, such as binding down those known to be turbulent, under section 107, Criminal Procedure Code, and, if necessary, enlisting the services of some of them as special constables, will be taken.

X. I have next to consider whether there is justification for splitting up into small detachments the body of armed police. Ordinarily armed police bodies are kept intact under their recognised officers. The exigencies of the situation at Rampur Boalia were such that this practice could not be followed. It will be seen from the sketch No. 1 that there were 19 separate procession parties, and that the police had to get those parties from their villages or akharas on to the particular roads prescribed as their route. The meeting of two bodies belonging to rival parties meant a riot, and so it was necessary to see that this meeting was avoided. This exigency necessitated the splitting up of the police force into small bodies, and the number of competent officers available was insufficient for the number of detachments.

There appears to be no doubt whatever that five constables stationed at point X on sketch II fired without orders. When Mr. Moore formed the force there across the road, there were present two head-constables, Idu Khan and Achabor Sing. Achabor Sing was

Sketch No. II.

directed to find the pass-holder of the procession shown at A, and went in search of him. Idu Khan's written orders, received early in the day, placed him in charge of a certain number of men at X and of a number at Y. After Mr. Moore had proceeded back towards Y, Idu Khan went over there to look for the men he was responsible for, and it thus came about that the party at X was temporarily without an officer, and while it was in this state the rush was made and the constables fired. Arrangements were no doubt defective here. But it must be remembered that there was no time to grasp all the details of the situation. On either side of the police line at X there was a dense crowd, partly spectators and partly processionists. The line made up of constables originally posted at Sahob bazar and of others who had come up with the Mirkamori party under Sub-Inspector Kunja Behari Banerjee was hurriedly formed, and the District Superintendent did not then and there place it under the command of any officer. Being close to it himself, he did not contemplate that fire would be opened without his orders. When the rush was made, the constables, two of whom had been knocked about at Talaimari, lost their heads and loaded and fired. All this occurred after midnight in the midst of a dense and turbulent crowd. It appears to me that no one can be held responsible for this unauthorised firing except the five constables, and as they are very seriously to blame, I have instructed the Government Prosecutor to proceed against them under section 29, Act V of 1861. Several persons who were present are of opinion that this firing, which resulted in the dispersal of the Mirkamori party (A in sketch), averted a disaster. Their rush was so determined that they would infallibly have got through the police line at X, and would have fallen on the rival party, just beyond at C (sketch II), and, if victorious against them, would have been stimulated to further excesses. This consideration, whether it be correct or otherwise, in no way justifies the conduct of the police in firing without orders. They no doubt intended to do no injury, and discharged their weapons to terrify the crowd. That harm resulted is probably due to their being in such a state of panic that they fired without pointing their weapons in a direction which would ensure the discharge being harmless; and that they failed to discriminate between the blank and buckshot cartridges in their pouches. The blank cartridge is half the size and less than half the weight of the buckshot cartridge, and no person not in a state of confusion or panic could well mistake one for the other.

XI. In conclusion, I may add that these disturbances were not brought about by any creed or caste differences. For some time past there has been a growing tendency amongst the Muhammadans of these parts to assume the role of latter-day Montagues and Capulets and form themselves into two parties, the members of which during the Muharram season, and only then, so far as I can learn, take every opportunity of quarrelling with their rivals and of resorting to blows. How serious this evil has become may be inferred from the fact that the police succeeded in getting a list of 20 persons more or less wounded in one night, and this represents only a portion of the actual number of sufferers. The feeling between the parties has been strengthened since last year, and will again be stronger next year, and may be expected to display itself in acts of much more dangerous turbulence than were committed this year, unless condign punishment is meted out to all those against whom evidence of rioting during the Muharram of 1894 can be obtained. It is an intolerable state of affairs when a number of men, arming themselves, amalgamate into compact bodies with the object of wreaking vengeance upon neighbours who happen not to belong to their particular party. The executive authorities are quite strong enough to deal with the evil, and the District Magistrate intends to deal with it effectively. If the preventive measures recognised by law are adopted on a sufficient scale, there need be little apprehension that the peace here will be again seriously imperilled.

EMPRESS <i>versus</i> ...	{	(1) MOULA BAKS,	} charged under section 29 of Act V of 1861.
		(2) RUGHUBIR SINGH,	
		(3) GANJON SINGH,	
		(4) RAHE SHANKAR SINGH,	

THE accused constables are charged in this case, under section 29 of Act V of 1861, with violation of duty, in having fired off their muskets, without the orders of a superior officer, on the night of the 14th July, when they had been posted in line across the road leading from Sahob bazar in the town of Boulia towards Rani bazar. The District Superintendent who was present on the occasion had himself so posted the line of some 22 constables, most, if not all, of them armed with muskets, to prevent two processions parading the town during the last night of the late Muharram festival, from coming into collision and engaging in a riot. The accused plead that they did fire, but not till the order to fire had been repeated by the Police Inspector, who, they allege, was immediately in front of them. Their reluctance to obey the Inspector's order when first given was because they feared that somebody would be wounded. It is not clear how such an apprehension could arise, for, according to their own admission, the accused fired with blank cartridges only, and in the air! This plea, therefore, which was never taken before, though it is on evidence that the accused, before the prosecution was instituted, had been repeatedly asked why they fired, seems to be the expression of an afterthought. Besides, it is significant that only the accused obeyed the alleged order to fire, though, had it been given, it would be natural to expect that the whole line of 20 men or more would have fired! The Inspector, who is said to have given the order to fire, has been examined at very great length, and he has emphatically denied that

he gave any orders to fire. I think a consideration of the circumstances set forth above is quite sufficient to justify me in disbelieving the plea set up by the accused; but as the whole conduct of the police during the late Muharram festival has been made the subject of very hostile criticism before me, I think that I ought to describe in detail the occurrences which culminated in the firing off of their muskets by the accused in Saheb bazar on the night of the 14th July last. There were many authorised processions (19) during the late Muharram festival in and around the town, all of which were attended during the several nights they went about the streets by parties of police; some constables, like those of the district reserve, being armed with muskets, and carrying both blank and buckshot cartridges (five of each); others, such as the ordinary reserve, thana police, and town constables and town chaukidars, being armed with batons or sticks (*lathis*) only. For, besides the regular police, there were employed to keep order in Boalia the town constables also, some 25 in number, and the town chaukidars, ten in number. There was not the slightest approach to any riotous behaviour on any night of the festival, till the final night, that of the 14th July last. A force of ten constables armed with muskets, to be assisted by others of the town police, was stationed at a central position in the town in Saheb bazar (where the Nator road joins the road which may be called the College Road going towards the north in the direction of Rani bazar), under the command of Edu Khan, head-constable. Two Sub-Inspectors, Nader Hosein and another, with a force of some 20 to 30 constables, were deputed to patrol the Nator road from a distance of between three and four miles from Saheb bazar, in order to prevent rival parties of processionists marching towards the town coming into collision and a fight ensuing. The Inspector of Police moved about all over the town itself, superintending operations and keeping himself in touch with the various police parties. The District Superintendent and the officer whom he had just relieved, Mr. Savi, kept awake during the entire night, so as to be able to repair immediately information was brought to them to any locality when trouble was apprehended. The police party deputed to patrol the Nator road proved unable to prevent two rival processional parties from coming into collision at a place called Talaimari, some  $2\frac{1}{2}$  miles from Saheb bazar; was overpowered and swept aside, but succeeded in separating the combatants by a discharge of blank cartridges in the air. The processional party which happened to be at the time nearest the town then proceeded towards it, followed by those members of the police party who had not been obliged to fall out by reason of the wounds they had received. They had to all appearances been rather roughly handled at Talaimari by the two rival processional parties, who made free use of brickbats and other missiles. Head-constable Achobar Sing, who has been examined as a witness by the prosecution, in the absence of superior officers, took the command of the police party that followed and kept up with the rioters on their way into the town. Shortly before reaching Saheb bazar Achobar Sing met the Inspector, told him all that had transpired at Talaimari, and asked him what he was to do if his party was again overpowered in their attempts to keep two riotous processional parties asunder, or were again attacked. There is no doubt in my mind that some conversation in respect of the procedure that would become necessary under certain contingencies did pass between the Inspector and the head-constable, for the head-constable himself says so. The defence tries to prove that the Inspector when asked for instructions replied:—"Fire with ball" (there were no ball cartridges issued on the occasion), whereas the Inspector says he said:—"Go to Saheb bazar. I will go for the District Superintendent and bring him." He swears he gave no orders, nor made any suggestion to fire at all. Head-constable Achobar Sing and his party then went towards Saheb bazar to join the police party under head-constable Edu Khan that had been permanently located there from an early hour of the evening, 6 P.M., while the Inspector went for the District Superintendent. The District Superintendent, Mr. Savi, the late District Superintendent, and two other European gentlemen drove up to the Saheb bazar in one carriage. The Inspector followed in another carriage. On arrival at Saheb bazar the District Superintendent saw that the processionists who had come up from Talaimari were engaged in stick-playing (*lathi khel*) at the place indicated above where the Nator road joins the College Road; he was of opinion that the processionists who had behaved so riotously at Talaimari should to prevent any further disorder be

\* A line is no doubt meant.

P. N.

disarmed of their sticks or *lathis*. At the same time he placed a file\* of constables armed with muskets, some 22 in number, across the College Road, leading to Rani bazar, to keep back the processionists, and prevent a collision with a rival party that had made its appearance at the head of the College Road on the north, and which ought to have proceeded by the route proscribed for it to Rani bazar. Having stationed this line of constables across College Road with strict orders to allow no processionists to pass by that road to the north, the District Superintendent resumed the operation of disarming the processionists at Saheb bazar. While the District Superintendent was arranging the line of constables there is no doubt both head-constables Achobar Sing and Edu Khan were present. No distinct or special orders were given to them to take the command of the line of constables. Achobar Sing says he moved off to look for the head of the processional party who had the pass authorising him to form a procession, and whom the District Superintendent wanted. The District Superintendent does not remember that he gave any orders to either Achobar Sing or Edu Khan. Both say they moved off when the District Superintendent left the line of constables to disarm the processionists. The former says he accompanied and was close behind the District Superintendent. The latter says he went to look after the other five constables of his party of ten who had

been stationed at the corner of the college compound. Edu Khan's statements in examination and cross-examination do not cohere, and I cannot say with certainty that he remained with the line of constables posted by the District Superintendent or that he went away. I am inclined to think he remained with the line. However that may be, the District Superintendent says he considered that he himself was in command of the line, as he had moved off only about 20 feet. He had given the order to bar all passage to the north by the College Road, and beyond carrying out this instruction the accused constables were not justified in his opinion in firing off their muskets, nor obeying any orders but his. Some 16 constables in the line did not fire at all. While the District Superintendent was engaged in disarming the processionists there was a sudden rush of people in all directions, and the accused constables fired. The District Superintendent immediately went up to them, asked by whose orders they had fired, but no answer was made. Under the circumstances, I think there can be no reasonable doubt that no order to fire was given, though that is the plea set up for the defence. I do not believe that the Inspector gave the order. His superior officer, the District Superintendent, was present, and could have been referred to at once if the occasion arose. Why should the Inspector assume the responsibility of taking it upon himself to direct operations? There is no doubt that in carrying out the District Superintendent's order the line of constables was broken by the great rush made: they were found by the District Superintendent and the superior officers of police immediately after the discharge huddled together. It is possible, and most probable, that those who fired only four out of 20 or 22 considered that they were being attacked, and being panic-stricken considered that they were justified in firing in self-defence without orders. The District Superintendent says he did not consider that any attack was being made on them, or indeed on any one else; that though he is unable to explain why the rush was made, there was no justification at all for firing. At the same time it should be remembered that two at least of the accused, Rughubir and Ganjon, had already had a rough experience of the behaviour of the rioters at Talaimari, and might with no great unreason have believed that there was going to be a repetition of the same. In any case those who fired did not intend to use any but blank cartridges. In their fight two buckshot cartridges were fired (one apparently in the air), for two boys who were on an adjacent house-top were slightly wounded by pellets in the head and face, and two processionists on the ground were wounded in the legs.

To prove that they got orders to fire, the accused have examined a respectable Hindu, a muharrir of the Deputy Inspector of Schools, who has said that about 20 minutes before the firing took place he heard a superior officer of police in a *gari*, who he subsequently discovered was the Inspector, say, when he was asked for instructions, that if any member of a police force was touched or molested, the rioters should be fired on with bullet (*guli*). The statement of the witness is uncorroborated, and I do not believe it. At the same time head-constable Acharor Sing distinctly states that he had asked what they were to do if again attacked, though the Inspector did not tell him, but said he was going for the District Superintendent. In any case, even if the witness is to be believed, a general instruction of the Inspector as to what the constables might do under circumstances was no authority for them to fire on a special occasion without the distinct order of superior officers. The accused have adduced two other witnesses, the driver of the *gari* that conveyed the Inspector on his various rounds that night and a bystander. Both the persons say that they heard the Inspector give the order to fire. I took these witnesses with me to point out the places where they respectively were, when they heard the order to fire given; also where the Inspector was. There is no such discrepancy in their statements as would justify me in saying that they actually contradict one another, but so great were the noise and tumults on the occasion that they could not have heard the Inspector address the constables. The Inspector is said to have been at least 10 cubits away from the witnesses and a like distance from the line of constables. The time was midnight with a crowd of persons, sightseers and others, between the Inspector and the constables and a vast body of men, surging all around and shouting and running about in all directions. I am of opinion that it is abundantly clear that on the occasion when the accused fired no order was given; that no one besides the District Superintendent (that officer being himself present) would have dared to give the order to fire. For so firing the accused have rendered themselves liable to punishment under section 29 of Act V of 1861. They have been ill-advised to bring in the name of the Inspector at all. I believe some designing persons have induced the constables to set up a false defence to make capital out of it for purposes of their own. Had the accused really got the order to fire, they would have said so immediately after the incident, when they were asked, and also afterwards, when they were repeatedly questioned by the District Superintendent, who has given a most accurate and truthful account of what transpired during the whole time, down to the institution of this case, and who never heard the accused set up the plea they have now put forward. Besides, as said before, had any order to fire been given, the whole line of 22 men would have fired or a majority of them, and not the four accused only. I find the accused guilty under section 29 of Act V of 1861, and I sentence them to one month and one day's simple imprisonment each.

J. O. PRICE,

Magistrate.

The 11th August 1894.

COURT OF SESSION.

APPELLATE JURISDICTION, RAJSHAHI.

*The 14th August 1894.*

CRIMINAL APPEAL No. 25 (3RD QUARTER) OF 1894.

APPEAL from the order of J. C. Price, Esq., District Magistrate of Rajshahi, dated the 11th August 1894.

- |                      |     |     |     |   |                    |

| 4. Rabi Sanker Singh | ... | ... | ... | : |                    |

For Appellants Babu Nalini Kanta Chaudhuri, Pleader.

JUDGMENT.

Pleader heard. It is urged that the constables were ordered by the Inspector to fire. The Judgment of the District Magistrate deals carefully with this question. There are very strong and cogent arguments in support of the contention of the prosecution that no orders were given. *Firstly*, only three men out of a line of twenty fired, though it is alleged that the Inspector had to repeat his order; *secondly*, the Inspector would be most unlikely to take on himself the responsibility of ordering the men to fire on the crowd when the District Superintendent was personally present; *thirdly*, the accused state that they fired blank cartridges, but fired in the air because they were afraid of wounding people. The District Magistrate has very justifiably put a note of admiration after the sentence in which he gives this plea of the defence; *fourthly*, the allegation that orders were given was only set up in the case, and not before. When the District Superintendent asked the men immediately after they fired under whose orders they had done so, they did not say anything. The appellants' pleader cannot show anything to weaken the cumulative force of all these circumstances, which make it practically impossible that the allegation about the Inspector having given orders should be true. I think that the defence set up is a wicked one. The men may probably have been acting under advice in setting up this defence; but if so, they were certainly most ill-advised.

The appeal is summarily rejected.

L. PALIT, Offg. Sessions Judge.

*The 14th August 1894.*

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 22nd September, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

*Definition.*—... indicates that a storm has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns weighting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 22ND OF SEPTEMBER 1894.**

At the end of the previous week a very feeble barometric depression had formed in the north-west angle of the Bay, and this had advanced in a north-westerly direction, and on Saturday, the 15th, or the last day of that week, it was partly over the south of Chota Nagpur and partly over South-West Bengal. The feeble depression had, however, caused the recommencement of general rain in the province. On the 16th instant pressure had fallen by small amounts over a considerable part of Bihar, while it had risen elsewhere, the increase being brisk in the south-west of the province. The lowest pressure was reported at Dehri, where a defect of 0.063" was recorded, and hence the feeble low pressure area appears to have advanced from the south-west of the province into Bihar. Rainfall continued general over the whole province, and the falls at the northern stations became decidedly heavy. On the 17th pressure had risen slowly at all except a few of the north-eastern stations, and pressure was in defect over the northern half, and in excess in the south of the province. A slight advance of westerly winds appeared to be taking place at the western stations on this day, and this partially forced back the moist easterly and south-easterly winds in the north of the province, and thus produced a certain amount of interaction which gave heavy rainfall over the whole of the north of the province. On the 18th pressure had fallen over the whole of the province, the fall being brisk at the eastern stations, and pressure still remained in defect by amounts ranging up to 0.064 inch at Dehri. Winds were also decidedly irregular in direction, pointing to a considerable amount of interaction. Rainfall had partially ceased in Orissa and over parts of South-West and East Bengal, but elsewhere it was general, and the falls were again heavy in the north of the province. On the 19th pressure had again fallen by small amounts at the great majority of stations, and it continued below the normal by amounts ranging up to a tenth of an inch over parts of Bihar. The westerly element in the wind directions had again strengthened, and winds had become south-westerly at the great majority of stations, and rainfall had continued general in East and North Bengal and Bihar and over a large part of Assam, but elsewhere only local showers were reported. On the 20th pressure began to fall slowly at the southern and western stations, while it was rising elsewhere, and the area of lowest pressure began to retreat southwards. This change continued on the 21st, on which date the lowest pressures in the province were reported from Chaibassa and Bankura, and also on the 22nd, when the lowest pressure had retreated to the north-west angle of the Bay, and was reported from Saugor Island, and on this day a very feeble form of wind circulation appeared to be setting up in connection with the low pressure. With the southerly retreat of the low pressure the area of rainfall also retreated southwards, and towards the end of the week some rather heavy showers were reported in South Bengal, but quite at the end of the week the general rainfall over the province had practically ceased, and only local showers were reported, though in some cases these were decidedly heavy.

*Pressure.*—The general average pressure for the week has been in decided defect from the normal. The largest defect of all has been at Darjeeling, where it has equalled 0.079". The defect at the northern stations along the foot of the hills has usually averaged between 0.04" and 0.05", but it decreases rapidly in amount towards the southern stations, and in South Bengal pressure has been almost normal, the defect at Chittagong having only equalled 0.004" and at Saugor Island 0.001". Still further south in Orissa pressure has been slightly above the normal, the excess at False Point and Cuttack having equalled about 0.01".

In Assam pressure has also been below the normal, the average defect having equalled 0.031".

*Temperature.*—The mean temperature for the week has been in excess in South-West Bengal, Orissa and Chota Nagpur by amounts which have averaged about half a degree. On the other hand defects averaging more than one and a half degrees have been recorded in East and North Bengal and Bihar. For the whole of Bengal the mean average temperature of the week has been about 0.6° in defect. In Assam the mean temperature has been in defect by the large average amount of 2.9°.

*Rainfall.*—North Bengal has received the extremely large average fall of 7.23 inches, or nearly 5 inches more than usual; Bihar has also averaged 5.04 inches, or three and a half inches more than usual; and East Bengal 3.92 inches, or one inch and a half more than the normal. South-West Bengal has averaged nearly two and a half inches, or also half an inch more than the normal, but in Chota Nagpur rather less than two inches have been received or practically a normal fall. The only division indeed in which the fall has been in defect has been Orissa, which has received less than an inch or nearly two inches less than usual.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal, 129 per cent., North Bengal 282 per cent., East Bengal 164 per cent., Bihar 348 per cent., Orissa 32 per cent., and Chota Nagpur 105 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 177 per cent. of the normal.

Some exceedingly heavy falls have been reported at individual stations; falls in excess of ten inches in the week have been received at Champaran, Jalpaiguri, Dinhatta, Kuch Bihar, Matabhanga, Fulbari, Bagdogra, Netrakona, Durgapur, Patna, Dinapur, Hajipur, Rosera and Chanchal. Falls exceeding six inches in a single day have also occurred at Raiganj, Dinhatta, Kuch Bihar, Fulbari, Patna, Hajipur and Beguserai.

In Assam rather heavy falls have also been received during the week; Dhubri has registered 10·15 inches, Sibsagar 8·53 inches and Silchar 2·99 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 22nd of September 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1894.		
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 181.

[First Publication.]

AUSTRALIA—HERVEY BAY.

*Fairway buoy away from position.*

THE Portmaster, Brisbane, has given notice (No. 14 of 1894) that the Fairway buoy marking the northern entrance to Hervey bay is away from its position, and is supposed to have been run down.

A small buoy has been placed to mark the position temporarily, which will be replaced as soon as practicable with a large conical buoy, painted black and carrying a staff and cylinder.

The buoy will be visible five miles in clear weather.

H. B. HOOPER, *Comdr., R.N.M.,*  
*Acting Port Officer of Calcutta.*

Published for general information.

CALCUTTA, the 21st September 1894.

*Under-Secretary, Marine Department.*

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 182.

[First Publication.]

NEW ZEALAND, SOUTH ISLAND—WESTPORT.

*Signal flagstaff moved, beacons, and alterations in night signals.*

THE British Admiralty has given notice (No. 456 of 1894) that, on 19th June 1894, the signal flagstaff at the entrance to Buller river, Westport, would be moved to a position on the western breakwater, 2,100 feet within the outer extremity.

Approximate position, lat.  $41^{\circ} 44' 20''$  S., long.  $171^{\circ} 36' 5''$  E.

A new beacon, 50 feet high, has been erected on the former site of the signal flagstaff.

Leading lights for entering the harbour are shown from two beacons, bearing when in line S. by E.  $\frac{1}{4}$  E. (S.  $17^{\circ}$  E.), and situated on the west bank of the river within the breakwater.

The front light, shown from a white beacon, is *green* when the bar is safe; and *red* when it is not safe.

The rear light, *white*, is shown from a white beacon with a red band. This beacon is 50 feet high, and has a semaphore attached, which will be used when required for the guidance of vessels entering or leaving the harbour.

The undermentioned night signals are shown from the signal flagstaff on the western breakwater, in addition to the general bar; and danger signals for all New Zealand ports:—

1. The *white* harbour light only, signifies—Wait.
2. A *green* light over the *white* light:—Bar safe for vessels of less than 9 feet draught.

3. *Two green lights over the white light*—Bar safe for vessels of 9 feet draught.

4. *A green light under the white light*:—Bar safe for vessels of 11 feet 6 inches draught.

5. *A green light above, and a green light below, the white light*:—Bar safe for vessels of 14 feet draught.

The signals to take the bar will be shown from the signal flagstaff on the west break-water.

Masters of vessels of more than 10 feet draught are requested to signal their draught of water, when arriving off the harbour entrance after half ebb; and of 10 feet draught or less when arriving at low water.

NOTICE TO MARINERS—No. 183.

[First Publication.]

JAPAN—NIIHON, SOUTH COAST.

*Sunken rock south-westerward of Taio Saki.*

THE British Admiralty has given notice (No. 459 of 1894) that a Japanese Chart, recently published, shows a rock with a depth of  $2\frac{1}{2}$  fathoms on it, in a position with O sima observation spot bearing N. by E.  $\frac{1}{2}$  E. (N.  $13^{\circ}$  E.), distant  $1\frac{1}{10}$  miles; and Goza saki, N.W. by N. (N.  $34^{\circ}$  W.); or approximately on plan No. 994 in lat.  $34^{\circ} 12' 30''$  N., long  $136^{\circ} 48' 45''$  E.

This rock has consequently been inserted on the Admiralty charts.

BAY OF BENGAL—BURMA COAST.

*Rangoon river entrance—Spit light-vessel placed in position.*

WITH reference to Notice to Mariners, No. 81, dated 30th April last, issued by this office, the Port Officer, Rangoon, has given notice that the Spit light-vessel at the entrance to Rangoon river has been placed in position in 20 feet low-water springs on the bearings noted:—

Eastern Grove Light-house	...	...	...	N. 16° E.
Elephant Point Obelisk	...	...	...	N. 44° W.

The Eastern Grove light-house in line with the Spit light-vessel N. 16° E. leads 100, yards west of the lower eastern buoy. Therefore on the flood tide an allowance must be made to clear the buoy.

(All bearings are magnetic.)

*Germein bay—Withdrawal of light-vessel and alteration in jetty light.*

WITH reference to Notice to Mariners, No. 120, dated 18th June last, issued by this office, the British Admiralty has given further notice (No. 426 of 1894) that, on 1st August 1894, the light-vessel in Germein bay (*fixed white light*) would be withdrawn; and the light shown from the extremity of Germein jetty would be altered from *red* to *red and white*:—

Germein jetty light is a fixed light, showing *white* from N. 80° E. (southward of Ward spit) to N. 66° E. (northward of the dry part of Cockle spit); *red* from N. 66° E. to N. 12° E. (over Cockle spit); and *white* from N. 12° E. (eastward of Cockle spit) through north to N. 10° W.; it is visible in clear weather from a distance of 10 miles.

The light-house is an iron tower, painted red, with a white lantern.

Approximate position, jetty light, lat. 33° 2' 15" S., long. 137° 5' 30" E.

Approximate position, light-vessel, lat. 33° 3' 45" S., long. 137° 52' 15" E.

CHINA SEA—TONG KING GULF.

*Hainan strait—Flashing light in Hoi Hau bay.*

THE British Admiralty has given notice (No. 427 of 1894) that a light was exhibited from a light-house recently erected in Hoi Hau bay.

Hoi Hau light is a sixth order, dioptric, *group flashing white and red light*, with a total period of *forty-five seconds*; the flashes are exhibited in the following order:—*white flash, one and-a-half seconds*; *eclipse, six seconds*; *white flash, one and-a-half seconds*; *eclipse, six seconds*; *white flash, one and-a-half seconds*; *eclipse, thirteen and-a-half seconds*; *red flash, one and-a-half seconds*; *eclipse, thirteen and-a-half seconds*. It is elevated 73 feet above the sea, and visible 10 miles in clear weather.

The light-house, 22 feet high, is a cylindrical iron tower, painted white, as are the dwellings and boundary wall, and is situated 46½ yards from high-water mark on the south side of the bay.

Approximate position, lat. 20° 1' 15" N., long. 110° 16' 10" E.

NOTICE TO MARINERS—No. 169.

[Third Publication.]

AFRICA, EAST COAST—GULF OF TAJURA.

*Jibuti bay—Light-house constructed and buoyage.*

THE British Admiralty has given notice (No. 419 of 1894) that a light-house has been constructed at fort Ayabele, situated southward of Jibuti bay, exactly on the line joining Direction hill and Pyramid, and with Ambuli house, bearing E. by N.  $\frac{3}{4}$  N. (N.  $70^{\circ}$  E.), distant  $1\frac{1}{4}$  miles; and Manga Daffa N. W.  $\frac{3}{4}$  W. (N.  $54^{\circ}$  W.).

Approximate position, lat.  $11^{\circ} 33' 15''$  N., long.  $43^{\circ} 8'$  E.

Also, that the undermentioned buoys have been moored in Jibuti bay and its approach; entering from seaward, the red buoys should be left on the starboard hand, and the black buoys on the port hand:—

1. A large flat-topped *bell* buoy, painted black, has been moored in  $8\frac{1}{2}$  fathoms at the north-west extreme of the reef, which dries north-westward of Mashah islands, in a position with Scorpion Point, bearing E.S.E. (S.  $68^{\circ}$  E.), distant  $2\frac{3}{4}$  miles; and west extreme of Maskali, S.S.W.  $\frac{1}{2}$  W. (S.  $28^{\circ}$  W.).

Approximate position, lat.  $11^{\circ} 44'$  N., long.  $43^{\circ} 10' 40''$  E.

2. A large flat-topped buoy, painted black, has been moored in 6 fathoms at the north-west extreme of the reef southward of Maskali, in a position with Maskali west extreme, bearing N.E. by N. (N.  $34^{\circ}$  E.), distant 4 cables; and south extreme east, Mashah island, E.  $\frac{3}{4}$  N. (N.  $81^{\circ}$  E.).

3. The small *conical* buoy, painted black, at the north-west extreme of the coral flat westward of plateau du Heron, is now numbered 3, and has been moved to a position in  $5\frac{1}{2}$  fathoms with Heron point bearing E. by S.  $\frac{3}{4}$  S. (S.  $70^{\circ}$  E.), distant  $8\frac{1}{2}$  cables; and Pyramid S. by W.  $\frac{1}{4}$  W. (S.  $14^{\circ}$  W.).

4. A small *conical* buoy, painted black and numbered 2, has been moored in 6 fathoms southward of buoy No. 3, in a position with Heron Point, bearing E.  $\frac{3}{4}$  N. (N.  $81^{\circ}$  E.), distant  $9\frac{1}{2}$  cables; and Pyramid S. by W. (S.  $11^{\circ}$  W.).

5. A large flat-topped buoy, painted black and numbered 1, has been moored in 7 fathoms further southward, in a position with Heron Point, bearing N.E. by E.  $\frac{3}{4}$  E. (N.  $66^{\circ}$  E.), distant  $11\frac{1}{2}$  cables; and jetty light-house S.E. by S. (S.  $34^{\circ}$  E.).

6. A large flat-topped buoy, painted red, has been moored in  $5\frac{1}{2}$  fathoms at the south-east extreme of Motcore reef, in a position with plateau du Heron centre, bearing S.E.  $\frac{3}{4}$  E. (S.  $52^{\circ}$  E.), distant  $2\frac{3}{4}$  miles; and Manga Daffa, S.W.  $\frac{3}{4}$  S. (S.  $36^{\circ}$  E.).

7. A large flat-topped buoy, painted red, has been moored in 6 fathoms at the east extreme of Penguin bank, in a position with plateau du Heron centre bearing S.E.  $\frac{3}{4}$  E. (S.  $53^{\circ}$  E.), distant 2 miles; and Manga Daffa, S.W.  $\frac{1}{4}$  W. (S.  $48^{\circ}$  W.).

8. A small *conical* buoy, painted red, has been moored in  $5\frac{1}{2}$  fathoms at the east extreme of the shoal south-west of Penguin bank, and now named Etoile bank, in a position with plateau du Heron centre bearing E.  $\frac{3}{4}$  S. (S.  $83^{\circ}$  E.), distant  $3\frac{1}{2}$  miles; and Manga Daffa S.S.W.  $\frac{3}{4}$  W. (S.  $29^{\circ}$  W.).

9. A large flat-topped buoy, painted red, has been moored in 6 fathoms on the east side of the large coral bank in Jibuti bay, in a position with Heron Point, bearing E. by N.  $\frac{1}{2}$  N. (N.  $73^{\circ}$  E.), distant  $14\frac{1}{2}$  cables; and jetty light-house S.E.  $\frac{1}{4}$  E. (S.  $45^{\circ}$  E.). This replaces the former conical red buoy.

10. A small *conical* buoy, painted red, has been moored in  $5\frac{1}{2}$  fathoms at the east extreme of the southern coral reef in Jibuti bay, in a position with jetty light-house, bearing E. by S.  $\frac{1}{4}$  S. (S.  $76^{\circ}$  E.), distant  $7\frac{1}{2}$  cables; and Heron Point N.E.  $\frac{3}{4}$  E. (N.  $49^{\circ}$  E.).

(Variation,  $4^{\circ}$  Westerly in 1894.)

H. J. S. Cotton,  
Chief Secy. to the Govt. of Bengal.

## REVENUE DEPARTMENT—(OPIUM).

### NOTIFICATION—No. 552 T.R.

**The 28th September 1894.**—Mr. C. M. Jerdon, Sub-Deputy Opium Agent, is posted, on return from leave, to Sitapur, in the Benares Opium Agency.

C. E. BUCKLAND,  
Secy. to the Govt. of Bengal.

## REVENUE DEPARTMENT—LAND REVENUE.

## NOTIFICATION—No. 556T.R.

*The 28th September 1894.*—Under the powers conferred upon him by section 101(2)(b) of the Bengal Tenancy Act, VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and record of rights prepared, in respect of all lands included within the villages named below in thana Ranisunkoil, pargana Kholora, tauzi No. 56 of the Dinajpur Collectorate, belonging to the estate of the late Raghabendra Narayan Chaudhri, zamindar of Haripur:—

- |                 |                                    |
|-----------------|------------------------------------|
| 1. Panchgharia. | 6. Kalugaon (including Gorak-koe). |
| 2. Chaudipur.   | 7. Dhulijhari.                     |
| 3. Bhaisa.      | 8. Singari.                        |
| 4. Gedura.      | 9. Garh-Bhabanipur.                |
| 5. Manikhari.   | 10. Gopalpur.                      |

The particulars to be recorded in the survey and record of rights shall be the following:—

- (a) The name of each proprietor with the character and extent of his interest.
- (b) The situation, quantity and boundaries of proprietor's private lands as defined in Chapter XI of the Act.
- (c) The name of each tenant, the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, whether his rent is liable to exhaucement during the continuance of his tenure.
- (d) The situation, quantity and boundaries of the land held by him.
- (e) Name of his landlord.
- (f) The rent payable.
- (g) The mode in which that rent has been fixed, whether by contract, by order of a Court or otherwise.
- (h) If the rent is a gradually increasing rent, the time at which and steps by which it increases.
- (i) The special conditions and incidents, if any, of the tenancy.

C. E. BUCKLAND,  
Secy. to the Govt. of Bengal.

## NOTIFICATION—No. 582T.—R.

*The 29th September 1894.*—Under section 3, clause (17) of the Bengal Tenancy Act of 1885, Maulvi Fazlar Rahman, Sub-Deputy Collector, Tippera, is authorised to discharge the functions of a Revenue officer under the provisions of that Act, so far as they relate to Revenue officers, and is vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the rules under the said Act for the purpose of making a survey and record of rights in respect of the lands appertaining to the Palpara estate in pargana Shingyre, included in pargana Gangamandal, in the district of Tippera.

C. E. BUCKLAND,  
Secy. to the Govt. of Bengal.

## DRAFT RULES UNDER THE NEW LAND ACQUISITION ACT, I OF 1894.

## NOTIFICATION—No. 584T.—R.

*The 29th September 1894.*—The passing of the new Land Acquisition Act I of 1894 having rendered it necessary to revise the rules published by Government, under section 59 of Act X of 1870, in the *Calcutta Gazette* of the 6th November 1889, it is proposed to replace them by the following rules which are published under clause (2) of section 55 of Act I of 1894. These draft rules, with any criticisms that may be offered, will be finally considered after a month from the date of publication:—

I.—Whenever any revenue-paying land shall be acquired under the Act, the proprietor shall, except as provided in Rule VI, be relieved of liability to pay revenue to the extent of the Government demand upon the said land, and such relief shall have effect from the date on which the Collector may take possession of the land on account of Government.

II.—In such cases the Collector shall, before making an award, ascertain in accordance with the two next following rules, and record the amount of Government revenue which is to be taken as payable in respect of the acquired portion, and shall, in the event of a reference being made to a Court, furnish the Court, at the time of making the reference, with particulars of the amount of the share so ascertained and recorded.

III.—If the land to be acquired be an entire estate or tenure assessed with a specific amount of revenue, the whole of such amount shall be remitted.

IV.—If the land be not liable for a specific amount of revenue, but be a portion of an estate or tenure which is liable for a specific amount, the proportion of Government revenue to be deemed payable in respect of the land taken shall be ascertained under the following rules :—

1st.—When an estate has, within twenty years next preceding the date of the commencement of proceedings for the acquisition of any land situate therein, been subjected to a detailed settlement, or has formed portion of an estate brought under partition under Act VIII (B.C.) of 1876, made after inquiry into and record of the assets of the estate, the Government revenue to be deemed payable in respect of the said land shall bear to the assets of the said land the same proportion as the Government revenue of the whole estate bears to the assets of the whole estate, as shown in the settlement or partition proceedings.

2nd.—When there may have been no such settlement or partition as aforesaid, then, if the area of the estate is known with accuracy, the amount of Government revenue to be deemed payable in respect of the portion of the land taken, shall bear to the Government revenue of the whole estate the same proportion as the area of the said portion bears to the area of the whole estate.

3rd.—When the Government revenue deemed payable in respect of the land taken cannot be determined by either of the above rules, one-fourth of the net rent (*i.e.*, the gross rental less a deduction of 10 per cent. for the expenses of collection) of the said land shall be taken to be the amount of Government revenue thereon chargeable.

V.—In determining the amount of compensation, the Collector shall take into consideration the fact that the land acquired is subject to the burden of the payment of Government revenue.

VI.—In the event of the proprietor declining to accept an abatement of revenue, such circumstance shall not entitle him to any compensation over and above the amount fixed on the original basis of calculation. In cases, however, in which the area of the portion of land acquired does not exceed one-twentieth part of the area of the estate, it shall be competent to the Revenue authorities, if the proprietor of the estate so desire, to pay to the proprietor the computed value of the revenue deemed payable in respect of such portion on the condition of his continuing to pay the revenue of the entire estate without abatement: provided that, in computing the value of the revenue so assigned, the basis of calculation shall not exceed the number of years' purchase (if known) upon which the market value of the proprietor's profits, *i.e.*, the amount of compensation for the land, has been determined. Thus, if the market value of the said profits has been computed at 12 years' purchase, the capitalized value of the revenue deemed payable in respect of the portion of land acquired shall be calculated at not more than 12 years' purchase of the amount of revenue in question.

VII.—When there is any question whether the land to be acquired is part of a revenue-paying estate, or is revenue-free, the Collector shall decide the matter before making his award, leaving it to the claimants to apply for a reference to the Court if they object to his decision. In case of a reference being applied for, the Collector shall, if he has decided that the land is revenue-free, determine the amount of revenue which would be payable for it in the event of its being held to belong to the revenue-paying estate of which it is alleged to form a part.

VIII.—To enable him to calculate accurately the additional compensation to be given under section 23(2) of the Act, and to keep up fully and clearly his registers of all lands occupied and compensation paid for them, the Collector shall invariably record separately his finding under the first head of section 23(1) of the Act, which concerns the market value of the land.

IX.—The procedure laid down for a reference under section 18 shall be held applicable to a reference under section 30 or 35. The compensation money, or, if any of the parties are willing to accept payment of their shares and payment to them is admissible, the portion of it which is in dispute and cannot be paid away shall be deposited in Court when the reference is made.

X.—In giving notice of the award under section 12 (2) and tendering payment under section 31 (1) to such of the persons interested as were not present personally, or by their representatives when the award was made, the Collector shall require them to appear personally or by a representative, by a certain date, to receive payment of the compensation awarded to them, intimating also that no interest will be allowed to them if they fail to appear. If they do not appear, and do not apply for a reference to the Civil Court under section 18, the Collector shall, after such further endeavour to secure their attendance as may seem desirable, pay the amounts due into the Treasury on revenue deposit, and vouched for in the form prescribed by rule 5 on page 211 of the Civil Account Code, volume I, 5th edition. When the payees ultimately claim payment of sums placed on deposit, the amounts will be paid to them in the same manner as ordinary revenue deposits, under the authority of the Collector. Whenever payment is claimed through a representative, whether before or after deposit of the amount awarded, such representative must show legal authority for receiving the compensation on behalf of his principal.

M. Waller to be Chairman of the Commissioners of the Port with effect from the same date.

**No. 93Marine.**—Under the provisions of section 16 of the Calcutta Port Act, 1890, Captain A. Gwyn, R.I.M., is appointed a Commissioner of the Port of Calcutta, *vice* Captain A. Campbell, R.I.M., resigned, with effect from the 1st September 1894.

Captain H. A. Street, R.I.M., will continue to act as a Commissioner of the Port of Calcutta during Captain Gwyn's absence from Calcutta.

The 2nd October 1894.

NOTIFICATION.

*No. 94 Marine.*—IN exercise of the power conferred by section 40 sub-sections (1) and (2) of the Indian Merchant Shipping Act (VII of 1880), as amended by the Deck and Load Lines Act (XVII of 1891), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal proposes to make the following rules:—

*Rules as to Load Line Marks, Seasons, Certificates, Draught of water, and Freeboard.*

1. The lines to be used in order to indicate the maximum load line under different circumstances and at different seasons shall be nine inches in length and one inch in thickness, and the maximum load line shall be the upper edge of each of such lines.

2. The said lines shall be horizontal lines marked on both sides of the ship, extending from and at right angles to a vertical line marked twenty-one inches forward of the centre of the disc. The maximum load line in fresh water shall be marked abaft such vertical line, and the maximum load lines in salt water shall be marked forward of such vertical line, as shown in the following diagrams:—

FOR STEAMER.

*Starboard Side.*

*Port Side.*

FOR SAILING VESSEL.

*Starboard Side.*

*Port Side.*

The arrow ( ) points in the direction of the vessel's head.

The provisions of the Indian Merchant Shipping Act, 1880, Chapter II, shall have effect as if any such maximum load line were drawn through the centre of the disc.

3. Such maximum load lines shall be as follows namely:—

- For fresh water,
- „ Indian summer (Indian fair weather season),
- „ summer (Indian foul weather season),
- „ winter,
- „ winter, North Atlantic,

and shall be distinguished by initial letters permanently and conspicuously marked opposite such horizontal lines as aforesaid, such initial letters being as follows:—

- F. W.—Fresh water.
- I. S.—Indian summer (Indian fair weather season).
- S.—Summer (Indian foul weather season).
- W.—Winter.
- W. N. A.—Winter, North Atlantic.

The upper edge of the horizontal line passing through the centre of the disc shall always indicate the summer freeboard in salt water.

4. Steam-ships shall be marked with such of the horizontal lines as aforesaid as are applicable to the nature of their employment, and sailing ships shall be marked with such of the above-mentioned lines, in addition to the summer load line, as indicate the maximum load line for fresh water and for North Atlantic winter, but sailing ships engaged solely in the coasting trade shall only be marked, in addition to the summer load line with the line indicating the maximum load line in fresh water.

5. The said disc, and the lines, or marks, to be used in connection therewith, shall be painted white or yellow on a dark ground, or black on a light ground, and the position of the disc, and of each of the lines, shall, in the case of iron and steel vessels, be permanently marked by centre punch marks, and shall, in the case of wooden vessels, be sunk for their breadths into the planking a depth of not less than one-quarter of an inch.

A diagram showing the distance in feet and inches from the deck line to the centre of the disc and the relative position of the other lines shall be issued with and as a part of the certificate of approval (or alteration) of the load line.

6. Application for a certificate of approval of the position of the disc or any alteration thereof shall be made by the owner or agent in the Form marked L.L. 1 in the schedule hereto annexed, and the certificate shall be issued in duplicate in the form in the schedule hereto annexed, which is applicable to the case; one part shall be delivered to the applicant, and the other part shall be forthwith sent to the Port Officer at the port of—

The managing owner, agent or master shall also forthwith, on the delivery to him or his agent of any such certificate as aforesaid, cause the same to be framed and put up in some conspicuous part of the ship so as to be visible to all persons on board the same, and shall cause it to be continued so put up so long as such certificate remains in force and such ship is in use.

On a certificate of approval ceasing to have effect, application shall at once be made by the registered managing owner of the ship for the granting of a new certificate of approval, and the old certificate shall be delivered up to the Government who issued and who shall cancel the same.

7. The master of every British or British Indian ship shall, before she leaves any port in India for the purpose of proceeding to sea, enter in the official log all the particulars stated in the certificate so issued as aforesaid if not previously entered.

8. For the purpose of these rules the following periods shall mean “Indian summer” (fair weather season), and “summer,” respectively:—

	Fair season (Indian Summer).	Summer.
(a) Bay of Bengal, east of Tuticorin.	15th November to 15th May.	16th May to 14th November.
(b) West Coast: Sind, Bombay and Malabar.	1st September to 15th May.	16th May to 31st August.

The seasons as prescribed should have reference to the “nature of the voyage” in all cases.

9. The following rules are prescribed with respect to certificates of approval and their duration:—

- (a) As regards iron and steel ships, whether classed or unclassed, and classed wooden ships, the certificate shall cease to have effect if and so soon as the class of the ship (if classed) is either changed or withdrawn, or if and so soon as any deterioration has taken place in the structural condition of the ship, whether classed or unclassed. Such certificate shall be in one of the forms L.L. 2 or L.L. 3 in the schedule hereto, as the case may be.

- (b) As regards unclassified wooden ships which have been opened out for survey, the certificate shall be granted for a fixed time varying with the age and condition of the ship at the expiration of which it shall cease to have effect. Such certificate shall be in the form L.L. 3A in the schedule hereto.
- (c) As regards unclassified wooden ships which have not been opened out for survey, no limit of time shall be imposed in the certificate, which shall be in the form L.L. 3B in the schedule hereto.

10. For the purpose of these regulations the expression "amidships" shall mean the middle of the length of the load water line as measured from the fore side of the stem to the aft side of the stern post.

Officers entrusted with assignment of Freeboard and the survey of vessels reported to be overladen will be guided by the Tables of Freeboard issued by the Board of Trade and as modified or supplemented by the Board from time to time.

#### SCHEDULE.

##### FORM L.L. 1.

APPLICATION for CERTIFICATE of APPROVAL of the position of a Load Line Disc under the provisions of the Indian Merchant Shipping Act (VII of 1880), as amended by the Deck and Load Lines Act (XVII of 1891).

APPLICATION is hereby made to \_\_\_\_\_ for a certificate of approval of the position [or alteration of the position] of a load line disc on the \_\_\_\_\_ Official No. \_\_\_\_\_ [The vessel is classed in \_\_\_\_\_] is not classed in \_\_\_\_\_.

The vessel is (is not) intended to be employed in the North Atlantic trade.

No previous application has been made for a certificate of approval of the position [or alteration of the position] of a load line disc on this vessel to any other authority appointed in accordance with the Indian Merchant Shipping Act (VII of 1880) as amended by the Deck and Load Lines Act (XVII of 1891) [except in respect of a previous certificate dated \_\_\_\_\_, which has expired (or ceased to have effect)].

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_.

Managing Owner (Agent).

##### FORM L.L. 2.

CERTIFICATE of APPROVAL of the Position [or alteration of the position] of the Disc on the steamship "\_\_\_\_\_" Official No. \_\_\_\_\_, in pursuance of the Indian Merchant Shipping Act (VII of 1880), as amended by the Deck and Load Lines Act (XVII of 1891).

[I, \_\_\_\_\_, a Surveyor employed by \_\_\_\_\_, and specially authorized by \_\_\_\_\_ in this behalf]

[or I, \_\_\_\_\_, an officer of the Government of \_\_\_\_\_] have approved on behalf of the Government of \_\_\_\_\_ the position [or alteration of the position] of the disc on the steamship [or ship] "\_\_\_\_\_" Official No. \_\_\_\_\_, and hereby certify that the centre of such disc is placed at \_\_\_\_\_ feet \_\_\_\_\_ inches below the \_\_\_\_\_ deck line marked under the provisions of the Merchant Shipping Act, 1876. [Indian Merchant Shipping Act, 1880].

This certificate is to remain in force only so long as the vessel remains in her present class, if classed, and no material deterioration has taken place in her present structural condition, whether classed or unclassified.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_.

(Signed.)

##### FORM L.L. 3.

CERTIFICATE of APPROVAL of the Position [or alteration of the position] of the Disc on the sailing ship "\_\_\_\_\_" Official No. \_\_\_\_\_, in pursuance of the Indian Merchant Shipping Act (VII of 1880) as amended by the Deck and Load Lines Act (XVII of 1891).

[I, \_\_\_\_\_, a Surveyor employed by \_\_\_\_\_, and specially authorized by \_\_\_\_\_ in this behalf]

[or I, \_\_\_\_\_, an officer of the Government of \_\_\_\_\_] have approved, on behalf of the Government of \_\_\_\_\_, the position [or alteration of the position] of the disc on the steamship [or ship] "\_\_\_\_\_" Official No. \_\_\_\_\_, and hereby certify that the centre of such disc is placed at \_\_\_\_\_ feet \_\_\_\_\_ inches below the \_\_\_\_\_ deck line marked under the provisions of the Merchant Shipping Act, 1876. [Indian Merchant Shipping Act, 1880.]

This certificate is to remain in force only so long as the vessel remains in her present class, if classed, and no material deterioration has taken place in her present structural condition, whether classed or unclassified.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_.

(Signed)

**POSITION of LINES to be used in connection with the Disc.**

Maximum load-line in fresh water,                      feet                      inches above the centre of the disc.

Maximum load-line in winter, North Atlantic,                      feet                      inches below the centre of the disc.

*Note.*—In accordance with the rules made by the Government of India the disc and lines must be permanently marked by centre punch marks or cutting, and the particulars given in this certificate are to be entered in the official log. This certificate must also be framed and put up in some conspicuous part of the ship.

If, and so soon as the class of the ship, if classed, is either changed or withdrawn, or if and so soon as any deterioration takes place in the structural condition of the ship, whether classed or unclassed, this certificate will be cancelled, and must be delivered to the Government for that purpose, and the owner will then be entitled to apply either to the original load-line authority, or to any other load-line authority approved by the Government, for a new certificate.

**L.L. 3A.**

**CERTIFICATE of APPROVAL of the POSITION [alteration of the position] of the Disc, on the sailing ship “                      ,” Official No.                      , in pursuance of the Merchant Shipping Act, VII of 1880, as amended by the Deck and Load Lines Act, XVII of 1901.**

By order of the Board of Revenue, L.P.,

M. FINUCANE, *Offg. Secretary.*

BOARD OF REVENUE, L.P., FORT WILLIAM, the 28th August 1894.

#### NOTIFICATION.

The 25th September 1894.—In supersession of the rules made under the provisions of section 75 of the Sea Customs Act VIII of 1878, and published under notification of the 2nd March 1887, at page 149, Part I of the *Calcutta Gazette* of the 9th idem, the following rules are notified under the said section:—

The fee to be charged under Rule 6 has been sanctioned by the Lieutenant-Governor.

1. Baggage includes all packages imported by a passenger for his own use or that of his family, which are not part of the cargo and are not manifested.

Baggage is not exempt from duty except under the circumstances mentioned below.

2. Baggage is exempt from duty only when it consists of articles free from duty or of *bond fide* wearing apparel and other articles of personal use, the property of the person whose baggage is being passed, or of any members of his family such as are in actual use at time of importation, or have been actually in use previously. It is in the discretion of the proper officer of Customs to determine, subject to the above rules, whether any goods shall be treated as baggage exempt from duty, or as goods liable to duty.

3. In Calcutta baggage officers will examine on board only such free baggage, not contained in soldered or nailed-down cases, as the passenger offers for examination; all other baggage will be sent to the baggage shed at the jetties in the case of vessels lying at the jetties; at the close of the day on which the vessel arrives, baggage landed from her will be sent to the Custom House. In the case of other vessels, baggage will be sent direct to the Custom House if unexamined.

4. It is optional with the proper officer of Customs to allow the cases of persons about to proceed up-country immediately to be passed without being opened. This discretion will never be exercised except on personal application of the owner of the baggage, or his or her representative: a detailed statement of contents and value signed by the owner must always accompany the application.

5. The Preventive officer should report at once whenever he detains any dutiable articles in order that a peon may be deputed to convey them to the Custom House.

6. A landing fee of eight annas per package will be charged on goods sent into the Custom House.

7. Preventive officers will, as far as practicable, see baggage put over the ship's side immediately after examination.

8. Preventive officers posted to passenger vessels are directed to land with as little delay as possible all baggage intended for the Custom House or import shed.

9. Preventive officers are not authorised to pass passenger's baggage after it has been placed in the jetty shed.

10. Officers are authorised to pass from on board all firearms in reasonable quantities and other dutiable goods belonging to passengers from a British Indian port, upon signature of the following declaration, reporting the number and nature of the articles so passed:—

"I hereby declare that my baggage includes no firearms or other dutiable articles belonging to a passenger from a foreign port, that is, from a port other than a British Indian port."

Name \_\_\_\_\_

Address \_\_\_\_\_

The above order does not apply to ammunition, which Preventive officers are not authorised to pass.

11. They are further authorised to pass from on board ship, reporting having done so, (1) uniform and accoutrements belonging to a public servant for his personal use, (2) arms forming part of the equipment of an officer entitled to wear diplomatic, military or police uniform, &c., upon signature of the following declaration:—

"I hereby declare I am a \_\_\_\_\_ officer serving in India."

12. Passengers' baggage need not be detained owing to arms and ammunition or other dutiable articles being found in their boxes, unless they have in any way attempted to conceal them: in such cases the articles should not be passed.

13. Shipping bills are not required for the shipment of *bonâ fide* passengers' baggage.

14. Preventive officers should examine baggage brought for shipment to China, the Straits, Mauritius and Ceylon, and should report for orders any case in which they have good reasons to suppose that baggage for other ports contain dutiable or contraband articles.

15. Passengers are allowed to embark and disembark at Diamond Harbour.

(a) It will be the duty of the Preventive officer in charge of the station to see that neither opium nor ganja is taken on board of outward-bound vessels.

(b) Passengers landing at Diamond Harbour may be allowed to take their own baggage containing free articles only. Passengers desirous of leaving inward-bound vessels with the intention of embarking on board outward-bound ones will not be permitted to take with them any other than personal baggage, which must be examined in the usual way.

(c) No nailed-down packages, arms, ammunition, spirits or dutiable articles of any kind will be allowed to be transhipped. Any articles transhipped in defiance of this order will be seized and detained.

By order of the Board of Revenue, L.P.,

N. K. ROSE, *Offg. Secretary*

#### NOTIFICATION—No. 1836B.

In exercise of the powers conferred on the Chief Customs authority by section 15 of the Customs Act, VIII of 1878, the Board of Revenue, Lower Provinces, appointed No. 9 at the Kidderpore Docks to be a public warehouse for the storage of salt under bond.

E. V. WESTMACOTT, Esq.

By order of the Board of Revenue, L.P.,

N. K. ROSE, *Offg. Secretary*.

CALCUTTA, the 26th September 1894.

### CUSTOM HOUSE NOTICE.

THE Durga and Lakshmi Puja holidays this year are from the 4th to the 15th October inclusive.

On the 4th, 5th, 10th, 11th, 12th, and 13th October the Custom House will be open during the usual hours for transaction of all business.

The Treasury on these days will be open.

On the 6th, 8th, 9th, and 15th October the Custom House will be open (on a day's notice being given) free of charge from 11 A.M. to 12 noon for entering or clearing any vessel, and for the issue of bills-of-entry or shipping bills covering free goods from or to the same.

The Treasury on these days will be closed.

### ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

#### MUNICIPAL AND LOCAL.

##### NOTIFICATION.

*No. 3963L.S.-G.—The 1st October 1894.*—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sadar Local Board in the district of Puri, under sections 25 and 29 of the Bengal Local-Self Government Act, III of 1885, of Babu Khetra Mohan Bose to be their Chairman, *vice* Babu Gopal Chandra Sarkar, resigned.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

##### NOTIFICATION.

*No. 3970L.S.-G.—The 25th September 1894.*—It is hereby notified that the members of the Sitamarhi Local Board in the district of Muzaffarpur having at a meeting, under section 25 of the Bengal Local Self-Government Act, III of 1885, requested the Lieutenant-Governor to appoint a Chairman, the Lieutenant-Governor is pleased, under the said section, to appoint Mr. W. Egerton, Sub-divisional Officer, to be Chairman of that Local Board.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

##### NOTIFICATION.

*No. 3972L.S.G.—The 1st October 1894.*—It is hereby notified for general information that, under section 6 of the Bengal Ferries Act I of 1885, the Lieutenant-Governor is pleased to declare the Kochani ferry, over the river Kochani, in the Buxar sub-division of the district of Shahabad to be a public ferry.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

##### NOTIFICATION.

*No. 3973L.S.G.—The 1st October 1894.*—It is hereby notified that the Lieutenant-Governor is pleased, in the exercise of the power conferred on him by section 35 of the Bengal Ferries Act I of 1885, to direct that the Kochani ferry, over the river Kochani, situated in the Buxar sub-division of the district of Shahabad, shall be managed by the District Board of Shahabad, and that all the proceeds of the ferry, and all the fines levied and compensation received under the said Act in respect thereof, shall be paid into the district fund with effect from the date of this notification.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 3977L.S.-G.—The 2nd October 1894.*—It is hereby notified that the members of the Satkhira Local Board in the district of Khulna having at a meeting, under section 25 of the Bengal Local Self-Government Act, III of 1885, requested the Local Government to appoint a Chairman, the Lieutenant-Governor is pleased under the said section and section 29 to appoint Babu Gati Krishna Neogi, Sub-divisional Officer, to be the Chairman of that Local Board, *vice* Babu Poresh Nath Chatterjee, resigned.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 3991L.S.-G.—The 1st October 1894.*—It is hereby notified for general information that, under rule 64 of the rules framed under section 138 (a) of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to fix Thursday, the 29th November 1894, as the date for holding an election under section 19 of the Act, in thana Purbasthali, in the district of Burdwan, for the purpose of filling the vacancy in the representation of that thana on the Local Board of Kalna, caused by the resignation of Babu Jogen-dra Narain Rai.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## DECLARATION.

*No. 3979M.—The 2nd October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for the improvement of Koomedan Bagau Bustee, it is hereby declared that for the above purpose pieces of land Nos. 14 and 20, Collinga 1st Lane, and No. 87, Ripon Street in the town of Calcutta, district 24-Parganas, measuring, more or less, 5 cottahs and 9 chitaks only, are required. The boundaries of the land are as follows:—

*Portion marked A on plan.*—On the North and South the remaining portion of No. 14, Collinga 1st Lane; on the East public sewered ditch; on the West Collinga 1st Lane.

*Portion marked B on plan.*—On the North Municipal land; on the South and East the remaining portion of No. 87 Ripon Street; on the West public sewered ditch.

*Portion marked C on plan.*—On the North and West the remaining portion of No. 20, Collinga 1st Lane; on the East Municipal land; on the South public sewered ditch.

Plan and specifications of the land are filed in the office of the Commissioners for public inspection.

This declaration cancels Notification No. 2812M., dated the 3rd November 1892, published at page 254, Part IB. of the *Calcutta Gazette* of the 9th idem.

This declaration is made, under the provisions of section 6 of Act 1 of 1894, to all whom it may concern.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION—No. 5320R.P.

*The 28th September 1894.*—Under section 129 of the Bengal Cess Act IX of 1880, Babu Hari Nath Roy is re-appointed to be Vice-Chairman of the Singhbhum District Road Committee.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

#### Advertisement of sale.

**NOTICE** is hereby given that the undermentioned plots of canal surplus land no longer required by Government, in the district of Shahabad, will be put to sale at 11 o'clock on the 30th October 1894.

The purchasers of the several plots of land will be subject to the following conditions :—

1. If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
2. If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited; if the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
3. The plots of land will be sold revenue free to the highest bidders.
4. The purchasers will have to respect the right of the raiyats and collect rent from them in accordance with the rent-roll prepared and filed with the record of the case.
5. The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale—

Consecutive lot number.	Name of district.	Name of pargana and mauza.	Approximate area of lot in bighas.	Land excluded from sale from each lot.	Commencement and termination of lot.	Boundary of lot.

Shahabad Collectorate, Arrah, the 12th September 1894.

C. A. OLIPHAM, Collector.

## Advertisement of Sale.

**NOTICE** is hereby given that the undermentioned plots of land, no longer required by Government, situated in the district of Muzaffarpur, will be put up to sale at 10 o'clock on the 1st November 1894 at the Muzaffarpur Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

## Conditions.

**1st.**—The amount of bid should not be less than the price shown against each lot. The lots will be sold to the highest bidders with or subject to an annual revenue shown against each lot.

**2nd.**—One-fourth of the amount of bid must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled (the sum deposited being forfeited to Government), and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

**3rd.**—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale:—

PROCLAMATION OF SALE.  
[SECTION 287 OF THE CODE OF CIVIL PROCEDURE.]  
DISTRICT CUTTACK.

In the Court of the Subordinate Judge at Cuttack.  
EXECUTION CASE No. 717 of 1894.

ORIGINAL SUIT No. 62 of 1889.

Chowdhuri Krutibas Das of Bhingarpur, pargana Kotdesh, decree-holder, *against* Goluk Chandra Bose and Hem Chandra Bose, both of Srikrishnapur *alias* Kuapal, pargana Matkatnagar, judgment-debtors.

**NOTICE** is hereby given that, under section 284, Act XIV of 1882, an order has been passed by this Court for the sale of the properties mentioned in the annexed schedule in satisfaction of the claim of the decree-holder in the suit mentioned above, amounting with costs and interest up to date of sale to the sum of Rs. 81,427-10-2.

The sale will be by public auction, and the properties to be put up for sale in the lots specified in the said schedule. The sale will be of the property of the judgment-debtors above named as mentioned in the schedule below, and the liabilities and claims attaching to the said properties, so far as they have been ascertained, are those specified in the schedule against each lot.

In the absence of any order of the postponement, the sale will be held by this Court at the monthly sale commencing at 12 o'clock on the 17th November 1894. In the event, however, of the debt above specified and of the costs of the sale being tendered or paid before the knocking down of any lot, the sale will be stopped.

At the sale the public generally are invited to bid either personally or by duly authorized agents. No bid by or on behalf of the judgment-creditors above mentioned, however, will be accepted, nor will any sale to them be valid without the express permission of the Court previously given.

*Schedule of properties.*

1	2	3	4	5
Number of lot.	Description of the property to be sold, with the name of each owner where there are more judgment-debtors than one.	The revenue assessed upon the estate or part of the estate if the property to be sold is an interest in an estate or part of an estate paying revenue to Government.	Detail of any incumbrance to which the property is liable.	Claims, if any, which have been put forward to the properties and any other known particulars bearing on its nature and value.
1	12a. 3g. 1k. 15b. 13g. share of the zamindari taluk Radha Mohan Prasad in pargana Barua, bearing tauzi No. 1313, and the Government revenue payable for the whole being Rs. 5,765 13a. 9p. 8b.	The Government revenue payable for the share to be sold is Rs. 4,384-14.	The property is liable to the mortgage decree in this suit.	Nil.
2	3 annas share of the zamindari taluk Padmanabhpur in pargana Dihi Anrukhpur, bearing tauzi No. 1971, and the Government revenue payable for the whole estate being Rs. 3,513-1-4.	The Government revenue payable for the share to be sold is Rs. 658-11-3.	Ditto ...	Nil.

## Oudh Forest Department.

## BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of *sāl* beams and scantlings supplied from this depot will be as follows:—

BEAMS—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.

Under 12 and over 7	"	2-4	"
Under 7 feet	"	"	"

The above prices are for ordinary building purpose. For *Planking Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still taken orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

*Second and Third Class Timber* will be sold and price fixed by agreement.

*Auction Sales* will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge. By order of the Conservator of Forests, N.-W.P. and Oudh, Oudh Circle.

KANYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1886.

## Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGAL GOVERNMENT  
CINCHONA PLANTATION.

THE price of this quinine is as follows:—

1 pound tin	Rs. 16 or, post free,	Rs. 16-12.
$\frac{1}{2}$ " "	8, " "	8-8.
$\frac{1}{4}$ " "	4, " "	4-8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

## Cinchona Febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, Rs. 2, *ans.* 8; per eight-ounce tin, Rs. 5; per pound tin, Rs. 10. The general public can be supplied by the Superintendent, Botanic Garden, for *Cash only* at the undernoted rates—per four-ounce tin, Rs. 3; per eight-ounce tin, Rs. 6; per pound tin, Rs. 12. This medicine is also sold by the principal European and native druggists in Calcutta. Postage four annas per 4-oz. tin, eight annas per 8oz. tin, and twelve annas per pound tin, in addition to the fore-

## Currency Notes.

THE following Currency Note of the Calcutta Circle is stated to have been destroyed, and payment of its value has been claimed by the person whose name is placed against the number; any other person claiming a right to it is warned to communicate at once with the undersigned:—

Notes wholly lost or destroyed.

Ramkrishnapore Ghat Road, Howrah P. O.

H. J. BREERETON, Asst. Compt.-Genl., in  
charge, Paper Currency.

Paper Currency Dept., the 14th September 1894.

## Stolen.

TWO Government Promissory Notes Nos. 182598 and 182599 of the four per cent. loan of 1865 for Rs. 1,000 (one thousand) each, standing in the name of Mahendra Nath Chuckerbutty, the proprietor, by whom it was never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicates in favour of the proprietor.

MAHENDRA NATH CHUCKERBUTTY, Amradanga,  
(576—3) Badu Post Office, 24-Parganas.

## Notice.

NOTICE is hereby given that six graves in the Bankura Cemetery, bearing the undermentioned inscriptions, are in a ruinous condition and need immediate attention. If no communication is received from any friend or relation of the deceased undertaking to restore them, the Magistrate of the district will take the necessary measures to level them with the ground as laid down in rule XIX of the rules and regulations relating to cemeteries:—

No.	Description of monument.
-----	--------------------------

Sacred to the memory of Lieutenant James Awdry, 55th Regiment, B. N. I., Assistant to the Political Agent at Ramghur, died 31st May 1836, aged 31. Erected by his brother officers and other friends by whom he was sincerely beloved and who deeply lament his untimely fate.

Sacred to the memory of the late Lieutenant-Colonel A. Shuldham, Commanding 31st Regiment, N. I., who departed this life on the 23rd day of February 1835, aged 46 years. Erected by the officers of his regiment as a mark of their respect and esteem.

Sacred to the memory of Ensign W. F. Alexander, 50th Regiment, N. I., who departed this life on the 25th day of March 1833. This monument is erected by the officers of his Regiment as a mark of the regard and esteem in which he was held by them, and in whom the regiment has lost a young officer of the brightest promise.

Here are interred the remains of Lieutenant James Henry Beck of the 24th Regiment, N. I., who departed this life at Bankura on 29th March 1833, aged 23 years. This monument is erected by his brother officers as an unaffected tribute to depart-  
worth and in testimony of sincere regard.

To the memory of Captain Stephen Mercer of the 35th Regiment, N. I., who departed this life on the 20th November 1821, aged 37 years.

Sacred to the memory of Ann, the beloved wife of George Earl, Esq., born 9th January 1800, died 6th December 1833.

ROBERT CORNISH, Magistrate.

Bankura Magistracy, the 18th September 1894.

## The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta Madras, Bombay, and Allahabad, and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately (inclusive of postage in India) ...	.....	2 0 0
„ part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied of subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series, per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series, per copy ...	0 5 3	0 5 9
„ the Calcutta Series. For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Report should apply to—  
 Superintendent, Government Press, Madras.  
 The Superintendent, Government Central Press, Bomb.  
 „ Curator of Government Books, North-Western Provinces and Oudh.  
 „ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page	Half page.	Quarter page.
	Rs.	Rs.	Rs.

three issues ...	55	36	24
six „ ...	100	68	45
nine „ ...	145	96	64
twelve „ ...	180	120	80

SEVERAL volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
Bengal Law Reports for one year ...	20 0 0	22 8 0
Single copies, Rs. 2 per copy.		
Full Bench Rulings, Parts I and II ...	20 0 0	22 8 0

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.  
 Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

## Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

## INDIAN LAW REPORTS.

## NOTICE TO SUBSCRIBERS.

SUBSCRIBERS are hereby informed that, unless complaint of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four series at subscription rates and at full rates is shown below:—

## REVISED ADVERTISEMENT.

**A Dictionary of the Economic Products of India.**

By Dr. Geo. WATT, C.I.E.,

*Reporter on Economic Products.*

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Vol. VI. Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G. Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI, which will consist of four parts, Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

**Indian Wheat Trade, Parts I, II and III, combined.** Royal 8vo., limp cover. Rs. 1-8 (4s.)

**Manual of the Land Revenue Systems of India.** By B. H. BARNES-POWELL. Revised Edition, in 3 Volumes—Royal 8vo., cloth.

## REVISED ADVERTISEMENT.

**A Dictionary of the Economic Products of India.**  
By DR. GEO. WATT, C.I.E.,*Reporter on Economic Products.*

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Vol. VI. Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F, and half of G. Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of Q; Vol. VI, which will consist of four parts, Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

**Indian Wheat Trade, Parts I, II and III, combined.** Royal 8vo. Limp cover. Rs. 1-8 (4a.)

**Manual of the Land Revenue Systems of India.** By R. H. BADEN-POWELL. Revised Edition, in 3 Volumes.—Royal 8vo., cloth.

CALCUTTA, the 2nd October 1894.

F. COLLIS SANDES, *Offg. Administrator-General, Bengal.***In the Court of the Subordinate Judge of Faridpur.****RENT EXECUTION No. 19 OF 1894.**

Asutosh Goswami and others, decree-holders, *versus*  
 (1) Peary Lal Roy; (2) Autullya Charan Roy; (3) Bishnu Charan Roy; (4) Amrita Lal Roy; and (5) Biseswari Dasya, judgment-debtors.

IT is hereby notified for general information that 5 annas 16 gandas 2 karas and 2 krantis share of the undermentioned estate, being the right, title and interest off the judgment-debtors, will be sold at public auction by the Nazir of the District Judge, Faridpur, at his Court-house, on Tuesday, the 20th day of November 1894, in execution of a decree of this Court passed on the 29th day of June 1894, in rent suit No. 6 of 1894:—

Mahal bearing No. 2635 on the rolls of the Faridpur Collectorate, lying in pargana Naldi and comprising mauzas Amdadanga, Bagbhaya, Vatai Dhopa, Chamta, Chapta, Ghoradanga, Hirankandi, Jangaliatola, Khorhat, Chhota Kharkandi, Mahanag, Majra, Pabanibil, Shibgoti, Alkhadia, Gouraganti, Hijlitola, Ikraail, Dahartola, Prabaldangutola, and Roohitkandi, all lying within police-station Muksudpur, and kismats Biswanathpur, Kadmi and Katagar, lying in police-station

Bhusna, all within the jurisdiction of this Court. The mahal stands in the name of Jagat Chandra Roy, and pays a sadar jama of Rs. 1,898-1-3½, and thus the sadar jama of the above share to be sold amounts to Rs. 670-2-2.

MOHIM CHANDRA GHOSE, Subordinate Judge.  
 Faridpur, the 26th September 1894. (670—1)

**Notification.**

IN modification of the notification published in Part I, page 205 of the *Calcutta Gazette* of the 14th March 1894, and under the authority vested in him by section 20 of the Chota Nagpur Encumbered Estates Act of 1876, the Commissioner of the Chota Nagpur Division hereby appoints Babu Bishnu Charan Kobiraj, Head Clerk, Commissioner's Office, Chota Nagpur, to be the Manager of the Dhalbhum Encumbered Estate in the district of Singhbhum, with effect from the 9th August 1894, *vice* Babu Moti Lal Mukerjee, on leave. Babu Bishnu Charan Kobiraj will exercise the powers of Manager only during the absence, on leave, of Babu Moti Lal Mukerjee, the permanent incumbent.

A. EVANS GORDON, Offg. Commr. of Chota Nagpur.

**RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION  
REPORT OF THE BHAGALPUR DIVISION FOR THE  
YEAR 1893-94.**

GENERAL DEPARTMENT.—MISCELLANEOUS.

*Darjeeling, the 2nd October, 1894.*

RESOLUTION—No. 105T.G.

READ—

The Annual General Administration Report of the Bhagalpur Division for the year 1893-94.

Mr. Toynbee's Report was written under the disadvantage of his having taken charge of the Division only at the close of the year. The Report contains a useful summary of the information given in the statistical tables, and of the more important remarks in the Collectors' Reports; but it necessarily embodies very little of personal knowledge on his part.

2. The Lieutenant-Governor would enforce what is said in paragraph 20, that it is important that Commissioners and Magistrates, when inspecting offices, should enquire into the steps taken to carry out orders passed in previous inspections. It is not necessary that the working of every department should be minutely examined on every occasion: they may be taken up in turns, every department being inspected thoroughly once a year either by the Commissioner or by the Magistrate, and a more summary supervision exercised over the others. Without this discrimination injury may be done to the public service by over-frequent inspections of offices, and the inspecting officer's time might be better occupied in touring. It has been laid down that tours should not be confined to any particular season, but that Commissioners and Magistrates should be on tour at all seasons of the year as occasion requires or opportunity offers.

3. In paragraph 47 the Commissioner has quoted from Mr. Curstairs' Report some serious abuses in the recruitment of emigrants. The Lieutenant-Governor has been in correspondence with the Government of India regarding a set of rules which are intended to afford some help in putting a stop to such abuses, but the main cure for them is the vigilance of District and Police Officers, and the infliction of severe sentences whenever such cases are proved.

4. Regarding the proposal in paragraph 73 to extend the Honorary Bench system, Government will be glad to receive any well considered proposals for introducing Honorary Benches of Munsifs for the trial of petty civil suits in the Sonthal Parganas as an experimental measure.

5. The Lieutenant-Governor observes with satisfaction the notice in paragraph 94 of the good settlement work done by Mr. J. A. Craven in the Sonthal Parganas, and the low rate of cost. It appears that since Mr. Craven's work began in 1888 up to 1893-94, he has dealt with an area of about 1,450 square miles at an average cost of not quite 5 annas per acre,—an extremely low rate.

6. It is a matter of regret that the expenditure on improvements in Wards' estates was not larger than it is reported to have been in paragraph 102 of the report. The only works done during the year appear to have been the sinking of a well in a village in the Sukraj Rai's estate at a cost of Rs. 97, and some improvements in irrigation works, roads and bandhs in the Rohini and Sankara estates in the Sonthal Parganas, which cost altogether Rs. 2,050. At the end of the year these estates had an accumulated surplus of over Rs. 45,000. It is also not satisfactory to notice that, in the remarks on District Boards in paragraphs 130-134, there is a total absence of information as to any efforts made by District Boards to improve sanitation and the water-supply. The failure to carry out sanitary measures at Karagola fair, noticed in paragraph 147, shows the attitude of the people towards such matters in an unfavourable light. The success of the system of selling quinine in pice-packets (paragraph 143) is gratifying.

7. The Division has been fortunate in having had comparatively few changes in Collectors. Mr. Phillips in Monghyr, Mr. Faulder in Purnea, Mr. Carstairs in the Sonthal Parganas, Messrs. Marindin and Skrine in Bhagalpur, and Messrs. Collin and Unesh Chandra Batabyal in Malda, have all deserved the commendation of Government. Mr. Carstairs in particular has for several years filled an ideal position as the father and ruler of his wild district, and as he will shortly be leaving it on furlough, Sir Charles Elliott takes this opportunity of recording the high esteem in which he holds his services.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Govt. of Bengal.*

ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGALPUR  
DIVISION FOR 1893-94.

No. 196G., dated Bhagalpur, the 29th June 1894.

From—G. TOYNBEE, Esq., Offg. Commissioner of the Bhagalpur Division and  
Sonthal Parganas,  
To —The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report of the Bhagalpur Division for the year 1893-94. The reports of the District Officers were received *in complete form* (i.e. after all necessary explanations had been furnished) on the following dates:—

District.      |      Date of first receipt.      |      Date of final receipt.

Monghyr	...	6th June 1894	...	19th June 1894.
Bhagalpur	...	4th " "	...	29th " "
Purnea	...	2nd " "	...	29th " "
Malda	...	4th " "	...	30th " "
Sonthal Parganas	...	11th " "	...	25th " "

All are full and well written, and that of Mr. C. J. Faulder, Collector of Purnea, may be singled out for special commendation.

I.—CHARGE.

2. The post of Commissioner was held by Mr. Quinn from the 1st to the 18th April; from the 19th July to the 27th December; and from the 15th January to the 15th March. Mr. Wace acted from the 19th April to the 18th July, and Mr. Skrine from the 28th December to the 14th January. I took charge on the 16th March, and held the office to the end of the year.

3. The following tabular statement shows the charges of districts and subdivisions:—

(b).—District charge.

## II.—TOURS AND INSPECTION OF OFFICES.

(a) *Tour of Commissioner.*

4. Mr. Quinn spent 92 days on tour, during which time he inspected all the district offices and all the subdivisional offices, except those of Supaul, Kishanganj and Araria. His tour was cut short by a serious accident which he met with on his way back from Godda on the 17th December.

Mr. Skrine, who acted for him, in addition to his own duties, spent 10 days on tour as Commissioner. The Bhagalpur district office which Mr. Quinn could not inspect, was inspected by me a few days before the close of the year.

Mr. Quinn during his tour inspected distilleries, municipalities, dispensaries, schools, sub-registry offices, and thanas; and he spent some days with Mr. Craven, the Settlement Officer of the Sonthal Parganas, in order to test the measurements in progress.

(b) *Tours of Collectors or Deputy Commissioners.*

5. Mr. Phillips was out on tour for 103 days, during which he inspected roads, ferries, pounds, police stations, outposts, sub-registry officers, dispensaries, outstills, ganja, opium and tari shops, schools, subdivisional offices and sub-treasuries; enquired into the prospects of the crops and the condition of people; visited several khas mahals and examined the accounts and talked to the raiyats; received visits from zamindars in the interior and heard their complaints. He also made enquires about the Gorakshini movement and regarding salt manufacture and opium cultivation. His tour was a well-organized one, extending over all the months of the year.

Bhagalpur.

6. Mr. Skrine has left the following note regarding his own tour and that of Mr. Marindin:—

“Mr. C. R. Marindin was in charge of the district between 1st April and 27th October, and was out in the interior for 22 days inspecting the Supaul, Madhipura and Banka subdivisions. He was succeeded by Mr. F. H. Skrine, who had put in 59 days touring while in charge of the Shahabad district. Mr. Skrine was on tour in Bhagalpur for 78 days, making 100 in all. He found it impossible to make up the obligatory 120 days in Bhagalpur, as the severe accident to Mr. C. C. Quinn, the Commissioner, kept him at the Sadar for 12 days at the height of the touring season, being appointed to act as Commissioner in addition to his other duties. Then he was compelled to return in the middle of March in order to receive the Hemp Drugs Commission, for whose entertainment and operations elaborate arrangements were necessary. Taking into account what had been performed in this respect by Mr. Skrine and his *locum tenens* in Shahabad, the minimum of 120 was largely exceeded in his case.”

“Mr. Skrine inspected the Supaul and Madhipura subdivisions, devoting his attention chiefly to excise matters, police stations, roads and bridges, chaukidari work, and every detail of administration. In the south of the Ganges his attention was directed principally to the establishment of a municipality at Sultanganj.”

Under the circumstances the tour was sufficient, though it fell short of the maximum period owing to unforeseen circumstances.

Purnea.

7. Mr. Faulder was on tour for 97 days, the minimum prescribed tour for his district being 90 days. Besides inspecting both the subdivisions and spending some time at Khagra looking into the affairs of the Court of Wards' Estate and superintending the sanitary arrangements of the mēla, he visited 9 out of 13 thanas and 12 out of 20 outposts. He also inspected schools, examined the mufassal papers of Government estates, and made enquiries about crops, excise matters, income-tax assessments, state of roads, relations of landlord and tenant, course of trade, and other details of district administration. Mr. Faulder writes—

“My tour took me round almost all those parts of the district which I had not time to visit in my first cold weather, though even now I cannot claim to have traversed the whole district, nor have I yet succeeded in reaching the Palasi and Bhatgaon outposts. The area of the district is enormous—five thousand square miles—and the distances great. Three years are necessary at least for its thorough exploration.”

He specially commends the tour of the Subdivisional Officer of the Araria subdivision, Babu Saroda Prosad Sircar, of which he says—

“His diaries I considered remarkably interesting; they showed that he had taken interest in every subject which called for attention, and that he did a quantity of admirable work of a kind which is often forgotten. He verified the reports of the police in some cases of outstanding criminal fines, and was able to make some realizations where the police had failed. Enquiry into bad livelihood cases, the material condition of the people, and the relations between landlords and tenants, the inspection of roads, pounds, and excise shops, the revision of chaukidari punchayet, and the prompt payment of chaukidars' salaries, were among the subjects that received his attention. He also checked the assessment of chaukidari tax made by the punchayet in a number of villages, and the registration of births and deaths in several. In one part of the subdivision the villagers were reported by the Sub-Inspector of Vaccination to have refused to allow anybody to be vaccinated. He explained to them the advantages of vaccination, and persuaded them to get vaccinated. He also enquired on the spot into a large number of income-tax objections, and also looked up on the spot a number of bad cases of income-tax defaults, which the peons had reported to be irrecoverable. He succeeded in realizing money which would otherwise have probably been recommended for remission.”

This appears to me a very good description of what a model subdivisional tour should be.

8. Messrs. Collin and Batabyal's tours extended over 103 days, being 13 days in excess of the minimum prescribed for the Malda district. All the details of district administration were looked into during these tours. The municipality of Old Malda and the

Malda.

office of the Bench there were thoroughly overhauled. Excise shops, pounds, ferries, and patsbalas were also inspected, and income-tax assessments were tested. Roads and crops also received their proper attention. The khas mahal offices were duly inspected, and preliminary arrangements were made for giving effect to the new scheme relating to the management of khas mahals recently sanctioned by the Board.

9. Mr. Carstairs was on tour during the year for 111 days, travelling no less than 1,550 miles, of which 738 were by rail and 817 by road. Mr. Vincent, as Officiating Deputy Commissioner, made a tour of nine days, travelling 270 miles by rail and 80 by road. Mr. Carstairs inspected all the subdivisions, and, as usual, looked into all matters which affect the welfare of the people and the district administration generally.

(c) *Tours of Subdivisional Officers.*

10. The following table shows the number of days spent by the different Subdivisional Officers on tour:—

Sub-divisions.	Names of Officers.	Time spent on tour.
1	2	
Begusarai ...	Mr. Wheeler ...	110 days.

11. The tours of all the District and Subdivisional Officers were up to the standard with three exceptions, viz.—

- (i) That of the District Officer of Bhagalpur, whose explanation is given above.
- (ii) The Subdivisional Officer of Madhipura's tour fell short of the prescribed minimum by 11 days. Mr. S. C. Roberts explains his shortcomings in this respect by saying that he had no competent amla to accompany him in his tours, as his peshkar was ill, and there was no one to take his place. This explanation is not satisfactory, but as Mr. Roberts is entirely new to district and subdivisional work, it may be accepted.
- (iii) In Jamtara the Subdivisional Officer, Mr. Stark, was unable, owing to ill health, to complete the requisite number of days on tour.

(d) *Inspection of District Offices and Treasuries by—*

(1) *Commissioner.*

12. My predecessor inspected all the district offices and treasuries, except those of Bhagalpur, the district offices of which were inspected by me.

(2) *Collectors.*

Monghyr.

13. Both the half-yearly inspections were made by Mr. Phillips.

14. The first half-yearly inspection was made by Mr. Marindin, and the second by Mr. Skrine. The latter followed Lord Ulick Browne's plan of having a preliminary inspection of each department made by an Assistant or Deputy Collector who was not in charge of it, or responsible for its working. After submission of their reports, which consisted chiefly of replies *seriatim* to the questions in the Board's Inspection Manual, he made a secondary inspection and passed the necessary orders on their notes. I cannot say that I regard this plan with favour. It involves an enormous amount of needless writing out of questions and answers, and renders important points very liable to be overlooked among a mass of details.

Bhagalpur.

Purnea.

Malda.

Sonthal Parganas.

15. Both the half-yearly inspections were made by Mr. Faulder.

16. Mr. Batabyal made both the half-yearly inspections.

17. Both the half-yearly inspections were made by Mr. Carstairs.

(c) *Inspection of Subdivisional Offices and Treasuries by—*

(1) *Commissioner.*

18. My predecessor inspected all the subdivisional offices and treasuries, except those of Supaul, Araria and Kishanganj.

(2) *Collectors.*

19. All the subdivisional offices and sub-treasuries in Monghyr were inspected twice by the Collector. In Bhagalpur the Banka subdivisional office and treasury was only inspected by the Collector once, and the other subdivisional offices and treasuries twice.

In Purnea the Collector inspected both the subdivisional offices and treasuries twice during the year.

Mr. Carstairs inspected all the subdivisional offices in the Sonthal Parganas once, and the sub-treasuries twice during the year.

20. On the whole, the work of inspection has, in my opinion, been sufficiently performed in this Division. There is, however a tendency to look upon an inspection as a matter 'out of sight out of mind.' By the time the explanations called for by the inspecting officers have been received in their offices, the matters to which they relate have generally become stale and wanting in interest. This is especially the case where the inspection is in unnecessary detail and made in the stereotyped form of answers to questions in the various inspection manuals. The recent issue of the Board's Circular Order No. 1 of October 1893 will tend to check this tendency, as will increased attention to their Circular Order No. 3 of November 1890, which directs that an inspecting officer should begin by seeing that previous defects have been remedied and orders carried out.

III.—WEATHER AND CROPS.

21. Appendices I and II give the statistics under this head in the prescribed forms.

22. The average rainfall in this district was greater than that of the previous two years, and above the normal. The bhadoi crop was close upon the average. The rainfall was particularly favourable to the winter rice, but owing to the cessation of rain from the latter part of October, the high lands failed to yield the estimated outturn, while the low lands yielded a rich crop. The rabi crops yielded a fair outturn.

Monghyr.

23. The rainfall in this district was copious, and was on the whole, well distributed. The heavy rains of July, however, caused more or less injury to some of the bhadoi crops all over the district. The rainfall was most propitious to the growth of rice, both bhadoi and aghani. The yield was nowhere less than the average, while in the Sadar and Madhipura subdivisions it was 18 annas. The almost entire cessation of rain from October to January caused some injury to rabi crops, particularly wheat and barley; but the outturn was on the whole decidedly better than in the preceding year, and oilseeds benefitted.

Bhagalpur.

24. The rainfall in this district was more than that of the previous year, and a little above the average. Its distribution was very seasonable till October, and a bumper harvest was expected. The unusually heavy rainfall at the end of September, however, caused a general overflow of all the rivers and streams which damaged the crops on low lands. The flood water did not subside till the middle of November, so that the sowing of the rabi crops was correspondingly late. The excessive moisture in the soil at the sowing season, and the entire absence of rain in November, December and January, prevented the full development of the rabi crops, and the yield was less than the average. On the whole the weather was fairly favourable, and the outturn of most crops good, though a little less than the average was harvested. Indigo, which is grown to a very large extent in the south and western parts of the Sadar subdivision, grew well; but the continued heavy rains from June to August washed out the colour from the leaves, and the outturn was not therefore satisfactory.

25. The rainfall in this district was much above that of the two preceding years, but it was not well distributed. There was excessive rain during the first seven months, and almost none at all during the last five. The season therefore was favourable to the rice crops, but unfavourable to kalai, wheat, barley, and other crops of the cold season. A peculiarity of the season was that though the rainfall was abundant, the rivers did not rise so high as in other years. Partly from this cause, and partly from the unusually dry weather during the cold season, the yield of the rabi crops was poor, though a good crop of rice was reaped all over the district. The growth of the mulberry, an important crop in this district, was as good as usual. Jute and indigo were partially injured by heavy rains, and the yield of both was comparatively poor. The yield of mango was slightly below the average.

26. The average rainfall in this district was 65·32, an increase of about 18½ inches over the two preceding years. The rain nearly all fell in the rainy season, and this very heavy rainfall interfered greatly with the Indian-corn crop, which was only about four annas. The rice crop, especially on the high grounds, was a bumper one. A good deal of rice was planted on Indian-corn land where the crop had failed. The rabi crops were below the average. The late rains interfered with the sowings, and the want of winter showers was unfavourable. Sugarcane did well. The mahua crop was also good.

27. On the whole the Division fared well in the matter of weather and crops, and the year was prosperous above the average.

#### IV.—PUBLIC HEALTH.

28. The general health of the district of Monghyr was much better than in the preceding year. The total number of deaths fell from 74,747 in 1892 to 55,498 in 1893, and the death-rate per thousand from 36·71 to 27·26. Only 638 deaths were registered under cholera against 6,297 in the year 1892. There was also a marked decrease in deaths from fever, the figures being 45,011 and 59,394 respectively.

29. There were 58,186 deaths registered in the Bhagalpur district in 1893 against 66,928 in 1892, or a decrease of 13 per cent. The causes of the comparative healthiness of 1893, are thus described by the Civil Surgeon:—

“The year 1893 was one of comparative plenty; rain fell in abundance and was equally distributed over both time and place, and grain was cheap. The tardy departure of the cold season, the early monsoon, and an interval of seasonable showers, shortened and moderated the period of heat and discomfort which precedes the break of the rains. All diseases associated with climatic conditions and imperfect nutrition, were therefore less rife.”

The disease which proved most fatal was fever, the number of deaths attributed to this cause being 48,278, or 83 per cent., of the total. Cholera was most prevalent in the months of October to December. During these months deaths from this disease numbered 817, or nearly 83 per cent., of the total reported number—990. In the town of Bhagalpur and its suburbs there

were 324 deaths from this disease. There were 1,177 deaths from small-pox. It was most prevalent in the Sadar and Banka subdivisions, the number of deaths being 899 and 271 respectively. The disease was worst in the months of April and August, but no month was quite free from deaths. The Civil Surgeon remarks that he is not at all satisfied with the way in which the work of vaccination has been conducted in the localities above referred to, and that it is his intention to change the greater number of the staff before the next working season.

30. The Collector of Purnea writes:—

Purnea. “Mortality by itself is no true measure of health, and only those who have been in and about the district can realize what a pestilential year this has been, especially between

October and March.”

There were 51,579 deaths registered during the year 1893, of which 49,316 were said to be from fever. On this subject Mr. Faulder says—

“There is not the least doubt that there was a perfect pestilence of fevers in the autumn, and that many deaths were due to it; but it is impossible to believe that all these deaths were due solely to malarial fevers. It needs a staunch faith to accept the diagnosis of the village chaukidar, especially when experience in the dispensaries and jails is opposed to belief. ‘Bokhar,’ the native name for ‘fever,’ appears also to be used as almost synonymous with ‘illness’ when a villager has no other specific name at hand.

“*Dysentery and Diarrhoea*.—A mortality of 61 from these two causes, (and of 56 in 1892-93), still further shakes one’s faith in the village chaukidar. A death-rate of 60 among two millions in such a district as this would be too ridiculous for remarks, if it had not been made the basis of a violent attack on the sanitary arrangements of Bengal jails, where a correct diagnosis shows a large proportion of deaths due to dysentery and diarrhoea.”

31. The general health of the Malda district was worse than in the preceding year. The total registered mortality from all causes was 32,947 against 26,804 of the preceding year, giving a ratio of 40·4 per thousand against 32·8 in 1892. There were 3,951 deaths from cholera against 346 in the preceding year, and 27,127 from fever against 25,036 in 1892.

32. The number of deaths registered in this district was 30,360 against 38,287 in the preceding year, and the rate per thousand dropped from 21·82 to 17·30. The year was essentially a fever year. The fever which generally hangs about the malarious villages on the eastern fringe of the district this year took the shape of influenza, and penetrated into other parts of the district. Cholera was not quite so rife as usual.

#### VACCINATION.

33. Compulsory vaccination was in force within all the municipal areas of the district. Within the municipality of Monghyr vaccination was carried on under the supervision of the Civil Surgeon, whilst in the municipalities of Jamui and Jamalpur vaccine operations were supervised by the local Assistant Surgeon and East Indian Railway Medical Officer respectively. Those in the district outside the municipal area were carried on under the supervision of the Deputy Superintendent of Vaccination. The total number of vaccinations during the year was 50,093 against 38,999 in the preceding year.

34. The Civil Surgeon remarks that about 75 per cent. of the children of this district may be said to be protected by vaccination. The Marwaris, and next to them the Babhans, are the people who oppose vaccination most. Some prosecutions were instituted against those who refused to have their children vaccinated in the compulsory areas, that is to say, the town and its suburbs. The Civil Surgeon strongly recommends that vaccination be made compulsory throughout the district. The Collector has furnished no figures under this head.

35. The number of vaccinations performed during the year was 59,946 against 51,369 in the preceding year: 99·89 per cent. are reported to have been successful.

Purnea.

36. The entire supervision of vaccine operations was brought under the Civil Medical Officer during the year: 27,826 vaccine operations were performed during the year against 26,350 in the preceding year: only 49 were unsuccessful. Vaccination was well received by all classes of people except the Ferazis, who also were ultimately persuaded to have their children vaccinated.

37. The number of persons vaccinated was 57,808 against 64,854 in the preceding year. The transfer of the work from the department to the Civil Medical Officer has had a good effect. Dr. Kelly has been most active and has, the Deputy Commissioner thinks, brought the returns more in accord with facts than they ever were before.

#### V.—MATERIAL CONDITION OF THE PEOPLE.

38. The people of this district have now recovered from the effects of the scarcity of 1891-92. The crops were better than in the previous year; the price of grain was cheaper, and rents have been realized with greater ease. Trade has been brisk, and the trading classes have done well. The condition of the classes who draw fixed salaries, continues to be bad. Mr. Philips writes—

“The middle classes in this district are better off than the same classes in Bengal, as they go in for fewer luxuries and do not affect silk umbrellas, patent leather shoes, &c. That the year has been a more prosperous one than the previous year is evident from the decrease in offences against property, decrease in number of sales and mortgages, and increased excise receipts. There has been a rise in taxable incomes from trade and letting value of houses, and an increase of goldsmiths with taxable incomes, which shows that the people have more to spend on jewellery. Cultivators, with rights of occupancy, are fairly well off, and many of them are petty maliks also, who are not dependent on a single season. Those who cultivate *kumuts*, and landless labourers, are not so well off and live from hand to mouth. The low castes live in dirty hovels and hardly ever get their clothes washed, while they prefer bread made of coarse grain, such as marwa and makai, to rice (even if they could afford the latter), as they are more satisfying at the price and take longer to digest. This class would be worse off than they are but for the abundance of mahua and other jungle fruits in those tracts which are the poorest. The mahua crop was poor this year owing to west winds. The half educated middle class is, as in Bengal, very badly off. It is a case of being unable to dig and ashamed to beg, though the pleas *ad misericordiam* of Umedwars for appointment are not far removed from begging.”

39. During the year under report the paddy harvest was a full one, and the yield of bhadoi and rabi was at least half of an average crop, and as the preceding year had also been prosperous, the masses of the people who live by agriculture were as contented and prosperous as their careless and unthrifty habits permit them to be.

40. Mr. Faulder writes—

“The condition of the agricultural class of people was much improved during the year, they having now reaped good harvests in two successive seasons. The prices of food-grains, though lower than in the previous year, generally ruled high, which enabled the cultivators to dispose of their surplus produce with much advantage to themselves. They were able to pay in their rents with ease; and also to satisfy their mahajans' demands. The condition of the landholding classes was also good, as they were able to collect their rents in good time and without difficulty, and discharge their debts. The condition of traders was also on the whole good. The middle classes who depend on service, are those who are least comfortable; they have a hard struggle to make both ends meet, owing to high prices of food and other necessities; stocks which were depleted during the scarcity of 1892 have been replenished.”

41. The material condition of the people of this district was on the whole prosperous. They reaped good harvests of bhadoi and winter rice crops in the preceding year,

and the yield of those crops during the past year was also good. The growers of mulberry and rearers of silkworm made moderately good profits; mango and jute were sold at high prices, and the effect of the partial failure of kalai and rabi crops was not much felt. The prices of food-grains ruled high on account of heavy exportation to the eastern districts. The people who live exclusively by labour, and those with fixed income alone, felt the high price of food-grains and other commodities that prevailed throughout the year. But even these classes felt some relief, as the prices, though high, were lower than those which ruled in the preceding year.

42. Mr. Carstairs writes—

“There was some apprehension of distress in the early part of the year owing to the failure of the Indian-corn crop, but this was set at rest by the unusual excellence of the rice crop. It is noticed on the Pakour side that the demand for labour far exceeds the supply, and in most parts of the district there is an increasing tendency to emigrate to the tea gardens: labour, unconnected with land, (such as on roads, quarries, irrigation works, &c.) is the only means by which the surplus population can hope for much relief now, as there is (except, perhaps, to a limited extent in the south centre of the district) little cultivable land that has not already been taken up. The Subdivisional Officer of Rajmahal is justly concerned about the condition of the Paharias, whose drunken, improvident, and lazy habits are not only preventing them from improving, but are also causing them to destroy their future prospects by removing from the hills their scanty covering of trees, and selling for years in advance their crops of sabai grass.

On the whole the past has been a satisfactory year.”

#### VI.—EMIGRATION AND IMMIGRATION.

43. In Monghyr there was a large falling off (195 against 454) in the number of emigrants registered as compared with the previous year, which is attributed to an increased resort to free emigration, and to good crops during the year. There were two cases of kidnapping and abduction of coolies in the Jamui subdivision. In one, three Sonthal girls were kidnapped by unlicensed female recruiters, who were punished with rigorous imprisonment for 18 months each. In the other case a family of seven persons, of whom two are aged women and the rest children, were abducted; the case has been committed to the Sessions for trial. Thirty-three emigrants were registered for the colonies against sixty in the preceding year.

44. There was very little recruiting of coolies for emigration from this district. The only depôts that exist are three in the town of Bhagalpur, through which only 37 men passed; and three in the Supaul subdivision through which 16 men passed. All these were emigrants for the tea districts: there were none for the colonies. The Subdivisional Officer of Banka, in which there is a large aboriginal element, states that the Sonthals, Koles, and people of similar tribes are taken away by recruiters from other places, but there is no record of the numbers, as the recruiters take care not to register intending emigrants at the stations to which they belong. There were two cases of alleged malpractices on the part of recruiters. One occurred in the town of Bhagalpur, where one Banku Dusadh complained against the person in charge of one of the cooly depôts that he had enticed away the complainant's niece, who was said to be only 16 years old. Upon enquiry it was ascertained that the girl was 19 years old, and that on arrival at Calcutta she had bolted. The other case occurred in Banka. A woman complained that her two daughters were missing. Upon enquiry it was ascertained that they were sent to the Nowgong tea gardens under false names and addresses. The parties in this affair are the recruiters and the chaukidars and another resident of the village to which the girls belonged. The case is still under trial. There is no immigration into this district, unless the periodical advent of people in search of employment can be so called. Labourers from Darbhanga and Monghyr districts came to the Supaul subdivision at harvest time to work as labourers.

45. There was no regular emigration from, or immigration into, this district during the year. The local population find no difficulty in getting sufficient lands for their purposes at low rents; they have therefore no incentive to leave their houses for other districts. There is as usual a large temporary emigration of blacksmiths, syces and artificers to Calcutta, Assam, Rangoon and other places. A large number of labourers from the western districts annually immigrate to this district for work in the fields and roads. They return to their respective homes on the completion of the works. Contractors on roads and railways import their coolies, and indigo-planters settle colonies of Dhangars and Musahars round them; in the west the Sonthals have come across in some numbers and taken up a good deal of land.

46. There was very little emigration from this district during the year; the people being mostly agriculturists, are naturally unwilling to go to other places for employment. A few Muhammadans of Tulsihatta work as blistis in Calcutta. A large number of labourers annually immigrate to this district to work in the fields and on roads. The number of Sonthal settlers in Old Malda and Gazole thana has increased during the year.

47. There are only two places where emigrants to Assam are registered, viz., Dumka and Deoghur; these two places registered between them 123 emigrants and dependents (36 of them only being males) against an average for the past three years of 489. The decrease, according to Mr. Carstairs, is not so much because emigration through *arkatis* is becoming more popular, as because their malpractices are destroying emigration itself. He believes that they are getting fewer people to go. This impression is strengthened by the fact that this class of recruiters is resorting more freely to illegal practices, and those practices are specially carried on against women and children. In Dumka subdivision alone there were 50 criminal complaints, and 11 convictions were obtained, eight under section 417, Penal Code, one under section 342, and two under section 363. In Deoghur many cases of abduction of females and children were reported. In six the accused were brought to trial and in four convicted. The Subdivisional Officer is convinced that the cases actually brought to trial are but a small proportion of those occurring in his subdivision. In Jantara there were 14 complaints and one conviction. In Pakour five persons in two cases were convicted of cheating in connection with recruiting. In Godda a Eurasian named Stark was convicted of forcibly carrying off some Paharia youths as coolies.

I quote the following remarks of Mr. Carstairs *in extenso*, as he has devoted much care and trouble to the matter. He writes—"Three circumstances have occurred to show how weak are the safeguards against abuses of recruiting. The first is a case that occurred last year and has developed thus: a Mr. Loder came down to recruit coolies for a garden in South Sylhet and got about 100, giving them written and registered contracts to pay wages at a certain rate (Rs. 12 I believe) for a year. The wages were refused, and Loder's letters to his employer showed that he was ready to promise whatever the men might believe, and that his promises were never meant to be kept. This was a European, ostensibly of good position, deliberately cheating. He was criminally convicted in Sylhet for the offence, but this occurrence shows how readily recruiters lay aside morality to get coolies. They seem to look on their business as that of trappers or hunters.

"The second case was that of Stark. He carried off five lads to Calcutta, where they were put in Mr. Myers' depôt and supposed to have accepted their contract before the Magistrate and the Protector of Emigrants. They were photographed in a group and consigned to Assam.

"It appears certain from the criminal proceedings in which Stark and others were convicted, that they did not appear before the Magistrate and Protector of Emigrants. Probably (certainly possibly) they were personated before these officials. They were not photographed until after they were recorded as having agreed to go and signed contracts, and no impartial person identified them. The danger of personation is very great at wholesale establishments remote from the houses of the emigrants, and I am certain unwilling persons are frequently got off to Assam. A bewildered and helpless jungly

saying to an official in a hurry that he goes willingly is to my mind no proof that he does so. A third case is the following:—

“A young married woman was enticed away from her house, debauched, and sent secretly to Assam. The two men who got her away were convicted and imprisoned. The young woman was afterwards traced to a garden in Assam, and her husband asked to have her sent back. The authorities in Assam at first would not consent to cancel her contract, and it was only after a lengthened correspondence that we got her back. This case caused a very great local excitement, and all the Sonthals were watching to see if she would be sent back or not.

“My own impression is that, if Government would entirely suppress the *arkatis*, and trust to unassisted emigration and recruiting by sardars and garden agents, emigration would be more popular and emigrants to Assam more numerous than is now the case. I can assert this, that the suppression would have the best effect on the native population among whom this trade is the chief cause of political danger, and would draw a sigh of relief from the breast of every one of our officers.”

I commend the above remarks to the serious consideration of Government, as they are the outcome of years of patient observation on the part of an officer who understands the Sonthals and is thoroughly trusted by them.

#### VII.—PRICES OF FOOD AND LABOUR.

48. Appendix III gives the prices of food in the several districts, as well as for the Division as a whole, in the form prescribed by Government. Appendix IV gives the prices of labour in the different districts in the prescribed form. It will be seen that all food-grains were cheaper than in the preceding year, though salt was slightly dearer. Wages of labourers remained almost the same as before except in Purnea, where there has been a rise in the cost of skilled labour. In the Sonthal Parganas carpenters' and gharamis' wages rose, while those of common blacksmiths fell. Wages generally do not appear to fluctuate with, or to rise so rapidly as prices.

#### VIII.—MANUFACTURES AND MINES.

49. The principal manufactures of the Monghyr district are indigo, molasses, hides, ghee, saltpetre, guns and opium.

Monghyr.

The total number of guns manufactured during the year was 3,799 against 2,368 of the preceding year. In spite of the import of cheap European-made guns, the Monghyr guns find ready sale with natives, and are largely exported to Calcutta, Dinajpur and other places. One mica quarry was worked in Janui, and the Dharhara stone quarry continued to be worked by Mr. Ambler.

50. The principal manufactures of the Bhagalpur district are indigo,

Bhagalpur.

tusser, molasses, iron implements, cotton cloths, saltpetre, lac ornaments, brass utensils and blankets.

The tusser silk industry shows signs of revival, as the quantity and value of the product appear to have been steadily increasing for the last three years.

In the Banka subdivision mineral products are said to exist, and attempts have been made from time to time to conduct mining operations there on a large scale, but to no effect. The Sonthals and Kols make something of the iron which they find in the dry beds of the hill streams all over the subdivision. They smelt the iron, and the village smiths purchase it for the manufacture of spades, axes, &c.

51. The principal manufactures of the Purnea district are indigo, country

Purnea.

cloths, blankets, brass-ware, wood-work gunny-bags, mats, molasses and Bidri-ware. Of the last

the Collector writes:—

“This industry is confined to a few families in Purnea city and Kusba. The articles turned out are hukkas, sorahies, khasdans, *i.e.*, for native use. They are not of very finished workmanship, and there is therefore no great demand for them. The workmen are lazy and unenterprising, and the industry is therefore on its decline. I reported last year that I had brought

some specimens of up-country Bidri-ware for these men to copy, and that little progress had been made. A sorahi and plate were ultimately finished, and were very little inferior to the patterns, showing that the workers could, if they liked, do well. I advised the man to make another pair, after which he might be allowed to keep the pattern, but he has never finished it; in 15 months he has therefore not completed two copies: his excuse is that he is afraid that these articles not being what he has been in the custom of selling, he will find no market for them; it seems hopeless to expect any display of enterprise on the part of men of his class. The principal kinds of country cloths manufactured are *totas* and *patanees*, which are much valued on account of their thickness, durability and handsome patterns. They are in very general use amongst the semi-aboriginal females of the Kishanganj subdivision. The manufacture of gunny-bags is on the decline. The opening of the Kishanganj Railway line has given an impetus to the manufacture of mats, and they are now taken down to Calcutta in very large quantities. They are made of a kind of grass called *mathi*. The Bidri-ware industry is confined to a few families in Purnea city and Kusba. The industry is on its decline."

"*Wooden-work.*—This industry consists of the making of cart wheels, and is confined to Chakla near Kishanganj. There is a colony of Mussulman carpenters of about 100 families who are chiefly employed in this work. A very large number are turned out every year, and the wheels find a ready market in the fairs of Khagra, Alua-Khoa and Nekmard. They are well known for their good make and durability, and as such they are in high demand and are circulated all over the surrounding districts. The boys of these Chakla families formed the bulk of the students first enrolled in the Purnea Technical School; after a year's work, however, they found they could make more money at home by helping their fathers as wheel-wright at Chakla than the Rs. 4 per month allowed as the stipend at the school. It is said that a strong half-taught carpenter boy can at Chakla make 8 annas a day." There are no mines in this district.

52. The chief manufactures of the Malda district are raw silk, various kinds of silk fabrics, indigo and utensils of brass and bell-metal. There are two silk factories, both of which are worked under European supervision. There are also numerous native silk filatures in different parts of the district. Nawabganj and English Bazar are the chief places for the manufacture of brass and bell-metal utensils. There are no mines in this district.

53. The chief manufactures of this district are indigo, country cloth, lac and molasses; country cloth is woven by three classes of weavers—Tantis, Jolhas and Sonthals. Sonthal Parganas. The best weavers are those at Hiranpur, Barhait and Boria. They all weave in colours, and some of the patterns are very pretty. Near Dumka and Deoghur ribbed and honey-combed cloth fit for towels is woven to a small extent. The use of country cloth among the Sonthals and lower class Hindus and Mussalmans is not decreasing, as it is thicker and stronger than imported cloths.

54. The only considerable mine in this district is the Madankata coal mine, which in 1893 turned out 23,660 tons and employed 388 workmen. The other two are surface quarries rather than mines, and are situated at Domanpur and Ghatchora. They turned out between them 316 tons and employed 29 workpeople.

55. Stone is largely quarried in this district for the use of the railway and for export to various municipalities. The chief quarries are situated in the Rajmahal and Pakour subdivisions. The entire outturn of the district was 207,258 tons.

56. Appendix V gives the statistics under this head in the form proscribed by Government.

#### IX.—TRADE AND COMMERCE.

57. The trade routes remained unchanged during the year. The import of English piece-goods shows an increase as compared with the preceding year. The trade in country produce remained almost stationary. There was an increase in the Monghyr.

export of wheat, oilseeds, grains, ghee, linseed, and other important food-crops, owing to the rich harvest of the year combined with the generally economical habits of the people. The imports of rice and salt were greater owing to the many marriages which took place during the year—always a gauge of prosperity.

58. There has been no change in the trade routes of this district. The traffic of North Bhagalpur is being more diverted every year to the Tirhut State Railway from the river Kusi. The traffic with Nepal is registered at three registering stations as before. The Collector has, as in preceding years, made a comparison of the figures of railway-borne traffic between his district and Calcutta as published in the *Calcutta Gazette*. These figures are not yet complete—those for January to March 1894 not having yet been published. The comparison, so far as it goes, shows an increase in the quantity of rice and oilseeds and a decrease in wheat and other food-grains exported to Calcutta. The increase in the export of rice and oilseeds is attributed to the good harvests of the year. There has been an increase in the imports of European piece-goods, which is a fair proof of the prosperity of the district. The import of salt, curiously enough, fell off to a great extent.

59. The total value of the export and import trade with Nepal was Rs. 6,00,442 and Rs. 3,01,093 as against Rs. 40,906 and Rs. 5,35,911 of the previous year. The trade in timber has altogether declined of late years, the authorities at Nepal having restricted excessive export from their territories.

60. The trade of the year under report was much brisker than that of the previous year. This was mainly due to the improved outturn of crops generally. The principal articles of export were tobacco, jute, mustard seeds, rice, paddy, wheat and hides. The exports show an increase in every article except wheat. A considerable quantity of rice, paddy and mustard seeds was brought from Nepal and exported through the several railway stations in the Araria subdivision. Mustard seed was chiefly sent down to Calcutta, and the rice and paddy were taken to Revelganj, Chapra, Arrah and other places in Bihar. A portion of the rice and paddy found its way to Ghazipur. The goods were sent down by rail to Manihari ghat, whence they were taken by country boats to the places above mentioned. Jute and tobacco were sent to Calcutta and Bhadreswar. The principal articles of import were European piece-goods, salt, iron, brass, copper-ware, cotton, kerosine oil, sugar and gold and silver. There was an increase in almost all the articles of import except salt and kerosine oil. The increase in European piece-goods is remarkable. A very large number of marriages took place during the year, and there was consequently an increased demand for them. The general prosperity of the people, consequent on the good harvest of the two preceding years, tended materially to increase the number of marriages.

61. There has been no great change as yet in the principal trade routes of the district, though a change which will be of great importance has been instituted. The Barsoe-Kishanganj line has now been opened for all traffic. So far, however, the railway has not obtained the traffic in full: the boat route by the Mahanadi, and the route from Kishanganj by cart to Kusba, is still followed. In course of time there can be no doubt but that the railway will get the whole traffic.

62. The trade with Nepal is daily growing in importance with the increased trade of the district and increased facility of transit. Judging from the figures registered at the twelve registering stations on the frontier, it would appear that there was an increase in the imports of rice and paddy, mustard seeds, linseed and tobacco. There was a decrease in the imports of jute and sal timber. The principal articles of export were European piece-goods, salt, iron, betelnuts, sugar and kerosine oil. All these show an increase; ganja only shows a decrease, which is probably due to the stocks remaining unsold of the previous year.

63. The Collector is unable to give reliable statistics for the trade of his district. The export trade in rice during the year was brisk, the harvests having been abundant, and

the demand from abroad great. It has been roughly estimated that about 8 lakhs of maunds of rice were exported during the year against 6 lakhs of maunds in the previous year. The export trade in kalai and pulses was also brisk. The export of wheat was normal. The export trade in cocoons and raw silk was nearly normal. Trade in jute was very brisk. The export of silk fabrics is fast dying out, the demand growing less and less every year. The chief imports of the district are piece-goods, cotton twist, salt and kerosine oil. The fluctuations as compared with the preceding year were unimportant.

64. Trade is most active on the east side of the district, viz., towards Pakour and Rajmahal, as communication is easier there. Among exports the leading commodities are grains, oilseeds, mahua, sabai grass, lac, tusser, stone metal, hides, fish and timber. Of imports the chief are cloth, kerosine oil and salt. The export of rice was large owing to the good harvest. In wheat and Indian-corn the trade was dull, the harvest having been bad. The trade in oilseeds was much as usual. The export trade of sabai grass is practically all from Sahibganj, where there are 12 baling presses. The trade expanded from 1,63,000 maunds in 1892-93 to 2,40,000 maunds in 1893-94. The trade in tusser cocoons has fallen off; stone metal is exported largely. The trade in hides is still expanding; fish are exported in large quantities by rail from Sahibganj and Rajmahal. Owing to improvement in quality and attractiveness, piece-goods are gaining ground on the locally manufactured goods. The import of salt has somewhat declined, as the excess stocks of the preceding year had to be worked off. There was a striking increase in the business of the Hiranpur cattle market; sales of 33,722 head of cattle were registered against 26,262 head in the preceding year. It is the principal mart for selling cattle from Bihar to purchasers in Bengal.

#### X.—ADMINISTRATIVE CHANGES.

65. The chief administrative changes introduced during the year were (1) the reorganization of the chaukidari system under Act VI (B.C.) of 1870 as amended by Act I of 1892; (2) the abolition of four police outposts in the Purnea district; (3) the transfer of the Sadar Sub-Registry office of Malda to the charge of a Special Sub-Registrar; (4) a similar change at Naya Dumka; and (5) the introduction of a new law, Regulation V of 1893, into the Sonthal Parganas, by which considerable changes were effected in the judicial arrangements of that district. On this point and on others which concern the Sonthal Parganas, I think Mr. Carstairs is entitled to be heard *in propria personâ*. He writes—"A new law, Regulation V of 1893, came into force in June, whereby considerable changes were effected in the judicial arrangements of the district.

"The principal of these was that by which the Deputy Commissioner was made Sessions Judge. This adds considerably to his work, as many cases which were formerly tried by the Sessions Judges of Bhagalpur and Birbhum, have now to be tried by him. A special report on the working of this as regards appointment of public prosecutor, assessors, statistics, &c., will be submitted after the reports for the year have been disposed of.

"Another important change is the limitation of the appointment of Subordinate Judge to subdivisional offices. This has broken through a long-standing custom, whereby a second officer was vested with such powers at head-quarters. I had myself the intention of gradually withdrawing the business of Subordinate Judge from subdivisional offices to a special officer at head-quarters, and thus assimilating our practice to that of other districts; but if only a Subdivisional Officer can be vested with these powers, as has been ruled by the Government, this hope must be given up.

"The law as interpreted is likely to operate harshly in the Sadar subdivision, whose extent is the largest, and where the Subdivisional Officer has a good deal of executive work. It has always been the custom for the second officer, vested with powers as a Subordinate Judge, to relieve him of the greater part of the cases, and I fear that the change will work badly, interfering with the Subdivisional Officer's work, and also preventing the cases from being punctually disposed of. I may remark that I was consulted while the Regulation was being drafted, and that this interpretation was one unexpected by me.

"The new Regulation has altered the rule as to appeals, giving the right to appeal, but limiting the number of appeals. Revision has also been restored to its proper function of correcting grave errors instead of being a mere appeal under another name.

"The limitation for Civil appeals has been reduced to that under the general Limitation law, and no one seems to be the worse. The power to enhance in Criminal appeals has been used though rarely, and was of great advantage. The variety of interpretation between the High Court and the local Courts as to what is meant in the usury clause by an intermediate adjustment of account, has been settled in the new regulations.

"Under this head, too, I may mention that rules for the regulation of petition-writers have been sanctioned during the year. I believe they are working well.

"The passing of the Justice regulation emphasized my claim to assistance in my work, and first a Deputy Magistrate was sent, and then a Joint-Magistrate. The appointment of the Joint-Magistrate enabled us to go more closely into some of the work of the various offices I am supposed to manage, and in some of them, especially the Road Department and the Record-room, as well as in the Head Muharrir's department, various irregularities were discovered.

"Proposals were under consideration at the beginning of the year for a reorganization of the subdivisional establishments, and these were sanctioned in part. The pay was in nearly all cases fixed in place of the old progressive pay, and the posts graded. The rate of pay was lowered, both minimum and maximum. The scheme has not yet come into full force as existing incumbents continue to draw progressive pay.

"I may remark that the scheme as sanctioned is likely to cause difficulties, seeing that while at head-quarters progressive pay is drawn, in the subdivisions fixed pay is to be drawn. This will cause difficulties with regard to transfer, which will increase as the senior men at subdivisions drop out and fixed pay becomes the rule there. The addition to the number of clerks and muharrirs does not all represent relief, as a considerable amount of work has also been added. Considering, however, the great difficulty Government finds in providing funds for any purpose at present, I must express gratitude for what has been done.

"A sub-treasury was opened at Jamtara in July 1893. It is a convenience, and involves little additional work.

"The system of management in the Wards' Estates was changed during the year, the former agents being appointed Managers and paid fixed salaries with fixed establishments in place of the commission formerly allowed. Some applications for adjustment of establishment have been and are being made, and the complaint is made justly I think that sufficient allowance is not made for the performance of the duty of ghatwal. The change has, however, been given effect to."

#### XI.—STATISTICAL ENQUIRIES.

66. The police registered both births and deaths during the year. The trade with Nepal continued to be registered at three registering stations on the frontier in the Bhagalpur and at 12 in the Purnea district. It is remarked by the Collector of Bhagalpur that a great deal of the frontier trade passes by routes not commanded by these stations. During the year the Bhagalpur District Board collected some valuable statistics regarding the traffic on the Bhagalpur-Bowski road, on which it is contemplated to run a light railway; statistics relating to price-currents were collected by Sub Deputy Collectors and kanungoes. Statistics were also collected in the Sonthal Parganas as regards the traffic on the Dumka-Bhagalpur road. This was done at the instance of the promoters of the Bhagalpur-Bowski Railway, the extension of which to Dumka forms part of the scheme. At the instance of the Director of Land Records and Agriculture, enquiries were made with a view to ascertain the number of horses, ponies and tatoes in the different districts of the Division and the result was duly reported to him.

#### XII.—CIVIL JUSTICE.

67. Appendices VI, VII and IX are submitted, giving statistics in the prescribed form regarding (a) original work disposed of by District Judges,

Subordinate Judges, and Small Cause Court Judges; (b) Civil work disposed of by Munsifs; and (c) Civil appeal cases. The figures for these statements have been obtained direct from the District Judges and not through the Collectors.

68. The Collector of Monghyr reports that the relations between landlords and tenants and between creditors and debtors are, according to the Civil Judges, far from satisfactory. In most of the disputes in the Sadar subdivision it appeared that landlords endeavoured to increase the rent indirectly by manufacturing collection papers, showing previous realizations at increased rates. The plea of payment set up by tenants was in many cases supported by fabricated receipts. It is also said that Marwaris often support their claims by fabricated account books, and many estates and shares of estates are passing into the hands of Marwaris and Banias. The experience of the last year has, Mr. Phillips says, further shown the efficacy of the cadastral survey in the Srinagar and Baneili estates. A large number of rent suits were instituted last year, but a considerable proportion of them decided *ex-parte*, the raiyats not contesting the demand. Mr. Phillips also notices the great delay in the disposal of title suits, which seems to him to amount to a denial of justice in many cases.

69. The Collector of Bhagalpur has no general remarks to make under this head, except that Civil Court amins do not command the confidence of parties so much as they should. I fear that this remark applies with equal force to Collectorate peons employed in serving notices, &c., under the Certificate Act. The plan of appointing pensioned soldiers as process-servers has not succeeded.

70. The Collector of Purnea remarks that the manner in which sale notices are published causes much hardship to the raiyats. For instance, a landlord gets some land belonging to a raiyat advertised for sale for some dues: in the boundaries which he gives for the land to be sold, he includes a plot of land belonging to another tenant. That tenant never comes to know of it till it is too late, and the land really liable for sale in addition to the other tenant's land is sold and made over to the possession of the auction-purchaser. He and the tenant whose land is thus sold, become involved in a dispute which often leads to litigation, and the injured tenant runs a certain amount of risk of losing his lands unless he can produce satisfactory evidence of his right. This hardship might, in Mr. Faulder's opinion, be obviated if a better method of publishing sale notices were adopted, by insisting that the peons should invariably obtain receipts from the raiyats holding lands on all the four sides of the land to be sold.

71. The Collector of Malda states that a large number of rent suits were instituted by the Zamindar of Chanchal against the tenants of a particular estate. The relations between landlord and tenant in this estate are reported to have been of a strained character for some years, and after some serious rioting the parties are now fighting in the Civil Courts.

72. I have recently submitted the Deputy Commissioner's report on the administration of Civil Justice in the Sonthal Parganas with my notes thereon. It seems unnecessary therefore to go into much detail in this report. The number of institutions of suits was 12,583, and of execution cases 6,706, showing an increase of 228. The institutions of execution cases did not keep pace with that of suits. Miscellaneous cases also show an increase. The increase in institutions is attributed to the chance the good year gave of realizing, and to the necessity of saving limitation in case of claims not pressed in previous bad years. Disposal kept pace with institution, except in Dumka and Godda. Arbitration cases show an increase from 339 to 506. The subdivision where this form of justice is most popular is Pakour. In Deoghur and Jamtara very few cases go to arbitration. Appeals before Subordinate Courts were, notwithstanding the increase in suits, less by 62; 502 against 564. The number of appeals to the Deputy Commissioner was 190 against 249 in the preceding year, but to these should be added 19 applications for revision, so that the real difference is only 40.

The receipts of Courts were Rs. 83,085-9-0 against Rs. 80,875-9-0.

73. The Civil Judicial work of the Sonthal Parganas is growing apace, and it is even now difficult to keep pace with it. I see no reason why the strain should not be lightened for our officers, who have also much revenue and miscellaneous work, by the gradual extension of the Honorary Bench system, and by allowing Benches to try petty civil as well as criminal cases.

## XIII.—CRIME.

74. There was a large decrease in cognizable crime, the divisional figures being 12,602 against 14,673 in 1892. The decrease is general, but the most marked decrease (of 745 cases) occurred in Bhagalpur. The decrease is chiefly in offences against property, and is attributable to the more prosperous condition of the people.

75. In Monghyr there was a decrease of 229 burglary and of 343 theft cases. In Bhagalpur there was a decrease of 694 burglaries and of 105 thefts. In Purnea there was a decrease of 165 burglary and of 263 theft cases. In Malda there was a decrease of 30 cases under the head of burglary and of 97 under theft. In the Sonthal Parganas there was a decrease of 87 cases under burglary and of 403 under theft.

76. In Monghyr there was a decrease of 3 cases under the head of rioting. In Bhagalpur there was some increase (44 against 37 in 1892) under this head, but the cases were not of a very serious nature. In Purnea there was an increase of 11 cases under this head, but none of the cases were serious. In Malda there was a decrease of 7 cases. In the Sonthal Parganas there was a large increase of 13 cases, but here also it is stated that none of the cases was of a serious nature.

77. There were 2 cases of dacoity in Monghyr against 1 in the preceding year. There was a marked falling off in Bhagalpur, there having been only 1 case against 7 in the preceding year. There were only 9 dacoity cases in Purnea against 24 in the preceding year. All the dacoities of the year under report were professional, with the exception of 1, which was a technical dacoity only. The decrease is due to some extent to the better patrol system introduced throughout the district (especially on the Nepal frontier line), but chiefly to the greater prosperity of the people. In Malda there were only 2 cases of dacoity reported during the year against 5 in 1892. One of these was declared false, and the complainant was prosecuted and convicted under section 211, Penal Code. In the Sonthal Parganas there was a satisfactory decrease, there having been only 2 cases against 19 in 1892. The decrease is attributed to the close watch on bad characters, and to the absence of distress.

78. In non-cognizable crime there was a divisional increase of 302 cases, there having been 12,797 cases against 12,495 in 1892. The increase was in Monghyr, Purnea and the Sonthal Parganas, while there was a decrease in Bhagalpur and Malda. In Monghyr the increase is chiefly in criminal force and cattle-trespass cases. The increase in Purnea is slight. The increase in the Sonthal Parganas was chiefly in offences against public justice, offences under the Municipal Act, nuisance, mischief and criminal force. In Bhagalpur the falling off in the number of offences under Municipal bye-laws accounts for more than the whole decrease of 1,183 cases. This is an item which is peculiarly liable to fluctuation according to the energies and views of different Magistrates and Municipal Chairmen. The fluctuation is not so much in the commission of petty municipal offences as in the vigour with which they are prosecuted. They do not practically affect the real criminal statistics of the Division.

## XIV.—POLICE.

79. Appendix X shows the results of police work in cognizable cases for the calendar year 1893.

The conduct of the regular police has been generally satisfactory. In the Bhagalpur town three constables were dismissed and four were judicially fined.

80. In Monghyr the rural police have worked better than in 1892, special care having been taken that no case of good service passed unrewarded. In Bhagalpur the pay of the chaukidars was generally raised during the year. Parades were restored all over the district, and the chaukidars were put into a neat uniform. In Purnea the working of the rural police was very unsatisfactory. Being entirely in the hands of the punchayets and zamindari amlas, they never report promptly even the most serious offences without consulting them. The District Superintendent is of opinion that better class of men should be employed as chaukidars,

and the control of punchayets over them, as regards information about crime, withdrawn. People of better caste have been induced to take various posts in many parts of the district, but there has been very great opposition of the part of the punchayets to all efforts to enlist a better class of men as chaukidars, as they can get more menial service from the low castes than from the higher ones. In the Sonthal Parganas the chaukidars are often badly paid, and in Rajmahal especially there is much trouble caused by irregularity in their payment. The indigenous police are reported everywhere to have done good work. They are best in Pakour and Jamtara. A special report has been submitted to Government since the close of the year on the working of the village police since the amendment of Act VI of 1870 (B.C.).

#### XV.—CRIMINAL JUSTICE.

81. Appendix XI shows the Criminal work disposed of by Stipendiary Magistrates. The ratio per cent. of witnesses detained over two days to the total number examined, is compared below for the years 1892 and 1893:—

		1892.	1893.
Monghyr	...	9.2	6.1
Bhagalpur	...	4.47	1.4
Purnea	...	7.	4.5
Malda	...	2.79	5.9
Sonthal Parganas...	...	3.25	5.5

There has been a marked improvement everywhere except in Malda.

The Collector of Purnea writes—"Of the total number of witnesses in attendance during the year, 24.3 per cent. were detained for more than one day as against 19.4 detained for that period in 1892. This increase in the percentage is due to the fact that the work was heavier in 1893, and that there happened to be a number of cases in which big men were the parties. They engaged pleaders and barristers whom Deputy Magistrates were quite unable to control. The pleaders and barristers think that quantity rather than quality is required in cross-examination; they apply for postponements after the close of the examination-in-chief, and have the witnesses brought back later on; they take days together in cross-examining the witnesses." The Magistrate of Malda gives no explanation of the falling off in his district. It is probably due to frequent changes in, and to the general numerical insufficiency of, the subordinate staff.

82. Appendix XII shows the work done by Honorary Magistrates and Benches who did a large amount of work, and were of much help to the general administration. The Magistrate of Purnea remarks that there was very little improvement in the attendance of the Honorary Magistrates of the Subdivisional Benches, notwithstanding the warnings sent to some of the Honorary Magistrates who had persistently neglected to attend. Every District Magistrate has a remedy for this in his own hands. If Honorary Magistrates cannot by constant and judicious personal supervision, tempered with praise whenever deserved, be induced to attend regularly, their names can be reported to Government for removal from their posts. The office of Honorary Magistrate carries with it considerable social distinction and several official privileges, and is one which is generally thought to be well worth the work which is given in return. There is, I am glad to say, a marked improvement as regards the proportion of witnesses detained by Benches over two days as compared with the preceding year. None of the Benches in this Division sit daily, so that the information called for in paragraph 6 of Government order No. 2643J., dated the 30th May 1893, cannot be given.

83. Appendix XIII shows the remands in A cases.

The percentages of A form cases remanded six times and more are compared below for each district with the figures for 1892—

		1892.	1893.
Monghyr	...	6.51	4.4
Bhagalpur	...	1.33	1.2
Purnea	...	6.33	5.7
Malda	...	2.83	2.5
Sonthal Parganas	...	.88	1.3

There was an improvement in every district except the Sonthal Parganas, the percentage of which is still very low in comparison with the regulation districts.

84. Appendix XIV gives the results of Sessions trial. The percentages of cases resulting in conviction are compared below with those of 1892. No special reason can be given for the fluctuations:—

	1892.	1893.
Monghyr ...	82.85	80.
Bhagalpur ...	77.27	80.77
Purnea ...	76.4	77.4
Malda ...	85.71	72.2
Sonthal Parganas ...	80.	88.88

85. Appendix XV gives the details of demand, realization and balances of criminal fines. The outstanding divisional balance has increased from Rs. 39,866 to Rs. 43,687. I am not satisfied that all is done that should be done in this Division to ensure more prompt realization and to have unrealizable fines periodically written off under my orders. The attention of the District Officers has been specially drawn to the matter, and it will be looked into during my tour.

86. Appendix XVI gives particulars regarding the attendance of Honorary Magistrates.

There is considerable room for improvement in this matter which, as remarked in paragraph 82, is one that rests chiefly on the personal interest taken by the district officer in the working of the Benches in his district. I have myself written to those Honorary Magistrates whose attendance has been exceptionally regular, to thank them for their services, and to those who have shown the fewest attendances, to warn them to be more regular in future.

#### XVI.—REGISTRATION OF DEEDS.

87. Appendix XVII gives the prescribed statistics under this head. There was a decrease both in the number of documents registered and in the receipts in Bhagalpur, Monghyr and the Sonthal Parganas. There was a large increase both in documents registered and in receipts in Purnea. In Malda the number of documents registered was very nearly the same (9,161 against 9,131), but there was a decrease in the receipts. In Monghyr the decrease falls under the headings "Mortgage" and "Lease." The decrease under the former head is due to good crops, which rendered it unnecessary for the raiyats to borrow money. The Collector remarks that some of the Rural Sub-Registrars are not as competent or well educated as is desirable. The decrease in Bhagalpur is also attributed to good crops. The number of registrations under sections 12 and 18 of the Bengal Tenancy Act decreased from 710 in 1892-93 to 546 in the year under report. The increase in Purnea was mostly in leases, and was due to special activity in settlement work in several zamindaris. The increase in Malda calls for no remarks, being slight. There was a reduction during the year from 12 to 8 annas of *ad valorem* fees on documents the consideration of which did not exceed Rs. 50. The number of this class of deeds being pretty large, the effect of the change was to diminish the receipts of the department to a considerable extent. The scale of searching fees was also reduced from Re. 1 to annas 8. In the Sonthal Parganas the reduction was mainly in deeds relating to immovable property. The legality of many of these deeds was doubtful, and they have accordingly decreased in number since it was found that they did not enable people to evade the law. In Rajmahal the reduction is chiefly owing to restrictions on the sale in anticipation by Paharias of their future crops of sabai grass. The season being a good one there was less pressure, and so less borrowing.

88. My predecessor inspected the following Sub-Registry offices in the course of his tour, viz., Monghyr, Purnea, Malda, Dumka, Jamui, Begusarai, Madhipura, Banka, Pakour, Rajmahal and Godda. I inspected the Sub-Registry office at Bhagalpur.

## XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

89. The following table shows the threefold classification of estates during the past two years:—

	NUMBER OF ESTATES.			TOTAL.
	Class I.	Class II.	Class III.	
1	2	3	4	
1892-93 ...	14,216	146	131	14,493
1893-94 ...	14,361	151	127	14,639
Difference ...	+145	+5	—4	+146

The increase in class I is mainly due to partitions. The increase under class II is due to the transfer of five estates from class III. Under class III there was a decrease of two estates in Monghyr (owing to their removal from the revenue-roll), an increase of two estates in Bhagalpur (caused by transfer from class I), a decrease of five estates in Malda (due to transfer from this class to class II), and an addition of one estate in the same district by transfer from the revenue roll of Murshidabad, the net result being a decrease of four estates as shown above.

90. The current demand of each class is compared below with that of the previous year:—

		1892-93.	1893-94.
		Rs.	Rs.
Class I	...	30,30,153	30,30,764
" II	...	53,704	54,521
" III	...	2,86,168	2,92,220
Total	...	33,70,025	33,77,505

The total shows an increase of Rs. 7,480. The increase under class I is due to the transfer of one estate from the district of Murshidabad to Malda. The increase under class II is partly due to the transfer of five estates from class III to this class in Malda, and to the increased rent of Government estates in the Sonthal Parganas settled in previous years on progressive rents. The increase under class III is due (a) to the assessment of accreted lands in Government estates in Monghyr; (b) to the settlement of alluvial accretions to some of the Government estates and to the enhancement of rent rates in Bhagalpur; (c) to the settlement of jangla tols and parti lands in Government estates Belwa, Harinkhuri and Bhagmara in Purnea; (d) to the resettlement of estate Sherghur Pomchandpur, the revision of assessment of estate jote Poran, the settlement of khas patit lands in Malda, and to the transfer of estate Mohunganj from Murshidabad to Malda.

91. The current collections from each class are compared below with those of the preceding year:—

		1892-93.	1893-94.
		Rs.	Rs.
Class I	...	28,87,662	29,74,383
" II	...	50,867	47,896
" III	...	2,48,542	2,60,951
Total	...	31,87,011	32,83,230

There was thus an increase of Rs. 96,219, and the percentage of current collections on the current demand rose from 94·5 in 1892-93 to 97·2 in the year under review. The arrear collections amounted to Rs. 1,89,323, or 93·7 per cent., on the arrear demand of Rs. 2,02,016 against 85·1 per cent., in the preceding year. The current and arrear collections together amounted to

Rs. 34,72,553, or 97·01 per cent. on the total demand of Rs. 35,99,521. The percentage of the total balance on the total demand is 2·8 against 5·7 in the previous year. This favourable result is chiefly due to the good season.

The balance is thus distributed:—

			Rs.
Class	I	...	57,242
"	II	...	6,717
"	III	...	36,968
			<hr/>
			1,00,927

92. Appendix XVIII gives details of the demand, collections and balances of Land Revenue and Cesses in the prescribed form.

#### OPERATION OF THE SALE LAWS.

93. Appendix XIX gives the required statistics regarding arrears of Land Revenue for the year under report. Only 173 estates were put up to sale, and only 63 were actually sold out of 1,799 which defaulted for Rs. 1,10,732.

#### SETTLEMENTS.

94. Appendix XX gives the required statistics under this head. Except in the Sonthal Parganas, there are no large or important settlements pending in this Division. Of 102 settlements pending for disposal, of which 83 were Government estates, 50 were disposed of and 52 left pending.

#### SONTHAL SETTLEMENT.

Under Government orders No. 4780L.R., dated the 24th November 1893, the revision of the settlement of Taluk Teor in Deoghur and of the Sonthal villages in Parganas Sultanabad and Ambar, was sanctioned. Taluk Teor was placed in the charge of Maulvi Ekram Hossain; Pargana Sultanabad under Babu Boloram Das Gupta; and Pargana Ambar under Babu Norendro Kumar Ghose. The party working under Maulvi Ekram Hossain took the field on the 15th November 1893, and between that date and the 31st March 1894 his party surveyed the boundaries and completed the detailed measurements of 249 villages covering an area of 36,438 acres of cultivated, and 29,070 of uncultivated lands. In addition to the above, Assistant Settlement Officer decided 126 boundary disputes, completed enquiries in 182 villages, and disposed of 544 objections.

The party working under Babu Balaram Das Gupta in Pargana Sultanabad during the same period, demarcated the boundaries of 409 villages and completed the detailed measurement of 254 villages covering an area of 63,665 acres of cultivated, and 37,491 acres of uncultivated lands. He also completed enquiries for the record of rights in 308 villages, decided 198 boundary disputes, and disposed of 318 miscellaneous objections.

The Ambar party working under Babu Narendra Kumar Ghose took the field on the 25th November 1893, and surveyed the boundaries of 201 villages and completed the detailed measurement in 119 villages, covering an area of 33,801 acres of cultivated, and 17,048 acres of uncultivated lands. In addition to the above, he completed the rough khatians of 63 villages, the enquiries for the record of rights of 88 villages. He also decided 99 boundary disputes, and disposed of 74 miscellaneous objections.

Mr. Carstairs writes as follows of the settlement work done by Mr. J. A. Craven:—

“I would like to note that since Mr. Craven’s work began in 1888 he has, including this season’s work, dealt with 2,848 villages, comprising in area 930,763·12 acres, or 1,455·71 square miles. He has dealt with 95,120 holdings of 109,851 raiyats, containing 2,470,977 plots, and in the first two seasons increased the rent from Rs. 2,38,098-1-6 to Rs. 3,38,559-4-0 (that for the current season not being yet fixed).

“This higher rent has been collected without difficulty, and though in so large a work errors were inevitable, especially with a supervising staff much weaker than is usually allowed, the general effect has been to reduce friction and

litigation, while the cost has been only annas 4-11½ per acre. I think, I am entitled to claim for Mr. Craven and his staff considerable credit for this satisfactory result. They were much hindered at the outset by uncertainty as to the rules, which were not finally passed till after His Honour the Lieutenant-Governor visited Dumka in 1891. The rules then passed have worked well."

#### CERTIFICATES.

95. Appendix XXI gives the required statistics under this head. The number of certificates remaining undisposed of at the end of the year in the Division (2,787) was much less than the number (3,255) pending at the beginning of the year. Monghyr has contributed mainly to this satisfactory result, and it is the only district in which the certificate work is exceptionally heavy. The formation of a special establishment for dealing with certificate work in each district will, I hope, bring about a considerable improvement both in its quantity and in quality. The amendment of the Certificate Law by the Bill now before the Bengal Council will contribute to the same result—and not before it was needed; for I fear that the realization of petty road cess dues under this procedure is a fruitful source of irritation and hardship. I allude to cases which have come before me in which, by mistakes in the Road Cess Office, the demand is frequently made on the wrong person, and to cases in which property is sold without the knowledge of the owner owing to peons not taking the trouble to serve notices personally, but sticking them up on the houses. It came to my notice that a mahajan in Monghyr, in concert with one of the hangers-on of the cutcherries, was in the habit of buying estates sold by auction under the Certificate Act with the object of making a profit by restoring them to the defaulters. Such a business, though it may save owners all the cost and risk of a civil suit to set aside the sale, raises an unpleasant suspicion of laxity, if not of collusion or something worse, on the part of the serving peons. The attention of the Collectors has been drawn to the necessity of thoroughly scrutinizing peon's work and of insisting on personal service wherever possible.

#### LAND ACQUISITION.

96. Appendix XXII gives the required statistics under this head. The number of cases disposed of exceeded the institutions, and the balance was therefore smaller than at the close of the preceding year. The lands acquired were chiefly for roads, railways, and other public works.

#### PARTITIONS.

97. Appendix XXIII gives the prescribed statistics under this head. The pending file has increased, the disposals having fallen far short of the institutions in Monghyr, where there is a Special Deputy Collector for partition work. Deputy Collector Babu Bunku Behari Bukshi, who held charge during the year, has been transferred to another Division as a Sub-Deputy Collector, and a new officer (Babu Hem Chandra Chatterji) has recently taken his place. It is to be hoped that he will improve matters during the current year.

#### LAND REGISTRATION.

98. Appendix XXIV gives the necessary details under this head. As usual, the number of cases instituted in Monghyr is in excess of those instituted in the other four districts taken together. The disposals in Bhagalpur far exceed the institutions, the result being that only 1,013 cases remained pending in the whole Division at the close of the year against 1,387 at the close of the preceding year. It is satisfactory to note that only six cases were pending over six months against 90 at the close of the preceding year.

#### EMBANKMENTS.

99. The following embankments were maintained during the year:—

- (1) The Begusarai embankment in Monghyr, which protects a large tract from the floods of the Ganges.
- (2) The Sakri embankment in the same district, which protects the country from the floods of the Sakri river.
- (3) The Chandan embankment in Bhagalpur.

- (4) The Belwa embankment in Purnea, which protects the adjacent lands from the overflow of the Punar.
- (5) The Muhananda embankment in Malda, which protects the civil station from the inundation of that river.

LANDLORDS' FEES.

100. Appendix XXV shows the deposit and acceptance of landlords' fees under section 12-13 of the Tenancy Act. The figures do not call for any special remark.

XVIII.—ATTACHED ESTATES INCLUDING COURT OF WARDS.

101. Appendix XXVII gives the prescribed details in respect of Wards' estates.

There were seven such estates under the management of the Court of Wards at the commencement of the year, and no new estate was taken charge of, nor was any estate released during the year under report.

102. No works of improvement were undertaken during the year in the Lugma estate in Bhagalpur. In the Sukraj Rai's estate Rs. 97 were spent in sinking a well in a village where there was a deficient supply of drinking water. In the Khagra estate nothing was done in this direction. Some improvements in the shape of irrigation works, roads and bandhs were effected in the Rohini and Sankara estates in the Sonthal Parganas.

103. The condition of the tenantry in the Lugma and Sukraj Rai's estates was generally satisfactory, that of the tenants in the Khagra estate was extremely good. Their flourishing condition is attributed by the Collector partly to the extreme fertility of the soil, and partly to the fact that most of them hold their lands on absurdly easy terms. In the Sonthal Wards' estates the year was a prosperous one to the tenants.

104. There was no attached estate during the year in Bhagalpur, Purnea or Malda. In Monghyr the share of an estate was attached during the year under the provisions of section 88 of the Criminal Procedure Code, and made over to the Collector for management. The Nazir was appointed Receiver, but before any collections were made by him, the estate was released under orders of the Magistrate. In the case of the Mulanagar estate, in which the dispute was referred to the Civil Court for determination under section 55, Act VII (B.C.) of 1876, a Receiver was appointed under section 56 of the Act. The right to possession was summarily determined by the Civil Court in March 1894, and possession was delivered accordingly. The Nagore estate remained in charge of the Deputy Commissioner of the Sonthal Parganas as before.

XIX.—EXCISE.

105. Appendix XXVIII shows the working of the Excise Department during the year. The total revenue from excise in this Division was Rs. 13,36,456 against Rs. 12,17,837 in 1892-93, or an increase of Rs. 1,18,619. The increase is general, but is most marked in Bhagalpur. The increase in Monghyr was chiefly obtained from country spirits, ganja and bhang and tari. The increase in Bhagalpur was under the heads of country spirits, rum, imported wines, ganja and bhang and opium. The increase in Purnea was under country spirits, tari, pachwai, rum, imported wines, ganja and bhang, opium and miscellaneous. The increase in Malda was under country spirits, tari, pachwai, madak and ganja. The increase in the Sonthal Parganas was under country spirits, tari, pachwai, ganja and bhang, opium and miscellaneous. The increase in Monghyr is due to better settlements as well as to the increase in the rate of duty on choor ganja. The increase in Bhagalpur is due partly to a greater number of outstills being in force in the district, and to competition among the vendors for shops, and partly to the increased consumption occasioned by the improvement in the material condition of the people. The increase in Purnea is due partly to improvement in the purchasing power of the people owing to a good harvest, and partly to a large amount of advance fees having been credited into the treasury in March last. The increase in Malda is attributed to the prosperous condition of the people, and to the increase in the rates of duty on ganja. The increase in the Sonthal Parganas is attributed to the good season. Part of the

increase, namely Rs. 3,704-12-0, was advance fees on account of some shops, the settlement of which was afterwards cancelled under orders of the Excise Commissioner. This will be refunded.

106. Mr. Carstairs writes—

“We have found that the pachwai shops have too often been centres of disorder, as many as 80 to 100 getting together and drinking to excess. Dacoities and crimes were also arranged at such places, and they brought distress on many families by getting the men into the habit of tipping every day instead of, as was formerly the case, contenting themselves with an occasional spree on home-brewed.”

A proposal for remedying this state of things was made by the Deputy Commissioner towards the close of the year, but it was disallowed as being too late. The Deputy Commissioner hopes to be able to bring it forward in proper time this year.

#### XX.—STAMPS.

107. The total receipts from the sale of stamps (excluding postage, service and telegraph stamps) amounted to Rs. 11,20,779 against Rs. 10, 73,106 in the preceding year. The increase of Rs. 47,673 was chiefly obtained under the head of court fees stamps.

The incidence of the Stamp revenue per head of the population was as follows:—

Monghyr	...	...	·16
Bhagalpur	...	...	·16
Purnea	...	...	·16
Malda	...	...	·16
Sonthal Parganas	...	...	·07

There was a decrease (78 against 86) in the number of breaches of the Stamp law detected by Civil Courts, and an increase in the amount (Rs. 784 against Rs. 672) of duty and penalty realized. On the other hand there was an increase in the number (380 against 178) of cases detected by Revenue Officers as well as in the amount (Rs. 2,335 against Rs. 1,152) of duty and penalty realized by them. Seventy-four prosecutions, in which 114 persons were concerned, were instituted against 45 in the preceding year. Seventy-two persons were convicted and thirty-nine acquitted. The issue of Board's Circular No. 8 of July 1891, under which Income-tax Assessors are empowered to impound documents insufficiently stamped, accounts for the increased activity of the Revenue Department.

#### XXI.—INCOME-TAX.

108. Appendix XXIX gives the prescribed statistics under this head. The total amount of tax assessed under Parts I, III and IV of the Act, exclusive of fines and penalties, and the tax imposed on salaries and pensions of Government officials, amounted to Rs. 2,46,278 against Rs. 2,39,400 in 1892-93. The increase in the tax is general, and is due to the discovery of new assessees, enhancements, and more careful assessments, and in Malda to a careful revision of higher class assessments. The net collections on account of the tax only amounted to Rs. 2,44,053 against Rs. 2,34,796 in the preceding year, showing an increase of Rs. 9,257. The outstanding balance on account of tax only of the year, was only Rs. 2,225 against Rs. 4,604. No assessments were made under Part II in any district of this Division. Rupees 106 were collected under Part III in Bhagalpur on account of the debentures issued by the Bhagalpur Municipality. The tax is as unpopular as ever both with assessors and assessees, but it has grown to be looked upon as inevitable, and is collected without much difficulty or friction.

#### XXII.—MONETARY ARRANGEMENTS.

109. There was a decrease in the receipts and an increase in the issues of currency notes in Monghyr. The decrease in receipts is not explained. The increase in the issues is attributed to there being a larger number of notes

available. In Bhagalpur also there was a large decrease in receipts and an increase in issues. In Purnea the large decrease in receipts is attributed to the very small number of currency notes received at the Land Revenue kist of March. The accumulation of silver was enormous, consequent on the dulness of both the import and export trade in rabi crops, jute, oilseeds, &c. There was a decrease in issues in payment of Government dues because there has been no heavy payment for railway contract work as in the preceding year. In Malda there was a decrease in both receipts and issues. For some time during the year the encashment of notes in the treasury, except for *bonâ fide* travellers, was stopped under the orders of the Accountant-General. This diminished the receipts in the first instance, and also ultimately the issues. Supply bills to the extent of Rs. 1,86,700 were cashed at the Malda Treasury during the year.

There was a decrease both in receipts and issues of currency notes in the Sonthal Parganas, but no explanation of the fact has been offered. The receipt of copper in the Sadar, Deoghur and Rajmahal subdivisions of this district is generally greater than the issue, because the traders and merchants of those places take silver from the treasuries in exchange for copper. On the other hand there is much demand for copper in the Pakour subdivision. The Subdivisional Officer states that copper coins are generally issued to the traders and resident raiyats for the purpose of enabling them to purchase goods (barter having been replaced by cash transaction) and to pay labourers. They are also issued to money-changers who visit the different markets.

#### XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

110. The branch line from Barsoi to Kishanganj in the Purnea district, was opened to passenger traffic from the 10th December 1893. One passenger-train leaves Kishanganj early in the morning and returns at 10 o'clock at night. The Collector remarks that the time at which the train runs is very inconvenient, not only for traffic between Purnea and Kishanganj, but also for passengers travelling out of the district, who are detained for a long time at Katihar.

The East Indian Railway continued to be worked with the usual efficiency. Accidents were few in number. A new roadside station was opened at Sabour between Ghogha and Bhagalpur, and about six miles to the east of the latter. A branch line from the Sultanganj station to the river side is about to be constructed, the land for it having already been acquired and made over to the Company. A line of telegraph was opened during the year connecting Supaul with the Bhaptiahi station on the Tirhut State Railway. The Assam-Bihar Branch of the Eastern Bengal State Railway in Purnea continues to be managed on a penurious scale. The carriages are dirty, the accommodation insufficient, and the transport of goods dilatory. In times of crowding 3rd class passengers are packed into wagons, and in one case this practice involved the loss of a passenger's fingers. The Deoghur tramway is reported to be defective in engine-power, the trains not being always able to clinch the gradients.

#### XXIV.—COMMUNICATIONS.

111. The roads and communications were well maintained during the year under report; 70 miles of metalled roads were maintained at a cost of Rs. 19,460, giving a rate of Rs. 278 per mile, and 660 miles of unmetalled roads were maintained at a cost of Rs. 49,037, giving a rate of Rs. 74-4-7 per mile. The above cost includes that of repairs to bridges. The expenditure on village roads incurred by the several Local Boards is given below:—

			Rs.
Sadar	...	...	4,680
Jamui	...	...	5,826
Begusarai	...	...	6,361

About 15,365 trees, chiefly mango and jack trees and a few mahogany trees, were maintained during the year at a cost of Rs. 899.

112. The following statement shows the length of roads of different classes maintained by the District and Local Boards, and the cost of their maintenance during the year:—

Class.	Description of roads.	Length in miles.	Cost of maintenance.	Average cost per mile.	REMARKS.
1	2	3	4	5	6
I	Metalled and bridged ...	54	Rs. 19,709	362·5	The cost shown in columns 4 and 5 includes that for arboriculture and the maintenance of bridges, the latter item amounting to Rs. 12,938.
II	Unmetalled but bridged ...	422	19,232	45·6	
III	Unmetalled with temporary bridges ...	262	7,713	38	
IV	Low level roads ...	161	2,979	19·4	
	Village roads ...	863	17,136	19·9	
	Total ...	1,695	66,769	39 4	

The Kosi is responsible for the bad state of the communications in the south of the Madhipura subdivision. In the Supaul subdivision also all the roads are sandy. Much requires to be done in North Bhagalpur in the way of communications. If the projected railway over the Bhagalpur-Bowsi road becomes an accomplished fact and relieves the District Board of a portion of the heavy cost of maintaining this road, it may be possible to make larger allotments for the Madhipura and Supaul roads.

113. One hundred and nine and-a-half miles of metalled roads were maintained at a cost of Rs. 35,175, or at the rate of Rs. 321·23 per mile; 808 $\frac{3}{4}$  miles of unmetalled roads were maintained at a cost of Rs. 28,636, or at the rate of Rs. 35·4 per mile. Out of a total mileage of 918, only 417 miles of roads were repaired, and the miles not repaired were in indifferent order. Some of the district roads were badly cut up by the excessive floods of 1892-93. In the Kishanganj and Sadar subdivisions some of the bridges that were damaged or carried away by the floods of 1892-93, have been repaired or reconstructed, and others are in hand.

The Collector remarks that the money (Rs. 26,752) allotted by Government from the pound income for the up-keep of the Ganges and Darjeeling roads, is inadequate for its proper maintenance, and is exceeded every year. Rupees 23-12-0 were spent towards the improvement of the trees on the road sides, most of which was spent on village roads.

114. There were altogether 541 miles of roads in this district. They received general repairs during the year at a cost of Rs. 19,206-11-0. Besides the above, 13 miles of village roads were repaired at a cost of Rs. 380. Sunken boats and trees were removed from the rivers at a cost of Rs. 207-1-9. Two lines of steamers, one along the Mahananda from English Bazar to Rampur-Boalia, and another from English Bazar to Rajmahal through the river Kalindry, ran during the year. A subsidy of Rs. 714-3-0 was paid to the Rajmahal line, which plied for about two and-a-half months of the year.

115. A large six-span bridge of rubble masonry on the Suri road, 8 miles south of Dumka, was completed and opened for traffic during the year. It is the most important completed bridge in the district. An old timber bridge on the same road, two miles from Dumka, was replaced by one resting on rolled iron beams. It is also now open for traffic. Fourteen boulder drains on the Dumka-Rampur Hat road were replaced by masonry culverts at a cost of Rs. 10,078.

One hundred and eighty-three miles of metalled roads were repaired at a cost of Rs. 16,184, or at the rate Rs. 80 per mile, and 568 miles of unmetalled roads were repaired at a cost of Rs. 12,133, or Rs. 21 per mile. There are 20 miles of village roads, 18 of which were maintained for Rs. 263, or Rs. 15 a mile, and the other two were privately maintained. A large number of roads, about 1,000 miles in all, is maintained out of the Government and Wards' Estate

Improvement Fund and by private contributions chiefly in labour. Rupees 702 were spent on roadside trees, of which there are now over 30,000.

## XXV.—WORKING OF THE LODGING-HOUSE ACT.

116. The Act is in force only in the town of Deoghur in the Sonthal Parganas. The receipts amounted to Rs. 1,782 against Rs. 1,279 of the preceding year, showing an increase of Rs. 503, which is due to the increased rate of fee being in force for the whole of the year. The total expenditure during the year from this fund was Rs. 1,406 against Rs. 932 of the preceding year. This increase was on account of establishment charges, construction of a bridge, and larger contribution to the municipality. It is reported that the recent orders of Government directing that all licenses under the Act are to run from 1st April, will prevent fraud. There were six prosecutions during the year for harbouring lodgers in excess of the licensed number.

## XXVI.—EDUCATION.

117. Appendix XXX gives the required statistics under this head.

The following table compares the statistics of schools and pupils for the last two years:—

TABLE I.

CLASS OF INSTITUTIONS.		1892-93.		1893-94.		Average number of pupils, 1893-94.
		Schools.	Pupils.	Schools.	Pupils.	
1		2	3	4	5	6
<i>Public Institutions.</i>

Total		1,279	9,745	1,345	10,153	.....
GRAND TOTAL		4,554	88,545	4,947	95,691	.....

There has been a net gain of 393 schools and 7,146 pupils, a gain shared by all the districts except Malda, which has lost 24 schools with 732 pupils. Secondary schools increased by 4 with 126 pupils, High English gaining 1 school with 56 pupils, Middle Vernacular 5 schools with 347 pupils, and Middle English losing 2 schools with 277 pupils. Primary education shows a gain in both upper and lower primary schools, the former increasing by 25 schools with 890 pupils, and the latter by 185 schools with 4,105 pupils. There has been good progress under this head in all the districts except Malda, which has lost 41 lower primary schools and 1,312 pupils. The loss is attributed to—

- (a) the advance of some of these schools to the higher status;
- (b) strictness in the reward examination by Sub-Inspectors; and
- (c) the prevalence of cholera in the different parts of the district.

Female education shows a gain of 110 schools with 1,530 pupils, of which Monghyr alone gained 83 schools.

Special schools, including Madrassas, increased by 3 schools with 87 pupils. Private institutions advanced by 66 schools with 408 pupils.

118. The result of the entrance examination in the Division was not satisfactory, the percentage of passes being 47·5 against 67·2 of the year before. Of the Government zila schools, Monghyr passed 12 out of 20, Bhagalpur 14 out of 30, Purnea 6 out of 11, Malda 3 out of 9, and Dumka all its 4 candidates. Of the aided schools, Jamalpur passed 8 out of 12, Pakour 5 out of 6, and Deoghur 3 out of 6. Champanagar Mission and Begusarai High Schools failed to pass any candidate.

Of the unaided institutions the Victoria Jubilee and Kamaleswari Prosad Schools in Monghyr passed 2 each out of 12 and 10, respectively. Barari passed 9 out of 11, Tejnarayan Jubilee Collegiate 14 out of 28, Bhagalpur Madrassa 1 out of 9, and Sidheswari School, Chanchal, in Malda, 4 out of 6. The new school at Sonbursa, started by Maharaja Harbullav Narain Singh, C.I.E., did not compete, having had no first class.

119. Thirty middle English schools sent up 113 candidates for Middle Scholarship examination, of whom 80 passed from 27 schools, 37 obtaining Middle English and 43 Middle Vernacular certificates. One hundred and thirty-six candidates from 36 middle vernacular schools competed at the Middle Vernacular Scholarship examination, of whom 83 passed from 31 schools. Of the private candidates for these examinations 29 passed out of 99, 4 obtaining Middle English and the rest Middle Vernacular certificates. Of 230 upper primaries, 150 schools against 145 sent up 371 candidates against 379 of the preceding year, of whom 163 passed against 151. Besides the above, 29 candidates passed from secondary schools. At the Lower Primary examination 2,574 candidates appeared from 821 schools against 2,553 from 819 schools, and 1,426 passed against 1,541. Eleven pupils more passed from secondary and 376 from upper primary schools.

120. The number of Muhammadan pupils in all classes of schools increased from 18,807 to 20,678. While the Muhammadan male population of the Division forms 20·3 per cent. of the total male population, the Muhammadan pupils are 21·5 of the total school population against 21·1. Thus both the number of Muhammadan pupils as well as their percentage compare favourably with the figures of the previous year.

121. The number of aboriginal pupils declined from 6,231 to 6,197, or by 34. In Monghyr there was an increase of 74 of these pupils, in Bhagalpur of 108, and in Purnea 15; while Malda lost 16 and the Sonthal Parganas 215 pupils.

Of 5,544 aboriginal pupils in the Sonthal Parganas, 5,352 were Sonthals, 186 Paharias, 3 Kols and 3 Dhangars. Of 178 schools for Sonthals, 125 schools received stipends from the special Damin-i-koh Fund of Rs. 7,500, the total expenditure from this Fund being Rs. 7,374 against Rs. 6,419 in the preceding year. Taking the population and the children of school-going age into consideration, there was 1 Sonthal in every 15·3 and 1 Paharia in every 50·4 at school.

#### XXVII.—DISPENSARIES AND HOSPITALS.

122. Appendix XXXI gives the required statistics under this head.

123. The dispensaries at Sheikpura and Chapraon in the Monghyr district, have been newly opened. The total number of out-patients in the dispensaries in this district was 40,385 against 32,059, and the total number of in-door patients 1,833 against 1,784 in the previous year. The Monghyr, Jamui and Kharakpur Dispensaries show an increase in the attendance of out-patients as compared with the previous year. The Begusarai Dispensary shows a decrease in respect of in-door as well as of out-door patients.

124. A new dispensary has been opened at Kishanganj in the Madhipura subdivision of the Bhagalpur district. Besides the eight shown in the Appendix, there is a ninth maintained by the Thakur family of Barari, which does not furnish any returns to Government. The charitable dispensary at Bhagalpur is maintained chiefly by the Bhagalpur Municipality, supplemented by grants from Government and

the District Board, and the proceeds of invested funds. It has a first grade Assistant Surgeon with a subordinate staff attached to it. The number of out-patients treated in the dispensaries of this district during the year was 28,946 against 26,100 in the preceding year. The increase is almost entirely due to the opening of a new dispensary. There are two hospitals in the Bhagalpur town in connection with Lady Dufferin's scheme. They are worked on alternate days. The recent orders bringing these hospitals under the superintendence of the Civil Surgeon will, the Collector thinks, result in great improvements.

125. There are 3 dispensaries in this district supported by local funds, a private dispensary supported by the Darbhanga Raj at Barara in the Dhamdaha thana, and another in charge of a native doctor is kept up by Syud Ashgar Reza of Kishanganj. The Purnea Municipal Dispensary can accommodate 14 in-patients. The number of out-door patients treated during the year in the dispensaries of this district, was 13,748 against 12,700 in the preceding year, and the number of in-patients, 480 against 526. The Purnea Dispensary did good work under 1st grade Civil Hospital Assistant Purnanand Das Gupta. The Kishanganj Dispensary suffers from want of funds. The municipality are unable to maintain it thoroughly and efficiently. There seems, says the Collector, to be much wealth, but no private spirit in Kishanganj; even the small subscription list is constantly in arrears. There were five changes in the *personnel* of the Medical Officer during the year, and this alone is a fatal impediment to efficient working. The Basantpur Dispensary is a useful institution supported by local funds. The Hospital Assistant has been some years in charge, is liked, and does good work. The dispensary has accommodation for 6 in-patients.

126. The District Board of Malda opened a new out-door dispensary at Gazole during the year. The District Board also made a grant of Rs. 450 to the municipality of English Bazar to make better arrangements for the in-door patients at that station hospital. The total number of out-door patients treated in all the charitable dispensaries of this district during the year, was 24,556 against 22,472 in the previous year, while the total number of in-door patients rose from 459 to 566. The increase was due partly to the opening of a new dispensary, and partly to the greater unhealthiness of the year.

127. There are 7 public dispensaries in this district, a new one having been opened during the year at Katikund in the Government estate Damin-i-koh, the headquarters of the Forest Officer. The numbers treated were—in-patients 508 against 432, and out-patients 23,043 against 15,488 in the preceding year.

Private dispensaries, for which figures are given, are—(1) Benagoria Mission, (2) Khairbani Mission, (3) Dharampur, (4) Taljhari, (5) Pakour Raj. There were also dispensaries at Pattra and at Moharu, for which no figures are given. Of the five first named, each got a Government contribution of Rs. 10 a month. The in-patients treated were 9,238, and out-patients 16,610. The use of the Pakour Raj Dispensary is really confined to the Raja's household, being situated in his own house.

#### XXVIII.—LIBRARIES.

128. There is no public library in Monghyr. The Bar Library is managed by the local pleaders. The Railway Mechanic's Institute at Jamalpur has got a very good library. There is a public library at Bhagalpur, but the only subscribers to it are some of the pleaders and a few native officials. The Bhagalpur Bar Library has a valuable collection of books. Banka and Supaul have also each a public library. At Purnea a Bar Library is supported by the pleaders. The District Office libraries are generally in good order.

#### XXIX.—MUSEUMS.

129. The only museum in the Division, namely that in Monghyr, founded by Mr. Lockwood, has ceased to exist. The articles and furniture which were much damaged have been sold, and the proceeds credited to the Government Zila School.

## XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

*District and Local Boards.*

130. Ten meetings were held by the District Board of Monghyr against 12 in the previous year. Sub-Committees for Monghyr. Public Works, Finance, and Education were held whenever necessary. The attendance of the members was good. The average attendance of members at each meeting was 12·2 against 10·8 of the previous year. The Sadar Local Board held 11 meetings against 10 of the preceding year, 1 of which was adjourned for want of a quorum. The average attendance was 5·3 against 4·4 in the year preceding; 12 meetings were convened by the Begusarai Local Board against 14 of the previous year. In 2 of the meetings there was no quorum. The average attendance was 6·5. The total number of meetings held by the Jamui Local Board was 13 against 12 of the previous year. Of these, one was adjourned for want of a quorum. The average attendance was 6·2 against 4·6 of the preceding year.

131. The Bhagalpur District Board held 25 meetings against 18 in the preceding year, and the average attendance at Bhagalpur. meetings was 10·3 against 9·6. The Local Boards between them held 47 meetings against 56 in the preceding year, and the average attendance was 6·07 against 4·5. Out of the 47 meetings held by Local Boards only 3 were adjourned. In the preceding year there were 17 adjourned meetings for want of a quorum. During the year the District Board was able to spend Rs. 959 more on education than in the preceding year. The total expenditure on education was Rs. 19,662, out of which Rs. 9,033 was on account of primary education.

132. The Purnea District Board convened 12 meetings during the year. against 11 of the preceding year. Only 1 meeting Purnea. against 3 of the preceding year was adjourned. The average attendance was 11·4 against 8·71 of the preceding year. The three Local Boards between them held 32 meetings. Of the total number five were abortive and adjourned. The average attendance was 5·9. Araria secured the largest attendance, viz., 7·33, at the Sadar Local Board it was 5·7, and at Kishanganj 4·69. The members of the Kishanganj Local Board did not show interest in any work of the Board. The Collector makes the following remarks:—"The attendance of members has been very satisfactory: they have listened with interest to whatever business has been put before them, and have invariably supported the executive; there has been no subject of a controversial nature before the Board."

133. The Malda District Board held 18 meetings during the year, 5 of which were adjourned. The average attendance Malda. of members was 5. The Collector makes no remarks on the working of the Board.

134. In this Division, as in others of which I have had charge, the District and Local Boards are useful as consultative bodies, but as executive bodies they become merged in the Chairman, Vice-Chairman and District Engineer, on whom chiefly depends the question as to whether or not the Local Self-Government system is a success.

## MUNICIPALITIES.

135. The Monghyr Municipality held 9 general, 5 special and 5 Sub-Committee meetings during the year. The Monghyr. Jamalpur Municipality held 6 general and 1 special meetings, and the Jamui Municipality held 15 general, and 1 special meetings. The Collector makes the following remarks regarding the municipalities of his district:—"The Jamalpur Municipality is well managed. I think the Monghyr Municipality also is being well worked. The idea that Monghyr is a model municipality however, has been thoroughly exploded by the Civil Surgeon, Dr. Vaughan, who has demonstrated Monghyr to be about the most unhealthy town in the province. Cholera breaks out every year. The incidence of assessment is low, and apparently the house valuation is not as high as it should be. Some of the Commissioners are very conservative and opposed to reform. Jamui is an illegally constituted municipality as I have reported, and I have demonstrated the injustice and the unwisdom of making

this place a municipality. Begusarai is far fitter to be a municipality. After paying for office establishment, audit forms, printing, &c., there is not much left to spend on roads and sanitation. Rupees 500, or one-sixth of the municipal income, was spent in one year on printing." The Magistrate's report as to the legality of the constitution of the Jamui Municipality will be taken up when the new Municipal Act becomes law.

136. The Bhagalpur Municipality held fifteen meetings during the year.

Bhagalpur.

In two of these there was no quorum. The Colgong Municipality held fourteen meetings. The Municipal Commissioners of Bhagalpur withdrew their contributions to the Bhagalpur model school and the Mansurganj boys' school, and diverted the savings to primary education. Their total expenditure on education was Rs. 1,121, of which Rs. 1,000 was on primary, and Rs. 121 on secondary education. The Collector makes no remarks regarding the working of the municipalities in his district.

137. The Municipal Commissioners of Purnea held ten meetings, and

Purnea.

those of Kishanganj seventeen meetings during the year. The percentage of attendance of the Commissioners was 46·6 at Purnea, and 55·77 at Kishanganj. A few of the Commissioners take some interest in their work.

The Collector writes—"The Municipality (Kishanganj) is not as well swept as it should be, and the reports of the Civil Surgeon after his inspection were most unsatisfactory. There are excavations and ditches all over the municipal limits which get filled with water during the rains and are unhealthy. The task of filling them up and improving the drainage of the town, which is urgently required, would, however, be very expensive, and the funds are not sufficient for the purpose. The municipality has done much to improve its roads, and has provided lamps to the streets. It has also provided a good stock of surgical instruments to the dispensary maintained by its grants and local subscriptions, which was in much need of them. Otherwise but little municipal activity is displayed."

With reference to the Purnea Municipality he writes—

"Owing to the vast area comprising the municipality of Purnea, the Commissioners are unable with their insufficient income to make any important improvement in it. Almost the only serious work which is undertaken in it is the maintenance of the roads that are in existence. The main streets in bustis are swept, but the number of sweepers is not sufficient to enable them to sweep the bye-lanes even once in six months. The drains are always kept clean in the dry season, but in the rainy season they get filled with jungle which it is impossible to keep down, except at a heavy cost, which the municipality cannot afford to pay."

138. The municipalities of English Bazar and Old Malda each held

Malda.

14 meetings during the year, two of which were adjourned meetings. The Collector writes—"The English Bazar Municipality was conspicuous throughout the year for its inefficiency in collecting the taxes, and frequently it was unable to pay its bills. Its affairs were in a bad condition. The Commissioners of Old Malda, on the other hand, performed their duties satisfactorily."

139. The only municipalities in the Sonthal Parganas are those of

Sonthal Parganas.

Deoghur and Sahibganj. In Deoghur the work has gone on smoothly; Sahibganj suffered considerably from frequent changes of Chairman.

140. As I have not yet had an opportunity of inspecting any of the municipalities in this Division, I cannot speak personally of their condition.

#### XXXI.—EMPLOYMENT OF MUHAMMADANS.

141. Appendix XXXII gives the required statistics under this head. The Collector of Purnea writes—"The Muhammadan population of the district is 41·4 per cent. of the entire population. They are mostly agriculturists and illiterate. Those who have some education take service under zamindars, but do not aspire in large numbers to service in Government offices, their education being below the required standard." The Collector of Malda writes—"As stated in the previous year's report, the resident Muhammadans of this district are mostly uneducated, and they are rarely found qualified for employment in any high post."

## XXXII.—POST OFFICE AND TELEGRAPH.

142. The Post Office worked generally satisfactorily during the year, and complaints were rare. A village postman of Lakhisarai was fined Rs. 25 by the Magistrate for throwing away letters and covers undelivered. In Purnea two cases of theft of Government money by runners occurred. In one case a runner cut open a mail bag on the road and absconded with Rs. 100 in cash which he found in it, leaving the mail on the road. He has not yet been arrested. In another case another runner abstracted Rs. 88 from a mail bag. He was on conviction punished with one year's rigorous imprisonment and a fine of Rs. 100. The Deputy Commissioner of the Sonthal Parganas makes the following complaints:—

“At Deoghur telegraph messages are taken for transmission only at fixed hours in the day. Mr. Heard suggests the raising the status of this important office, so that hours of business may be lengthened. I have personally experienced the inconvenience of the restricted hours, and no doubt they interfere with business.

“At Godda Mr. Piffard complains of irregularities in receipt and despatch of Bhagalpur mails. He suggests that a telegraph is much wanted.

“At Rajmahal Mr. McGavin suggests that letters and parcels might be sent from the Calcutta side by the slow as well as the mail train; and there might be two deliveries at Rajmahal instead of one as at present. Then all insufficiently stamped and bearing letters before being delivered there have to pass through the head office at Dumka. This must cause immense delays, as the distance from Rajmahal to Dumka one way is 66 miles by rail and 38 by road. Surely the post office might arrange for Rajmahal being attached for this purpose to some nearer place on the rail.

143. The sale of quinine at the Government post offices has been a success. In the district of Purnea alone 16 lb 9 oz. and 2 drachms of quinine were sold during the year, and this shows the appreciation of the efficacy of the drug as a febrifuge by the people in the remotest villages, where its use had been previously almost unknown.

144. A line of telegraph was carried during the year from the Bhaptiahi station on the Tirhut State Railway to Supaul. The newly-established Telegraph Office at Malda is increasing in popularity. A Government Telegraph Office was opened at Pakour during the year and seems to be prospering.

## XXXIII.—ZAMINDARI DÁK.

145. The following statement shows the income and expenditure during the year, and the rate of zamindari dák cess in each district:—

District.	Income.	Expenditure.	Rate at which levied.
1	2	3	4
	Rs.	Rs.	Rs. A. P.
Monghyr ...	8,241	6,723	0 14 0
Bhagalpur ...	15,248	11,760	2 8 0
Purnea ...	10,754	9,613	0 14 0
Malda ...	7,460	6,882	1 14 0
Sonthal Parganas	4,772	4,284	3 8 0

There were no changes either in the lines or in the management.

## FAIRS.

146. The principal gatherings of people at the fairs in this Division are estimated as follows:—

Singhessar	...	...	...	10,000
Kabilas	...	...	...	50,000
Karagola	...	...	...	10,000
Khagra	...	...	...	50,000
Ramkeli	...	...	...	5,000 to 6,000
Rameswar	...	...	...	10,000
Dhamsai	...	...	...	19,500
Deoghur (Bhadro Purnima)	...	...	...	8,000
„ (Sri Panchami)	...	...	...	5,000
„ (Shiva Rátri)	...	...	...	8,000

The Collector of Bhagalpur has not furnished an estimate of the gathering at Bowsi, the most important mēla of his district, in which the estimated gathering in the preceding year was so large as 175,000.

147. The sanitary and police arrangements were generally satisfactory, and no disease broke out at any of the fairs.

The Collector of Purnea, who was present at the Karagola fair, doubts the efficacy of the sanitary arrangements that were made there. Latrines were erected outside the mēla for men and women, but hardly any one went to them the mass of the people going to the fields beyond the mēla. They said they were ashamed, and if they were not allowed to ease themselves in the open fields, they would rather not go anywhere, and take the chance of getting ill. The Collector had therefore to give up all idea of regulating their operations, and allowed them to do what they liked outside the flags, merely keeping a number of mehters to go round with spades and cover up any excreta which they saw lying about.

#### POUNDS.

148. As usual, the majority of the pounds were farmed out. Those in the regulation districts, outside municipal limits, were under the control of the District Boards. No malpractices were brought to notice in the Monghyr district, though they are generally known to exist.

In Purnea complaints of wrongful impounding and cattle seizure by the pound-keepers, have been as common as ever.

The Collector of Malda reports that farmers are said to encourage malpractices in various ways, one of which is the employment of professional cattle-catchers, who seize stray cattle, bring them to the pound, and are rewarded by the farmers for their trouble. All complaints against farmers were strictly enquired into, and several of them were criminally prosecuted. Pounds under the District Board were inspected by the Sub-Inspectors of Schools.

#### XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

149. No report has been received in connection with the working of the Jamalpur Ratepayers' Association.

The Anjuman Islam Institution of Monghyr is supported from the following sources of income :—

- (1) Subscriptions and donations.
- (2) Collections of handfuls of rice daily contributed by the members.
- (3) Sale-proceeds of hides at the Id-uz-zuhá.
- (4) Landed property made over by the leading members of the institution.

The income and expenditure of the year were Rs. 3,017-6-11 and Rs. 2,094-1-3 respectively. During the year 63 orphans were supported by the institution, most of whom received free education in Arabic, Persian, and Urdu.

The Kaisth Sabha of Monghyr was established for the purpose of adopting means for the improvement of the social, moral, and educational condition of the Kaisth community. During the year seven boys of this community were educated at the expense of the Sabha. Two of these boys passed the entrance examination of the Calcutta University. The Sabha is entirely of a non-political and social character.

The Pasu Rakshini Sabha of Monghyr was established on the 24th May 1892, on the birth day of Her Imperial Majesty. The main object of the Sabha is to give shelter and food to worn-out animals and neglected creatures, and especially to those of the bovine species after they become unserviceable for domestic purposes. This institution is maintained by means of funds realized by setting up boxes in shops and other places. The following shows the income and expenditure of the Sabha during the year :—

				Rs.
Income ...	...	...	...	1,600
Expenditure	...	...	...	1,500
				<hr/>
		Balance	...	100
				<hr/>

The former name of Gorakshini has been altered into Pasu Rakshini.

150. The Bhagalpur Landholders' Association generally endorses the views and resolutions of the other Landholders' Association in Bihar in regard to questions relating to lands, and as to other matters it follows the lead of what is known as native public opinion in Calcutta. During the year under report the Association protested against the Bihar Survey and the Jury Notification, and supported the resolution of Parliament regarding simultaneous examinations in India and England for admission into the Indian Civil Service.

The Muhammadan Society of Bhagalpur is doing good and quiet work in helping in the education of the community. The school kept by it has been sufficiently successful.

The Gorakshini Sabha of the district has not developed any aggressive tendencies.

151. There is no social institution in Purnea, and a Branch Committee of the National Congress is the only political institution in this district. It sat once during the year, and some delegates were sent to the last Congress meeting held at Lahore.

152. The only institution in the Sonthal Parganas is the Jubilee Institute, of which a branch has been established at Pakour. The members this year have been devoting their attention chiefly to the question of disposal of the dead.

#### STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

153. The Collector of Monghyr writes—"There was some display of feeling arising out of the anti-kine-killing movement. Goshalas were started here and there, but some have since collapsed, or are languishing for want of adequate support. The Lieutenant-Governor's first circular about killing of kine caused considerable excitement among the Muhammadans, and there was, as in other towns, a large meeting held here at which a memorial to His Honour was adopted. The issue of the second circular re-assured the Muhammadans, but it displeased the Hindus. However the relations between Hindus and Muhammadans in the town of Monghyr are satisfactory. I think there has been some revival of religious feeling, and this has been increased by the mud-plastering of trees, which has been attributed by the common people to supernatural agency."

154. The Collector of Bhagalpur (Mr. Maguire) writes—"As I have only just joined the district, it would be presumptuous in me to offer any opinion as to the tree-daubing question, but in this district neither this nor the cow-killing question seems to have assumed very serious proportions. Public opinion as we speak of it exists only among about '01 of the people."

155. In Purnea the feelings of the people were not aroused upon any subject of importance or of general interest worth noticing.

156. All that the Collector of Malda has to say under this head is that the people of his district do not concern themselves with politics.

157. The Deputy Commissioner of the Sonthal Parganas writes—

"One or two ripples of the kine-killing agitation overflowed into this district; but, except for one small disturbance at Sahibganj, no overt act took place. There was a little feeling in Godda which is in touch with Bhagalpur: with this exception the district was unexcited about this matter.

"Cooly recruiting still disturbs people's minds.

"There was some small friction in Jamtara about forest rights, and a good deal on the same subject with the Paharias in the south of the Pakour Damir, who wish to practice the wasteful jhuming or 'karao' process of cultivation."

158. There is no newspaper press in this Division, and the circulation of Calcutta papers is very limited.

#### XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

159. The accompanying statement contains the remarks left by Mr. Quinn regarding the character of the different officers employed in the Division during the year under report. As I only joined it on the 16th March 1894, I cannot add any opinion of my own.

#### XXXXVI.—CONDUCT OF ZAMINDARS.

\* \* \* \* \*

#### XXXVII.—GENERAL REMARKS.

165. Under this head it is usual to mention the condition of the Nepal frontier for which no separate head has been prescribed. The Collector of

Bhagalpur reports that the main current of the Kosi has during the last rains receded a little further to the east of Birpur, and that there is now a small fordable stream where the main stream formerly flowed. No pillars, masonry or wooden, have been washed away. The soil under one masonry pillar was reported to have been partially scooped out, but measures were immediately taken to repair the injury.

The Collector of Purnea reports that the wooden posts on the boundary line were generally in good order, excepting numbers 17, 18, 41, 47, and 58, which had been washed away or had fallen down; they were reset in their proper places; pukka pillars numbers 10 and 11, and wooden posts numbers 59, 60 and 61, had also been washed away, but they could not be reset, as their sites were under water up to the end of the year. There were no changes in the course of rivers which form the boundary between the British territory and Nepal, except that the river Suranda cut away in the Purnea side about a mile in the jurisdiction of the Nawabganj outpost in the Araria subdivision.

Under this head the Collector of Malda gives the following summary:—

“The year under review (1893-94) was upon the whole a prosperous one to all classes of people. The harvest of food crops was abundant, and trade was brisk. There was a decrease in crime and increase in the revenues in all the departments. There was no disturbance of the public peace, and no unusual visitations of nature. The only circumstance which marred the general prosperity, was the heavy mortality of the year, especially from cholera, which for some time created something like a panic in the district: owing to this cause the attendance and efficiency of the public schools was somewhat impaired. The district roads (fair-weather roads for the most part as they are) were maintained in passable order, and public buildings were maintained in good condition. The police generally behaved well, and measures were taken to improve the status and efficiency of the village watch. The few Regulation XX chaukidars that still existed were brought under the operation of Act VI of 1870. The work of administration was carried on with smoothness and regularity, the only exception to this remark being the affairs of the English Bazar Municipality, which unfortunately fell under great disorder. General incapacity marked the administration of the Commissioners of the Municipality, especially in the Collection Department; work was at a stand-still for want of funds. The establishment was kept in arrears for several months. A general election took place in December 1893, and the newly-elected Commissioners have been given a chance of placing matters on a more satisfactory footing.”

Mr. Phillips, the Collector of Monghyr, gives the following interesting account of work done during the year, and of the chief wants of his district. The record is very creditable to his administration, and I think that a similar paragraph might be given for each district in future reports with great advantage.

Important matters which were brought to notice were—

1. The sale of houses and holdings in the Fort and town khas mahals.
2. The necessity for preserving the Fort walls and bastions.
3. The necessity for having a separate cemetery at Jamalpur for native Christians.
4. The dispute between the Public Ferry farmer and the Railway regarding the Railway Steamer Service to Gogri and Khagaria.
5. The establishment and spread of cow protection societies (see my report submitted in accordance with Government Circular No. 67J.D., dated 8th September 1893).
6. The fact that Jamui is not a legally constituted municipality.
7. The pollution of the Sitakund spring.
8. The insanitary condition of the Monghyr Municipality.
9. The necessity for more post offices in the interior.

As instances of solid work done, or of general administrative improvement effected in various directions, I would note the following:—

1. Starting of three new dispensaries.
2. Establishment of an in-ward at Jamui.
3. Extension of telegraph line from Jamui to Khairra.
4. Extension of telegraph line from Lakhisarai to Sheikhpura.
5. Establishment of six new inspection bungalows (in course of construction).

6. Enormous increase of vaccination operations (see under that head).
7. Systematic prosecution of bad characters, who make a living by preying on society (result—large decrease of the thefts and house-breakings).
8. Special encouragement of primary education.
9. Establishment of a number of new pounds sufficient for the *bona fide* requirements of the agricultural community, but not so many or so close together as to cause unhealthy competition and so increase the inherent evils of the farming system.
10. Better management of ferries (I hope that good platform boats will have been supplied within a short time for all the Municipal ferries).
11. Establishment of Entrance school at Jamui.

I would say that the chief wants of the district are the following :—

1. Railway from Garhara on Bengal and North-Western Railway, through Begusarai and Ballia with a branch to Monghyr.
2. Extension of this line through Gogri and due east into the Bhagalpur district up to the banks of the Kosi.
3. Railway line from Khagaria to Bhaptiahi on the Bengal and North-Western Railway.
4. A good road from Dharhara on the Loop line to Jamui on the Chord line, piercing the Amrasini pass.
5. Capital for the development of the mineral wealth—slate, mica, plumbago, &c.
6. The bridging of the Dakra nala on the Patna road, 3 miles west of Monghyr.
7. The proper metalling of the roads in the town of Monghyr (their present state is deplorable).
8. Bridging of the gaps in the Nepal road.
9. One dispensary at least for each thana.
10. Gradual extension outward of the Compulsory Vaccination Act.
11. A scheme of having peripatetic compounders—*cum*—vaccinators with travelling petaras (slung as a bhangy) of common medicines for cholera, fever, itch, &c.
12. Drainage and waterworks for the town of Monghyr.
13. Good cutcherries for the Sadar station.
14. A railway from Lakhisarai to Gaya (this has been sanctioned, and I believe work will be begun next cold weather).

As to sanitation, I can make no special recommendation beyond the diffusion of education. There are cholera epidemics every year; but the water supply is distinctly good. There are very few villages which have not good wells. Broadly speaking, drainage is not required."

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE  
CUSTOMS DEPARTMENT FOR 1893-94.

## FINANCIAL DEPARTMENT,—CUSTOMS.

*Darjeeling, the 22nd September 1894.*

## RESOLUTION—No. 301T.—F.

READ—

The Report on the Administration of the Customs Department for the year 1893-94.

The passing of the new Indian Tariff Act, which, speaking broadly, imposes a duty of 5 per cent. *ad valorem* on all imports, with a few exceptions, of which the most important is cotton yarn and goods, was the principal event of the year in connection with the administration of the Customs Department. The Act, however, came into operation on the 10th March 1894, or only three weeks before the close of the year, and the Collector has rightly prepared the portion of his report treating of dutiable imports in the same form as last year.

2. *Customs duty.*—The following statement compares the gross and net customs duty, inclusive of the duty on imported salt, collected during the past five years and in the years before and after the remission of import duties on the 10th March 1881-82:—

1	2	3	4	5	6	7	8	9
	1880-81.	1881-82.	1882-83.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Import duty (excluding duty on salt) .. .. .	72,72,428	61,72,901	14,87,018	24,45,683	26,75,754	28,08,900	31,06,025	35,94,967
Duty on salt .. .. .	2,27,44,388	2,37,15,028	1,74,72,613	2,25,83,827	2,30,66,656	2,39,34,018	2,40,16,051	2,36,63,961
Export duty .. .. .	17,09,351	20,46,909	21,28,492	16,09,445	20,80,014	22,43,551	18,07,330	17,51,001
Total gross duty .. .. .	3,18,16,170	3,19,35,818	2,10,89,123	2,66,37,955	2,78,31,424	2,89,86,469	2,90,29,006	2,90,13,722
Refunds and drawbacks—								
Imports .. .. .	3,37,096	3,04,426	3,20,636	3,12,697	3,13,188	3,32,730	2,63,270	2,98,531
Exports .. .. .	71,970	1,05,549	1,16,840	31,606	70,223	1,02,850	72,896	57,438
Total .. .. .	4,09,075	4,09,975	4,37,476	3,44,303	3,83,411	4,35,586	3,36,156	3,55,969
Total net duty .. .. .	3,14,07,095	3,15,25,843	2,56,50,647	2,62,93,652	2,74,48,013	2,85,50,883	2,86,92,850	2,86,57,758

Notwithstanding the receipt of over two lakhs in March from the duties imposed by the new tariff, the revenue of the past year shows a slight decline of Rs. 26,092, or .09 per cent., as compared with that of 1892-93. It was, however, only 9 per cent. less than the amount realised prior to the reduction of the salt duty and the remission of import duties except those on arms and ammunition, liquors and opium, in 1881-82. Owing chiefly to larger clearances of kerosine oil, the import duty on general merchandise improved by nearly five lakhs, or 16 per cent. The loss of revenue occurred in the import duty on salt and the export duty on rice. The salt trade has been reviewed in the Resolution on the Annual Report of the Department: the decline in rice exports is attributed to the high prices prevailing in Bengal. The charges of the year, inclusive of refunds and drawbacks, amounted to Rs. 9,36,157, and the net revenue, after allowance for receipts from coast light dues and miscellaneous items other than duty, was Rs. 2,82,76,916, against Rs. 2,83,03,565 in 1892-93.

3. The realisations of import and export duty at the different ports in the past two years are shown in the following statement:—

*Import duty.*

	Calcutta.	Chittagong.	Orissa ports.	Narayanganj.	Total.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.

... { 1893-94	2,61,73,894	6,61,766	15,721	2,04,856	2,70,56,237

*Export duty.*

	1892-93.	1893-94.
	Rs.	Rs.
Calcutta ...	16,84,876	15,31,082
Chittagong ...	43,979	24,991
Orissa Ports ...	1,68,475	1,98,828
Narayanganj ...	.....	.....
Total ...	18,97,330	17,54,901

To the above total figures for the past year should be added the amount (Rs. 2,02,580) realised under the new tariff during the year.

4. As already stated, the increase in import duty occurred mainly in mineral oil, the only other heads showing an increase being arms and ammunition. The slight falling off in duty on liquors, including ale, spirits and wines, has not been accompanied by any such reduction in the quantity or value of those luxuries as might have been expected from the effects of the depreciation of the rupee on the incomes of the European residents, who are the principal consumers of the commodities. The total value of these imports amounted in the past year to about 46½ lakhs of rupees, against 44 lakhs in the preceding year and about 49 lakhs in 1889-90. The export duty on rice shows an increase at the Orissa ports against a considerable decrease in Calcutta and Chittagong.

5. *Value of trade.*—The value of the trade of the Province, foreign and coasting, in the past two years is exhibited under three main heads in the following statement:—

	Merchandise.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Import trade—										
Foreign ...	23,22,52,063	29,10,07,300	2,20,10,216	1,63,08,817	1,44,42,418	1,29,80,951	26,03,05,297	32,33,46,077	5,40,46,780	.....
Coasting ...	4,34,09,070	5,65,06,341	37,02,708	59,20,683	8,13,416	10,10,868	5,29,86,103	6,33,37,792	1,03,51,689	.....
Total ...	28,07,22,042	34,85,03,640	2,63,12,924	2,41,84,500	1,52,55,834	1,39,97,819	32,22,91,400	38,66,83,869	6,43,94,469	.....
II.—Export trade—										
Foreign ...	41,62,98,812	41,96,91,497	67,06,428	39,27,688	1,59,595	1,06,910	43,31,63,965	42,37,56,476	5,61,630	.....
Coasting ...	7,36,48,132	6,07,66,640	84,90,916	34,44,317	30,08,098	34,88,627	8,58,28,140	6,77,28,486	...	1,60,99,680
Total ...	48,99,41,974	48,04,87,139	1,61,93,344	63,71,405	38,66,993	35,95,437	50,79,92,011	49,04,83,961	...	1,75,38,030
III.—Total trade of the Province.	77,06,64,616	82,89,90,680	4,05,06,268	3,05,55,905	1,91,12,827	1,75,93,256	83,02,83,411	87,71,30,850	4,68,56,439	.....

A marked increase is observable in the value of the foreign import trade in merchandise, the advance having taken place in both free and dutiable goods. In treasure a steady falling off has occurred since the large imports of 1890-91, and the decline was assisted in the past year by the closing of the Mints. In Government transactions the decrease in value is due to the fact that introduction of the new magazine rifle caused a large increase under arms and ammunition in the previous year. The increase in the foreign export trade is attributable to the larger value of the exports of seeds, jute, raw and manufactured, dyeing materials, lac, tea, and raw cotton. In the coasting trade the increase in imports is mainly accounted for by larger receipts of rice, spices, mineral oil, raw cotton and Indian-made twist in Calcutta, and the decrease in exports by reduced shipments from the same port of rice, cotton twist, jute manufactures, spices, raw tobacco, provisions and raw silk.

6. *Foreign trade of Calcutta.*—Eighty-six and a quarter per cent. of the foreign trade of Calcutta is carried on with the United Kingdom, China including Hong-Kong and the Treaty Ports, the United States, Germany, the Straits Settlements, France and Ceylon, the remainder being divided between Austria, Australia, Italy, Belgium, Mauritius, South America, Egypt, Russia in Asia, Arabia and other countries. The United Kingdom, as usual, occupies the first place, taking in the past year 59·63 per cent. of the entire trade, against 57·18 per cent. in the previous year. An improvement took place under most heads of imports, the most marked being in cotton goods, while in exports tea, raw and manufactured jute, linseed, indigo and rice contributed the largest increases. China comes next, but shows a decline from 8·83 per cent. in 1892-93 to 6·23 per cent., which is attributable to reduced exportation of opium and other Indian products, the imports, especially of unwrought copper, showing a considerable increase. The closing of the Mints and the consequent fall in the price of silver is said to have disturbed the trade between India and China. The United States, which holds the third place, has also a reduced percentage, due to a very large decline in exports, which was not fully made up by a large increase in imports of kerosine-oil. Germany maintained its position with a percentage of 4·89, and the Straits Settlements, with a percentage of 4·30, show a slight increase. A comparatively large advance, from 2·14 to 2·94 per cent., occurred in the trade with France. The imports exhibited no appreciable variation, but a great demand for oil seeds from India was created by drought in France, and a quantity of Indian wheat was also taken. The trade with Ceylon (2·36 per cent.) declined by ·52 per cent., imports showing a slight increase, while a large falling off took place in exports, especially of rice.

7. *Shipping in Calcutta.*—The proportion of the foreign trade carried through the Suez Canal stood last year at the highest point yet attained, being 70 against 68·1 per cent. in 1892-93. The total shipping entering inwards and clearing outwards, and the aggregate tonnage in the past two years, have been as follow :—

			1892-93.		1893-94.	
1	2	3	4	5		
	No.	Tonnage.	No.	Tonnage.		
Steam vessels ... ..	641	1,298,244	609	1,260,581		
Sailing do. ... ..	421	651,582	342	574,409		
Native craft ... ..	23	4,444	28	5,113		
Total ... ..	1,085	1,954,270	979	1,840,103		

The steam-vessels shown are only those which arrive in and leave Calcutta without touching at any other Indian ports. Vessels which so touch are reckoned in the coasting trade. The falling off in steamers in the past year

is partly attributed to this classification, fewer of the regular steamers plying to Calcutta having come direct. The number of steamers and sailing vessels both arriving and leaving shows a reduction of 35 and 11 respectively in the case of the United Kingdom and Germany, while it increased by nine in the case of France. Eighty-five sailing vessels, mostly employed in the oil trade, came from the United States, against 70 in the preceding year.

8. *Calcutta Imports*.—The total values of the principal articles of import in the past two years were—

	1892-93.	1893-94.
	Rs.	Rs.
Cotton goods ... ..	11,80,94,110	15,22,02,091
Twist and yarn ... ..	70,11,262	93,64,054
Metals ... ..	2,08,16,248	2,60,32,750
Mineral oil ... ..	1,56,41,143	1,85,27,067
Machinery ... ..	83,31,033	99,95,554
Woollen goods ... ..	62,13,269	74,67,299
Salt ... ..	48,55,575	64,84,529
Liquors ... ..	44,04,878	46,49,907

There was an increase in the quantity as well as the value of imports of cotton goods and twist and yarn. It is stated that for nine months of the year the trade in cotton piece-goods was remunerative to merchants, who had covered their exchange, but that to those who had not the result must have been serious. At the end of the year stocks were accumulating and very little business was done. In the finer counts of yarn the importations were in excess of requirements, and losses were suffered by importers and dealers. Large importations of copper wrought and unwrought, the latter being chiefly Japanese copper received from Hong-Kong, account for the increase in metals. The principal feature of the year in the oil trade was an enormous increase of imports from the United States. The American producers made a determined effort to maintain their position against Russian competition, and consignments exceeding those of the previous year by 91 per cent. were received, prices being at the same time reduced to an unprecedented point. The immediate result has been a decided check to importation from Batoum, the quantity received from that port having fallen from 20 million gallons in 1892-93 to 10½ millions, while American imports increased from 20 million to 38½ million gallons. Stocks at Budge-Budge have in consequence largely increased, the total quantity at the close of the year being about 9 million gallons. In machinery there were again large importations of pumping machinery for water-works, and the usual importations for renewals and repairs of jute and cotton mills. Woollen goods showed an increase under most heads, the largest percentages being in shawls and piece-goods from the United Kingdom. It is reported that some of the goods were conveyed by the Bengal-Nagpur Railway to places formerly supplied from Bombay. In liquors a decline in beer was accompanied by a considerable advance in the importations of porter. The receipts of brandy increased considerably, while those of whisky also continued to advance, but in both cases stocks in bond were larger at the end of the year. In wines champagne recovered from the heavy fall in 1892-93, the advance being 26 per cent. The larger imports of this wine were, it is assumed, due to the replenishing of the depleted stocks of the previous year. Port wine shows a decided advance, and it is evident that the use of this wine is increasing. Among articles not specified above, large increases are observable in sugar, hardware and cutlery, apparel, umbrellas and spices, including betel-nuts and pepper. Statistics are not available to show how far the sugar imports pass into consumption outside of Calcutta, but consumption in Calcutta itself appears to have largely increased. The importations of hardware and cutlery from Germany nearly doubled during the year, and the receipts from Austria and Belgium were also larger, while the trade with the United Kingdom remained nearly stationary. The increase in apparel is attributed, as in previous reports, mainly to the increase in the number of Europeans coming to India. The number of umbrellas imported increased from 2,232,140 to 2,915,024, the trade being the largest on record. A growing demand, competition among importers, and favourable exchange when the purchases were being made, are the reasons

given for the increase. The importations were, with insignificant exceptions, entirely from the United Kingdom, and the average price did not quite reach fifteen annas. A small local crop caused an increase of 129·4 per cent. in the importations of betel-nuts from Ceylon and the Straits Settlements. The trade in pepper has exhibited an enormous development during the last six years, and the increase in the past year was 68·8 per cent., the sole source of supply in the last two years having been the Straits Settlements.

9. *Calcutta Exports*.—The value of the trade in the principal exports in the past two years compares as follows:—

	1892-93.	1893-94.
	Rs.	Rs.
Jute, raw ...	7,19,71,637	7,92,97,243
„ gunny bags	2,79,88,280	2,82,27,268
Opium ...	5,98,50,325	4,84,06,059
Tea ...	6,06,74,336	6,22,28,418
Oilseeds ...	3,22,59,426	4,68,36,289
Rice ...	3,25,26,271	3,09,76,521
Indigo ...	2,60,04,461	2,86,83,810
Hides and skins	2,50,81,939	2,43,60,735
Wheat ...	1,52,42,488	42,69,510
Raw cotton ...	63,58,537	76,30,439
Lac ...	77,87,583	95,21,007
Silk, raw ...	59,41,246	67,70,385

Although the value is shown to have been larger in the past year, the exports of raw jute declined by  $1\frac{1}{2}$  million cwts., or 16 per cent. With a larger area under cultivation in the producing districts, the outturn fell off considerably owing to floods, the quality of the fibre was poor, freights were higher, and generally the trade was not profitable. The manufacturing industry in Dundee is said not to have been prosperous, supplies being short and prices high, and a strike having occurred amongst the operatives. The United Kingdom, Germany and the United States were, as usual, the principal consumers, and in each case the exports declined. The United States took nearly one million cwts. less, owing, it is stated, to the unsatisfactory state of trade there. Exports of jute bags increased both in quantity and value. The consignments to the United Kingdom slightly declined, but those to Egypt, the United States, and the Straits Settlements, increased considerably. Of gunny cloths,  $60\frac{1}{2}$  million yards were exported against nearly 40 millions in the previous year. The large fall in the value of opium exports is due to the smaller number of chests offered for sale by the Government and a reduction in the average price per chest. Although the quantity and the total value of the tea exports were larger, the average price per pound fell from 8 annas and 8 pies to 8 annas and 2 pies. The shipments were the highest yet made; but, owing to unfavourable weather in certain districts, the quality of the produce was not altogether satisfactory. The competition of Ceylon with Indian tea in the English market grows year by year, while China tea is being gradually driven out of the market. A heavy fall in exports from Calcutta to Australia, which is the only important consumer after the United Kingdom, occurred in 1892-93, but last year shows a recovery, and the shipments were the highest recorded. Ceylon, however, sent larger consignments to the Australian Colonies. An advance in exports to the United States is also a satisfactory feature of the year, and this is attributed to the successful operations of the representative of the Chamber of Commerce deputed to the Chicago Exhibition. Among oilseeds, linseed is the chief export. The quantity last year increased by 33 per cent. Russia was formerly a formidable competitor with India in this trade with the United Kingdom, but the Indian exports have largely exceeded hers in recent years. Poppy, rape and til (sesamum) are the other seeds exported, and all showed an advance. The fall in the export of rice was due to high prices, as already explained. The United Kingdom took more, but Ceylon, which is the principal consumer of Bengal rice, curtailed her demand, supplying herself from other parts of India. Indigo shows an advance of 24 per cent. in quantity, owing to larger crops in 1893, but the average price per maund fell from Rs. 310 to Rs. 276. Increased shipments were made to the United Kingdom, Austria and Germany, but there was a heavy decline in those to the

United States. Germany, Holland and Belgium combined took the largest supplies last year, and next in order came the United Kingdom, the United States and France. The trade in raw hides, which is the largest item under the head of hides and skins, is said to be almost entirely in the hands of German merchants, and Germany is now the principal consumer, having displaced the United Kingdom, which formerly took the largest quantity. Of raw skins, the largest demand is for the United States. The exports of wheat declined during the year by 68 per cent., the figures being the lowest for many years. The trade was practically confined to the United Kingdom and France, and low prices in the former discouraged Indian exporters. Raw cotton exhibits an advance of 24 per cent. in quantity. Germany is the principal country of export, but she took less than in the previous year, probably drawing larger supplies from other Indian ports, while increased shipments were made to the United Kingdom, Austria, Belgium, France and Italy. Lac is mainly exported to the United Kingdom and the United States. The total quantity fell, although very high prices caused an increase in the total value. A similar rise in prices early in the year increased the total value of the raw silk exports, notwithstanding a slight decline in the quantity; but consumers eventually held back, and an accumulation of stocks was the result.

10. *Treasure*.—In treasure imports of gold increased by  $13\frac{1}{2}$  lakhs, while exports declined by  $26\frac{1}{2}$  lakhs. The closing of the Mints to free coinage in June 1893 caused a reduction of 56 lakhs in imports of silver, the exports falling at the same time by  $1\frac{1}{4}$  lakhs.

11. *Subordinate Ports*.—The trade of the subordinate ports calls for brief notice. Chittagong shows a slight improvement in the foreign trade after a decline in the previous two years. The total value of the trade increased from 88 to 90 lakhs, or by 2 per cent. The import trade advanced from  $4\frac{1}{4}$  to 24 lakhs, or by 460 per cent., but this was largely due to the importation of material for the Assam-Chittagong Railway. Imports of salt and kerosine oil account for eight lakhs. Exports of jute and rice fell off very considerably, for apparently the same reasons as in Calcutta. The coasting trade, consisting mainly of imports of raw jute and tobacco, and exports of rice, raw cotton received from the Hill Tracts, and tea produced locally, shows an increase. The total value of the trade, both foreign and coasting, at the Orissa ports, as compared with 1892-93 fell, at Cuttack, from Rs. 34,15,436 to Rs. 24,94,178, at Puri from Rs. 3,04,999 to Rs. 2,84,292, and at Balasore from Rs. 1,07,46,209 to Rs. 86,72,300. In the foreign trade there was a decline in both imports and exports at Cuttack, amounting to 12 per cent. Puri and Balasore have no foreign import trade, but at both places a large increase occurred in exports, which consist only of rice. The coasting trade of Cuttack dwindled from  $6\frac{1}{2}$  lakhs in the previous year to over  $\frac{3}{4}$  lakh, of Puri from  $1\frac{1}{3}$  lakhs to Rs. 20, and of Balasore from 103 to 79 lakhs. At Narayanganj the trade is entirely coasting. It showed a slight improvement during the year, and the total value stood at  $72\frac{1}{2}$  lakhs. The ordinary imports are kerosine oil and salt, but rice was also imported from Chittagong in the past year owing to high prices locally. Exports of jute to Chittagong were much reduced, but a much larger quantity of raw tobacco was despatched to that port.

12. Mr. Marriott's administration of the Customs Department during the year was efficient and judicious, and merits the thanks of the Government. The Lieutenant-Governor desires to thank the Board also for their supervision of the Department. The names of the officers favourably noticed by the Board will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,  
Offg. Secretary to the Govt. of Bengal.

**RESOLUTION ON THE REPORT ON THE AGRICULTURAL  
DEPARTMENT FOR THE YEAR 1893-94.**

**REVENUE DEPARTMENT—AGRICULTURE.**

*Darjeeling, the 27th September 1894.*

**RESOLUTION No. 567T.-R.**

**READ—**

Letter No.1030A., dated the 21st August 1894, from the Board of Revenue, Land Revenue Department, submitting the Report of the Agricultural Department for the year 1893-94.

The ninth Annual Report of the Department of Land Records and Agriculture on the subject of agricultural enquiry, agricultural experiments, and agricultural improvements, is, like its predecessors, a record of good intentions and incommensurate results. The report is divided under the following heads, viz., (1) Analysis of districts; (2) Rent and Revenue in precarious tracts; (3) Measures of Protection; (4) Agricultural Improvements; (5) The Bengal Veterinary Department and cattle-breeding; (6) Notice of Agricultural Statistics; (7) Miscellaneous.

2. Nothing was done during the year under the first two heads. In regard to measures for protection, there was a marked failure in the scheme of emigration to

Emigration to Burma.

Burma, for the furtherance of which Government continued the subsidy, subject to a maximum of Rs. 1,000 per annum, paid to the British India Steam Navigation Company for the conveyance of State emigrants from Bihar (including Monghyr and Bhagalpur), Chota Nagpur and Orissa at a reduced fare. Only one batch was sent, consisting of 10 men, 8 women, 7 children and 7 infants, against five batches consisting of 191 men, 2 women, 89 children and 33 infants in the previous year. This falling off is attributed to the good harvests of the latter year.

3. The orders issued to the Settlement Officers of Chittagong, Western Duars and Orissa regarding the establishment of fuel and fodder reserves on Government lands not

Fuel and fodder reserves.

included in forests reserved under Act VII of 1878, have borne no fruit. It is hardly likely that anything practical will be done in Bengal in this matter. Where fuel and fodder reserves are wanted there is no spare land, and where there is land no such reserves are wanted. The Director will find it hardly necessary to mention this subject at any length in his future reports.

4. The poverty of results is most conspicuous under the head of silk experiments and eradication of pebrine, on which

Silk experiments.

Mr. Nitya Gopal Mukherji has for years been employed by Government. Mr. Mukherji was appointed with the object of discovering pebrine and other diseases said to be common among silkworms; it was also intended that he should breed kinds of seed which should be free from those diseases, and distribute and sell such seed. The report of Mr. N. G. Mukherji, however, says nothing as to the discovery or prevention of diseases. It appears that 2,134oz. of healthy seed were sold to cultivators, of which 1,650oz. were reared by a private individual and sold by himself. The balance 484oz. were apparently what was reared by Mr. Mukherji, though this is not stated in the report. For an outlay of Rs. 600 the private individual realized Rs. 1,238 for cocoons sold as seed, and Rs. 1,114 for those sold otherwise. But Mr. Mukherji appears to have realized only Rs. 313 for an outlay of Rs. 252 in rearing seed, which excludes the cost of Mr. Mukherji's salary and other incidental expenses, coming to a total of Rs. 7,955 during the year. Something is reported to have been done in the distribution of mulberry plants, but this is hardly a business which requires Government help.

5. Experiments were made at the Burdwan farm on paddy, sugarcane, jute, and potato crops with different varieties of

Experiments with manures.

manures, but, in the absence of any information as to the cost of manuring in proportion to increased production, the results reported lose their practical value. The planting of sugarcane in deep trenches instead of in irregular shallow furrows appears to have

Crop experiments.

been fairly satisfactory and to have been adopted by cultivators in the neighbourhood of the Burdwan farm. The system of *ratooning* canes, which has been tried successfully for over seven years, appears to be about the only definite result obtained by the Agricultural Department. The record in paragraphs 23-44 of the report, of ignorant and unsuccessful experiments conducted in private estates at the instance of the Department, is rather ludicrous, and at the same time rather lamentable. It is perhaps good for Government Officers and Zamindars to have taken this interest in the crops and learnt a few rudimentary lessons in cultivation, and enabled themselves to share in the feelings of agriculturists as to the vicissitudes of weather, but it is idle to hope for any serious improvement in the agriculture of the country to be effected in this way.

6. The experiment made in Orissa with a small quantity of fine paddy imported from Diamond Harbour is reported to have proved satisfactory. But the actual yield per acre is not stated. Settlement Officers in Orissa report that nothing is accurately known as to the production of rice per acre in that division. They have been directed to make experimental cuttings for the purpose. Instructions have also been issued that strenuous efforts should be made in jail gardens and Wards' and Government estates in order to obtain some knowledge of actual results. No experiments have been ordered to be made in jail gardens as stated by the Director: the instructions of Government were simply that when jail gardens grow cereals for jail consumption the area sown and produce reaped should be reported to the Agricultural Department.

7. The manufacture of date sugar by the centrifugal machine was fairly successful. Having demonstrated the effects of the machine, the experiment need hardly be repeated.

The Lieutenant-Governor regrets to observe that interest in agricultural reform on the part of leading zamindars is conspicuously absent.

8. The Bengal Veterinary Institution has been put on a proper footing from January in the present year. Rules for the admission of animals into the hospital, and for the admission of students, allotment of stipends, examinations, and award of diplomas were approved by Government, and published in the *Calcutta Gazette* of the 2nd January 1894. The number of students enrolled is 35, of whom 15 are in receipt of a stipend of Rs. 5 per month. The number of animals admitted for treatment since the opening of the hospital on the 10th January 1894 up to the end of the year was 50 horses and mules, 53 bullocks, and 3 dogs. The Report of the Bengal Veterinary Department submitted with the report of the Agricultural Department has been separately dealt with in detail.

9. The Department published during the course of the year general forecasts of *rabi*, *bhadoi*, the winter rice crops, and of important special crops such as sugarcane, tobacco, mulberry, and poppy. Special forecasts were published of wheat, jute, oilseeds and cotton. Agricultural exhibitions were held at Cossipore, Kushtia, Kalimpong, Falakata, and Alipore, and were assisted with grants of money from Government. Local fairs and shows without the pecuniary assistance of Government were also held at Pabna, Chapra in Nadia, Faridpur, Jalpesh in Jalpaiguri, and Kuch Bihar.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette*, and that a copy of it, together with the report and the forwarding letter of the Board of Revenue, be submitted to the Government of India in the Revenue and Agricultural Department, and copy forwarded also to the Board of Revenue, Land Revenue Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Government of Bengal.*

RESOLUTION ON LAND REVENUE ADMINISTRATION OF BENGAL  
FOR 1893-94.

## REVENUE DEPARTMENT—LAND REVENUE.

*Darjeeling, the 27th September 1894.*

## RESOLUTION—No. 557T.—R.

## READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1893-94.

The Report has been submitted with commendable punctuality, and the Lieutenant-Governor appreciates the efforts of the Board to condense their remarks in accordance with his suggestions. Though reduced in length from 67 to 55 pages, it contains a full and sufficient exposition of the standard branches of the Revenue administration, while affording a larger space to a record of the settlement work which has developed considerably in recent years. The increase in the number of illustrative maps from 16 in 1891-92 to 22 tends to swell the apparent bulk of the volume, but they are useful in showing the extent and situation of the survey-settlement operations, and their comparative progress from year to year.

## COLLECTION OF THE LAND REVENUE.

2. Some attention appears to have been paid by the Board and District Officers to the standards of success in collection of the current demand of land revenue which they are

Standards of collections.  
expected to attain, viz.—

- 99 per cent. for permanently settled estates,
- 95 ditto temporarily ditto and estates farmed or leased for a period, whether belonging to Government or to individuals,
- 90 per cent. for estates held direct by Government ;

but the Lieutenant-Governor desires to remind all officers that the above standards are only prescribed as the lowest percentage of collections on the current demand which will avoid the necessity of explanation: it is not meant that they should relax their efforts to realise within the year the whole of the Government dues: and, as was laid down previously, in each case Collectors will have to be careful that the balances are not overlooked but are accounted for in the ensuing year. The Lieutenant-Governor is anxious that the collection of the land revenue should not degenerate into a routine duty delegated to subordinates, but that the Collectors should take personal interest in it as their main *raison d'être*, and ever aim at improving the standards of the collections.

Financial results. 3. The current demand on account of the land revenue in Bengal for the past five years is shown in the following table:—

CLASS OF ESTATES.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Permanently settled estates ...	3,22,92,924	3,22,91,318	3,22,47,951	3,22,63,793	3,22,65,896
II.—Temporarily settled .. ...	{ 58,09,904	{ 26,91,601	26,76,096	27,10,912	28,10,713
III.—Estates held direct by Govern- ment.					
		91,84,778	32,38,128	33,97,627	34,08,777
Total	3,81,02,828	3,81,67,697	3,81,62,175	3,83,72,332	3,84,85,386

The current demand is higher than in the previous year by Rs. 1,13,054, and occurs in all three classes of estates. The increase is chiefly due to the re-settlement of the Western Duars in Jalpaiguri. This increase would have

appeared entirely under class III, but that the tea-grants in that district, with a demand of about Rs. 79,000, have been transferred from that class to class II.

4. The demands, collections, remissions and balances for the same period of five years are shown in the following statement:—

YEAR.	DEMAND.			COLLECTIONS.			Remissions.	BALANCES.			Percentage of total collections to total demand (column 7 on column 4).	Percentage of total remissions to total demand (column 8 on column 4).	Percentage of current collections on current demand (column 5 on column 2).
	Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
1890-91 ...	3,41,02,829	29,20,124	4,10,22,953	3,62,03,567	24,60,255	3,86,63,822	96,310	18,70,468	3,80,017	22,50,785	94.25	101.5	95.92
1891-92 ...	3,81,07,607	22,46,426	4,04,54,033	3,67,33,458	18,62,435	3,85,95,893	4,066	14,30,832	3,54,312	17,85,144	96.47	101.8	96.2
1892-93 ...	3,81,62,175	17,00,912	3,98,63,087	3,69,87,653	18,22,757	3,88,10,410	50,169	11,67,045	3,14,473	14,81,518	96.15	100.46	96.92
1893-94 ...	3,88,72,332	16,04,778	4,04,77,110	3,70,21,736	11,16,319	3,81,38,054	80,356	13,33,707	2,88,733	16,22,500	96.71	99.46	96.48
1893-94 ...	3,84,85,386	16,11,648	4,00,97,034	3,72,03,505	12,30,718	3,84,34,223	1,21,405	12,65,118	2,67,258	15,32,376	95.87	99.89	96.66

These figures show an increase of more than two lakhs of rupees in the total demand, and an increase of more than two and three-quarter lakhs in collections.

5. While the current demand increased by Rs. 1,13,054, the current Collections, balances and remissions. collections rose by Rs. 1,81,770, so that the percentage of current collections on current demand advanced from 96.48 to 96.66, but failed to reach the record figure 96.92 attained in 1891-92. The total collections were Rs. 2,75,199 higher than in 1892-93 in consequence of the collection of Rs. 93,429 more of the arrear balances, so that the total balances have again been substantially reduced. All the percentages of the collections as displayed in columns 12 to 14 of the above statement are better than in the previous year, but they are not so good as in 1891-92. The Lieutenant-Governor regards the present improvement as a creditable recovery from the low figures of 1892-93, and trusts that the Board will continue to urge the District Officers to aim at higher results. The remissions amounted to Rs. 1,21,405, of which nearly three-fourths were in class III. The remissions of grace, amounting to Rs. 43,169, were chiefly in the 24 Parganas, Mymensingh, and Backergunge. It is doubtful whether remissions of right and nominal remissions should be included in this category at all. The Commissioner of the Rajshahi Division in paragraph 50 of his Annual Report for 1893-94 mentions that half the assessment on Cheboo Lama's estate, which has been remitted for the life of the present holder, used to be deducted from the demand, but is now shown as a remission. In this way the amount of remissions is unduly swelled.

6. The total demand, current and arrear, from estates in class I, was Rs. 3,29,84,927, of which Rs. 3,22,87,238 were Permanently-settled estates. collected. The percentage, after excluding from the demand sums in suspense during the year, and adding the sums collected but not credited during the year, was 98.12 as compared with 97.86 in 1892-93, and 98.41 in 91-92. The actual percentage of current collections on the current demand was 97.98: so that the prescribed standard of 99 per cent. was not attained. Seventeen districts failed to reach that standard, but eight of them collected over 98 per cent. Patna and Shahabad only attained to 89.16 and 88.23 per cent. respectively. It is unsatisfactory to hear that their collections were as usual bad. The short collections in Patna are attributed to the large number of separate accounts opened, in which petty shareholders are said to withhold payment in the hope that their co-sharers will pay for them in order to save their estates from sale. This is an argument against the opening of separate accounts, but the same difficulty occurs in other districts and is successfully met. The Commissioner of Rajshahi has drawn attention to the fact that whereas in Bogra Rs. 12,609 out of a total arrear of Rs. 13,443 were collected in other districts during the year, but not credited in the Bogra treasury accounts until after its close, this was not an arrear at all from a Provincial point of view, Government having received the money at some of its treasuries. This is correct, and credit is duly given for it in columns 21 and 22 of Appendix

number IIA of the Board's report, and in the percentages 98·12, 97·86, 98·41 above mentioned. At the same time it is absolutely necessary that each district account should show exactly what is received in its treasury.

In the collections of the arrear demand, eleven districts did not reach the standard, and three of them did not even collect 80 per cent. Champaran was the worst of all; the large sum of Rs. 23,604 shown as an arrear there is due to the frauds discovered in the Tauzi Department of that district, which have still to be adjusted. This district accounts for nearly half of the total arrear balance of the whole province (Rs. 50,572). Apart from such special cause the arrear demands should be entirely collected within the year following that for which they were originally due. The arrears due from permanently-settled wards' estates are stated to be Rs. 13,440, against Rs. 1,07,134 in 1892-93. A large proportion, about Rs. 10,000, is due from the Tikari estates in Champaran in connection with the tauzi frauds already mentioned.

7. Class II or temporarily-settled estates consists of three divisions—

Temporarily-settled estates.

- (a) those settled for periods with proprietors,
- (b) private estates leased to farmers for periods,
- (c) Government estates leased to farmers for periods.

For all of these classes a minimum standard of 95 per cent. was laid down; but the following table, which gives the result of the collections in each subdivision of this class of estates for the two years 1892-93 and 1893-94, shows that in no single instance has it been achieved:—

CLASSIFICATION OF ESTATES.	Year.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(a) Settled with proprietors ...	1892-93 ...	95·72	89·96	95·53
	1893-94 ...	94·77	84·99	94·20
(b) Private estates leased to farmers.	1892-93 ...	83·74	73·36	80·62
	1893-94 ...	80·26	40·02	70·79
(c) Government estates leased to farmers.	1892-93 ...	85·70	77·21	84·10
	1893-94 ...	85·16	76·26	83·71
Total ...	1892-93 ...	93·21	80·24	92·13
	1893-94 ...	92·38	75·95	91·05

The total demand, current and arrear, from these estates was Rs. 30,58,092 against Rs. 29,56,421, and the total collections Rs. 27,84,531 against Rs. 27,23,884 of the previous year. The comparative figures in this statement show worse results in every case. The remissions also rose from Rs. 5,314 to Rs. 31,332, and the balances outstanding have increased by Rs. 15,000. For several years the unsatisfactory state of the collections in farmed estates has been noticed, and the special attention of District Officers has been called to the subject by the Board; not only has there been no improvement, but less success has been attained: the collection of 40·02 per cent. of the arrear demand from private estates leased to farmers is altogether inadequate. It is said that, in consequence of a legal opinion, the difficulty of collecting Government dues from farmers has much increased; but too much attention need not be paid to this objection. There is always a way of getting round a merely technical difficulty of the sort, and the Lieutenant-Governor has no doubt that the Board will not be seriously embarrassed by it. The current collections were not up to the mark in 28 districts under one or other of the three subdivisions of this class, and the explanations offered are not satisfactory. The largest item outstanding is Rs. 36,224, due from the Basudebpur ward's estate in Midnapore; but it is not understood why this estate is still shown in this class; this estate had been taken under Government management in the hope of

rescuing it from its desperate indebtedness, but finding it impossible to realise that hope it has lately been released, with the exception of the Jallamutha mahal, which is attached to effect the realisation of this arrear. The arrear collections failed to reach the standard in one or other of the three subdivisions of estates in 20 districts. The Lieutenant-Governor trusts that the Board will continue to give this branch of the Revenue administration their special attention.

8. Class III, or estates held direct by Government, comprises two subdivisions:—

Estates held direct by Government.

(a) those managed for proprietor.

(b) those owned by Government as proprietor.

After excluding demands not due during the year, and including collections realized but not credited, the net demand was for both classes together Rs. 40,06,154, and the collections Rs. 33,99,310, so that the percentage of total collections on total demand was 84·8. In the following statement the percentages of actual recorded collections are compared with those of the previous year:—

Sub-class.	Year.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
		3	4	5
(a) Managed for proprietors ...	1892-93	72·64	50·	65·25
	1893-94	76·51	48·02	65·72
(b) Owned by Government ...	1892-93	88·94	68·87	86·66
	1893-94	89·61	69·39	87·04
Total ... }	1892-93	86·52	61·38	82·66
	1893-94	87·63	59·53	83·16

In this class, again, the prescribed standard of 90 per cent. was not attained, though there was some improvement in every respect, except in the arrear collections from private estates. In 16 districts this standard for current collections was reached under both sub-classes; in 2 more districts under one or other of the two sub-classes; for the rest various explanations are offered. In the districts of the 24-Parganas, Nadia, Murshidabad, and Khulna the current collections from the estates held direct by Government were only 81·16, 82·47, 68·82, 81·42 per cent. of the current demand. These are poor results and not satisfactorily explained. Again, in Midnapore there were heavy arrears in the current collections, viz., of Rs. 67,136 in private estates and Rs. 14,211 in Government estates; also in the arrear collections there were balances of Rs. 1,18,301 due from private estates and Rs. 4,551 from Government estates. As to the private estates, the following account is submitted:—

“In Midnapore the large balance of Rs. 1,85,437 was due from the estates Jallamutha, Majnamutha, Bhowani Chak, and Jallamutha Julpai. The amount is in process of recovery by khas tahsil agency at Contai, under the supervision of the Subdivisional Officer. The Collector writes—

‘The explanations furnished by the Khas Tahsil Officer at Contai about the shortness of collection, in spite of this year of good harvest, are not satisfactory. He says that it is due, *first*, to failure of crop in some parts of the subdivision; *secondly*, to the outbreak of cholera in parts of the subdivision; *thirdly*, the year yielding a good harvest after many years’ failure of crop, the impoverished raiyats had to satisfy their mahajans out of the proceeds of the year; and lastly, on account of the change of officers.’”

The heavy balances due from these estates were noticed in the Government Resolution last year: and their constant recurrence is not altogether creditable to the Administration. The Lieutenant-Governor would be glad to hear from the Board whether no remedy can be applied to improve this state of things.

9. During the year 1893-94 there were 2,317 estates held direct by Government, of which 2,080 (against 2,042 in the previous year) were Government estates, and 237 private estates managed by Government. The following statement shows the number of these estates by divisions, the demands, cost of management, and total collections during the year:—

DIVISION.	GOVERNMENT ESTATES.		PRIVATE ESTATES.		TOTAL.		Cost of management.	Percentage of cost on current demand.	Current collections.	Percentage of current collections on current demand.
	Number.	Current demand.	Number.	Current demand.	Number.	Current demand.				
1	2	3	4	5	6	7	8	9	10	11

The Board's report shows in Appendix VI the establishment for the management of estates held direct by Government, and their cost much more fully than before. In 10 districts, viz., the 24-Parganas, Bogra, Dacca, Faridpur, Noakhali, Chittagong, Gaya, Shahabad, Darbhanga and Purnea, the cost of management exceeds 10 per cent. on the current demand, though in four of these districts the excess is small. The Lieutenant-Governor is well aware that the Board carefully scrutinize establishments, and that an establishment costing 10 per cent. on the demand is not entertained, unless it is really required: in some districts the management only costs 4 or 5 per cent. of the demand. His Honour is also glad to see that his desire is borne in mind that Government should divest itself of the direct management and ownership of estates as far as possible: it is stated in paragraph 34 of the Report that 65 such estates have been sold during the year; but in spite of this the total number has increased.

10. As a special report is annually submitted and separately reviewed on the working of the Road and Public Works Cesses, the subject is only briefly mentioned in the Board's Land Revenue Report and this Resolution. The following statement contains the results of the last period of five years:—

YEAR.	DEMAND.			Collections.	Remissions.	Balances.	Percentage of balances on gross demand
	Current.	Arrear.	Total.				
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1889-90 ...	76,60,539	18,04,134	94,64,673	77,54,684	76,885	16,58,728	17.5
1890-91 ...	78,38,927	18,35,056	96,73,983	76,84,012	12,661	19,33,855	19.9
1891-92 ...	79,67,933	19,44,615	99,12,548	80,61,032	25,453	18,35,454	18.51
1892-93 ...	80,91,015	16,58,356	97,49,372	82,76,738	13,368	14,86,471	15.24
1893-94 ...	82,35,859	15,02,319	97,38,178	82,12,800	20,404	14,82,876	15.22

The increase of the current demand by nearly 6 lakhs in this quinquennial period represents the gain obtained by the revaluations of certain districts. The collections have not, however, risen proportionately. This may be accounted for by the diminution in the arrear demand, the balances being three lakhs lower than at the beginning of the period. The current collections by which the year's work must really be judged are not shown in this report, but the total collections were nearly Rs. 64,000 less than last year

The percentage of collections ought to approximate much more closely to the standards required in the case of the Land Revenue.

11. The system of payment of revenue and cesses by money-order continues to develop at a steady rate of progress as to the number of orders, but the money transmitted thereby has not increased proportionately.

The Lieutenant-Governor has heard with satisfaction that a revised money-order form has been brought into use to remove two of the three defects noticed by Mr. W. C. Macpherson in his Tauzi Procedure Report. This is the first result of the long discussion in connection with the reform of the tauzi. The third defect will be remedied when new forms are issued. The following table shows the progress of the payments during the last five years:—

YEAR.			Number.	Amount of revenue paid.	Average value of each order
1			2	3	4
				Rs.	Rs. A.
1889-90	...	...	139,535	11,11,353	7 15
1890-91	...	...	160,892	15,64,268	9 11
1891-92	...	...	167,229	14,68,037	8 12
1892-93	...	...	183,403	16,35,409	8 14
1893-94	...	..	190,785	16,46,450	8 10

The system of payment of rent by money-orders has been in force since 1st July 1891 in all districts in which the whole of the Tenancy Act is in force. The following table gives the figures for the nine months of the year 1891-92, and for the whole of the two subsequent years:—

YEAR.	Number of money- orders issued for rent.	Amount.	Number of such orders refused.	Amount.
		Rs.		Rs.
1891-92 (nine months)	37,944	5,07,819	12,544	1,27,153
1892-93	42,901	5,19,768	13,687	1,26,757
1893-94	43,206	6,17,146	16,959	1,59,606

Thus, speaking broadly, about one-third of the number of money-orders were refused, transmitting about one-quarter of the amount tendered.

The Board remark as follows:—

“The system does not appear to have found much favour with the landlords, who, it is reported, generally avail themselves of any plausible excuse that may present itself for refusing rent remitted by money-orders, while the tenants do not resort to it except in cases in which their relations with their landlords are strained. The very large proportion (more than three-quarters) of money-orders refused in the Kajshahi Division deserves special notice. The Collector of Backergunge reports that, as the lower class of people in his district are illiterate, they prefer to pay personally to their superior landlords and receive a *dakhila* from them, and the landlords refuse to receive money-orders generally under a mistaken apprehension that the receipt of a money-order for a less amount than the actual sum due will bar them from taking steps in the Civil Court to recover the unpaid balance. The landlords in this district are said to feel themselves humiliated by the procedure, and are generally annoyed with their raiyats who resort to it. The Collector fears a desire to extort irregular cesses is not wholly foreign to this feeling.”

In spite of this feeling, the number of orders has increased during the year, and it is a remarkable fact that each rent money-order accepted is about half as large again as the average value of each Revenue money-order.

12. During the year 991 whole estates and 438 shares, total 1,429, bearing an aggregate revenue of Rs. 1,43,689, were sold, as compared with 1,355 estates and shares bearing a revenue of Rs. 1,38,912 in the preceding year. The Board consider that the law was worked with moderation. The Lieutenant-Governor notices that, in the 292 appeals made to the Commissioners, 61 sales were annulled by them, and 33 sales were annulled by Government on the ground of mistakes or hardship, on recommendations submitted by the Board. He would like to know more of the grounds of these annulments by the Commissioners, and to hear how far they were based on technical grounds, such as non-service of processes or on errors of the Tauzi Department, and the Board will be asked to report in how many cases the Civil Courts interfered under section 33 of Act XI of 1859. The largest number of defaults, 1,641, occurred in Saran, and the Board are right in saying that their frequency justified severe measures to some extent. The general rule of practice is that, whenever arrears of all kinds have been entirely paid before sale, the legal right to sell up defaulting estates is waived; but in Saran the legal right appears to have been enforced, and the Lieutenant-Governor cannot but regret that it should have been thought necessary to insist on so harsh-seeming a procedure. He trusts that the Bill which has been introduced into the Legislative Council will obviate the necessity for such action by putting things on a better basis. The percentage of sales to defaults was again highest in Chittagong, reaching 36·6: it was also as high as 28·5 in Nadia. The orders enjoining that the sales for arrears at one kist day should be effected before the next kist day comes round appear to have been neglected in several districts: the delays in holding sales were especially great in the districts of Bhagalpur, Cuttack, Patna, the 24-Parganas, Birbhum, Darbhanga, and Jessore. Considerable confusion and risk to the Government revenue must result from such delays; the Board are requested to take measures to enforce the existing orders.

A Bill to amend the Revenue Sale Law has been introduced into the Bengal Legislative Council, and will be proceeded with as soon as the further reports called for from Revenue Officers and certain Associations have been received and considered.

13. The following statement shows the number of certificate cases instituted and disposed of during the year under the different classes of demands:—

Working of the Public Demands Recovery Act VII (B.C.) of 18·0.

	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	PENDING—		
					More than six months.	Less than six months.	Total.
1	2	3	4	5	6	7	8
Demands of all kinds under section 5 ...	481	1,572	2,053	1,543	52	458	510
Arrears of rent due to Government, clause 6, section 7 ...	6,300	16,100	22,580	17,943	1,031	3,615	4,646
Embarkment dues, section 50, Act VI (B.C.) of 1873 ...	2,400	4,248	6,738	5,457	96	1,135	1,231
Water-rates, Act III (B.C.) of 1876 ...	1,350	8,713	10,063	9,389	118	556	674
Cases, Act IX (B.C.) of 1880 ...	40,324	77,510	117,834	80,402	15,380	22,052	37,432
Demands of the Court of Wards, clause 7, section 7 ...	7,924	7,030	15,854	10,299	3,627	1,928	5,555
All other demands under section 7 ...	11,398	27,714	39,112	27,553	2,974	8,785	11,759
Total ...	70,357	143,886	214,243	152,386	23,278	38,570	61,857
In 1892-93 ...	83,283	146,572	229,855	159,522	31,323	40,005	70,333

In this statement, which is based upon Appendix IX of the Board's Report, it is not clear why the certificates for water-rates in the Patna Division have been omitted from the Appendix, though they are mentioned in paragraph 63 of the report.

Taking the statement as it is, the number of certificates filed has again decreased, but only by 2,686; however, as more work has been done, the pending cases have been reduced from 70,333 (or 70,357) to 61,857, and it is satisfactory that those pending over six months have fallen from 30,323 to 23,278. A decrease in the total institutions is observed in the water-rate

collection department, though there was an increase in the Burdwan Division, as is shown by the following figures:—

		Filed in 1891-92.	Filed in 1892-93.	Filed in 1893-94.
Districts of the Orissa Division		8,634	7,991	6,667
Ditto	Patna „	3,167	2,914	2,219
Ditto	Burdwan „	3,427	1,237	2,046
Total		15,228	12,142	10,932

The number of certificates filed for the recovery of cesses has again decreased, viz., from 78,952 to 77,510; those for the realization of rent due to Government also decreased from 16,904 to 16,199. The certificates filed for demands of the Court of Wards has rapidly fallen from 13,299 in 1891-92 to 9,906 in 1892-93, and 7,930 in the present year. This is a consequence of the Government order that certificates are not to be issued except when the claim is undisputed, or has been fixed by settlement proceedings. The Lieutenant-Governor does not agree with the Commissioner of Burdwan that it would be an improvement in both principle and practice if it were made compulsory "to go to a Civil Court with new lists, and to prove them by some sort of declaration before obtaining certificates." But His Honour is of opinion that certificates are in many cases given too easily, and that the Requisitioning officer should more often be put to proof that the demand is a sound one, especially in khas mahal and Court of Wards cases.

14. There was a satisfactory decrease in the total number of cases in which compulsory measures for realization. The number of cases in which demands were paid upon mere issue of notices has fallen from 52,047 to 44,827. In the Resolution on the Board's Report for 1891-92, the Lieutenant-Governor, commenting on the numbers, viz., 63 and 71, of persons imprisoned in two years, who were eventually released without payment of the debts, expressed a hope that very different figures would be shown for the year 1892-93. In that year the figures were 44, and in 1893-94 they were 22. This is satisfactory, as is also the fact that in three years the numbers have decreased from 45 to 20, and now to 11, of the persons imprisoned for non-payment of Government demands of various descriptions.

## ADMINISTRATION OF THE LAND REVENUE.

15. The 12 per cent. deducted from the collections from estates under the management of Government is distributed as follows:—

- (1). 1 per cent. to education.
- (2).  $1\frac{1}{2}$  per cent. to communications.
- (3). 2 per cent. to sanitary improvements.
- (4).  $7\frac{1}{2}$  per cent. to (a) management proper, and (b) miscellaneous improvements.

(5. There is also the separate Agricultural Public Works grant for the increase or maintenance of the land revenue from Government or temporarily settled estates.

The allotments and expenditure under the above heads (3) to (5) during 1893-94 are shown in the following statement:—

	Allotment.	Expenditure 1893-94.	Expenditure 1892-93.
1	2	3	4
(3) 2 per cent. for sanitary improvements ...	Rs.	Rs.	Rs.
(4) The 7½ per cent. for { (a) Management proper	3,78,174 }	50,476	46,087
{ (b) Miscellaneous im-		(a) 2,37,587	225,167
provements.		(b) 1,16,844	79,042
(5) Agricultural Public Works grant ...	60,000	4,04,907	3,50,296
		54,017	63,501
	4,33,174	4,58,924	413,797

The expenditure from the Agricultural Public Works grant was more nearly equal to the allotment than last year, but still there is no reason why the whole allotment should not be exhausted. Some attempts at the introduction of new staples met with varied success, especially potato seed in the Western Duars. Good use was made of the education grant for primary schools in Midnapore, the 24-Parganas, Jalpaiguri, Darjeeling, Backergunge, Chittagong, Puri, and Singhbhum. Besides the figures shown in the foregoing table, considerable grants are made from Provincial Revenues for the opening out of backward districts by roads. The large sum of Rs. 52,044 expended on the construction of roads in Jalpaiguri, mentioned by the Board in their paragraph 78, belonged to this class.

16. A full statement is now furnished in an Appendix of the inspections of the registers and accounts of the numerous Government estates by Revenue Officers of every grade.

Inspection of accounts.

The Lieutenant-Governor attaches great importance to this duty, and trusts that the inspections are made thoroughly and in no perfunctory manner. It is gratifying to read that the results of the inspections were in general satisfactory, and that no serious irregularity was detected. It is not sufficient to be content with a comparison of the receipts granted to the raiyats with their counterfoils, and it is presumably not by this plan that the Commissioner of Dacca discovered omissions and irregularities in the Kalkini Estates office in Faridpur.

17. The survey and settlement work in Bengal was lately reviewed in the Government Resolution of 30th May for the survey year ending the 30th September 1893.

Surveys and settlements.

It is therefore only referred to briefly in this Resolution. The survey of the town of Calcutta, which has been for some years in progress, has been completed at the end of August 1894, and an amalgamated map of the whole town is in course of preparation. The following table shows the progress made in the settlements of Government and temporarily-settled and private estates under the control of the Director of Land Records during the year:—

*Government and temporarily-settled estates.*

Name of estate or tract under settlement.	Estimated area in square miles under settlement of revenue or rents.	Total number of villages.	Area surveyed during the year.	Area surveyed up to the end of the year.	Number of villages of which attestation has been completed.	Number of villages of which the final records of rights have been published under section 105(2) of the Tenancy Act.	Cost during the year.
1	2	3	4	5	6	7	8
Balasore (all temporarily-settled estates).	1,715	3,676	Sq. miles. 721	Sq. miles. 1,635	867	} .....	Rs. 3,76,805
Puri (all temporarily-settled estates)	985	1,957	.....	985	1,957		
Cuttack (all temporarily-settled estates and five permanently-settled estates).	2,352	4,979	.....	2,353	2,442

North Bihar (Musaffarpur, Champaran, and Baran).	3,000	5,200	1,921	2,436	1,214	.....	3,37,889
Buksol and other villages in Champaran.	6.77	5	.....	6.77	5	.....	420
Southal Parganas (20 private estates)...	795.6	1,416	442.70	731.6	548	548	69,172
Total ...	4,428.34	8,144	2,756.50	3,789.39	1,860	598	5,13,101

The total area of Government and temporarily-settled estates professionally surveyed during the year was 898.45 square miles, and the total expenditure on surveys was Rs. 2,62,338, or about seven annas per acre.

The following table shows the progress made in smaller settlements under the Tenancy Act under the supervision of the Commissioners of Divisions during the year :—

	Estimated area in acres under settlement of revenue or rents.	Total number of villages.	Area surveyed during the year.	Total area surveyed up to the end of the year.	Number of villages in which attestation has been completed.	Number of villages of which the final records of rights have been published under section 103(2) of the Tenancy Act.	Cost during the year.
1	2	3	4	5	6	7	8
	A. R. P.		A. R. P.	A. R. P.			Rs.
Government estates in the districts of Khulna, Pabna, Dacca, Faridpur, Tippera, and Shahabad.	40,762 2 20	110	11,460 0 37	40,016 3 10	65	57	8,344
Private estates (excluding Wards' estates) in the districts of Midnapore, 24 Parganas, Nadia, Jessore, Rangpur, Pabna, Dacca, Mymensingh, Faridpur, Noakhali, Monghyr, and Bhagalpur.	79,739 0 21	328	32,253 2 5	67,979 1 24	101	49	25,002

The Board in paragraph 179 of their report have made some sound remarks as follows, in which the Lieutenant-Governor generally concurs:—

“When private individuals apply for surveys and records of right it is generally either because of their ignorance regarding the amounts of existing rents, or because of complicated disputes between the landlords and tenants concerned. Such cases are specially difficult, and there is great risk of errors in procedure being committed by untrained Deputy or Sub-Deputy Collectors who are necessarily put in charge of these operations. The supervision which can be exercised over them by the Board is not sufficient to prevent such errors, and it is feared Collectors and Commissioners cannot find time to adequately inspect these petty settlements on the ground while the operations are in progress. However desirable it may be to endeavour to settle disputes by resort to Chapter X of the Act, the Board are disposed to think that Collectors and Commissioners should hesitate to grant applications under section 103 unless competent officers to supervise the proceedings are at their disposal.”

The Lieutenant-Governor observes that the Board refer to the forecast of increases of revenue due to revision of settlements and other causes, by which a total increase of Rs. 1,12,562 was anticipated during 1893-94: whereas by comparing the total current demands of the years 1892-93 and 1893-94, the actual increase demand was Rs. 1,13,054. This approximation to the forecast is creditable to the estimate, but it is the outcome of conflicting causes, for so large a sum as Rs. 39,000 expected from Chittagong was not realized.

18. The following statement shows the number of interests registered under initial registration, and the number of applications for mutation filed during the year:—

## Land Registration.

1	2	3			4	5	6
DIVISIONS.	Total number of interests registered under initial registration (section 38).	NUMBER OF APPLICATIONS UNDER SECTION 42 FILED DURING THE YEAR—			Percentage of column 3 (c) on column 2.	Percentage during 1892-93.	Percentage during 1891-92.
		(a) On account of succession by inheritance, whether under will or otherwise.	(b) On account of succession by purchase, gift, or otherwise.	(c) Total.			
Burwan ... ..	50,044	1,731	1,653	3,387	6·7	6·5	6·7

Bhagalpur ... ..	98,614	1,407	1,915	3,322	3·5	3·8	3·9
Orissa ... ..	160,694	5,134	4,812	9,946	6·1	4·2	3·4
Chota Nagpur ... ..	4,211	292	202	494	11·7	3·5	3·4
Total ... ..	978,132	34,141	30,851	64,992	6·6	5·5	5·7
Total for 1892-93 ... ..	971,200	26,459	27,048	53,507			

The percentage of mutations on initial registrations shows a marked improvement from 5·5 to 6·6, the increase in the Patna and Orissa Divisions being attributed to the survey-settlement proceedings in progress therein. The total number of cases disposed of was 61,428, against 59,037 in 1892-93 and 61,425 in 1891-92.

19. Partitions are comparatively infrequent, except in the Patna, Bhagalpur, and Dacca Divisions, for which the following statement gives the figures of the number of cases instituted, disposed of, and pending :—

DIVISION.	Pending at close of—		Instituted during—		Total.		Disposed of during—		Pending at close of—	
	1891-92.	1892-93.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11
Patna ... ..	1,679	1,545	338	327	2,017	1,872	472	402	1,545	1,470
Bhagalpur ... ..	119	101	39	42	158	143	57	28	101	115
Dacca ... ..	463	441	92	113	555	554	114	136	441	418

There were fewer cases disposed of in the Patna and Bhagalpur Divisions, but more in Dacca, than in the previous year: the cases pending are fewer in Patna and Dacca, but more in Bhagalpur. It may be admitted that cases vary greatly in complexity and magnitude, but it does not necessarily follow that numbers are of little use in estimating the quantity of work to be done: over a period of years and large numbers of cases they afford a sufficiently good indication. But Government has often been forced to doubt whether the work progresses as it should, and whether the officers, the Deputy Collectors, who are on special duty in connection with partition work, are not liable to be somewhat overlooked, and to lose their activity. Sir Charles Elliott must look to the Board and to Commissioners for a vigorous supervision of this branch of the revenue administration. He is anxious to receive the Board's report on the Bill to amend the law relating to partition of estates, which has been an exceedingly long time under their consideration.

20. The following table shows the quantity of land required during the year under Act X of 1870, and the cost of acquisition, as well as the department for which it was acquired :—

For whom acquired.	Area of land acquired.			Abatement of Government revenue.	Cost of acquisition.		
1	2			3	4		
	A.	R.	P.	Rs.	A.	P.	Rs.
Government ... ..	151	1	20	44	2	9	74,105
Irrigation ... ..	780	2	7	178	12	3	75,602
Municipalities ... ..	62	2	12	75	7	8	2,83,969
Railways ... ..	4,660	3	5	1,174	4	7	6,57,016
District Boards ... ..	434	1	30	126	15	6	53,944
Chankidars' jagir lands ...	16	0	39	11	14	11	1,568
Lands for Port Commissioners.	651	1	22	965	3	0	27,23,677
GRAND TOTAL. ...	6,757	1	15	2,576	12	8	38,69,884

Less land was acquired for Government than for some years past. A few poles of land for the Howrah foreshore road at Sibpur represent nearly half the expenditure of Government. They were required to complete the connection between the end of that road and the Royal Botanical Gardens. The total outlay of the year is enormously swelled by the charge of over 27

lakhs of rupees for the 644 acres taken up for the Kidderpore Docks scheme. This amount seems to have come, after much delay, into the accounts of the year, although the Docks have been open for some time past. The remarks about the progress of work in the preceding paragraph apply also to the subject of land acquisition, and the Lieutenant-Governor is glad to see that in each case of land acquisition proceedings a standard of work, *i.e.*, of the number of cases to be dealt with in the month, is laid down, and that the progress reports are examined for the purpose of ensuring the maintenance of the standard. The new Land Acquisition Act, I of 1894, came into force on the 1st March this year, and it is hoped that its provisions will admit of proceedings being considerably expedited, and of the expenditure being curtailed within reasonable limits.

21. In Orissa all the kanungos (except a few in Balasore), who had been deputed to settlement work, reverted to regular duty in October 1893, their services, which were

Kanungos and patwaris.

found of very little value, being no longer required by the Settlement Officer. The question of re-organising the kanungos and patwaris for the purpose of maintaining the settlement records in this division has been for some time under consideration, and it is essential that a scheme should be fully matured before the new settlement comes into effect in 1897. The registration of patwaris in the Patna Division and Monghyr under the old Regulation of 1817 still continues, but in Bihar the attempt which had been made to utilise the existing patwaris in the survey-settlement operations was abandoned. If these persons cannot be utilized for such operations, and are not considered a fitting agency for the maintenance of the records, while their duties as village accountants are practically obsolete, and their conduct as a class is generally condemned, it is a matter for consideration whether they should be continued merely as a possible nucleus for the organization of a village agency.

22. Out of the sum of Rs. 54,970 allotted for advances under the Land

Advances under the Land Improvement Loans Act.

Improvement Loans Act, XIX of 1883, only Rs. 29,431 were actually distributed. It has been previously remarked that the class of work to which these loans are most suitable are wells in flat lands and *ahars* and *pynes*, *i.e.*, tank *bandhs* and conduits leading to them in slightly undulating country. The largest advance of Rs. 4,100 was made in Gaya, where such works are most required. But this sum contrasts remarkably with the Rs. 35,350 and Rs. 24,050 expended there the two previous years for similar purposes under Mr. Grierson's supervision. The Lieutenant-Governor doubts if he would agree with the present Collector of Gaya that zamindars as a rule apply for these advances only when pressed for money, and not because they have any real desire to improve their property. It is stated that the balance outstanding on 1st April 1893 was Rs. 2,21,685; but there is nothing to show how these figures were arrived at. They are not to be found in any column of Appendix XV of the report of the year 1892-93, and another column should accordingly be added to Appendix XV in each year's report to show the total amount outstanding at the end of the year. The figure shown in column 26 as the balance outstanding, Rs. 25,349, represents only the sum which ought to have been recovered during the year but has not been realized; not the total outstandings. The balances are very large in Saran, Champaran, and Bankura. In Saran Rs. 3,467 principal and Rs. 1,264 interest for previous years were due: the collections were only Rs. 926, and Rs. 3,069 principal and interest remain outstanding from what ought to have been collected in the year. In Champaran Rs. 5,720 advanced were due, and Rs. 434 old interest: only Rs. 618 were collected, so that Rs. 5,219 principal and Rs. 675 interest,—total Rs. 5,894,—are still due for the year. In Bankura Rs. 27,185 principal and Rs. 1,811 old interest were due: only Rs. 7,229 were collected, and Rs. 9,601 more ought to have been collected in the year. These figures indicate lax administration. In Bankura the large balance of past years is from sums which were advanced under this Act, but should have been given under Act XII of 1884, as they were not spent on improvements.

The sum of Rs. 1,13,201 was advanced under the Agriculturists' Loans

Advances under the Agriculturists' Loans Act.

Act, 1884, as against Rs. 1,93,070 in the previous year. The following districts took the largest sums, viz., Midnapore Rs. 9,964 for purchasing seed

and agricultural implements: the 24-Parganas Rs. 4,000 for seed and food rice: Faridpur Rs. 22,753 and Backergunge Rs. 17,000 in consequence of the high floods and failures of crops in parts of the districts: Tippera Rs. 5,776 for the purchase of cattle and seed after the inundation: in the Patna Division, Muzaffarpur took Rs. 21,913 and Darbhanga Rs. 7,851, in certain villages where the crops were injured by floods: in Manbhum Rs. 10,015 in consequence of scarcity in certain parganas. Out of the demand due for the year, viz. Rs. 3,22,384, only Rs. 1,71,668 were collected: Rs. 2,348 were remitted, so that Rs. 1,48,368, or nearly half which should have been recovered, were not realized. Half, or nearly half, the demand of the year was uncollected in Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, the Sonthal Parganas, and Manbhum. The Board are desired to request greater attention on the part of District Officers to this subject. It is very important that the recipients of advances should not be allowed to regard them as gifts from Government.

#### RENT.

23. There has been no marked change in the year in the generally satisfactory relations between landlords and tenants in the Lower Provinces, except in particular localities. In Midnapore, the relations between the managers of Messrs. Watson and Company and their tenants are said to have improved. A settlement was effected last December, and the Collector hopes that there is now every prospect of continuous peace. In Khulna the practice, mentioned last year, of one zamindar purchasing the rights of the under-tenants of another landlord, gave rise to disputes. In Murshidabad, a muharrir and peon of an indigo concern were murdered by raiyats. In Backergunge the relations are strained, because of (1) the persistent attempts of the landlords to levy illegal cesses or benevolences upon all sorts of pretexts, and (2) the extraordinary degree of sub-infederation prevalent in the district, with its consequent interposition of a host of middlemen, all making their living by intercepting part of the rent between the cultivator and the zamindar. A naib of a catchery at Baria Baishdia was murdered. In the Patna Division the instances of strained relations occurred chiefly in the districts to which the survey-settlement operations have not been extended. There has been friction in Supaul, in consequence of attempts to enhance rents, and in Purnea too, but the cause is not stated. The settlement proceedings in Orissa have not to any noticeable extent affected the relations between landlords and tenants, and the country is said to be quieter under resettlement than many parts of Bengal at ordinary times. In Lohardaga the relations are much the same as they have been for the last few years, the zamindars withholding receipts when they can, and the raiyats refusing payment whenever strong enough to resist pressure. A Bill has been framed for the application of the Tenancy Act adapted to the circumstances of the Division, and for the commutation of predial services and conditions, which it is hoped will conduce to the welfare of the rural community of Chota Nagpur.

24. The Tenancy Act is reported, as in previous years, to have worked smoothly and to have had no tendency to foster litigation. The Board's remarks may be here quoted at length:—

“The Commissioner of Rajshahi reports that ‘the provisions made by the Act for the protection of the raiyats have proved effectual, and it is to their operation that we owe the cessation of the attempts to enforce the surrender of occupancy rights or enhancement of rents beyond customary limits, which at one time disturbed the tranquillity of this Division. The law has thus attained its main object, and it has also proved an efficient instrument for realisation of rent.’ The Collector of Monghyr, on the other hand, remarks that the main provisions of the Act for the protection of the raiyats are to a great extent a dead letter in his district:—‘Illegal ejections, enhancements and distraint, are not uncommon, and there is more or less a constant struggle between petty maliks and tenants on the questions of *kamat* and *gora*, the latter claiming *gora* rights where none existed before and the former asserting *kamat* rights in lands which always have been raiyati.’”

Since the conclusion of the year the subject of the transfer of raiyats' holdings, which was specially mentioned by the Board in 1891-92, has been considered and reported upon, and will be further dealt with in connection with the question of the indebtedness of the agricultural population.

The following statement shows the operation of some of the most important sections of the Tenancy Act in the various divisions of the Province:—

1	2	3	4	5	6	7	8	9	10	11	12	
DIVISIONS.	TRANSFER OF TENURES.			Appraisal or division of produce where rent is paid in kind, sections 69 and 70.	Registration of improvements, section 80.	Certificates of Collectors as to acquisition of land for building or other purposes, section 84.	Notices of resumption of land by landlords, section 87 (2).	Written permission to landlord to measure land, section 90.	Applications by Collector for appointment of common managers, section 93.	Applications made for survey and record of rights (under Chapter X).	Applications made for survey and record of rights in private lands (under Chapter XI).	Local enquiries held by order of a Court, section 138.
	(a)	(b)	(c)									
	Voluntary, section 12 (3).	By sale in execution of decrees, sections 13 (2) and 14.	By succession, section 15.									
	Computation of rent payable in kind, section 40.											
Burdwan	5,073	62	98	26	2	280	...	17	...	8	1	3
Presidency	7,540	213	203	...	4	6	...	4	...	6	...	...
Rajshahi	699	222	4	...	...	1	...	10	...	...	...	...
Dacca	2,413	168	180	...	...	18	...	15	...	36	...	16
Chittagong	2,392	621	251	...	...	43	...	90	...	...	...	36
Patna	1,276	1	7	73	202	76	3	901	...	8	...	10
Bhagalpur	1,226	...	2	1	84	20	...	...	...	1	...	...
Total for 1893-94	20,780	2,147	835	106	342	424	3	1,037	...	63	1	75
.. for 1892-93	21,739	2,115	650	44	385	204	...	1,034	1	54	1	81

The remarkable feature in this statement is that the statistics vary so little from year to year. The figures in column 2 refer only to transfer of "permanent" tenures, and are far below the figures recorded in Statements XII and XIII of the Registration Report, which refer to transfer of tenures and raiyati holdings. Since the close of the year, a circular has been issued which it is hoped will have the effect of diminishing to a material extent, the accumulation of "landlords' fees" (on transfers of tenures) in the treasury. The Board call attention rightly to the importance of the preparation of price-lists of staple food-grains under section 39 of the Act, and it is satisfactory to hear that they are considered to be generally correct.

Rent suits. 25. The number of suits before Revenue Courts under the Rent Laws for the years 1892-93 and 1893-94 is shown as follows:—

DISTRICTS.	NUMBER OF CASES INSTITUTED.		Increase.	Decrease.
	1892-93.	1893-94.		
1	2	3	4	5
Darjeeling ... ..	21	33	12	.....
Jalpaiguri ... ..	4,690	4,709	19	.....
Cuttack ... ..	2,674	3,582	908	.....
Puri ... ..	2,112	2,939	827	.....
Balasore ... ..	2,172	2,460	288	.....
Angul ... ..	.....	13	13	.....
Hazaribagh ... ..	2,974	3,071	97	.....
Lohardaga ... ..	8,627	7,626	.....	1,001
Singhbhum ... ..	395	319	.....	76
Manbhum ... ..	6,321	5,579	.....	742
Palamau ... ..	172	237	65	...
Total ... ..	30,158	30,568	2,229	1,819

Two years ago notice was taken in the Government Resolution on the Board's report, of the undue delay in the disposal of rent suits (of which the number continues to increase). The Commissioner of Chota Nagpur has, in his inspections and examination of quarterly returns, impressed on the District Officers and their subordinates the necessity of disposing of these suits with promptitude, and of avoiding frequent adjournments. While the decrease of suits

is considerable in Lohardaga, the increase is marked throughout the Orissa districts.

26. There were 658,301 cases instituted against 367,069, and 638,565 cases disposed of against 390,450 in the previous year. As the form of Collector's business statement

Miscellaneous.

has been revised, the number of headings being increased, and the return made more elaborate, so that several kinds of cases are included which did not find place before in the statement, no comparison can be made between the figures of the two years

27. The subject of the training of junior members of the Covenanted Civil Service in survey and settlement work has been before Government during the year. The Lieutenant-Governor considers it essential in the interests

Training of junior civilians in survey-settlement work.

of the administration that, whenever survey-settlement operations are in progress in any district, all the junior members of the service employed in executive duties in that district should receive some training in the work of survey, khanapuri and attestation, and the Board were asked to mention this subject more fully than formerly in their annual reports. Such operations are now in progress in eleven districts. The Lieutenant-Governor is not satisfied that in all cases sufficient attention has been paid to the orders of Government: in some cases the attempt to learn such work seems to have been rather perfunctory and of little use. The Board will be requested to enforce the orders of Government with greater fulness in the ensuing season.

28. In 1892 the Lieutenant-Governor expressed his wishes on the subject of the tours to be made by the Hon'ble Members of the Board of Revenue, and he is

General.

glad to see that Mr. Stevens was able to spend some time in the mufassal during the year. The Senior Member was detained in Calcutta by urgent business of the Government of India last cold weather, but Sir Charles Elliott hopes that this will not recur, and that Mr. Stevens will manage this year to do more local inspections, and to make himself acquainted on the spot with the working of some of the very important settlements which the Board control and on which they are often required to submit reports. Another year the tours of the Junior Member also should be mentioned in the Board's Land Revenue Report. His Honour endorses the acknowledgments tendered by the Board to the Commissioners for their assistance, and desires to acknowledge the services rendered to Government by the Board as the highest Revenue authority under his administration. He can specially congratulate the Province on the freedom from personal casualty in the staff of higher officers during the year under report. The names of the District Officers and their subordinates, who have been commended by the Board for Revenue work during the year, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Government of Bengal.*

# RESOLUTION ON THE ANNUAL REPORT OF THE PORT OFFICER OF CALCUTTA FOR 1893-94.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

No. 2157 Marine.

*Dated Calcutta, the 24th September 1894.*

## RESOLUTION.

READ—

The Annual Report of the Port Officer of Calcutta for 1893-94.

THE office was held by Commander B. P. Creagh, R.I.M., from 1st April to 15th August, and from 24th October to the end of the year. From 16th August to 23rd October, Commander H. B. Hooper, R.I.M., officiated for Commander Creagh, who was on privilege leave.

2. The strength of the Pilot Service at the close of the year stood at 58 Pilots and 14 Leadsman, against 60 Pilots and 15 Leadsman at the close of last year. Three Pilots retired, one was invalided, and one died. One Leadsman Apprentice resigned his appointment. It has been decided to reduce the strength of the Pilot Service to 50 Pilots and 14 Leadsman, and to limit the annual recruitment of Leadsman Apprentices. During the year under review only three Leadsman Apprentices were appointed, against four in other years. Two of them were brought out from England, and one was appointed locally.

3. The following table shows the number of arrivals and departures of vessels during the past three years:—

		Arrivals.	Departures.	Average tonnage.
1		2	3	4
Steamers ...	1891-92	897	887	2,633
	1892-93	844	841	2,697
	1893-94	813	823	2,776
Sailing Ships ...	1891-92	220	200	1,489
	1892-93	221	220	1,409
	1893-94	178	190	1,751

To this have to be added 8 Light Vessels, 12 Pilot Brigs, and 23 other Government vessels; also 8 vessels put back, and 2 inland steamers. Steam tugs, which are constantly running up and down the river, are not included in these figures. The number of vessels visiting the Port shows a falling off, but on the other hand the average tonnage has increased.

There was no material difference in the draft of vessels as compared with last year.

4. There were 21 groundings and 11 collisions during the year, as compared with 33 and 6 respectively, during the previous year. Among the casualties due to grounding, one vessel, the *Welhelm Tell*, sustained considerable damage owing to her being driven on to the Diamond Sand during the cyclone in May 1893. Of the collisions, six were accidental, four were considered to be the fault of the Pilots in charge, and one was slight and unimportant. The per centage of casualties during the year was 1·59, against 1·83 and 1·86 during the two previous years. The smallness of the number of accidents is an evidence of the care and skill exercised in piloting vessels up and down the river.

5. The receipts and expenditure on account of pilotage for the last three years are shown below:—

		Receipts.	Expenditure.
		Rs.	Rs.
1891-92	...	9,01,447	8,20,617
1892-93	...	8,50,200	8,41,527
1893-94	...	8,63,095	8,84,548

This expenditure does not include payments in England towards furlough and pension, which amount to about Rs. 2,00,000 per annum.

6. Owing to the decrease in the number of vessels of small tonnage visiting the Port, several representations were made by the Mate Pilots that their earnings were considerably below what it was intended that they should receive, and it was therefore decided to meet their complaint by revising the tonnage of the different grades. Subsequently, when it was found that the measures taken did not give sufficient relief to the Mate Pilots, it was decided to appoint certain Senior Mate Pilots who had completed three years service in that grade, to be Acting Junior Master Pilots on their passing the necessary examination. In accordance with this decision, six Mate Pilots were promoted to the grade of Junior Master.

7. The Orders regarding Preliminary Enquiries into casualties to ships were revised, the duties imposed by section 6 of Act V of 1883 being, as regards ships in charge of Harbour Masters, transferred from the Port Officer to the Deputy Conservator of the Port. In accordance with these Orders, forty five Preliminary Enquiries were held by the Port Officer, and six of them were further referred to Departmental Courts of Enquiry, against five so referred last year. In the six cases referred to the Departmental Court, two Pilots were suspended from duty, one was kept off the running list for 14 days, and four others were either censured or warned to be more careful. In the year preceding, one pilot was dismissed the service and one suspended.

8. The ships *Glengarry* and *Shah-in-Shah* were caught in the cyclone which passed over the Bay in May 1893, and were abandoned, the crews being taken off, the former by the French vessel *Eridan*, and the latter by the British vessel *Nubia*: no lives were lost. The *Glengarry* was afterwards picked up and towed into Calcutta, damaged beyond repair; but the *Shah-in-Shah* must have foundered, as nothing has been heard of her since. The gallant conduct of the Officers and Crews of the S.S. *Nubia* and *Eridan* in rescuing the crews of the vessels named, was recognized by the Bengal Government, and in the case of the latter, which is not a British vessel, the Board of Trade have awarded testimonials to the Officers and Crew immediately concerned.

9. The French Barque *Franklin* was totally lost in a storm off Saugor Island on the 22nd June last. Her crew took shelter in No. 1 Refuge House, from where they were brought to Calcutta by the Port Commissioners steamer *Cuckoo*.

10. Another vessel, the *Humayan Shah*, was totally lost near False Point Lighthouse on the 22nd September 1893. Of the 70 men on board, including passengers, 34 were drowned. The Master of the vessel was drowned, and a Preliminary Enquiry only was held, as there was no one left who could give satisfactory evidence.

11. The Eastern Gaspar and Eden Channels and Upper Saugor Roads have remained steady, but on the Lower Saugor Roads the bar has been gradually extending south-west, necessitating the shifting of the Long Sand Light Vessel into deeper water. At the Jellingham Channel the changes have been rapid and variable, but since October a depth of 13 feet has been maintained.

12. The new Pilot Brig *Alice*, built in the Government Dockyard at Bombay, arrived in Calcutta in February 1894, and left for the Sandheads to take up her duties as a Pilot Brig.

13. The number of Certificates of each class granted to Masters, Mates, and Engineers after examination at Calcutta, is shown in the following table:—

NATURE OF CERTIFICATE.	Candidates.	Total number examined.	RESULT.			Provincial Certificate granted.	Renewal of Certificates.
			Passed.	Failed.	In-eligible.		
1	2	3	4	5	6	7	8
Colonial	Master ... ..	20	10	10	.....	.....	.....
	First Mate ... ..	25	14	11	.....	.....	.....
	Only Mate ... ..	1	.....	1	.....	.....	.....
	Second Mate ... ..	31	14	17	.....	.....	.....
	First Class Engineer ...	5	4	1	.....	.....	.....
	Second Class Engineer ...	29	18	11	1	.....	.....
Local	Master ... ..	.....	.....	.....	.....	.....	.....
	Mate ... ..	1	1	.....	.....	.....	.....
	Engine-driver ... under Act VII of 1884.	2	1	1	.....	.....	.....
	First class Master ... ..	8	7	1	.....	.....	.....
	Second class Master ... ..	12	11	1	.....	.....	.....
	Serang ... ..	25	24	1	.....	.....	.....
	Engineer ... ..	.....	.....	.....	.....	.....	.....
	First class Engine-driver ...	15	10	5	.....	.....	.....
	second class ditto ... ..	11	5	6	1	.....	.....

14. One vessel, the Brig *Constance*, was reported to be in an unseaworthy condition, but as she was under 150 tons register, the Merchant Shipping Act VII, of 1880, did not apply to her. Her Owner (a native of India) expressed an opinion that the vessel was seaworthy for the trade she is intended for, whereupon the Shipwright Surveyor was communicated with. The Owner having executed the repairs suggested by the Surveyor, the vessel was allowed to proceed on her voyage to Chittagong.

15. The thanks of the Government are due to Commander Creagh, R.I.M., Port Officer for the efficient management of the Department under his control.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Government of Bengal.*

RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF  
THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING  
OFFICES AT THE OUTPORTS FOR THE YEAR 1893-94.

No. 2162 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

RESOLUTION.

*Dated Calcutta, the 24th September 1894.*

READ—

The Annual Report on the working of the Calcutta Shipping Office and of the Shipping Offices at the outports for the year 1893-94.

1. The number of seamen of all nationalities shipped and discharged through the Shipping Office was 20,024 and 17,600 respectively, against 16,955 and 16,428 in the year 1892-93. Particulars as to the nationality of the seamen are given below :—

	1893-94.		1892-93.	
	Shipped.	Discharged.	Shipped.	Discharged.
British ...	1,726	1,577	1,451	1,528
Europeans, Continental ...	712	700	548	380
Americans and West Indians	350	300	210	198
Australians ...	20	13	13	16
Asiatics other than Indians...	271	298	851	326
Indians proper ...	16,595	14,215	14,031	13,655
Eurasians and Goanese ...	350	497	351	325
	20,024	17,600	16,955	16,428

2. The difference between the total number shipped and discharged, much exceeds that in the preceding year, and occurs chiefly in the case of British and Indian seamen. The Shipping Master accounts for this by saying that a large number of lascars, who were engaged at this Port and sent as passengers to the United Kingdom and elsewhere, have not as yet been discharged, while some lascars were discharged at outports and sent on to Calcutta as passengers. He also states that European seamen were engaged in Calcutta and supplied to several ships at outports, whose final destination was either the United Kingdom or a port in the Continent of Europe, and they were as a matter of course not discharged through the Calcutta Shipping Office.

3. The number of seamen of different nationalities shipped in and discharged from Foreign vessels through their Consulates, who are not included in the table given in paragraph 1, are shown below—

Shipped	...	...	...	101
Discharged	...	...	...	88

4. The number of deserters has steadily decreased during the last four years. The Shipping Master has arranged with the Calcutta Police Authorities to prosecute the deserters with the help of the Agents of vessels from which the desertions took place. This measure appears to

1890-91	...	...	291
1891-92	...	...	188
1892-93	...	...	93
1893-94	...	...	64

have had a deterrent effect.

5. The receipts of the Shipping Office amounted to Rs. 35,545 against Rs. 31,540 during the previous year, while the disbursements have been Rs. 22,883 against Rs. 21,376 in 1892-93. Part of the increase in the receipts is said to be due to the engagement of lascars on some of the steamers which had hitherto carried European crews, causing an increase in the number of seamen shipped and discharged. Another cause of the increase is stated to be due to the relaxation, in the interests of ship owners, of the Rules that in the case of European Seamen being discharged by mutual consent, security against their following into distress should be given. Seamen with little or no balance of wages due were allowed to be discharged when it was certain that they would soon be shipped. It is stated that no inconvenient results have ensued from the greater latitude allowed.

6. The transactions of the Funds held in trust by the Shipping Office showed a large falling off. Details are given in the table below:—

	1892-93.	1893-94.
	Rs.	Rs.
Ticket money ... ..	277	262
Deposit money, British seamen ... ..	61,368	34,706
Ditto Native " ... ..	3,369	2,277
Estates of British seamen ... ..	16,982	7,545
Ditto Native " ... ..	3,434	1,907

The decrease under "Deposit Money of British Seamen" is attributed to the relaxation of the Rule as to granting discharges referred to in the preceding paragraph.

The decrease under "Deposit Money of Native Seamen" is attributed to smaller balances of wages being due to the native seamen reported to be in hospital or jail, at the time the crew were paid off, owing to the adoption by ship masters of the custom of making cash advances to the crews during the course of the voyage.

The decrease under the head "Estates of deceased British and Native Seamen" is said to be partly due to the fact that during the year it was found necessary in fewer instances to call for and receive such Estates for credit to the Board of Trade, as most of the ships to which the deceased belong were bound for the United Kingdom, and partly owing to there being fewer cases of distressed seamen sent Home, whose wages are, in accordance with the practice in such cases, transferred from "Deposit Money" to the head "Estates of deceased British Seamen."

7. Notwithstanding the unfavourable Exchange rates, there has been an increase in the value of money orders issued by the Shipping Officer during the year compared with the previous year. This result appears to indicate increasing thrift amongst European seamen.

8. The number of distressed seamen sent Home during the year was 36 against 93 in the previous year, 61 in 1891-92, and 27 in 1890-91.

9. The Shipping Master reports that in two or three cases Serangs have been induced to accept Eurasians as lascars, without requiring them to become Muhammadans. This appears to be a new departure, and if followed up may become a matter of importance to the poorer classes of the Eurasian community.

10. Four cases of imposition on seamen were reported, but in only one case was the complaint well founded, and the crew allowed compensation. One case of ill treatment was reported, but on enquiry it was found to be groundless.

11. His Honour notices that no information is given to show the number of seamen who have been convicted by the Presidency Magistrate and what their offences were. This information will be useful, and should be given in future Reports.

12. At Chittagong the receipts amounted to Rs. 93, against Rs. 209 during the previous year, due to fewer seamen being shipped and discharged. The actual numbers were 35 shipped and 22 discharged against 86 and 111 respectively during 1892-93. There were no disbursements.

13. In consequence of the fewer discharges the receipts from Trust Funds amounted to Rs. 4,360 against Rs. 13,902 in the previous year. Of this sum Rs. 2,507 represents the balance of wages of 16 seamen discharged by mutual consent, and Rs. 471, the wages of three seamen discharged in hospital. There were no deposits by native seamen.

14. During the year the Shipping Master visited 87 vessels, as against 100 during 1892-93. These visits are paid with a view to enquire into the health of crews and inspect provision, water, medicines, and fore-castle accommodation; and it is satisfactory to observe that at these visits only two complaints were made—one regarding alleged unseaworthiness of the ship *Tinto Hall*, and the other regarding the quality of the provisions on board the *Sierro Blanco*. Both the complaints were found to be without foundation, but the papers regarding the first complaint were, under section 222 of the English Merchant Shipping Act, 1854, forwarded to the Board of Trade.

15. The admissions into hospital amounted to 30 against 37 in the previous year, of which five cases terminated fatally. Of these deaths three

were from cholera, one from aneurism, and one from an accident resulting in fracture of the skull. No case of scurvy was reported.

16. There were six desertions, five Europeans and one native during the year. Three of the Europeans were arrested, but no trace could be obtained of the others. Of those arrested one was sentenced to imprisonment, and the other two shipped.

17. It is satisfactory to observe that the number of convictions fell from 99 in 1892-93 to 32 in the current year, the diminution being marked under the heads "Drunkenness" and "Offences under the Merchant Shipping Act." This result the Commissioner of the Division considers to be due in some degree to the beneficial effect of the local Seamen's Mission, and partly to the men not being allowed so much liberty ashore, and also to fewer vessels having visited the Port.

18. At False Point the number of seamen shipped and discharged were 10 and 42 against 3 and 17, respectively, during the previous year. Of the number discharged, 3 were for sickness, and 39 by mutual consent. Thirty seven of the discharged seamen left for Calcutta in search of employment. In the review on the Report of this Port for 1892-93, the attention of the Commissioner was drawn to the large number of discharges, and he was directed to instruct the Officers exercising the powers of a Shipping Master not to grant discharges, except on good grounds, as the result is to swell the number of unemployed seamen in Calcutta. The Commissioner's attention is again invited to this matter, the number of discharges having risen from 17 to 42.

19. No transactions under the Merchant Shipping Act are reported to have taken place at Balasore and Puri.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Government of Bengal.*

**RESOLUTION ON THE REPORT FROM THE BOARD OF REVENUE  
ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS  
FOR THE YEAR 1893-94.**

FINANCIAL DEPARTMENT—ROAD AND P. W. CESS.

*Darjeeling, the 29th September 1894.*

RESOLUTION—No. 337T-F.

READ—

The Report of the Board of Revenue on the Road and Public Works Cess operations for the year 1893-94.

In all districts where the Cess Act is in force, except Backergunge, the Road and Public Works cesses were levied during the year at the maximum rates as in previous years. In Backergunge the road cess was raised from half the maximum rate to three-fourths, while the Public Works Cess was levied at the full rate. For the current year, however, the road cess has again been fixed at half the maximum rate, the principal reason assigned being the prevalence of high prices in consequence of floods. The reduction prevents the execution of many improvements in the district, and is, the Lieutenant-Governor considers, without justification. High prices affect respectable families with fixed means and landless labourers living on daily wages, but are a source of profit to the landowners and occupiers of land. Destruction of the crop by floods would be a valid reason if it were general, and if it disabled the raiyats from paying their share of the cess. But the Collector reports that the landlords are in the habit of realizing cesses from their tenants not merely at the authorised rate, but commonly at the full rate of one anna per rupee, and in some cases at rates rising to three annas. It cannot, therefore, be reasonably assumed that the district is unable to pay road cess at the maximum rate. The wants of the district and the deficiency of funds to meet them have been clearly brought to the notice of the Board, and the Lieutenant-Governor trusts that they will vote for an adequate increase of the rate for next year.

2. The following statement shows the main results of the working of the Cess Act during the last two years:—

			1892-93.		1893-94.
Current demand	...	...	Ra. 80 91,015	Rs.	82,35,859

(a) Excluding advance collections made during the year on account of future years.

3. The increase of Rs. 19,443 in the arrear demand for the year under review, as compared with the net balance of the previous year, is explained by the Board to be due to revaluations of rent-free holdings with retrospective effect, transfers of estates, correction and adjustments of accounts, and revision of assessments. The collections were affected in all districts, as in previous

years, by the 15 days' grace allowed to assesses under section 45 of the Act, and in some by bad harvests, and by failure on the part of a few large proprietors to pay within the year. The result for the province as a whole was not so satisfactory as in the preceding year, but the difference between the two years is not large.

4. In paragraphs 9 to 14 of the Report, the Board examine the percentages of current and arrear collections in the different districts as they fall short of, or exceed, 90. The standard of excellence laid down by the Lieutenant-Governor in paragraph 11 of the Resolution on the Annual Report for 1891-92 was, however, for current collections above 90 per cent., and for arrear collections above 80 per cent., and the districts would be more conveniently grouped as follows:—

- (1) Districts in which current collections are above 90 per cent. and arrear collections above 80 per cent.
- (2) Districts in which current collections are above 90 per cent. and arrear collections below 80 per cent.
- (3) Districts in which current collections are below 90 per cent. and arrear collections above 80 per cent.
- (4) Districts in which current collections are below 90 per cent. and arrear collections below 80 per cent.

The districts are accordingly re-grouped in this manner in the following paragraphs. Figures for three instead of two years have also been furnished, as they indicate better the districts which persistently show bad results. It should be remarked, however, that collections are in some districts facilitated by favourable local conditions, such as the existence of large Government estates, the smallness of the number of revenue-paying and revenue-free estates and of rent free tenures, and greater punctuality generally on the part of the zamindars.

5. The districts which satisfy the Government requirements, that is, in which the percentage of current collections rose above 90, and of arrear collections above 80, during the year, were:—

DISTRICT.	Percentage of current collections on current demand.			Percentage of arrear collections on arrear demand.		
	1893-94	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.
1	2	3	4	5	6	7
Darjeeling	99·9	99·8	99·8	100·	100	100
Bogra	91·9	94·8	94·	100·	100	100
Jalpaiguri	91·6	99·5	94·4	99·	100	100
Manbhum	92·4	59·2	64·7	99·5	99·9	99·9
Dinaipur	92·3	92·3	84·1	99·6	99·5	99·5
Malda	97·4	90·2	86·6	99·7	99·9	99·6
Hazaribagh	96·0	96·1	97·2	99·7	99·9	100
Palamau	92·4	87·3	...	99·8	99·9	
Singhbhum	98·0	99·8	100	97·1	...	
Chittagong	91·5	91·1	91·8	96·6	95·9	94·4
Mymensingh	93·1	92·0	92·5	95·6	93·4	95·6
Birbhum	95·	94·7	94·8	95·1	95·6	97·1
Rangpur	93·	93·4	92·7	94·9	96·3	95·2
Puri	97·9	97·3	96·1	93·1	91·0	69·6
Khulna	90·5	88·1	86·5	85·5	84·4	
Noakhali	90·8	97·6	89·9	84·8	99·3	91·5

In arrear collections the standard has been attained by all these districts, except Puri and Khulna, during the past three years; while in current collections Manbhum and Khulna failed to attain the standard in two years, and Dinaipur, Malda, Palamau and Noakhali in one year.

Balasore is the only district which falls into the second class: the current collections were satisfactory last year, being 95·4 per cent. of the current demand, but only 71·3 per cent. of the arrears was collected.

6. In the districts below the current collections fell short of 90, but the arrear collections rose above 80 per cent:—

DISTRICT.	Percentage of current collections on current demand.			Percentage of arrear collections on arrear demand.		
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.
1	2	3	4	5	6	7
Hooghly ... ..	70·5	68·8	69·1	83·6	80·7	78·9
Saran ... ..	70·7	70·7	66·2	82·9	82·1	75·7
Faridpur ... ..	76·	78·8	74·2	86·2	85·5	83·4

Backergunge ... ..	84·5	87·1	84·	99·6	98·8	96·5
24-Parganas ... ..	86·4	85·1	85·3	91·5	91·1	86·5
Purnea ... ..	86·4	81·1	93·4	99·1	99·1	99·
Champaran ... ..	86·6	69·6	75·7	98·6	99·3	98·4
Pabna ... ..	87·1	89·2	86·3	95·	93·8	91·1
Dacca ... ..	87·3	90·5	86·1	90·4	93·5	92·3
Bhagalpur ... ..	89·2	91·5	92·2	80·7	80·	57·4

Hooghly, Saran, Midnapore, Jessore, Cuttack and Bhagalpur are the only districts which have not invariably reached the standard for arrear collections in the three years; but in current collections all the districts show short percentages, except Cuttack, Lohardaga, Tippera, Purnea and Dacca for one year and Bhagalpur for two years. The percentages are specially low in the first six districts, and the collection work in those districts clearly demands the particular attention of the District Officers. The short collections are ascribed in Hooghly to the difficulty, as in previous years, of realizing cesses from rent free holdings; in Saran to a heavy arrear balance from 1892-93, and neglect on the part of the large number of the petty coparcenary estates to make prompt payments; in Faridpur to agricultural distress; and in Jessore partly to failure on the part of two of the principal zamindars to pay within the year. In Patna, the small percentage is attributed by the Collector to disintegration of estates and delay in effecting separation of accounts and registration, the proprietors ceasing to pay until the registration or separation of account is completed. The Lieutenant-Governor agrees with the Board that this explanation is not satisfactory. The Collector's personal attention should be given to the matter. No explanation is given for the short collections of the current demand in the remaining districts.

7. The districts in which both the current and arrear collections fell short of the standards were—

District.	Percentage of current collections on current demand.			Percentage of arrear collections on arrear demand.		
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.
1	2	3	4	5	6	7
Muzaffarpur ... ..	72·1	77·1	70·5	76·4	82·3	74·8
Gaya ... ..	75·7	80·2	74·7	53·	68·5	58·5
Bankura ... ..	78·2	80·6	79·7	48·4	53·1	51·3
Murshidabad ... ..	85·3	87·3	88·4	53·9	49·3	43·
Darbhanga ... ..	86·7	86·2	85·4	78·2	76·9	80·2
Burdwan ... ..	89·1	88·6	83·6	56·1	50·7	14·2
Shahabad ... ..	89·2	93·2	93·2	67·6	71·8	72·8

Except for one year in Muzaffarpur and Darbhanga in the case of arrear collections, and for two years in Shahabad in the case of current collections, all these districts have during the three years failed to collect up to the standards. Floods and poor harvests are the causes assigned for the bad results last year in Muzaffarpur. The short collections in Gaya are stated by the Board to be chiefly due to the discovery during the year, after a most laborious investigation, of old arrears amounting to Rs. 1,03,573 which had not been brought to account before. This is far from creditable to the officers who have had charge of the department in recent years. Energetic steps should be taken to recover, under the certificates already issued, the portions of the arrears which are not barred by limitation. The poor results in Bankura are attributed to heavy arrears due from rent-free tenures, which could not be sold during the last six months of the year for want of information as to the boundaries of the lands required for the sale proclamations. The reasons assigned for the bad collections in Murshidabad are indebtedness of a large number of the zamindars, failure to collect in time arrears due from rent-free tenures in consequence of the difficulty experienced in tracing the owners and their property, and the 15 days' grace allowed for payments. The same reasons have been given before, but with regard to the first two the district cannot be in a worse position than many others, and the 15 days' grace is the law common to all districts. The real difficulty as to the rent-free tenures exists in regard to those which have been transferred since the last valuation, as the names of present owners cannot be ascertained with a view to the issue of certificates, there being no law in force for the compulsory registration of such tenures in the Collector's office; but, as the Board remark, such cases must be few in number, and cannot affect the general result; and in some cases the transfers would be found registered in the Registration Offices. As regards the 15 days' grace, it would be easy to distinguish the amount due on the last kist, the 28th March, the payment of which cannot be enforced till the 12th April. This might be separated off, and the remainder shown as the true arrear, for the collection of which the Collector is held responsible. The success attained in collecting this sum would be the test of the efficiency of the department in the district. Darbhanga has never yet attained the prescribed standard, and the Collector explains that the majority of zamindars do not pay till their property is in imminent danger of sale for arrears. The floods also interfered with the collections during the year. The percentage for arrear collections in Burdwan, though better than in the preceding years, is yet far below the standard. The Lieutenant-Governor observes that the Commissioner considers the certificate work for the collection of the cesses to have been badly done in that district, both the Certificate and the Cess Departments being in fault. The short collections in Shahabad are ascribed partly to the non-payment of a large sum by the Dumraon Raj during the March kist, and partly to the stoppage of the practice which had prevailed of giving priority to cesses in crediting receipts. In all the above districts it is evident that there is much need of improvement in the work of cess collection, and the Lieutenant-

Governor trusts that the District Officers will not relax their efforts to secure greater success.

8. Arrears amounting to Rs. 6,380 became barred by limitation in eight districts, Patna heading the list with Rs. 2,244, followed by Hooghly with Rs. 1,538. The omission to realize was due in Patna to a mistake in the Road Cess Office, and in Hooghly partly to failure to file certificates in time. In both cases the explanation is unsatisfactory. The Legal Remembrancer's opinion, quoted by the Board in paragraph 13, with reference to the probable writing off of Rs. 20,000 imposed as fines in the course of the last revaluation of the district, interprets section 45 of the Act, and therefore applies only to arrears of cess, not to fines.

9. The following statement illustrates the working of the certificate procedure in the realization of the cesses during the last two years:—

	1893-94.	1892-93.
Certificates pending from the previous year	39,294	49,718
Filed during the year	76,034	77,794
Total for disposal	115,328	127,512
Cancelled on objection	1,409	1,118
Struck off	4,115	7,341
Fully discharged	73,158	79,728
Pending at close of year	36,646	39,325
Sales effected	1,087	1,045
Sales set aside	62	30

As compared with 1892-93, the decrease in the number of pending cases is satisfactory, but it is still nearly 50 per cent. of the number of cases instituted during the year. The largest number of certificates was filed in the districts of Burdwan (8,539), Hooghly (6,883), Darbhanga (5,786), Saran (5,156), Cuttack (4,804), Gaya (4,099), and Monghyr (3,419). The number of cases disposed of fell far short of the institutions in Gaya and Cuttack, and should have been much larger in Burdwan, Bankura and Hooghly. Birbhum, Jessore, Khulna, Puri, Chittagong, Monghyr, and all the districts of the Patna Division except Gaya, show good work.

10. Complete revaluations of the districts of Birbhum, Hooghly, Rajshahi, Saran and Malda were brought to a close during the year, and partial valuations and revaluations were completed in the districts of Bankura, Khulna, Darjeeling, Mymensingh, Faridpur, Backergunge, Tippera, Noakhali, Chittagong and Palamau. Valuation and revaluation work was also in progress in 16 districts. In one of these, Rangpur, the revaluation operations have been completed, but no completion report has been received. The only case in which revaluation has resulted in a decrease was in Faridpur, where the valuation of twelve estates was reduced. In Backergunge, where 18 estates were dealt with, their valuation rose from Rs. 28,767 to Rs. 51,272. These figures may be quoted in answer to those who object to the imposition of a full rate in this district on the ground that it is overvalued.

11. Statistics comparing the gross rental for 1893-94, as shown by the returns under the Cess Act, with the gross rental ascertained on the same basis when the road cess was first introduced, are furnished in statement VI appended to the Report. The following figures compare the gross rental at first assessment with the gross rental in 1892-93 and 1893-94:—

	Rs.
Gross rental at first assessment	13,11,68,432
Ditto in 1892-93	14,94,80,155
Ditto in 1893-94	15,11,74,604

Only seven districts show a decrease of gross rental in 1893-94 as compared with the gross rental at first assessment, the decrease being due in five cases to the transfer of portions of these districts to others, in one to extensive diluviation, and in one to a reduction in the valuation of a single large estate.

12. The names of the Deputy Collectors whose work is favourably noticed by the Board will be communicated to the Appointment Department.

13. The thanks of the Lieutenant-Governor are due to the Board for their careful administration of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

# BIHAR CADASTRAL SURVEY AND MAINTENANCE OF THE RECORD-OF-RIGHTS.

Notification No. 588T.—R., dated Darjeeling, the 29th September 1894.

WITH the sanction of the Government of India, the Lieutenant-Governor of Bengal directs the publication of the following Despatch\* from the Right Hon'ble the Secretary of State for India on the subject of the cadastral survey and record-of-rights in North Bihar.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,  
*Secretary to the Govt. of Bengal.*

No. 88 Revenue, India Office, London, the 5th July 1894.

From—Her Majesty's Secretary of State for India,

To—His Excellency the Right Hon'ble the Governor-General of India in Council.

LORD LANSDOWNE's letter, No. 8 (Revenue), dated the 26th January 1894, reported at length upon, and forwarded papers concerning, the two points reserved in my despatch of the 14th December 1893 on the subject of the cadastral survey in North Bihar.

Cadastral Survey, Behar: its cost and the maintenance of the record.

Those points were, (1) the share of the expenditure that ought to fall upon the general treasury, and (2) the scheme for maintaining the record-of-rights.

2. I have carefully considered these papers in Council, and I now communicate the following remarks and instructions. First, with reference to the share of the expenditure to be borne by the Indian Revenues. In the papers considered by Lord Cross's despatch of the 24th December 1891, it was suggested that one-eighth of the cost of the survey and record-of-rights should be borne by the general treasury, and that the remainder should be defrayed half by the landlords and half by the tenants. Lord Cross observed that in other parts of India the general revenues bore the cost of cadastral surveys, while in the adjoining permanently settled districts of the Benares Province one-half of the cost was met by the Government and one-half from a fund that had been contributed by the people; he considered that there were good reasons why the Treasury should bear a smaller share of the cost of the Bihar survey than it did of the Benares survey; but, nevertheless, he expressed himself as ready to sanction the payment of a larger share than one-eighth in the present case.

3. At paragraph 58 of Sir A. P. MacDonnell's Minute, dated the 20th September 1893, it is shown that the zamindars' rentals have risen immensely since the Permanent Settlement, while the obligations devolving on the zamindars towards their tenants have been neglected. It is urged that the general tax-payer ought not to be bound to contribute largely to the cost of operations undertaken to remedy that neglect. Sir C. Elliott, in his Minute of the 19th January, claims that the proposal for Government to accept one-eighth of the cost is fair and reasonable, as that represents about the geographical value of the survey, while the rest of the operations are useful only to the parties concerned; and he urges that the cost of meeting local wants should not be thrown upon the general public. The Government of India took the view that a contribution of one-eighth was reasonable and justifiable, and that any larger contribution might reasonably be questioned by the general tax-payer, and might form an inconvenient precedent hereafter.

4. I recognize that the decision in the present case will guide the allocation of charges in future cadastral surveys of other permanently settled tracts. But I share the opinion indicated by my predecessor on this matter in his despatch quoted above. Cadastral surveys and records-of-rights in temporarily settled provinces are made, not wholly for securing the State revenues, but partly for protecting the rights and improving the relations of landlords and tenants. In all such cases the State bears the whole cost of the operations. In the districts of Benares which adjoin North Bihar the cadastral survey

\* The extract quoted at paragraph 3 of Lord Cross's despatch from official papers of 1878 says it was decided that "a resurvey and a revision of the record-of-rights was essential to the well-being of the peasant classes in those districts, and was expedient from a political as well as from an administrative standpoint."

and record-of-rights\* was undertaken for the protection of tenants' and landlords' rights, and not for purpose of revenue, and there the State bore one-half the cost of the operations. The people of North Bihar, in common with

tax-payers of other parts of India, have borne their share of the cost of cadastral surveys elsewhere; and they have a claim to something more like corresponding treatment when the Government decides to make a cadastral survey of their province. I agree in Lord Cross's view that, in the circumstances of the North Bihar survey, the State should bear a smaller share of the cost than it did in the Benares province. But I do not think the State share ought to be less than one-quarter of the total cost of making the survey and the record-of-rights. The large rentals and profits enjoyed by the zamindars do not make the raiyats of North Bihar more able to sustain their share of the cost; and the additional one-eighth (two annas) devolving on the State under my present instructions, should be given in reduction of the raiyats' share of the expenditure. The cost of the survey will then fall one-quarter on the State, five-sixteenths on the raiyats, and seven-sixteenths on the zamindars.

5. Next, with reference to the maintenance of the record-of-rights. It has been regarded by the Home Government and by the Government of India as essential that the village record-of-rights, when once prepared by the cadastral survey, should be maintained and periodically corrected up to date. Two schemes for effecting this object were before the Government of India, namely:—

- (1) That of Sir C. Elliott for increasing the number of rural registrars, and compelling by various disabilities the landlords to file revised rent-rolls yearly and the tenants to register all changes of occupancy by inheritance or transfer;
- (2) Sir A. MacDonnell's scheme for organizing a special staff of officials, who would visit every village yearly, record all changes of occupancy and rent, and prepare revised village papers year by year. The cost of the special staff would be met by a special tax to be paid half by the landlords and half by the tenants.

6. Sir C. Elliott's scheme has not been worked out in complete detail; and no draft of the enactment that would be required to validate the operations is forwarded. The scheme does not provide for verification or ascertainment of changes of occupancy on the spot; it leaves the maintenance of the record very much to the action of the people themselves. Experience of the Bengal Land Registration Act of 1876 has shown that the landlords are very slow to register even changes in the proprietary body; and it appears to be the general opinion that raiyats will be disinclined to register transfers of tenancy, and that their unreadiness will be confirmed by the doubt about the legality of such transfers, multitudes of which, however, occur every year in North Bihar.

7. Sir A. MacDonnell's scheme was worked out by him in complete detail, and has been further considered by a conference of officers expert in land revenue affairs, assisted by two representatives of the landholders in North Bihar. The draft of a law, and of rules to be issued under that law, for maintaining the land records, have been prepared and considered by the Conference. The special staff under this scheme for the Muzaffarpur district would consist of about 120 land-recorders and supervisors assisted by the same number of chainmen; the district is to be parcelled out among the land-recorders, who would verify on the spot annually every entry regarding every raiyat and every field, and would compile fresh village papers every year, embodying the changes of tenancy that have occurred. The cost of the staff for the Muzaffarpur district is estimated at Rs. 90,000 a year, which sum would be defrayed by a special cess of  $\frac{1}{4}$  anna per rupee (about  $1\frac{1}{4}$  per cent.) on the rental, or about  $\frac{1}{4}$  anna per acre of cultivated land. It is proposed that this cess should be paid in the same way as the Road cess, and the Public Works cess—one-half by the landlords and one-half by the tenants.

8. The official members of the Conference were unanimously in favour of the scheme for the yearly correction of the village records on the spot; most of the members, from their experience of Northern India, considered that nothing short of a yearly correction of the village papers by officials who visited each village would suffice to secure the proper maintenance of the valuable rural records left by the cadastral survey. Some of the papers produced at the Conference, however, show that in the adjoining districts of Jaunpur, Mirzapur, Ballia, and Ghazipur, the yearly village papers were, up to a recent date, incorrect and untrustworthy, though in those districts, under the system in force in the North-West Provinces, there had been for half a century much stronger sub-divisional and village rural establishments than are proposed for North Bihar under the second of the schemes now under consideration.

9. There are two features common to both schemes. The first is that the patwaris, as established by Regulation XII of 1817, should be abolished and the Regulation repealed, on the ground that the patwaris have failed to perform for the villages, for the raiyats, or for the district administration, the services contemplated by the Regulation, while their dual relation to the Collector and to the zamindar interfered with their usefulness to the landlords whom they served. As at present advised, I see no objection to the proposed repeal. I approve the provision in the Bill, as submitted by the Conference, for prohibiting the continuance of the patwari cess which the zamindars used, it is said, to levy from the raiyats, though I apprehend there is reason in Mr. T. Gibbon's remark (page 6 of the Conference Proceedings), that the zamindars will still have to pay some one to do the work that patwaris used to perform for them.

The second feature, common to both schemes, is that, when any alleged change of occupancy or change of rent is disputed, either before the rural registrar or the land-recorder, the parties concerned must be referred to the Courts for settlement of their dispute, the bare facts of the dispute being recorded by either the rural registrar or the land-recorder. It is stated in the Conference papers, and in the reports from Bihar officers, that transfers of occupancies or parts of occupancies are constantly made in Bihar, and that the landlord would ordinarily challenge the validity of such transfers.

10. Lord Lansdowne's Government, in their letter now under my consideration, pronounced strongly in favour of Sir A. MacDonnell's scheme; they believed that under Sir C. Elliott's scheme there would be no real or effective maintenance of the cadastral records; they desired to see the controversy settled as soon as possible; and they asked sanction to the introduction into the Legislature of the Land Records Maintenance Bill in the shape proposed by the Conference in January last.

Sir C. Elliott, the Lieutenant-Governor of Bengal, deprecates the introduction of Sir A. MacDonnell's scheme, on the grounds that the imposition of a fresh tax for the purpose

will be distasteful to the people, that the visits and inquiries of the land-recorders will cause irritation among villagers, who have for generations been unaccustomed to the intervention of Government officials in such matters, and that the business of organizing and supervising the new staff of officials will throw a difficult and heavy burden on the district officers, who already have much to do. Sir C. Elliott urges that if the Government of India decide in favour of Sir A. MacDonnell's scheme, a trial should at the same time be given to the scheme of rural registrars. The scheme of Sir Charles Elliott can be introduced without the imposition of any special tax. He points out that the cadastral survey will shortly be again going over the tract (about 700 villages) treated by Mr. Collin's experimental survey in 1886; the result of this revision will show how far the record-of-rights made by Mr. Collin has to be altered after a period of nine years, and will throw light on the question how far yearly enquiry in each village by special officials is absolutely necessary for maintaining the usefulness of the village record-of-rights.

The Government of India were averse to even giving a trial to Sir C. Elliott's scheme; but added that, if necessary, the proposed Bill could be made to provide for carrying both schemes into execution, leaving the Government discretion to decide within what limits each should be introduced.

11. Both the schemes now before me are supported by high authority. Sir C. Elliott, Lieutenant-Governor of Bengal, possesses very special experience of land revenue and rural affairs in the North-West Provinces, in the Central Provinces, and in Mysore. It was on his recommendation that the cadastral survey and record-of-rights were recently introduced into North Bihar, though one or more of his predecessors had previously advocated the measure; and he is most anxious that the measure should be a lasting success and permanent benefit to the people of the province. He admits that Sir A. MacDonnell's scheme would be the more complete if the circumstances were those of Northern India. But in the circumstances of Bihar he deprecates the introduction of a large staff of official land-recorders into the country; he is averse to imposing a further special tax for the purpose on the people if it can possibly be avoided, and he would at any rate postpone the adoption of such measures until it becomes clear that they are inevitable.

Sir A. MacDonnell possesses special experience and knowledge of rural affairs in North Bihar; he is keenly alive to the necessity of permanently protecting the cultivating classes of the province; and his recent Minutes, written while he was acting for Sir C. Elliott as Lieutenant-Governor of Bengal, show that he is master of the history and bearings of the subject.

12. It is possible that Sir A. MacDonnell's scheme might, if completely carried out, be more successful in maintaining the village record-of-rights in North Bihar than Sir C. Elliott's. At the same time there may be doubt whether the work could be fully done without a stronger staff than has been proposed, and also whether any official staff whatever would be able, at the outset and without the co-operation of the people, to effect year by year the correction and maintenance of the record-of-rights in a complete and trustworthy manner. In the circumstances of rural Bengal there would be risk, and there would be among the people themselves much fear of evil from a scheme which let loose on a single district a staff of 240 new and mostly low paid officials.

13. I cannot conceal from myself that, as anticipated in Lord Cross's despatch of December 1891, there has been local irritation against the cadastral survey, and regarding the impost that must be made upon the people to meet the cost of the operations. Until the survey has been made and paid for, and until the people have begun to appreciate the benefits which I confidently expect will result from the preparation of a correct record of rights, the Government should, if possible, abstain from further measures that might intensify the feeling that has already arisen.

14. If it be possible, without risking the rights of the raiyats, to avoid altogether the necessity of imposing a special cess on the people for the maintenance of the record-of-rights, the advantage will be great. If the zamindars and raiyats understand their interests, and recognize the fact that the failure of the rural registrar system may entail the adoption of other and more distasteful measures, they may make that system successful. I am very unwilling to sanction the imposition of a further and a permanent cess until Sir C. Elliott's system, which relies partly on the co-operation of the people, has been tried.

15. I anticipate that the revision next year of the experimental survey and record-of-rights, effected in 1886 over 700 square miles of the Muzaffarpur district, will afford valuable information as to the extent to which changes of occupancy falsify or render useless the cadastral record after a series of years. I shall be glad to receive hereafter a report upon the results of that revision, and of the inferences which are drawn by the Local Government and your Excellency's Government from those results.

16. Meanwhile, I approve the introduction into the Legislature of a Bill for the maintenance of the record-of-rights in Bengal. It should provide for the adoption of Sir C. Elliott's scheme, with such sanctions and safeguards as may be considered expedient, but without the imposition of any fresh tax beyond a moderate fee on registrations. Provision can be made for repealing the Patwari Regulations and for realizing the initial cost of the survey, if further provision on that point is found needful. But the Bill should make no reference to the alternative scheme for the maintenance of the records, nor does the further discussion of that scheme seem to me desirable until the plans of Sir Charles Elliott have had a full trial.

## CONDITION OF PARTS OF THE DISTRICT OF FARIDPUR.

NOTIFICATION—No. 604-T.R.

*The 29th September 1894.*—The following report is published for general information:—

C. E. BUCKLAND,  
*Secy. to the Government of Bengal.*

No. 3T., dated Camp Madaripur, the 21st September 1894.

From—A. C. TUTE, Esq., Offg. Commissioner of the Dacca Division,  
 To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to submit a report on the condition of certain parts of the Faridpur district.

2. Publicity was given by a letter under the signature of the Secretary to a local public Association to the existence of a state of things which, if true, demanded some enquiry; and subscriptions were solicited from the public for the aid of what the writer of the latter described as a starving community. At the same time the character and motives of the Subdivisional Officer of Madaripur were attacked in the native press and otherwise for his alleged apathy to the sufferings of the people in his subdivision.

3. I thought it therefore advisable to go to that part of the country, so as to put Government in possession of the facts as they are, and not as they are being represented by persons whose philanthropy or some other motive has a tendency to blind them to what is the true state of affairs.

4. Before leaving Faridpur, I made some general enquiries which tended to throw light on the condition of the tract supposed to be affected by famine. When inspecting the jail, I had all the prisoners who came from those parts paraded separately; most of them were convicts of this year, and not one of them bore the least trace of having come from a people in a distressed condition.

5. The jail hospital returns next drew my attention, and I find that up to date the admissions to hospital bear a far lower ratio to the population of the jail than they have done for the last three years.

6. Admissions to hospital are notoriously more frequent from those recently admitted into jail, and a remarkable decrease in them is not a sign of a weakly condition amongst the rural population.

7. Then I found that the District Board, after much soliciting on the part of those who seem to wish to point out distress, had, against the views of the Magistrate, given a grant of Rs. 300 for weaving. This sum was thankfully received by the local famine agitators. It was either hopelessly inadequate, or else a waste of District Board money. If the return of cloth be made for the thread supplied, the waste will be slight. It is as nothing to the fact of the District Board lending its weight towards recognizing a state of distress in the district.

8. Last year we all know was a year of scarcity, yet out of the sum advanced to one gentleman, the Reverend Mathura Nath Bose, to relieve distress which was admitted to have existed, he was enabled to hand over Rs. 600 to a brother missionary to carry on operations this year.

9. These are the facts which I ascertained before starting out on my visit to the locality. I sent word previously to the gentlemen interested in the matter that I was coming, and I was not accompanied by any officer who had formed or expressed an opinion on the existence or non-existence of distress.

10. The tract alleged to be so affected is the south-western corner of the district with the station Kotalipara as its centre. I left Madaripur on the 19th instant, and at Ausgram took the police launch and steamed right down through the centre of this tract. I stopped at two large villages on the way; the people all came out to look at the launch, gave us directions how to go, as the navigation was difficult. Not a soul seemed to be aware that they were supposed to be starving, and none of them looked in bad case. They seemed to enjoy the *tamasha*, and looked as bright as people who lead a semi-amphibious life might be expected to look. I was gravely informed afterwards that here people were starving, but their natural timidity would not allow them to mention the circumstance.

11. When I reached Kotalipara, I was met with a telegram from the gentleman who wrote to the *Englishman*, saying he was sorry he could not meet me, but he had instructed his agents to render me every assistance.

12. Shortly after my arrival at the thana, a number of boats arrived with a collection of people, who informed me that they had been sent for my inspection by the delegate of the *shabha*, and that that gentleman was on his way; before his arrival I questioned these people, who all said they were beggars by profession, as they clearly were.

13. Shortly after this, the Reverend Mathura Nath Bose came. He is a gentleman who, I am told, possesses the confidence of all, and who would give me valuable information. He admitted at once that there was nothing like "the Madras famine" existing, and said that there was abundance of food in the place, but that the people mixed it would various kinds of jungle ságs, such as kochu leaves. There is not a district with which I am acquainted in which people of this class do not use jungle ság largely as an article of food to eke out the small quantity of rice they get by begging. He asked me to inspect the people who came. I did so. There were some decrepit old beggar women, some old men, and a number of children, the latter *all* in good condition. One young woman, with a *baby* of about two months old, was amongst the crowd, and she was pointed out as a fit subject for charitable relief on the ground that she had been a widow for years.

14. The whole crowd were just what one could gather on any Sunday at a Rajbari, or any other place where indiscriminate charity is given—the regular beggar class.

15. The delegate then turned up with another consignment, and he at once assumed that I had come to supplement the subscriptions of those who have been influenced by the representations of his Society, with substantial Government aid. The account of my interview with him will be interesting. I was informed that he spent about Rs. 50 a week, so I began by asking him for some particulars. I first asked him how many persons he relieved. He replied 2,000 twice a week. I then asked him if he had any register of these people. He said he had a register, but *he had not brought it*. I asked him to tell me how many names were on it. He said *about* 900. I then asked him how he arrived at the 2,000. His reply was, "they have children, &c." He was then asked whether he entered a certain name with so many dependants, to which he replied in the negative.

16. I then asked him if he ever had counted the actual number relieved. He said he had about two or three weeks ago (he has been in the place about a month). I asked him the result. He then said at the first counting there were 900, then 1,100 a week after, and lastly, on last Thursday (the 13th), 2,000. His first statement was one counting two or three weeks ago.

17. I take the liberty of doubting his statement as to the counting, as I shall show later on. I next enquired into the quantity of grain distributed. He said he gave a seer a week to each person in two instalments. I pointed out to him that a seer of rice a week hardly made the difference between life and death to people, when he changed his position, and said there were exceptional cases, and instanced a family of five girls, the eldest of whom was 14, to whom he gave two seers of rice *daily*.

18. I then suggested that he might possibly keep some accounts of his expenditure. He said at first he did, and when asked their nature, he said; "I enter so many maunds of rice purchased and distributed to so many persons." I ventured to enquire how any one interested could ascertain how the expenditure was made. He said with very charming simplicity:—"They can ask me," and there is an account sent to the papers. He then asked me, in which he was joined by the Rev. Mr. Bose, if advances could not be made by Government to eke out the subscriptions, or even to open out a system of relief work in the way of weaving, to which I replied that I had no intention whatever of making any such request to Government.

19. The delegate at this told me that his feelings were wrung at times by the sight of the distress, and made an effort at emotion by removing his spectacles, and wiping one eye with the corner of his *chuddar*.

20. By this time I had noticed that the people were sitting down in two lines at opposite sides of the road, and I asked Mr. Bose what this meant. "Oh!" he said, "you just come on the day of distributing the bi-weekly dole, and we have brought the recipients here for you to see." I asked him if the number present represented the usual weekly crowd, and he said there might be a few absentees, but not so many as to make any natural difference. I had meantime, when talking to the delegate, from a point below the middle of the line asked the District Superintendent, who was with me, to count these behind us quietly. They amounted to 180, nearly all children. So that the number present could not have amounted to 400 persons including children. This represented the bi-weekly 2,000 persons fed, and had it not been that I had had the advantage of Mr. Bose's information, I should probably have been told that I had only seen a few selected specimens from amongst a starving population.

21. The absence of any accounts, and the vague assertion of so much being spent weekly on rice distributed amongst an equally vague number of people, shows tolerably clearly what the whole business is. I saw the cup in which the dole is measured; it is about the size of a large coconut cut in half, and the distribution of its contents twice a week could no more keep a starving man alive than the exhibition of the *Shabha* system of relief could convince me of the existence of anything out of the common in the way of distress in the Faridpur district.

22. I am glad to have to report that the Subdivisional Officer of Madaripur has shown a clear-headed courage throughout the whole of this business, which is most creditable to him. He has been abused and misrepresented, not only by the press, but by people who might have been expected to have known better, and has kept his head through it all. He was found fault with for asking to see the accounts of these relief operations which, he was told, existed but were unfortunately in Faridpur, but the non-existence of which I elicited.

23. I must apologise for the length of this report, but I thought it desirable to put Government in a position to give an accurate version of what has been persistently exaggerated and misrepresented in the press and elsewhere. As long as people are credulous enough to subscribe money in answer to the appeal made in the *Englishman* and elsewhere, I presume this farce will go on. I shall, however, stop its recognition by the District Board of Faridpur or any other body entrusted with public funds in my Division.

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 29th September, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIV.	1 Burdwan Sept. 29, '94	2.58	Weather—seasonable. Harvesting of <i>aus</i> in progress; crop as reported damaged in parts by floods. Sugarcane doing well. Prospects of <i>aman</i> good.
	Kalna ...	2.38	Prices of common rice:—
	Katwa ...	3.25	Srs.
	Raniganj ...	3.14	Sadar ... .. 10½ to 16 Kalna ... .. 9 to 13 Katwa ... .. 14½ Raniganj ... .. 14½ } per rupee.
	2 Birbhum „ 29, '94	8.49	Weather—stormy with heavy rain during the last three days. Prospects of crops very good. Common rice sells from 12½ to 16½ seers per rupee. Cattle doing well.
	Rampur Hát ...	1.86	
	3 Bankura „ 29, '94	4.97	Weather—stormy. Prospects of crops continue good. Prices of coarse rice:—
	Vishnupur ...	4.94	Srs. Bankura ... .. 17½ Vishnupur ... .. 17 } per rupee.
	4 Midnapore „ 29, '94	2.16	Weather—rainy with occasional sunshine. Outlook in Contai not bright. Elsewhere the prospects of all crops very good. Fodder and water sufficient. Prices of common rice:—
	Contai ...	0.49	Srs. Sadar ... .. 14 Contai ... .. 13½ Tamluk ... .. 13 Ghatal ... .. 12 to 14 } per rupee.
	Tamluk ...	0.81	
	Ghatal ...	5.61	
5 Hooghly „ 29, '94	1.85	Weather—cloudy and rainy. Standing crops doing well. Harvesting of <i>aus</i> commenced. Prices of common rice:—	
Serampore ...	3.01	Srs. Sadar ... .. 11 Serampore ... .. 11 to 12 Jahanabad ... .. 13 } per rupee.	
Jahanabad ...	.87		
6 Howrah „ 29, '94	3.76	Weather—bright with alternate showers. Harvesting of jute and <i>aus</i> continues. Winter rice doing well. No disease among cattle. Fodder and water-supply sufficient. Prices of common rice:—	
Ulubaria ...	1.77	Srs. Howrah ... .. 10 Ulubaria ... .. 10 to 13 } per rupee.	
7 24-Parganas „ 29, '94	2.01	Weather—seasonable. Harvesting of <i>aus</i> nearly over. <i>Aman</i> and sugarcane doing well. The rain during the week has done much good to the <i>aman</i> crop. No cattle-disease reported. Fodder and water sufficient. Rice sells at—	
		Srs. c. Sadar ... .. 12 to 13 0 Barasat ... .. 10 10 Basirhat ... .. 12 to 13 5 Diamond Harbour ... .. 11 0 } per rupee.	
8 Nadia „ 29, '94	1.09	Weather—at present showery and moderately cool. Prospect of <i>aman</i> excellent. Common rice selling from 11 to 14 seers per rupee.	
Kushtia ...	0.26		
Mehorpur ...	1.04		
Chundanga ...	0.60		
Ranaghat ...	1.00		
9 Murshidabad ...	...	Report not received.	
10 Jessore „ 29, '94	0.87	Weather—cloudy and rainy. Prospect of <i>aman</i> good. Harvesting of <i>aus</i> completed. Floods have done some injury to jute and <i>aman</i> on chur lands in subdivision Bangaon, where rivers are still rising. Fodder and water sufficient. Prices of common rice:—	
Jhenida ...	4.03	Srs. c. Sadar ... .. 11 to 12 0 Jhenida ... .. 13 8 Bangaon ... .. 11 to 16 0 Magura ... .. 14 0 Narail ... .. 13 0 } per rupee.	
Bangaon ...	0.59		
Magura ...	0.33		
Narail ...	1.25		
11 Khulna „ 29, '94	2.01	Weather—showery. Harvesting of <i>aus</i> and jute nearly over. Standing crops doing well. Rice sells from 10 seers to 13 seers 11 chitaks per rupee.	
Bagerhat ...	1.64	Fodder and water sufficient.	
Satkhira ...	1.43		

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.																							
BENGAL—concd.																										
RAJBHARI DIVN.	12 Rajshahi Sept. 29, '94	6.92	Weather—seasonable, almost too wet. Prospects of all crops excellent. <i>Aus</i> , which in places came up late, requires dry weather for cutting. Water and fodder sufficient. There is no cattle-disease. Price of rice varies from 10½ to 13 seers per rupee.																							
	Nator ...	1.04																								
	Naugaon ...	2.49																								
	13 Dinajpur „ 29, '94	3.22	Weather—hot and rainy. <i>Aman</i> progressing well. <i>Bhadoi</i> harvesting nearly over. No report of cattle-disease. Supply of fodder and drinking water sufficient. Rice selling from 10 to 12 seers per rupee.																							
	14 Jalpaiguri „ 20, '94	2.16	Weather—seasonable. Transplantation of <i>haimanti</i> paddy finished, and all crops doing well. Prospects favourable. Cattle-disease severe in Mynaguri thana of the Duars. Fodder and water sufficient. Rice selling from 10 to 12 seers per rupee.																							
		2.55																								
	15 Darjeeling „ 29, '94	3.97	Weather—rainy with snatches of bright weather. <i>Bhutta</i> , <i>chota marua</i> and <i>bhadoi</i> being harvested. <i>Aghani dhan</i> , <i>kalai</i> and <i>baru marua</i> coming to maturity. <i>Phapur</i> and potatoes being planted. Prospects good. Price of coarse rice in the Hills 7 to 10 seers per rupee.																							
	16 Rangpur „ 20, '94	0.91	Weather—cloudy with occasional rain. Steeping of jute and transplantation of <i>aman</i> not yet finished. Sugarcane doing well. <i>Kalai</i> is being sown. Rainfall sufficient. Price of rice from 8 to 10½ seers per rupee.																							
		Nilphamari ...		4.00																						
		Gaibanda ...		0.68																						
Kurigram ...		1.05																								
17 Bogra „ 29, '94	0.66	Weather—seasonable. Prospects of <i>aman</i> rice good. <i>Bhadoi</i> harvest nearly finished. Prices steady (11½ seers per rupee). Fodder and water sufficient.																								
Sherpur ...	1.25																									
18 Pabna „ 29, '94	3.16	Weather—seasonable. Prospects of standing crops good throughout the district. Harvesting of <i>aus</i> nearly finished; that of jute still going on. Common rice selling at 11 seers per rupee at Sadar and 11½ seers at Sirajganj. Fodder and water-supply sufficient.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	...	58.77

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; lx, lightning reflection; Δ, dew.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 29TH OF SEPTEMBER 1894.**

THE principal feature in the meteorological changes of the previous week had been the gradual retreat of the area of minimum pressure southwards in the province, the area of lowest pressure also being accompanied by heavy rain. On the 22nd instant, or the last day of that week, the minimum pressure was reported in the north-west angle of the Bay at Saugor Island, and even on this day there was a distinct tendency for a cyclonic circulation of winds to set up round the low pressure. The gradual deepening of this low pressure area into a distinct barometric depression, and then into a small cyclonic storm, and its westerly movement across Orissa into the Central Provinces, have been the only features of importance in the meteorology of the week under review.

On the 23rd pressure had fallen slowly over the whole province, and was in defect by amounts ranging up to about 0.15" in the south and south-east of the province, and the lowest pressures were in South-West Bengal. At the head of the Bay and in South Bengal winds were distinctly cyclonic in direction, but rather light in force, and the depression was giving disturbed weather in South Bengal, though the only general rainfall which was being received was in the north of the province. On the 24th pressure had fallen in Orissa and at some of the south-western and western stations, and the barometric depression on this day was in the north-west angle of the Bay at some little distance from the Orissa coast, while it was attended by a very complete cyclonic circulation of winds. The depression on the 24th was, therefore, rather more clearly pronounced, though it was still very feeble, and it had caused rainfall to recommence over a large part of the province, and the only districts which received no rain were parts of Bihar and Chota Nagpur. On the 25th pressure had risen slowly over the whole province except at Gopalpur, and the feeble barometric depression in the north-west of the Bay remained practically unchanged in character and position, and though the cyclonic circulation of winds attending it was very complete, yet the winds were not strong. On the 26th pressure had fallen briskly in the north-west angle of the Bay, the fall at False Point equalling 0.05", and it had also fallen slowly elsewhere, except over parts of Bihar and Chota Nagpur. The depression in the north-west angle of the Bay had, therefore, distinctly intensified, but it had remained almost stationary. The perfect cyclonic circulation of winds on this day had extended over the whole province, but still the winds reported at the land stations were only light to moderate in force. On the 27th pressure had again fallen in Orissa and risen elsewhere, the increase being rapid at the eastern stations, and in addition to the depression having again intensified slowly, it had commenced to move in a westerly direction and was close to the coast of Orissa. On this day it was probably a small cyclonic storm, for the cyclonic circulation continued very perfect, and strong monsoon winds were feeding into the small storm from the east and south. During the afternoon of the 27th, the centre of the small storm passed inland, crossing the coast not very far from Puri, and moving with considerably increased rapidity in a west-north-westerly direction, and on the 28th the centre was well inland in the Central Provinces, and was midway between Sambalpur and Raipur. In its advance over Orissa it gave only moderate to rather strong winds, and the rainfall also accompanying it was much lighter than usual, and much lighter than was to be expected by the very considerable depression at its centre. It, however, brought up another advance of monsoon winds over the whole of Bengal, and good general rain was again received. From the 28th to the 29th the storm commenced to recurve, and it began to move in a north-westerly or even north-north-westerly direction at the rate of about ten miles an hour, and on the 29th the centre was between Jubbulpur and Seoni. The storm was fed mainly by the monsoon current blowing from the Bay of Bengal, and this hence was flowing rather freely over Bengal, and on the 29th again fairly general rain was received in practically all districts of the province.

*Pressure.*—Owing to the gradual formation of the small cyclonic storm in the north-west angle of the Bay and its advance through Orissa, the mean pressure for the week has been considerably below the normal, and the defect has naturally been largest in the south-western districts. The mean pressure has been in defect by from 0.05 inch at such stations as Dinajpur and Jalpaiguri to 0.126 inch at False Point, and about 0.12 inch at Cuttack and Balasore. The pressure over the whole province has been in defect by about 0.08 inch. In Assam the mean pressure has been 0.086 inch below the normal.

*Temperature.*—The mean temperature has been practically normal in South-West Bengal, while in all other divisions it has been in moderate excess, the largest variation being an excess of 1.3° in Chota Nagpur. For the whole of the province the mean temperature has shown an excess of 0.6°. In Assam the slight general excess of 0.1° has been shown in the average mean temperature for the week.

*Rainfall.*—The heaviest falls have again occurred in North Bengal, which has received three and-a-third inches. Orissa, Chota Nagpur, and South-West Bengal have all received falls between two and three inches, and in all these four divisions the falls have been in small to moderate excess. East Bengal and Bihar, on the other hand, have received falls of a little less than two inches, and these divisions have been in decided defect. In all the divisions of

the province, however, even in the two where defective falls have been registered, the number of rainy days registered during the week has been rather largely in excess of the normal.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 140 per cent., North Bengal 105 per cent., East Bengal 71 per cent., Bihar 89 per cent., Orissa 131 per cent., and Cnota Nagpur 132 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 111 per cent of the normal.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 29th of September 1894:—

METEOROLOGICAL DIVISIONS.		TEMPERATURE.							RAINFALL.								
		Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.		Since 1st of month.		Since 1st of May 1894.		
				Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

Statement of principal commodities carried on the Eastern Bengal State Railway during the month of July 1894.

INCREASES.			
Coal	Tons.	Jute	Tons.
.....	42,373	.....	1,481
The increase was chiefly in despatches to Shamnagar mills and to Bracebridge Hall.		Principally in despatches from Atrai, Nilphamari and Kissenjunge.	
Rice	2,552	Kerosine oil	1,141
The increase was chiefly in downward despatches from stations on the Northern and Bihar Sections, and was due to demand in the Eastern districts and in the Calcutta market for shipment.		Principally in despatches from Budge-Budge, and chiefly due to the extension of bulk oil traffic,	

CALCUTTA, the 27th September 1894.

J. SHAW,  
for Examiner of Accounts.

*Statement of principal commodities carried on the Bengal Central Railway during the month of July 1894.*

## INCREASE.

Seeds .. .. . 636 Tons.

The increase was chiefly in despatches from Khulna.

The increases and decreases in other commodities are due to ordinary fluctuation of traffic, and call for no special remarks.

J. SHAW.

NOTICE TO MARINERS—No. 181.

[Second Publication.]

## AUSTRALIA—HERVEY BAY.

*Fairway buoy away from position.*

THE Portmaster, Brisbane, has given notice (No. 14 of 1894) that the Fairway buoy marking the northern entrance to Hervey bay is away from its position, and is supposed to have been run down.

A small buoy has been placed to mark the position temporarily, which will be replaced as soon as practicable with a large conical buoy, painted black and carrying a staff and cylinder.

The buoy will be visible five miles in clear weather.

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 182.

[Second Publication.]

## NEW ZEALAND, SOUTH ISLAND—WESTPORT.

*Signal flagstaff moved, beacons, and alterations in night signals.*

THE British Admiralty has given notice (No. 456 of 1894) that, on 19th June 1894, the signal flagstaff at the entrance to Buller river, Westport, would be moved to a position on the western breakwater, 2,100 feet within the outer extremity.

Approximate position, lat.  $41^{\circ} 44' 20''$  S., long.  $171^{\circ} 36' 5''$  E.

A new beacon, 50 feet high, has been erected on the former site of the signal flagstaff.

Leading lights for entering the harbour are shown from two beacons, bearing when in line S. by E.  $\frac{1}{2}$  E. (S.  $17^{\circ}$  E.), and situated on the west bank of the river within the breakwater.

The front light, shown from a white beacon, is *green* when the bar is safe; and *red* when it is not safe.

The rear light, *white*, is shown from a white beacon with a red band. This beacon is 50 feet high, and has a semaphore attached, which will be used when required for the guidance of vessels entering or leaving the harbour.

The undermentioned night signals are shown from the signal flagstaff on the western breakwater, in addition to the general bar; and danger signals for all New Zealand ports:—

1. The *white* harbour light only, signifies—Wait.
2. A *green* light over the *white* light:—Bar safe for vessels of less than 9 feet draught.
3. Two *green* lights over the *white* light—Bar safe for vessels of 9 feet draught.
4. A *green* light under the *white* light:—Bar safe for vessels of 11 feet 6 inches draught.
5. A *green* light above, and a *green* light below, the *white* light:—Bar safe for vessels of 14 feet draught.

The signals to take the bar will be shown from the signal flagstaff on the west breakwater.

Masters of vessels of more than 10 feet draught are requested to signal their draught of water, when arriving off the harbour entrance after half ebb; and of 10 feet draught or less when arriving at low water.

(Variation,  $15^{\circ}$  Easterly in 1894.)

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 183.

[Second Publication.]

JAPAN—NIPON, SOUTH COAST.

*Sunken rock south-westward of Tao Saki.*

THE British Admiralty has given notice (No. 459 of 1894) that a Japanese Chart, recently published, shows a rock with a depth of  $2\frac{1}{2}$  fathoms on it, in a position with O sima observation spot bearing N. by E.  $\frac{1}{4}$  E. (N.  $13^{\circ}$  E.), distant  $1\frac{1}{10}$  miles; and Goza saki, N.W. by N. (N.  $34^{\circ}$  W.); or approximately on plan No. 994 in lat.  $34^{\circ} 12' 30''$  N., long  $136^{\circ} 8' 45''$  E.

This rock has consequently been inserted on the Admiralty charts.

(Variation,  $4^{\circ}$  Westerly in 1894.)

[Third Publication.]

BAY OF BENGAL—BURMA COAST.

*Rangoon river entrance—Spit light-vessel placed in position.*

WITH reference to Notice to Mariners, No. 81, dated 30th April last, issued by this office, the Port Officer, Rangoon, has given notice that the Spit light-vessel at the entrance to Rangoon river has been placed in position in 20 feet low-water springs on the bearings noted:—

Eastern Grove Light-house	...	...	...	N. 16° E.
Elephant Point Obelisk	...	...	...	N. 44° W.

The Eastern Grove light-house in line with the Spit light-vessel N. 16° E. leads 100, yards west of the lower eastern buoy. Therefore on the flood tide an allowance must be made to clear the buoy.

(All bearings are magnetic.)

AUSTRALIA, SOUTH COAST—SPENCER GULF.

*Germein bay—Withdrawal of light-vessel and alteration in jetty light.*

WITH reference to Notice to Mariners, No. 120, dated 18th June last, issued by this office, the British Admiralty has given further notice (No. 426 of 1894) that, on 1st August

1894, the light-vessel in Germein bay (*fixed white* light) would be withdrawn; and the light shown from the extremity of Germein jetty would be altered from *red* to *red* and *white*:—

Germein jetty light is a fixed light, showing *white* from N. 80° E. (southward of Ward spit) to N. 66° E. (northward of the dry part of Cockle spit); *red* from N. 66° E. to N. 12° E. (over Cockle spit); and *white* from N. 12° E. (eastward of Cockle spit) through north to N. 10° W.; it is visible in clear weather from a distance of 10 miles.

The light-house is an iron tower, painted red, with a white lantern.

Approximate position, jetty light, lat. 33° 2' 15" S., long. 137° 59' 30" E.

Approximate position, light-vessel, lat. 33° 3' 45" S., long. 137° 52' 15" E.

CHINA SEA—TONG KING GULF.

*Hainan strait—Flashing light in Hoi Hau bay.*

THE British Admiralty has given notice (No. 427 of 1894) that a light was exhibited from a light-house recently erected in Hoi Hau bay.

Hoi Hau light is a sixth order, dioptric, *group flashing white* and *red* light, with a total period of *forty-five* seconds; the flashes are exhibited in the following order:—*white* flash, *one and-a-half* seconds; *eclipse*, *six* seconds; *white* flash, *one and-a-half* seconds; *eclipse*, *six* seconds; *white* flash, *one and-a-half* seconds; *eclipse*, *thirteen and-a-half* seconds; *red* flash, *one and-a-half* seconds; *eclipse*, *thirteen and-a-half* seconds. It is elevated 73 feet above the sea, and visible 10 miles in clear weather.

The light-house, 22 feet high, is a cylindrical iron tower, painted white, as are the dwellings and boundary wall, and is situated 464 yards from high-water mark on the south side of the bay.

Approximate position, lat. 20° 1' 15" N., long. 110° 16' 10" E.

### Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

#### ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 5005A.

**GENERAL.**—No. 1576A.D.—*The 4th October 1894.*—Mr. E. F. Ainslie, Deputy Magistrate and Deputy Collector, Rampur Hat, Birbhum, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the 17th October 1894.

No. 1578A.D.—*The 4th October 1894.*—Mr. J. A. Claven (Jr.), substantive *pro tempore* Deputy Magistrate and Deputy Collector, Sonthal Parganas, is transferred to Birbhum, and is appointed temporarily to have charge of the Rampur Hat sub-division of that district, during the absence, on leave, of Mr. E. F. Ainslie, or until further orders.

No. 1614A.D.—*The 6th October 1894.*—Mr. G. Gordon, Officiating District and Sessions Judge, Bankura, is appointed to act, in addition to his other duties, as Additional Sessions Judge of the 24-Parganas from the 16th to the 26th October 1894. He is authorized, under section 193 of the Code of Criminal Procedure, to receive and dispose of all criminal applications and cases for the above period.

No. 1633A.D.—*The 6th October 1894.*—Mr. E. F. Growse, Officiating Magistrate and Collector, Birbhum, is allowed leave for one month, under article 291 of the Civil Service Regulations, with effect from the 7th November 1894.

*No. 1635 A.D.—The 6th October 1894.*—Mr. J. H. Temple, Officiating Magistrate and Collector, Murshidabad, is appointed to act as Magistrate and Collector of Birbhum, during the absence, on leave, of Mr. E. F. Growse, or until further orders, on being relieved of his present appointment.

*No. 1625 A.D.—The 6th October 1894.*—Mr. J. D. Cargill, Officiating Joint Magistrate and Deputy Collector, Aurangabad, Gaya, is vested with the powers of a Collector under Act I of 1894 in that sub-division.

*No. 1630 A.D.—The 6th September 1894.*—Babu Gobind Chandra Das, Deputy Magistrate and Deputy Collector, on leave, is posted to the head-quarters station of the district of Jalpaiguri.

*No. 1638 A.D.—The 6th October 1894.*—Mr. Brojendro Nath Dey, Magistrate and Collector, Khulna, on furlough, is appointed to be Magistrate and Collector of Balasore.

*No. 1640 A.D.—The 6th October 1894.*—Mr. R. Cornish, Officiating Magistrate and Collector, Bankura, is confirmed in that appointment.

*No. 1642 A.D.—The 8th October 1894.*—Maulavi Bazlul Kariem, Deputy Magistrate and Deputy Collector, Serampore, Hooghly, is vested with the powers of a Collector under Act I of 1894 in that sub-division.

*No. 1652 A.D.—The 6th October 1894.*—Mr. P. Nolan, Commissioner of the Rajshahi Division, is allowed leave for three months, under article 291 of the Civil Service Regulations, with effect from the 12th November 1894.

*No. 1665 A.D.—The 8th October 1894.*—Mr. C. E. A. W. Oldham, Assistant Magistrate and Collector, Buxar, Shahabad, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, with effect from the forenoon of the 1st October 1894.

*No. 1667 A.D.—The 8th October 1894.*—Babu Gati Krishna Neogy, Deputy Magistrate and Deputy Collector, Satkhira, Khulna, is vested with the powers of a Collector under Act I of 1894 in that sub-division.

*No. 1672 A.D.—The 8th October 1894.*—Babu Fatik Chandra Das, Officiating Deputy Magistrate and Deputy Collector and Tahsildar, Alipore, Jalpaiguri, is appointed temporarily to have charge of the Mynaguri tahsil in that district, during the absence, on leave, of Babu Kamal Chandra Datta, or until further orders.

**ERRATUM.**—*No. 1637 A.D.—The 8th October 1894.*—In the notification No. 1463 A.D., dated the 29th September 1894, published in the *Calcutta Gazette* of the 3rd October 1894, for “Babu Nabin Chandra Rai” read “Babu Nalin Chandra Rai.”

*No. 697 T.R.—The 8th October 1894.*—Babu Brij Bausi Sahai, Officiating Deputy Magistrate and Deputy Collector, is appointed to perform the functions of a Collector under section 4 of the Public Demands Recovery Act VII (B.C.) of 1880 in the district of Patna.

*No. 699 T.R.—The 8th October 1894.*—Babu Rajkishore Das, Deputy Magistrate and Deputy Collector, is appointed to perform the functions of a Collector under section 4 of the Public Demands Recovery Act VII (B.C.) of 1880 in the district of Cuttack.

**POLICE.**—*No. 1582 A.D.—The 4th October 1894.*—Mr. G. R. K. Meares, District Superintendent of Police, Purnea, is allowed leave for one month, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved by Mr. F. D. Savi.

*No. 1584 A.D.—The 4th October 1894.*—Mr. F. D. Savi, Assistant Superintendent of Police, in charge of the District Police, Dinajpur, is appointed temporarily to have charge of the District Police of Purnea, during the absence, on leave, of Mr. G. R. K. Meares, or until further orders, on being relieved of his present appointment.

**JAILS.**—*No. 1657 A.D.—The 8th October 1894.*—Mr. W. a'C. Beadon, Superintendent of the Central Jail, Dacca, is allowed leave for two months, under article 291 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 27th August 1894.

**ECCLESIASTICAL.**—*No. 1611 A.D.—The 8th October 1894.*—The Reverend J. M. Macdonald is appointed to be Chaplain of Cuttack, with effect from the 29th September 1894, or from such date as he may take over charge of his duties.

*No. 1621 A.D.—The 8th October 1894.*—The Reverend W. J. Wickins, Chaplain of St. James' Church, Calcutta, is allowed leave for six weeks, under article 656 of the Civil Service Regulations, with effect from the 15th October 1894, or from such date as he may avail himself of it.

*No. 1623 A.D.—The 8th October 1894.*—The Reverend J. L. Peach is appointed to act as Chaplain of St. James' Church, Calcutta, during the absence, on leave, of the Reverend W. J. Wickins, or until further orders.

*No. 1662 A.D.—The 8th October 1894.*—The services of the Reverend H. R. Coulthard, Officiating Chaplain of St. John's Church, Calcutta, are placed at the disposal of the Government of the Punjab, with effect from the 16th October 1894, or from the subsequent date on which he may be relieved of his present duties.

H. J. S. COTTON,  
Chief Secy. to the Govt. of Bengal.

## REVENUE DEPARTMENT.—(OPIUM).

## NOTIFICATION—No. 643T.R.

*The 5th October 1894.*—With reference to, and in supersession of, Government Resolution No. 73T.R., dated the 18th May 1894, published in the *Calcutta Gazette* of the 23rd idem, it is hereby declared that a Competitive Examination for three appointments in the Opium Department will be held in February 1895. At this examination only such European and Eurasian candidates as have been nominated by the Lieutenant-Governors of Bengal and the North-Western Provinces, and the Opium Agents of Bihar and Benares, each of whom is authorised to make one nomination for each vacancy, subject to ultimate nomination by the Lieutenant-Governor of Bengal, will be permitted to present themselves.

It must be clearly understood by intending competitors that those who may be declared successful will not be entitled to obtain permanent appointments in the fourth grade of Assistant Sub-Deputy Opium Agents, until a permanent vacancy occurs in that grade, nor until they have complied with the conditions of Rule (12), but it is the intention of Government to appoint them at once to duty in the department.

2. A certificate of health and physical fitness, signed by a covenanted medical officer in the form given in the margin, will be required from each candidate, who should also furnish a copy of his baptismal certificate, in the absence of which sufficient evidence as to age should be forwarded with the application for admission to the examination. No one whose age on the date of examination exceeds 22 years, or who is under 19 years, will be permitted to appear.

I do hereby certify that I have examined Mr. \_\_\_\_\_ a candidate for employment in the Opium Department, and that he has no disease, affection, or bodily infirmity, and is in my opinion possessed of a robust constitution, well fitted for the performance of the duties appertaining to such an appointment. His age is, according to his own statement, \_\_\_\_\_ years, and by appearance about \_\_\_\_\_ years.

The

189 .

Signature.  
Description.

3. A certificate that the candidate is able to ride and is of active habits, signed by a District Magistrate, or by a Presidency Magistrate or the Commissioner of Police, in the case of applicants residing in Presidency towns, should

also be submitted.

4. Applications, accompanied by the necessary certificates, must be sent to the Under-Secretary to the Government of Bengal, in the Revenue Department, on or before the 1st January 1895. Such applicants as are granted nominations will receive an intimation to that effect, and be required to pay a fee of Rs. 20 before they can appear at the examination. The fee is payable to the Under-Secretary aforesaid.

5. The examination will be held in Calcutta: the date and place of the examination and the order in which the different subjects will be taken up will be notified hereafter to such candidates as are allowed to present themselves at the competition.

6. The examination will be by written questions and answers and *viva voce*.

The subjects of examination and the number of marks to be allotted will be as follows:—

## I. Preliminary—

	Marks.
(1) Dictation ... ..	100
(2) English composition ( <i>i.e.</i> , essay or precis writing) ...	100
(3) Arithmetic (the whole) ... ..	100

## II. Obligatory—

(4) Algebra (up to and including Quadratic Equations) and Plane Trigonometry (including solutions of triangles and mensuration) ... ..	100
(5) Euclid, Books I, II, III, IV and VI ... ..	100
* (6) English History ... ..	100
* (7) Indian History ... ..	100
(8) English Literature ... ..	100
(9) Hindustani ( <i>Urdu</i> )—Translation of easy passages from English into Urdu; reading at sight from a book such as the <i>Bagh-o-Bahar</i> , conversation. <i>Hindi</i> —Translation of some piece into Hindi character; reading at sight from a printed book, such as the <i>Baital Pachisi</i> ) ... ..	150

## III. Optional—

(10) Latin (200) and French (150) ... ..	350
or,	
(11) Botany (150) and Chemistry (150) ... ..	300

No text-books are prescribed for the different subjects, except for the subjects included in No. (11)—Botany and Chemistry. The text-books for these subjects are—

- (a) Oliver's First Book of Indian Botany.  
(b) Inorganic Chemistry, Theoretical and Practical, by W. Jago.

7. No books of any kind will be allowed at the time of Examination.

Questions on these subjects may also include questions relating to the Geography of these countries.

8. Candidates who fail to obtain half the marks in each and all of the three subjects of the preliminary examination shall not be allowed to proceed further with the examination in the remaining subjects. The examination in the obligatory and optional subjects will not be held until the papers of the preliminary examination have been examined and marked, for which an interval of a day or two will ordinarily be allowed to the Examiners, and a list of the candidates successful in the preliminary examination will be published forthwith at the place of the examination.

9. In the obligatory subjects, each candidate must obtain at least one-third of the marks allotted to each paper to be considered to have passed in that paper, and half of the marks in the aggregate.

10. The candidates will only be allowed to take up either, but not both, of the groups of the optional subjects, and the marks obtained will count towards the aggregate total.

The candidates must state in their applications which of the groups they will take up.

11. The three candidates will be placed in order of precedence according to the aggregate number of marks obtained by them, and appointments will be made accordingly.

12. Candidates appointed to the Opium Department after examination will be considered as probationers for the first two years of their service. The confirmation of a candidate in the Department will depend on his passing the Departmental Examinations, and on the periodical reports submitted by the Opium Agents showing the industry and intelligence with which he discharges his duties, and his aptitude for service in the Department as displayed during the period of probation. He will be liable to be removed if he fails to pass all examinations within this period, or if his conduct is unsatisfactory, and he is reported to be unfit for confirmation.

13. The native of India next to be admitted to the Opium Department will be appointed after the three successful candidates at this examination.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

#### NOTIFICATION—No. 682T.R.

*The 6th October 1894.*—Babu Jagadis Chandra Roy, Assistant Sub-Deputy Opium Agent, is granted privilege leave for one month and nine days, under article 291 of the Civil Service Regulations, with effect from the 16th October 1894, or any subsequent date on which he may avail himself of it.

Chief Secy. to the Govt. of Bengal.

## PUBLIC WORKS DEPARTMENT,—BENGAL.

## IRRIGATION.

*The 3rd October 1894.*

*No. 304.—Notification.*—Whereas it appears to the Lieutenant-Governor of Bengal that the Doodhia Nalla commencing in mauza Bogra, pargana Lahakhund, and falling into the Gobree Nalla in mauza Sekunderpur, pargana Tekone, in the district of Outtack, should be maintained as a natural drainage channel, it is hereby notified that from the date of publication of this notice the formation of any bunds or other obstructions to free passage of drainage water within the whole length of the channel now declared as a drainage course will not be permitted, and that the existing cross bunds erected at different points noted below by the parties named across the channel must be removed within four months of the date of this Notification.

In the Doodhia Nalla (1) Mauza Bogra, pargana Lahakhund, belonging to Bhujni Setty, (2) Mauza Sekunderpur, pargana Tekone, belonging to Babu Baloram Bhrammerbar.

*Statement of cross bunds in Doodhia Nalla.*

Number of cross bund in Doodhia Nalla.	LOCALITY OF BUND.		Construction of bund.	Owner of bund.	Purpose for which constructed.	Approximate area irrigated by each bund.	Can be irrigated from which distributary.	Present state of the bund.	REMARKS.
	Mauza.	Pargana.							
1	2	3	4	5	6	7	8	9	10
1	Anandnagar samil Bogra.	Lahakhund	Bhujni Setty and Budhy Setty.	Bhujni Setty	Fishing	Nil	No. 15, Main distributary.	Wants repair	Budhy Setty has no share now in the fishing.
2	Shaghoria samil Sekunderpur.	Tekone	Bonai Barie and other villagers.	Babu Baloram Bhrammerbar	Pathway	Nil	Ditto	Ditto	This bund was constructed more for a pathway than for any thing else. These are the only two bunds now existing. A third bund, No. 23, as shown on plan, is not existing.

This declaration is made, under the provisions of section 40 of the Bengal Irrigation Act III of 1876, to all whom it may concern.

ESTABLISHMENT.

*The 4th October 1894.*

*Notification No. 305.*—With reference to the Government of India, Public Works Department Notification No. 366, dated the 27th September 1894, Babu Saroda Sunder Pal, Assistant Engineer, is posted to the Sone Circle.

C. W. ODLING,  
Secy. to the Govt of Bengal.

ESTABLISHMENT.

*The 5th October 1894.*

*No. 506.—Notification.*—Rai Madhab Chander Ray Bahadur, Executive Engineer, first grade, is, with the permission of the Government of India, permitted to retire from the service of Government from such date as he may be relieved of his charge of the Chota Nagpur Division.

*No. 507.—Notification.*—Mr. J. H. Toogood, Executive Engineer, first grade, and Officiating Under-Secretary, Roads and Buildings Branch, is transferred, in the interests of Government, to the Western Circle, and appointed Executive Engineer of the Chota Nagpur Division.

F. J. JOHNSTONE,  
Secy. to the Govt. of Bengal.

## GOVERNMENT OF BENGAL,—MARINE DEPARTMENT.

*The 5th October 1894.*

*No. 96 Marine.*—Under the powers conferred upon him by section 6, sub-section (1) of the Indian Ports Act, 1889, as amended by Act VI of 1891, and in supersession of the existing rules for the Port of Calcutta made under section 7 of Act XII of 1875, the Lieutenant-Governor has been pleased to make the following revised rules.

C. W. ODLING,

*Secy. to the Govt. of Bengal.*

1. In these Rules the word "Commissioners" shall be understood to mean "The Commissioners of the Port of Calcutta" as constituted by Act III (B.O.) of 1890.  
Definition of "Commissioners."
2. In these Rules the words "Howrah Bridge" shall be understood to mean the bridge constructed and maintained under the provisions of Act IX (B.O.) of 1871.  
Definition of "Howrah Bridge."
3. In these Rules the word "daybreak" shall be held to mean half an hour before sunrise, and the word "dark" to mean half an hour after sunset.  
Definition of "daybreak" and "dark."
4. No vessel of the burthen of 200 tons or upwards coming into the Port shall proceed above the house of the Superintendent of the Government Botanical Gardens (hereinafter called Garden House), or move from one place to another within the Port above Garden House between dark and day-break, without the special permission of the Commissioners, provided that a vessel which has arrived above Garden House before dark, may at once proceed to a safe anchorage at any part of the Port between Tolly's Nala and Prinsep's Ghat.  
Vessels not to move at night.
5. Steam-tugs having no vessel in tow shall be permitted to enter the Port after dark at their own risk, but they shall not proceed above Chandpal Ghat. Steam-tugs shall be held liable for any damage which they may cause by moving at night.  
Exception in favour of steam-tugs.
- \*6. No vessel of the burthen of 200 tons or upwards shall steam, sail, or be towed up on the flood, or down on the ebb, within the Port, above Garden House, without the special permission of the Commissioners; and in cases where such permission is granted, the Officers in charge shall be held strictly responsible for accidents which may occur in consequence of their taking the vessels up or down at a greater speed than is absolutely necessary in order to keep them under command; and in every case where such permission is granted the speed of the vessels shall not exceed four miles an hour through the water. A vessel arriving off Garden House on the last quarter of the flood, and bound for the Kidderpore Docks, will be allowed to steam up until opposite the entrance of the Docks.  
Vessels not to move up on the flood or down on the ebb.
7. No vessel shall steam, sail, or be towed up on the ebb or down on the flood, within the Port above Garden House, at a speed greater than four miles an hour over the ground.  
Speed of vessels restricted.
8. Vessels may at all times drop up or down the Port above Garden House with their anchors on the ground. Vessels using their own steam-power when dropping with the tide shall in no case proceed at a greater speed than is absolutely necessary in order to keep them under command.  
Vessels dropping up or down.
9. All vessels anchored or moored in the stream within the Port shall exhibit, between dark and daybreak, where it can best be seen, but at a height not exceeding 20 feet above the hull of the vessel, a white light in a globular lantern of eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light visible all round the horizon and at a distance of at least one mile. Vessels under weigh at night shall show the lights prescribed by the Board of Trade's Regulations, with the exception of cargo boats, bhurs, budgerows, up-country and passenger row boats, which shall carry such lights as shall from time to time be prescribed at the time of licensing.  
Vessels anchored or under weigh in the Port to show lights between dark and daybreak.
10. A free channel of not less than 200 yards in width shall be kept for vessels moving up or down the river in the Port, and also free passages to piers, jetties, landing-places, wharves, quays, docks and moorings; and all vessels shall move when ordered to clear such channel or passages.  
Free channel of 200 yards to be kept.
11. The river between the lower buoy of the College Sand and Metteabrooj Ghât shall be kept clear for turning inward or outward bound vessels, and no vessels shall anchor within these limits. Between the College Sand and Tolly's Nala vessels cannot anchor without infringing the preceding rule. All vessels intending to anchor in Garden Reach, shall be moored below Metteabrooj Ghat moorings, in a clear swinging berth, as close to the south bank as the length and draught of

\* With reference to Port Rule No. 6, the following instruction for the guidance of Assistant Harbour Masters is published for general information:—

"Assistant Harbour Masters are forbidden, without a special order from the Harbour Master's Office, to turn outward bound vessels until they are below the Lower College Sand Buoy."

the vessels will admit. Inward bound vessels proceeding above Metteabrooj Ghat shall moor in the stream between Prinsep's Ghat and Tolly's Nala, leaving the clear channel of 200 yards described by the preceding rule.

12. Vessels entering the Port at neap tides during the freshets are permitted to proceed above Garden House at slack-water at a speed not exceeding four miles an hour over the ground.

Vessels entering the Port at neap tides.

13. River steamers and tug steamers having no vessels in tow are permitted to move up on the flood or down on the ebb at their own risk, and at a speed sufficient to keep them under command; but in no case shall the speed within the Port above Garden House exceed four miles an hour through the water.

River steamers and tug steamers exempted.

14. No steam vessel shall proceed at a greater rate of speed than four miles an hour through the water when inside the moorings, and no such steam vessel shall proceed at a greater rate of speed than four miles an hour through the water anywhere within the Port above Garden House after dark. Without the special permission of the Commissioners, no steamers carrying passengers shall be under weigh after dark between the limits of the landing-stages at Hastings on the south and Aheereetollah on the north.

Speed of steamers inside moorings.

15. Special permission may be given by the Commissioners to ferry steamers to move in the Port, otherwise than is prescribed in these rules, due limitation being laid down as to place and hours of plying and speed in each case.

Ferry steamers may be exempted.

16. Inland steamers and flats lying above the Howrah Bridge shall not haul out of moorings during the freshets on the last quarter of the ebb.

Inland vessels moved above Bridge.

17. All vessels within the Port shall take up such berths as may be appointed for them by the Commissioners or the Harbour Master and shall move from one berth to another when ordered to do so; but this Rule shall not apply to vessels when moving within the Port between Budge Budge and Garden House in charge of a Pilot.

Moorings not to be used without Commissioners' permission.

19. All applications to be hauled into or cast off from the moorings, or for any other assistance, shall be made, either personally or by letter, to the Harbour Master. Applications will, as far as possible, be complied with in order according to date of receipt.

Applications for Assistant Harbour Masters to be made to the Harbour Master.

Vessels not to move without Harbour Master's permission.

20. After a vessel is moored, she shall not be moved without the permission of the Harbour Master.

21. All vessels lying at swinging moorings how to be fastened.

Vessels in the stream to keep a clear hawse.

22. All vessels moored in the stream shall keep a clear hawse. 23. Vessels lying in the stream, or at the moorings, shall at all times have at least one anchor at the bow, with a cable bent and ranged ready to let go. In cases where the vessel has no spare hawse pipe, the towing hawser is to be bent on over all in lieu of the chain cable.

Vessels to have an anchor at the bow.

Lying at single anchor prohibited.

24. No vessels shall lie at single anchor in the Port unless a Pilot or Assistant Harbour Master is on board. 25. All vessels placed in the moorings on the ebb tide shall, during spring tides, when bores are expected, have their best hawsers passed from each quarter pipe abaft the main mast, and made fast to the stern moorings, if possible; otherwise to their own chains close to the moorings and hove taut with sufficient strain to relieve the jerk on the chains and bits when the bore comes up.

Stern fastenings in time of bores.

26. Steam vessels occupying moorings shall not turn their screws or paddles without giving sufficient warning of their intention to do so to boats in the vicinity; they shall not put full power on when trying their engines in the moorings, nor shall any trial under steam be permitted so long as a vessel is lying at the Jetties.

Steamers occupying moorings not to move screws or paddles except under limitation.

27. No vessel within the Port above Garden House shall have any anchor or spar, or other substance likely to cause damage, projecting from her side.

Vessels to remove projections from sides.

28. All vessels on arrival in the Port shall rig in their jib and driver booms, and shall keep them so rigged in, until the Pilot takes charge of the vessel for the purpose of taking her to sea. They shall also strike their yards and masts when ordered by the Commissioners. Vessels proceeding to the Jetties shall, when so required by the Assistant Harbour Master in charge, remove all boats and other projections likely to damage the jetties and cranes.

Vessels arriving in the Port to rig in the jib and driver booms.

29. From the 1st day of May until the 30th day of June, and from the 1st day of October to the 15th day of November, all sailing vessels in Port shall have their royal and top-gallant yards on deck, and mast ropes rove in readiness to send the top-gallant masts down at short notice if required. Vessels about to leave the Port may send their top-gallant

Rules for regulating striking off yards and masts.

yards aloft 48 hours before leaving the moorings. Vessels entering the Port between the above dates, having top-gallant masts and yards aloft, may be placed in moorings, and the top-gallant yards of such vessels shall be sent down within 24 hours after they are moored.

30. On the occurrence of signs of an approaching cyclone, a black drum will be hoisted during daylight from the flagstaff on the roof of the Commissioners' office, Koila Ghat, another from the flagstaff opposite the Government Dockyard, Kidderpore, and another at the Petroleum Wharf at Budge Budge. During the night, under similar circumstances, two bright lights in a vertical line will be exhibited from the same flagstaffs. When these signals are displayed, masters of vessels shall immediately take every precaution in their power to make their vessels snug and secure, by having awnings furled, and the lower and top-sail yards counter-braced or pointed to the wind as seems best. The cables shall be bent to both bower anchors when possible.

31. Vessels arriving in Port with coal or other cargo likely to cause nuisance shall not moor above Garden Reach moorings without the permission of the Commissioners.

32. Vessels referred to in Rule 31 shall discharge their cargo from whichever side the Harbour Master may direct, and shall adopt such measures as he may order for the abatement of the nuisance arising from the discharge.

33. With the exceptions hereinafter noted, no vessel of or exceeding 200 tons burthen shall, without the special sanction of the Commissioners, move up or down the Port through the ship opening of the Howrah Bridge, except such vessel is propelled or towed by steam against the tide, and then only at such rate of speed, not exceeding four miles an hour over the ground, as is absolutely necessary to keep good steerage way. No river steamer shall pass through the opening with more than two vessels in tow.

*Exceptions.*—Tug and river steamers, when not towing or propelling other vessels, may drop through the Bridge opening, under steam, head to tide.

River flats may be dropped or warped at slack-water through the ship opening or through the 60 feet openings.

Vessels not to pass each other in the opening.

34. No steam vessel shall attempt to pass any other vessel proceeding in the same direction whilst between the pontoons of the Howrah Bridge.

Not more than two cargo boats to be towed through the opening.

35. No steam vessel shall have in tow more than two cargo boats when proceeding through the bridge opening with the tide.

36. No inland steam-vessel, the beam of which exceeds 30 feet or when towing flats or boats abreast, her beam added to that of the tow exceeds 30 feet, shall, when moving up or down the Port, proceed through the 60 feet openings of the Howrah Bridge, unless such vessel is propelled or towed by steam against the tide.

Vessels going through Bridge to sound whistle.

37. No steam-vessel shall pass through the bridge opening without first sounding its whistle.

38. All vessels about to leave the Port shall hoist the Blue Peter at the fore at 6 A.M., on the day previous to that on which they leave the moorings, and shall keep it hoisted until the Pilot takes charge of the vessel, to take her to sea.

Signal of departure to be hoisted.

39. No person shall smoke or use naked lights of any description in the hold or between-decks, or in any enclosed space on the upper deck in which stores, cargo or inflammable materials are stored of any vessel within the Port or in any dock belonging to the Commissioners within the Port.

40. Fires shall be permitted only in galleys or fireplaces regularly constructed for the purpose; such fires to be kept alight only between daybreak and 9 P.M. Cooking fires shall not be allowed on board of vessels in dry dock.

41. With a view to the extinction of fires, all vessels in Port shall be provided with three buckets for every hundred tons of registered measurement up to 600 tons, and two additional buckets for every 100 tons above 600; provided that the total number of buckets shall not be required to exceed 50 in any vessel. One-half of the number of such buckets shall be left constantly hanging up on the quarter-deck or other convenient place.

\*42. When fire has broken out in any vessel, the Officers in charge of all vessels in neighbouring moorings or anchorage shall furl their awnings, get their force pumps ready for use, and prepare for slipping their cables and chains, seeing specially that the pins of the shackles can be immediately knocked out.

43. All vessels in Port shall adopt sufficient precautions and guards to prevent injury to persons or goods through the discharge of steam from any part of the vessel.

Carolews discharge from steam pipes prohibited.

\* For the better security of vessels against damage or loss by fire, a steam floating fire-engine has been provided and is always kept under steam, ready to proceed at once to any place where her services may be required. The fire-engine station is at Port Point, where the vessel is moored, and where a look-out is kept day and night. In case fire breaks out on board a vessel, notice should at once be sent to the fire-engine station.

44. When cargo is being loaded into, or unloaded from, any ship through any hatchway, Hatch covers and cross-pieces to be removed or slung. every hatch, fore and after, and cross-piece shall be either removed from it or slung separately by a lanyard of sufficient strength to prevent its falling into the hold.

45. Masters of vessels requiring work to be performed, in bigles, boilers, and double bottoms shall take precautions to ensure that working in such places is free from all danger before the men are sent into them. Precautions to be taken when working in bigles, &c.

46. No boats are to go alongside of any vessel for the purpose of embarking or disembarking passengers until the vessel is reported to be moored and the engines finished with. The Port Police will satisfy themselves that such is the case before the boats are allowed alongside. Boats going alongside of vessels for embarking or disembarking passengers.

This Rule is not to apply to a boat carrying the Agent or other person having business with the vessel.

47. No Master or Officer for the time being in charge of or doing duty on board any vessel shall, on and from the 1st day of April to the 31st day of October inclusive, employ, or cause to be employed, any European seaman or apprentice in cleaning or painting between the hours of 9 A.M. and 4 P.M., necessitating the direct exposure of such seaman or apprentice to the rays of the sun. Employment of seamen during certain hours in the hot season prohibited.

48. No vessel of more than ten tons burthen shall without such license as hereinafter is mentioned be afloat within the Port without having on board thereof a crew of not less than the number set forth in the first schedule hereto. A sufficient crew to be maintained on board vessels lying in Port.

49. Whenever it shall appear to the Commissioners that any vessel may, without danger to other vessels, be afloat without such crew as is set forth in the first schedule hereto being maintained thereon, it shall be lawful to the Commissioners, if they shall think fit, to grant under their hand a license in the Form A in the second schedule hereto, which license may be made determinable on the breach of any conditions therein contained; and during the continuance of such license the provisions of Rule 48 shall not apply to such vessel. Power to grant exemption from maintaining crew on board particular vessels.

50. It shall be lawful for the Commissioners by any writing under their hand, in the Form B in the second schedule hereto, to revoke such license; and from and after the publication of such revocation, by posting a copy thereof upon some conspicuous part of such vessel, the provisions of Rule 48 shall apply to such vessel as if no such license had ever been granted. Power to revoke exemption.

51. Whenever it shall appear to the Commissioners that any creek, river, or dock is so situated that vessels without any crew thereon, may remain afloat in such creek, river, or dock, without danger to any vessels in any part of the Port, it shall be lawful for the Commissioners to make an order in the Form C in the second schedule hereto, and from time to time, if they shall think fit, to revoke or amend such order. Provided always that every such order, amendment, and revocation shall be published in the *Calcutta Gazette*, and that no such order, amendment, and revocation shall have any force or effect until it shall have been so published. Power to make order with respect to portions of Port.

52. During such time as any such order shall remain in force, the provisions of Rule 48 shall not apply to any vessel lying or being within the limits of any such creek, river, or dock, as the same shall be defined by such order. During continuance of order, vessels to be exempt from necessity of maintaining crews.

53. On the occurrence of a case of cholera, small-pox or other dangerously communicable disease on board any vessel lying in the Port, the Master shall, as early as possible, send the affected person to hospital, and shall cause the flag R to be hoisted at the fore as a signal to the Health Officer of the Port, and such signal shall not be lowered until such Health Officer has visited the vessel. Outbreak of sickness.

54. The Master shall afford such information in regard to the occurrence of the disease as the Health Officer may require, and shall carry out such responsible instructions regarding the cleaning and disinfection of the vessel, and the disposal of polluted clothing, bedding, &c., as that Officer may consider it necessary to give.

55. If, by reason of the prevalence of any dangerously communicable disease on board any vessel, the Health Officer and one other Medical Officer in the service of the Government at Calcutta jointly consider it absolutely necessary for the safety of the crews of other vessels that such vessel should be segregated, the Health Officer shall furnish the Master with a certificate to that effect. The Master shall on receipt of such certificate, forthwith give notice accordingly to the Harbour Master, and the vessel shall be removed to Metiabrooj, or such other place as the Commissioners may direct.

56. On the occurrence of a death on board, the Master shall without delay, inform the Port Police, whose permission shall be obtained before the corpse is removed.

#### *Rules for licensing and regulating cargo boats and flats.*

57. No cargo boat or flat of any description shall ply for hire within the Port unless licensed and registered by the Commissioners. No licensed and registered cargo boat or flat shall be allowed to ply within the Port except under the direction of a manjhi, serang or officer

licensed and registered by the Commissioners. The registration of cargo boats or flats which do not ply for hire is optional.

58. Every application for the licensing and registration of cargo boats or flats shall be made in writing to the Commissioners, and shall contain particulars of the Owner's name and residence, and the tonnage of the boat or flat; and in the event of the Owner not residing in Calcutta, the name and address of the Agent duly authorized to act for him.

59. Every license granted under these Rules shall continue in force for one year from the date on which such license was issued, unless it shall have been revoked under the provisions of these Rules. The license is not transferable, and if the ownership of the boat or flat be changed, notice of the transfer must be given to the Commissioners before it again plies in the Port.

60. No license shall be granted to any cargo boat or flat until such boat or flat has been surveyed by the Boat Surveyor of the Commissioners, and he shall have granted a certificate stating—

- (a) that the boat or flat is in good order and suited for the conveyance of cargo within the Port;
- (b) the tonnage of such boat or flat, that is the quantity of cargo she is authorized to carry as ascertained by the following Rules;
- (c) the number of crew required for the safe navigation of such boat or flat according to the annexed scale; and
- (d) the lights to be exhibited between dark and daybreak.

*Rules for ascertaining tonnage of boats and flats.*

*Length*—Measure the length from the inside stem to inside stern post.

*Breadth*.—Measure the breadth from side to side inside ceiling plank, under the deck beams amidships.

*Depth*.—Measure the depth from underside of deck beam amidships to upperside or floor ceiling plank.

Then multiply the length, breadth, and depth together, and the product—

by .009 for flush-decked, square-built, and open cargo boats and flats;

by .007 for bazar boats;

by .0064 for open country boats, such as panaways, bhurs, dinghees, and bhowleahs;

by .0083 for open country boats known as hollahs;

by .0068 for open country boats known as dhotes.

The result will be the tonnage of the boat or flat.

The foregoing formula shall be used in measuring boats and flats of class I up to a burden of 50 tons, but the measurement of boats or flats of that class exceeding 50 tons shall be made under the Rules of the Merchant Shipping Act, provided that the Boat Surveyor of the Commissioners shall be authorized to measure boats of class I of any size under the Rules of the Merchant Shipping Act, when the Owners show that the measurements made according to the above formula are inaccurate or oppressive.

Having ascertained the tonnage of a boat or flat, that is, the quantity of cargo she is authorized to carry in accordance with the foregoing Rules, the Boat Surveyor of the Commissioners shall, by a conspicuous mark on the boat's or flat's side, indicate for every boat or flat exceeding 10 tons the depth to which she will be immersed when carrying the quantity of cargo for which she is licensed.

**NUMBER OF CREW TO BE CARRIED BY CARGO BOATS AND FLATS.**

**CLASS I.—Square-built, open or decked cargo boats.**

Boats of not more than	15 tons,	5 men, including manjée.
Above 15 and not above	20 "	6 "
" 20 "	30 "	7 "
" 30 "	35 "	8 "
" 35 "	40 "	9 "
" Above 40 "	10 "	"

Flats, half the above number.

**CLASS II.—Dinghi-built bhurs and open country boats.**

For boats not exceeding	20 tons,	4 men, including manjée
" "	30 "	5 "
" "	40 "	6 "
" above	40 }	7 "
but not exceeding	50 }	"

61. The number of every licensed boat or flat shall be branded by the Boat Surveyor of the Commissioners on the boat or flat and shall also be painted in figures not less than six inches long on both sides of the boat or flat.

62. The Owner or his Agent, or the manjhi, serang or officer in charge of any licensed boat or flat shall not permit any quantity of cargo, more than that for which such boat or flat has been licensed, to be carried in such boat or flat at one time, and shall not permit such boat or flat to ply unless provided with the number of crew stated in the license. The boat or flat must be kept thoroughly clean, and shall always bear the numbers branded and painted on it under the provisions of the previous Rule and be provided with a pump, lights, ground tackle, and fittings in working order as specified in the license.

63. The license granted for any cargo boat or flat may be revoked whenever such boat or flat is, in the opinion of the Commissioners, unfitted for the conveyance of cargo, or when any breach of the conditions of the license or the Port Rules has been committed by the Owner or his Agent, or the manjhi, serang or officer in charge of the boat or flat.

64. No cargo boat or flat shall lie at the Inland Vessels Wharves, unless when receiving or discharging cargo, and all cargo boats or flats shall cast off from the mooring posts and move from one place to another when required by an Officer duly authorized by the Commissioners.

65. No cargo boat or flat shall obstruct the free navigation of the Port, or the approaches to wharves, jetties, or landing-stages, and no cargo boat or flat shall be moored, or land, or ship goods at any bathing ghât.

66. Cargo boats or flats when under weigh within the Port shall be under oars or sail or in tow of a steamer to enable them to keep clear of moving steamers or ships.

67. Cargo boats or flats moving up or down in Port when proceeding to or from vessels occupying fixed moorings shall keep as close as possible to the line of fixed moorings. Other cargo boats or flats moving up or down shall keep to the west of the line of swinging moorings.

68. Not more than three cargo boats or flats shall make fast to one mooring buoy at the same time, and any cargo boat or flat which has made fast to a mooring buoy shall cast off when required by an Officer duly authorized by the Commissioners.

69. Every cargo boat or flat shall be provided with an iron caboose or fireplace, to be kept on deck or in such other part of the boat or flat as the Boat Surveyor of the Commissioners may direct, and no fire shall be permitted in any other part of the boat or flat.

70. The Commissioners may, if they think fit, at any time order any licensed cargo boat or flat to be re-surveyed without any charge to the Owners, and they may also revoke at any time any license granted to any Owner or manjhi, serang or officer and it shall be competent to the Commissioners to refuse any application for the issue of a license.

71. Whenever any accident shall occur to a licensed cargo boat or flat, the manjhi, serang or officer in charge, or the Owner of the boat or flat shall at once proceed to the nearest Port Police-station and report the circumstances connected with the accident to the Officer in charge.

72. The Owner or Agent or manjhi of a licensed cargo boat shall not, without good reason, refuse to carry cargo in such boat.

73. Every licensed cargo boat or flat when plying shall have its license on board, and it shall be produced when required.

74. Every registered manjhi, serang or officer shall be provided with a metal license ticket, upon which shall be legibly painted the number of his license, and every such manjhi, serang or officer when in charge of a licensed cargo boat or flat shall wear his ticket exposed to view. No manjhi, serang or officer without such ticket shall be in charge of any licensed cargo boat or flat.

75. Whenever the number of any manjhi, serang or officer's license ticket shall become obliterated or defaced, so that the same shall not be distinctly legible, and also when any manjhi, serang or officer's license ticket shall have been lost or mislaid, the manjhi, serang or officer shall apply to the Commissioners for a renewal thereof, and the Commissioners shall, upon the payment of the fee mentioned in the scale of charges framed under section 106 of Act III of 1890, deliver to the manjhi, serang or officer a new license ticket.

76. On the expiration or other determination of the license, the manjhi, serang or officer shall deliver his metal ticket to the Boat Surveyor of the Commissioners.

77. No manjhi, serang or officer shall lend or transfer his ticket to any other person, and no such ticket shall be used by any such person.

78. No person in charge of any licensed cargo boat or flat plying within the limits of the Port shall use, or wear, or have any ticket resembling the metal ticket granted under the authority of the Rules.

79. The manjhi of every licensed cargo boat plying for hire within the Port shall, when waiting for hire at the wharves, have a hiring note showing the rate at which such boat can be hired by the day.

80. Every Owner or Agent of a licensed cargo boat or flat shall, on the 1st August and 1st December in each year, submit a return to the Commissioners, showing the number of licensed boats or flats belonging to him plying on the last day of the previous month.

*Rules for licensing and regulating passenger boats and flats.*

81. No catamaran, flat, passenger or other boat shall ply for hire, whether regularly or only occasionally in, or partly within and partly without, the limits of the Port, unless licensed and registered by the Commissioners. No such vessel shall be allowed to ply as aforesaid except under the direction of a person licensed by the Commissioners.

82. Every application for the licensing and the registration of a catamaran, flat, passenger or other boat shall be made in writing to the Commissioners, and shall contain particulars of the Owner's name and residence, or in the event of the Owner not residing in Calcutta, the name and residence of the Agent duly authorized to act for him, a description of the vessel, and the number of passengers which it is intended to carry.

83. Every license granted under these Rules shall continue in force for one year from the date on which such license was issued, unless it shall have been revoked under the provisions of these Rules. The license is not transferable, and if the ownership of the boat or flat be changed, notice of the transfer shall be given to the Commissioners before the boat or flat again plies in the Port.

84. No license shall be granted to any catamaran, flat, passenger or other boat, until such vessel shall have been surveyed by the Boat Surveyor of the Commissioners, and he shall have granted a certificate stating the following particulars:—

- (a) That such vessel is in good order and suited for the accommodation of passengers.
- (b) The number of passengers which may be carried.
- (c) The number of crew required for the navigation of such vessel, and the number of such crew who should be required to remain on board at night or when the vessel is lying at anchor at other times is according to the following scales:—
- (d) The lights to be exhibited between dark and daybreak.

*Crew required for navigation*

Boat to carry not more than 10 passengers, 3 men including manjee.

"	"	15	"	4	"	"	"
"	"	20	"	5	"	"	"
"	"	25	"	6	"	"	"
"	"	30	"	7	"	"	"
"	"	35	"	8	"	"	"

Flats, half the above number.

*Crew required to remain on board at night or when lying at anchor at other times.*

Boat licensed to carry	10 passengers	...	1 man.
"	15—20	"	2 men.
"	25	"	3 "
"	30—35	"	4 "

*Rule for ascertaining the number of passengers catamarans, flats, passenger, and other boats are to carry.*

Divide the superficial area in square feet of the floor space available for the accommodation of passengers by 6, and the result will be the number of passengers the vessels may be licensed to carry.

A passenger license entitles a vessel to carry cargo without a cargo license having been taken out

85. The number of every licensed boat or flat shall be branded by the Boat Surveyor of the Commissioners on the boat or flat, and shall also be painted in figures not less than six inches long on both sides of the boat or flat.

86. The Owner or his Agent, or the manjhi, serang or officer in charge of any licensed boat or flat, shall not permit any number of persons more than that for which such boat or flat has been licensed, to be carried in such boat or flat at one time, and shall not permit such boat or flat to ply unless provided with the number of crew stated in the license. The boat or flat must be kept thoroughly clean, and shall always bear the numbers branded and painted on it under the provisions of the previous Rule, and be provided with a pump, lights, ground tackle, and fittings in working order as specified in the license.

87. In the computation of the number of persons in addition to the crew carried in any vessel, two children below the age of 12 years shall be counted as one person; and every two maunds weight of luggage shall be counted as equivalent to one person.

88. The license granted for any catamaran, flat, passenger or other boat may be revoked by the Commissioners whenever such vessel is, in the opinion of the Commissioners, unfitted for the conveyance of passengers, or when any breach of the conditions of the license or the Port Rules has been committed by the Owner, or his Agent, or the person in charge.

89. No catamaran, flat, passenger or other boat shall obstruct the free navigation of the Port or the approaches to wharves, jetties, landing-stages, or occupy the portions of the bank set aside for bathing ghats.

90. The Commissioners may, if they think fit, at any time order any catamaran, flat, passenger or other boat to be re-surveyed without any charge to the Owners; and they may also revoke at any time any license granted for any such vessel, or to the person in charge thereof, and it shall be competent to the Commissioners to refuse any application for the issue of a license.

91. Whenever any accident shall occur to a registered catamaran, flat, passenger or other boat, the person in charge or the Owner shall at once proceed to the nearest Port Police-station and report the circumstances connected with the accident to the Officer in charge.

92. When any property belonging to passengers or others is left in a catamaran, flat, passenger or other boat unclaimed, the property so left shall be at once sent by the person in charge to the Superintendent, Port Police, and a report of the circumstances connected with the property shall be entered in a book kept for that purpose by the Police.

93. No person in charge of a licensed catamaran, flat, passenger or other boat plying for hire for passengers in the Port, shall, without good reason, refuse to carry a passenger in such vessel.

94. Every licensed catamaran, flat, passenger or other boat when plying shall have its license on board, which shall be produced when required by any passenger, the Port Police, or any Officer of the Commissioners.

95. Every person licensed under Rule 81 shall be provided with a metal license ticket, upon which shall be legibly painted the number of his license; and every such person when in charge of a licensed vessel shall wear his ticket exposed to view. No person without such ticket shall be in charge of any catamaran, flat, passenger or other boat.

96. Whenever the number of any license ticket shall become obliterated or defaced so that the same shall not be distinctly legible, and also when any license ticket shall have been lost or mislaid, an application shall be made to the Commissioners for renewal thereof, and the Commissioners shall, upon the payment of the fee mentioned in the scale of charges framed under section 106 of Act III of 1890, supply a new license ticket.

97. On the expiration or other determination of any license, the ticket shall be returned to the Boat Surveyor of the Commissioners.

98. No manjee, serang or officer in charge of any licensed boat or flat shall lend or transfer his ticket to any other person, and no such ticket shall be used by any such person.

99. No person in charge of any registered catamaran, flat, passenger or other boat plying for hire for passenger traffic within the limits of the Port, shall use or wear, or have any ticket resembling the metal ticket granted under the authority of these Rules.

#### FIRST SCHEDULE (referred to in Rule 48).

	If natives.	If Europeans.	Officers in charge.
Cargo boats ... ..	4	4	...
Vessels not being cargo boats of 600 tons and under, in moorings.	6	4	1
For every additional 100 tons ... ..	1½	1	...
Vessels not being cargo boats of 600 tons and under, in stream.	11	7½	1
For every additional 100 tons ... ..	2	1	...

#### SECOND SCHEDULE (referred to in Rules 49, 50 and 51).

##### FORM A.

Port of Calcutta.  
I, Vice Chairman of the Commissioners, do hereby license the *(ship)* of which is Master, to remain at her present moorings in the said Port without having on board the crew required by Act X of 1889 of the Governor-General in Council. Provided always that, on breach of any of the conditions hereunder written, this license shall forthwith absolutely cease and determine.

##### FORM B.

Port of Calcutta.  
I, Vice-Chairman of the Commissioners, do hereby revoke all license to the *(ship)* to remain in Port without a crew therein.

##### FORM C.

Port of Calcutta.  
I, Vice-Chairman of the Commissioners, do hereby order that vessels lying in the following portion of the said Port (*here set out the exempted limits*) shall be exempt from the provisions of Rule 48 framed under section 6 (1), Act X of 1889, passed by the Governor-General in Council.

C. W. ODLING,  
Secy. to the Govt. of Bengal.

#### SUBORDINATE CIVIL SERVICE.

##### No. 5007A.

No. 1648A.D.—The 8th October 1894.—Babu Nani Lal Mukherjee, Sub-Deputy Collector, Midnapore, is allowed leave for one month, under article 270 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 10th August 1894.

No. 1645A.D.—The 8th October 1894.—Babu Debendra Prosad Roy, substantive *pro tempore* Sub-Deputy Collector, Jalpaiguri, who has been appointed to act as a Deputy Deputy Magistrate and Deputy Collector, and whose services have been placed at the disposal of the Financial Department of this Government for employment on cess revaluation work in that district, under the order of the 20th September 1894, is allowed leave for three weeks, under article 273(a) of the Civil Service Regulations, with effect from the afternoon of the 21st September 1894.

*No. 1650 A.D.—The 8th October 1894.*—Maulavi Syed Ahmad Ali Khan, substantive *pro tempore* Sub-Deputy Collector, Bhagalpur, was on leave from the 6th September 1894, to the 2nd October 1894, both days inclusive, under Article 369—i of the Civil Service Regulations.

*No. 8770, dated 2nd October 1894.*—Assistant Surgeon Purna Chandra Das Gupta, of the Kishoreganj sub-division and Hybutnugger dispensary, is allowed leave for three months under article 291 of the Civil Service Regulations.

*No. 8772, dated 2nd October 1894.*—Assistant Surgeon Hari Charan Sen, a supernumerary at the Medical College Hospital, is appointed to have temporary medical charge of the Kishoreganj sub-division and Hybutnugger Dispensary in the Mymensingh district, during the absence on leave of Assistant Surgeon Purna Chandra Das Gupta, or until further orders.

*No. 8775, dated 2nd October 1894.*—Assistant Surgeon Purna Chandra Das Gupta, officiating at the Kishoreganj sub-division and Hybutnugger Dispensary in the Mymensingh district, is confirmed in that appointment.

*No. 8777, dated 2nd October 1894.*—Assistant Surgeon Badrika Nath Mukerjee, officiating at the Hooghly Imambarah Hospital, is confirmed in that appointment.

*No. 8907, the 8th October 1894.*—Assistant Surgeon Mohendro Nath Dutta, a Supernumerary at the Presidency General Hospital, is allowed leave without allowances for three months, under article 372 of the Civil Service Regulations.

J. O'BRIEN, M.A., M.D., Surgeon-Lieut.-Colonel,  
*for Inspr.-Genl. of Civil Hospitals, Bengal.*

## HIGH COURT NOTICE.

ISSUED BY AUTHORITY OF THE HIGH COURT OF JUDICATURE AT  
FORT WILLIAM IN BENGAL.  
CRIMINAL.*Rule No 2, dated 20th September 1894.**Heads of account.*

The following are the heads of accounts in the public accounts under which the money received and paid by judicial officers or under their orders is classified—

- (a) Civil or Criminal deposits, including rent deposits.

Judges will, as far as possible, in their transactions with the public avoid the direct receipt and payment of money under head (a) of rule 5. Cash must, however, be received.

*Miscellaneous refunds.*

When an application is made for the refund of a fine or a miscellaneous receipt (heads (b) to (f) of rule 5), the payment order shall be prepared by the accountant in form 10 after checking the application by a reference to the fine register or miscellaneous receipt register (rule 105), and the Judge in charge at the time of passing the refund order shall note the repayment against the entry of the receipt in such register. The payment order shall also be noted in the register of payment orders (form 13), and initialled by the Judge in charge.

*Payment of compensation to plaintiff in presence of the accused.*

The application of the plaintiff in form 10 and the chalan for the fine paid in by the accused shall be drawn up and passed through the books in the ordinary way, and the receipt and payment are to be made independently of each other. The order on the chalan shall, however, be signed by the Judicial officer, and shall be an order to the Court Inspector to receive the amount, and the order on the application (form 10) shall be an order also directed to that officer to pay, but must contain the words "after the amount has been realized from A. B."

The entry in the register of fines must be made at the time of the transaction and not at the end of business.

Published in the *Calcutta Gazette* of the 5th September 1894, Part I, page 945, and in the *Assam Gazette* of the 15th *idem*, Part III, pages 888 and 889.

The following amendments should be made in Chapter III of the Court's General Rules and Circular Orders (Criminal), viz. :—

1. At page 68, in rule 5, clause (a), after the words "rent deposits," insert—and compensation fines (including costs in criminal cases) not paid on the spot in open court.

2. At page 71, after clause (b) of rule 9, insert—

(bb) when the complainant or informant is ordered by the court to pay compensation to the accused at the time of his acquittal (section 560, Criminal Procedure Code);

(lbb) when by order of the court compensation is paid to the complainant out of the fine imposed on the accused (section 545, *ibid*);

(bbbb) when the costs of processes, etc., in non-cognizable cases are recovered from the accused in addition to any fine that may have been imposed on him, and are paid to the complainant (section 31 of the Court-fees Act);

3. At page 87, add as a foot-note to the words "a fine" in the second line of rule 47, the following :—

"N.B.—Compensation fines are repaid under the procedure laid down in rule 37, page 80 *supra*."

4. At page 90, insert the following as a note to rule 52 :—

*Note.*—Compensation fines (including costs in criminal cases) when not paid on the spot in open court are dealt with as deposits [*vide* rules 5 (a) and 47, pages 68 and 87 *supra*].

**Sheriff's Office, the 19th September 1894.**

NOTICE is hereby given that the Fifth Criminal Sessions of the year 1894 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William, and the places subordinate thereto, will be holden at the Court-house, in the Town of Calcutta, on Wednesday, the 5th day of December next, at 11 o'clock in the forenoon, and so on from day to day, until the said Sessions be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Sessions be present then and there to prosecute.

E. TRELAWNY, *Sheriff.*

শরিক আকিস, সন ১৮৯৪ সাল তারিখ ১৯শে সেপ্টেম্বর।

## NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1828B.

NOTICE is hereby given that the Eleventh Sale of Opium, the Provision of 1892-93, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Thursday, the 1st November 1894, at 11 A.M., and will comprise 3,105 chests, viz.—

			Chests.
Opium manufactured at the Patna Factory	...	...	1,510
Ditto ditto at the Ghazepore Factory	...	..	1,595
Total	..	..	3,105

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 25th November 1893, and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 6th and 16th November 1894 respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Tuesday, the 6th November 1894, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Friday, the 16th November 1894.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazepore Factories will be brought to sale down to December next about the date specified below. The Board of Revenue, however, reserve to themselves the right of altering the date should circumstances render it expedient to do so :—

DATES.	Manufactured at the Patna Fac- tory ; about chests	Manufactured at the Ghazepore Factory ; about chests	Total ; about chests
On or about Monday, 3rd December 1894 ...	1,510	1,595	3,105

By order of the Board of Revenue, L.P.,

N. K. BOSE, *Offg. Secy.*

BOARD OF REVENUE, L.P., FORT WILLIAM, the 25th September 1894.

### NOTIFICATION.

The 25th September 1894.—In supersession of the rules made under the provisions of section 75 of the Sea Customs Act VIII of 1878, and published under notification of the 2nd March 1887, at page 149, Part I of the *Calcutta Gazette* of the 9th idem, the following rules are notified under the said section :—

The fee to be charged under Rule 6 has been sanctioned by the Lieutenant-Governor.

1. Baggage includes all packages imported by a passenger for his own use or that of his family, which are not part of the cargo and are not manifested.

Baggage is not exempt from duty except under the circumstances mentioned below.

2. Baggage is exempt from duty only when it consists of articles free from duty or of *bond fide* wearing apparel and other articles of personal use, the property of the person whose baggage is being passed, or of any members of his family such as are in actual use

at time of importation, or have been actually in use previously. It is in the discretion of the proper officer of Customs to determine, subject to the above rules, whether any goods shall be treated as baggage exempt from duty, or as goods liable to duty.

3. In Calcutta baggage officers will examine on board only such free baggage, not contained in soldered or nailed-down cases, as the passenger offers for examination; all other baggage will be sent to the baggage shed at the jetties in the case of vessels lying at the jetties; at the close of the day on which the vessel arrives, baggage landed from her will be sent to the Custom House. In the case of other vessels, baggage will be sent direct to the Custom House if unexamined.

4. It is optional with the proper officer of Customs to allow the cases of persons about to proceed up-country immediately to be passed without being opened. This discretion will never be exercised except on personal application of the owner of the baggage, or his or her representative: a detailed statement of contents and value signed by the owner must always accompany the application.

5. The Preventive officer should report at once whenever he detains any dutiable articles in order that a peon may be deputed to convey them to the Custom House.

6. A landing fee of eight annas per package will be charged on goods sent into the Custom House.

7. Preventive officers will, as far as practicable, see baggage put over the ship's side immediately after examination.

8. Preventive officers posted to passenger vessels are directed to land with as little delay as possible all baggage intended for the Custom House or import shed.

9. Preventive officers are not authorised to pass passenger's baggage after it has been placed in the jetty shed.

10. Officers are authorised to pass from on board all firearms in reasonable quantities and other dutiable goods belonging to passengers from a British Indian port, upon signature of the following declaration, reporting the number and nature of the articles so passed:—

"I hereby declare that my baggage includes no firearms or other dutiable articles belonging to a passenger from a foreign port, that is, from a port other than a British Indian port."

Name \_\_\_\_\_

Address \_\_\_\_\_

The above order does not apply to ammunition, which Preventive officers are not authorised to pass.

11. They are further authorised to pass from on board ship, reporting having done so, (1) uniform and accoutrements belonging to a public servant for his personal use, (2) arms forming part of the equipment of an officer entitled to wear diplomatic, military or police uniform, &c., upon signature of the following declaration:—

"I hereby declare I am a \_\_\_\_\_ officer serving in India."

12. Passengers' baggage need not be detained owing to arms and ammunition or other dutiable articles being found in their boxes, unless they have in any way attempted to conceal them: in such cases the articles should not be passed.

13. Shipping bills are not required for the shipment of *bond fide* passengers' baggage.

14. Preventive officers should examine baggage brought for shipment to China, the Straits, Mauritius and Ceylon, and should report for orders any case in which they have good reasons to suppose that baggage for other ports contain dutiable or contraband articles.

15. Passengers are allowed to embark and disembark at Diamond Harbour.

(a) It will be the duty of the Preventive officer in charge of the station to see that neither opium nor ganja is taken on board of outward-bound vessels.

(b) Passengers landing at Diamond Harbour may be allowed to take their own baggage containing free articles only. Passengers desirous of leaving inward-bound vessels with the intention of embarking on board outward-bound ones will not be permitted to take with them any other than personal baggage, which must be examined in the usual way.

(c) No nailed-down packages, arms, ammunition, spirits or dutiable articles of any kind will be allowed to be transhipped. Any articles transhipped in defiance of this order will be seized and detained.

By order of the Board of Revenue, L.P.,

N. K. Bose, *Offg. Secretary*

#### NOTIFICATION—No. 1836B.

IN exercise of the powers conferred on the Chief Customs authority by section 15 of the Sea Customs Act, VIII of 1878, the Board of Revenue, Lower Provinces, appoint shed No. 9 at the Kidderpore Docks to be a public warehouse for the storage of salt under

CUSTOMS,  
E. V. WESTMACOTT, Esq.  
bond.

By order of the Board of Revenue, L.P.,

N. K. Bose, *Offg. Secretary*.

CALCUTTA, the 26th September 1894.

## ELECTION OF MUNICIPAL COMMISSIONERS.

### NOTIFICATION.

It is hereby notified for general information that, at the bye-election held on the 3rd September 1894, in ward No. II of the North Dum-Dum Municipality in the district of the 24-Parganas, Babu Rissese Banerji was duly elected a Municipal Commissioner in the place of Babu Monmohan Chatterji, resigned.

GOPI KRISHNA LALL, for Collector

#### Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of canal surplus land no longer required by Government, in the district of Shahabad, will be put to sale at 11 o'clock on the 30th October 1894.

The purchasers of the several plots of land will be subject to the following conditions :—

1. If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
2. If the amount of purchase-money exceeds Rs. 100, one fourth of the amount must be immediately deposited; if the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
3. The plots of land will be sold revenue free to the highest bidders.
4. The purchasers will have to respect the right of the raiyats and collect rent from them in accordance with the rent-roll prepared and filed with the record of the case.
5. The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale—

Consecutive lot number.	Name of district.	Name of pargana and mauza.	Approximate area of lot in bighas.	Land excluded from sale from each lot.	Commencement and termination of lot.	Boundary of lot.

Shahabad Collectorate, Arrah, the 12th September 1894.

C. A. OLDHAM, Collector.

## Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated in the district of Muzaffarpur, will be put up to sale at 10 o'clock on the 1st November 1894 at the Muzaffarpur Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

## Conditions.

1st.—The amount of bid should not be less than the price shown against each lot. The lots will be sold to the highest bidders with or subject to an annual revenue shown against each lot.

2nd.—One-fourth of the amount of bid must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled (the sum deposited being forfeited to Government), and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3rd.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale:—

Name of district.	Pargana and estate.	Number of mile.	NUMBER AND AREA OF EACH PLOT.		Boundary of each sale lot.	Total area of each sale lot in local bighas.	Price of each sale lot.	Annual revenue of each sale lot.
			Number.	Area in local bighas.

## Oudh Forest Department.

## BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of sāl beams and scantlings supplied from this depot will be as follows:—

BEAMS—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.

Under 12 and over 7	"	2-4	"
Under 7 feet	"	"	"

The above prices are for ordinary building purpose.

For *Planking Sleepers*, &c., special rates will be fixed by agreement.

The Department will still taken orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N.-W.P. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1886.

## Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGALE GOVERNMENT  
CINCHONA PLANTATION.

THE price of this quinine is as follows:—

1 pound tin	Rs. 16 or, post free, Rs. 16-12.
1/2 " "	8, " " " 8-8.
1/4 " "	4, " " " 4-8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

## Cinchona Febrifuge.

## SALE NOTICE.

## In the Court of the District Judge of Birbhum.

## R. EXECUTION CASE No. 16 OF 1894.

Raja Ramranjan Chakravarti Bahadur, decree-holder, versus Bonvari Lal Mitra and others, judgment-debtors.

IT is hereby notified that the judgment-debtors' right, title and interest in an eight annas share of the zamindari property named Babuijor (entered as No. 247 of the Birbhum Collector's rent-roll), situated within the local limits of the munsifi and sub-registry of Dubrajpur in this district, and paying an annual revenue of Rs. 2,511-6, will be sold at noon of the 1st of November 1894, at the Court sale-room by the Court Nazir, insatisfaction of the judgment-debt, aggregating Rs. 1,502-14.

B. C. MITRA, Offg. District Judge.

Birbhum District Court, the 18th September 1894.

(623-3)

LOST left half of a Government Currency Note No.  $\frac{X}{7}$  02763 for Rs. 100. A reward of Rs. 5

will be given to the party restoring the same to me.

(674-3)

PEHARILAL PAL, Assistant Surgeon.

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal in its Ordinary Original Civil Jurisdiction, made in suit No. 596 of 1894, wherein Prem Loll Mullick is plaintiff and Sumbhoo Nath Roy and others are defendants, the creditors of Nundo Loll Mullick, late of No. 81, Upper Chitapore Road, in the town of Calcutta, zamindar and landholder, who died at Cawnpore in the North-West Provinces on or about the 22nd day of February 1891, are, on or before the 24th day of November 1894, to send to the office of the Registrar of this Court in its Original Side their names, addresses and descriptions, the full particulars of their claims, a statement of their accounts, and the nature of the securities (if any) held by them, or in default thereof they will be peremptorily excluded from the benefit of the said decree.

Every creditor holding any security may produce or transmit the same to the Registrar with particulars of his claim, or shall produce the same before the said Registrar on Tuesday, the 11th day of December 1894, at 12 o'clock noon, being the time appointed for adjudicating on the claims.

R. BELCHAMBERS, Registrar.

G. C. CHUNDER &amp; Co., Plaintiff's Attorneys.

Calcutta High Court, Original Jurisdiction, the 27th day of August 1894. (561-1)

### Notice.

**NOTICE** is hereby given that six graves in the Bankura Cemetery, bearing the undermentioned inscriptions, are in a ruinous condition and need immediate attention. If no communication is received from any friend or relation of the deceased undertaking to restore them, the Magistrate of the district will take the necessary measures to level them with the ground as laid down in rule XIX of the rules and regulations relating to cemeteries:—

No.	Description of monument.
1	2
1	Sacred to the memory of Lieutenant James Awdry, 55th Regiment, B. N. I., Assistant to the Political Agent at Ramghur, died 31st May 1835, aged 31. Erected by his brother officers and other friends by whom he was sincerely beloved and who deeply lament his untimely fate.
2	Sacred to the memory of the late Lieutenant-Colonel A. Shuldham, Commanding 31st Regiment, N. I., who departed this life on the 23rd day of February 1835, aged 46 years. Erected by the officers of his regiment as a mark of their respect and esteem.
3	Sacred to the memory of Ensign W. F. Alexander, 50th Regiment, N. I., who departed this life on the 25th day of March 1833. This monument is erected by the officers of his Regiment as a mark of the regard and esteem in which he was held by them, and in whom the regiment has lost a young officer of the brightest promise.
4	Here are interred the remains of Lieutenant James Henry Beck of the 24th Regiment, N. I., who departed this life at Bankura on 29th March 1838, aged 23 years. This monument is erected by his brother officers as an unaffected tribute to departed worth and in testimony of sincere regard.
5	To the memory of Captain Stephen Mercer of the 35th Regiment, N. I., who departed this life on the 20th November 1827, aged 37 years.
6	Sacred to the memory of Ann, the beloved wife of George Earl, Esq., born 9th January 1800, died 6th December 1833.

ROBERT CORRIANT, Magistrate.  
Bankura Magistracy, the 18th September 1894.

**NOTICE** is hereby given that the partnership heretofore existing between the undersigned, Kunoolall Khettry and Mooljee Virjee, as brokers, under the style or firm of Kunoolall, Mooljee & Co., has been dissolved by mutual consent as from the 31st July 1894. The business will in future be carried on by Mooljee Virjee alone under the style and firm of Mooljee & Co.

KUNOOLALL KHETTRY.  
MOOLJEE VIRJEE.

Calcutta, 24th September 1894. (674—3)

JOHN OWENS, Presidency Postmaster, Calcutta.

General Post Office, the 9th October 1894.

**T**HE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

**1st.**—Bay of Bengal Daily Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem.

**2nd.**—Bengal Daily Report, containing observations taken at 48 meteorological stations in Bengal and Assam, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 8 A.M. observations of each day is printed in time for the evening mail, and is distributed to subscribers in Calcutta the same evening. This report for the present is only published during the south-west monsoon, i.e., from about May 15th to November 15th, or thereabouts. Price Rs. 2-8 per mensem, including postage.

**3rd.**—A Weekly and Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 278 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable, in advance, and of the Monthly Summary Rs. 2 per annum payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Meteorological Reporter to the Govt. of Bengal.

### The Indian Law Reports.

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

### Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

### INDIAN LAW REPORTS.

#### NOTICE TO SUBSCRIBERS.

SUBSCRIBERS are hereby informed that, unless complaint of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four series at subscription rates and at full rates is shown below:—

## RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1893-94.

### GENERAL DEPARTMENT.—MISCELLANEOUS.

*Darjeeling, the 9th October 1894.*

#### RESOLUTION.—No. 104T.G.

READ—

The Annual General Administration Report of the Burdwan Division for the year 1893-94.

The Lieutenant-Governor considers the Report, which has been submitted by Mr. Romesh Chandra Dutt, to be very creditable to that officer, as he only entered on charge of the Division subsequent to the expiry of the year which forms the subject of the Report. In three of the six districts there was practically no change of District Magistrate during the year, except for short intervals of privilege leave. In the other three districts there were changes, and in the case of Birbhum they were regrettably but unavoidably numerous. Mr. Power, before going on leave, placed on record his opinion highly commending the services, among District Officers, of Mr. Romesh Chandra Dutt, Mr. D. B. Allen, Mr. G. A. Grierson, and Mr. F. W. Duke. The Lieutenant-Governor is pleased to endorse this commendation.

2. Mr. Romesh Chandra Dutt's remarks in paragraph 31 deserve careful attention as giving a correct description of the obstructions to drainage, which are believed to be the main causes of malarial fever in Burdwan, and which the

Drainage Bill now before the Legislative Council is intended to remedy. And his aspiration in paragraph 35, that every town should be supplied with filtered water, and every village with a reserved tank, is one towards the realisation of which Government and its officers, as well as all the leading men in the country, should be prepared to give their hearty help. The work done in this direction by the Burdwan District Board and by the Collector, as recorded in paragraph 36, merits commendation, and should be imitated in other districts.

3. In paragraph 42 of his Report the Commissioner has given some figures to show the export of rice and paddy from Burdwan during the last three years. According to this statement 2,875,572 tons of rice and 1,146,277 tons of paddy were exported during 1893-94. These figures appear to be very inaccurate, and it is not stated from whence they have been obtained. It is possible that tons have been written where maunds were meant. Converting paddy into rice at the rate of 25 seers of rice to a maund of paddy, the total exports of cleaned rice would amount to 3,591,905 tons during the year in question. But according to the agricultural returns, the area cultivated in the Burdwan district with autumn and winter rice was 171,460 acres and 918,300 acres, respectively, the estimated yield of both kinds of rice being 402,300 tons; in other words, the Commissioner's export figures for the past year are nearly nine times larger than the outturn. On the other hand, the figures given for the imports into Burdwan are inadequate and inconsistent with those otherwise recorded. It is stated by the Commissioner that European piece-goods up to Rs. 1,23,482 were imported into Burdwan, as against Rs. 1,19,863 and Rs. 1,12,863 in the preceding two years. But according to the returns of the Calcutta traffic published in the Gazette, the total exports from Calcutta to the Burdwan district during 1893-94 were valued at Rs. 18,43,869, against Rs. 24,11,260 in 1892-93, and Rs. 26,86,018 in 1891-92. It is desirable that greater accuracy should be aimed at in the statistics of trade, and steps will be taken to secure it.

4. The District Judge of Birbhum has made some interesting observations, quoted in paragraph 45, on the steady diminution in the number of appeals, and the growth of confidence in the Munsifs' Courts, which deserve general attention.

5. The Commissioner's remarks in paragraph 53 on the failure of many people to renew their licenses under the Arms Act are well timed and judicious. The attention of Government has lately been drawn by the Commissioner of Dacca to this subject, and orders will shortly be issued as to the best method of dealing with it.

6. Mr. R. C. Dutt's suggestions in paragraph 54, on the steps required to improve the efficiency of the Police, have the Lieutenant-Governor's concurrence. One of the remedies he suggests—the improvement in the pay of the Sub-Inspectors—has already been partially introduced, and will be carried on further as the funds of the province permit; also a new system of appointment has been invented, by which it is hoped that a better class of recruits will be supplied. As regards the other remedy suggested—the treatment of the Police with greater discrimination by their superior officers—Mr. Dutt's views agree closely with those of Mr. Nolan, which His Honour has recently quoted with complete approval.

7. Sir Charles Elliott is unable to concur in the Officiating Commissioner's remarks in paragraph 67 as to the need of a public prosecutor in important cases tried by Magistrates, on the ground that Court Sub-Inspectors are incompetent. Measures have been taken during the last three years to ensure that Court Sub-Inspectors are competent men, with some legal training, and with more leisure to study the record and to act as public prosecutors; and reports have been received from several quarters that these measures have been successful. It is the duty of District Magistrates to select the most capable men in the force for this duty.

8. In paragraph 76 some remarks are passed on the want of care shown in issuing certificates, and a suggestion is made that the requisitions should be laid before a Civil Court, and their validity proved by evidence, before a certificate is issued. The remedy is impracticable, but the defect found is often true. It would be cured if the officer who receives the requisition recognises that it is his duty not to issue the certificate as a matter of course, but to satisfy himself that there is good evidence that the claim is sound.

9. The statement in paragraph 80 that the Tenancy Act does not give protection to raiyats in respect of their homestead lands, and that zamindars, when thwarted in attempts to oust raiyats from their fields, often secure their ends by turning them out of their homesteads, is a grave one. The section of the Tenancy Act which deals with the question of homesteads, section 182, has hitherto been supposed to be an effective security for the rights of raiyats, providing as it does that, unless a specific local custom of usage to the contrary is proved to exist, the homestead land is subject to the same conditions as the raiyat's agricultural land. The Commissioner is requested to submit a special report on the subject, together with such statistics as he can collect to prove the existence of this abuse. If it does prevail, and if the law is powerless to stop it, an endeavour must be made to amend the law.

10. The section dealing with Wards' and Attached estates contains (paragraph 88) an observation with which the Lieutenant-Governor agrees, that in taking charge of such estates the object of Government officers should be to improve their condition. He regrets, however, that the Commissioner has not dealt more fully with this subject, showing what has been done in this direction. The expenditure on permanent improvements (outside of the Burdwan Raj) has been only Rs. 14,000, though a surplus of Rs. 56,000 stood to the credit of those estates at the end of the year.

11. Sir Charles Elliott has read with surprise the opinion expressed in paragraph 94, that "as the Income-tax Act does not touch the large class of cultivators and labourers, it is not widely unpopular, and is less unpopular than the Road Cess." This view is opposed to what His Honour believes to be the general opinion of the best informed people in the country, and does not go to the root of the matter. The incidence of the Road Cess is based on ascertained facts, while the main gravamen against the Income Tax is that it is imposed, to a great extent, by guess work.

12. The Officiating Commissioner's remarks (paragraph 99) on the condition of roads in Birbhum and Midnapore, as being inferior to what it was a few years ago, will be communicated to the Public Works Department and to the Inspector of Local Works. No grounds are given for any falling off in their condition.

13. The view expressed in paragraph 114, that District Boards are useful as consultative bodies, and that it is a good thing for non-officials to obtain acquaintance with administrative work, is one which has never been contested. The battle of Local Self-Government—if there is a battle—lies round the question whether any loss of executive efficiency is incurred, and whether, if so, this loss is compensated for by the advantages in which all agree. On this subject Mr. R. C. Dutt's remarks throw no light. But he is a hearty supporter of village Unions, and his views on their utility (paragraph 116) are sound and valuable. The Resolution which issued on this subject on the 1st September 1894, shows how far the Lieutenant-Governor is able to agree with them, and in what manner he proposes to carry them into effect.

14. In his defence of municipal shortcomings (paragraph 117), Mr. R. C. Dutt goes rather further than His Honour can follow him, in asserting that equal shortcomings existed in the official administration which preceded the municipal law. The District Officer of to-day carries on the administration in a more efficient way than his predecessor of 30 years ago: and the District Officer, with a hundred strings in his hand, cannot give the same attention to any one of them which a body created for the purpose is able to do. On both grounds, therefore, the Municipal administration of to-day ought to be superior to the official administration of 30 years ago, and should not rest content with such comparisons as those which the Report adduces; but the Lieutenant Governor cordially endorses Mr. Dutt's experience that "when we make reasonable and practicable suggestions, and indicate the way in which improvements should be effected, Municipal Commissioners show an anxious and sincere desire to accept and act on our advice."

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Govt. of Bengal.*

ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN  
DIVISION FOR 1893-94.

No. 182J.G., dated Burdwan, the 28th June 1894.

From—R. C. DUTT, Esq., C.I.E., Offg. Commissioner of the Burdwan Division,  
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report of the Burdwan Division for the year 1893-94.

PRELIMINARY.

2. The Bankura report was received on the 30th May, and the Birbhum and Howrah reports were received on the 31st idem. Those from Burdwan, Midnapore, and Hooghly were received on the 2nd, 4th, and 6th instant, respectively. Most of the reports were however incomplete, and replies to the references made have not yet been all received. I do not, however, think it necessary to delay my report for them.

I.—CHARGE.

3. Mr. Power was in charge of the Division during the whole year, except in September and October when he was on privilege leave, and Mr. R. M. Waller acted for him.  
(a) Charge of the Division. Mr. Power retired on the 15th April last.

District officers were changed in every district, and no less than five officers had charge of the Birbhum district within the year.  
(b) Charge of districts.

Mr. Williams left the district of Burdwan on the 8th April 1893. Mr. Windsor succeeded him, and I relieved him on the 25th November last. I remained in charge of Burdwan district till the end of the year, and took over charge of the Division on the 15th April last.

Messrs. O'Donnell, Vincent, Waller, Ahmad, and Growse held charge of Birbhum. Mr. Waller was there for over four months. Mr. Growse took over charge on the 22nd February last, and I hope he will be kept on at Suri for some time.

Mr. Barrow held charge of Bankura for almost the whole year. He retired on the 24th March last, and Mr. Cornish succeeded him.  
Bankura.

Messrs. Allen and Shirres were the district officers of Midnapore; the latter was in charge from the 27th June 1893 to the 8th January 1894.  
Midnapore.

In Hooghly Mr. Duke was the district officer all through the year, except for three months, 16th August to 15th November 1893, when he was away on privilege leave, and Messrs. LeMesurier and Fischer successively acted for him.  
Hooghly.

Mr. Grierson continued to be the Magistrate of Howrah. He took, however, three months' leave—26th August to 25th November 1893—during which time Mr. Vincent acted for him.  
Howrah.

Except Kalna, Jahanabad, Raniganj, and Serampore, the seven other subdivisions were fortunate in having the same officers as Subdivisional Officers all through the year.  
(c) Charge of subdivisions.

II.—TOURS AND INSPECTION OF OFFICES.

4. Mr. Power has left the following note about the Commissioner's tour:—  
(a) Tour of Commissioner.

"I was in charge for ten months of the year. During my absence on privilege leave, from 3rd September to 3rd November 1893, Mr. R. M. Waller acted.

"I was out 71 days on tour, Mr. Waller 47,—total 118. Not less than 14 days were spent in every district, and each was fully inspected, except Hooghly. Every subdivision was also inspected, except Serampore. In the middle of March last, while inspecting Hooghly, private affairs compelled me to prepare for immediate resignation of the service and departure from India; hence the deficiency of two days in the prescribed period of tour, the incompleteness of my inspection of Hooghly, and my omission to visit Serampore. It so happened, however, that Mr. Duke had just thoroughly inspected Serampore, and was making a very full inspection of his own offices synchronously with mine; the public interests therefore did not materially suffer from my shortcomings.

"In August I inspected Birbhum, in September Mr. Waller inspected Bankura with Vishnupur subdivision, and in October, Midnapore with Contai subdivision. In November I inspected the subdivisions of Ulubaria, Ghatal, Tamluk, Rampur Hát, and Jahanabad, and in December the Raniganj subdivision and the Burdwan Raj khas mahal settlement office. In that month also I negotiated a fresh opium convention with the Administrateur Principal of Chandernagore. In January I inspected Kalna subdivision and the Burdwan district office in all branches, attended the reception of Lord Elgin on his arrival at Howrah, and inspected the Burdwan Raj ward's estate. In February I inspected Katwa subdivision, the Rajapur drainage survey and settlement operations, and the Howrah offices, and also presided at a conference in connection with the Burdwan and Hooghly tauzi accounts. In March I inspected the Hooghly treasury, and had commenced inspecting the collectorate offices when interrupted as explained above."

5. Mr. Windsor made useful tours in different parts of the district for 49 days, and I was out for 71 days. I visited nearly all the thanas in the district, and the subdivisional offices were thoroughly inspected by me.
- (b) Tours of Collectors.
- Burdwan.

I took charge of the Burdwan district towards the latter end of November, and began my cold-weather tour in the eastern portions of the district, where malarious fever was specially severe in the last cold season. I made special enquiries into the causes of the fever, noted the death-rates in several thanas, and sent my notes and figures to the Deputy Sanitary Commissioner. The general conclusions to which I arrived have been stated elsewhere. After inspecting Kalna and Katwa subdivisions, I came back by way of Srikhand, Mangalkot, and Ghuskara to Burdwan. I then proceeded to the southern parts of the district, and at Jamalpur visited the site of the proposed junction between Kana Nadi and Kana Damodar, and induced some zamindars to withdraw their objections. In February and March I visited the western parts, and inspected Raniganj subdivision and the factories and depôts there. I concluded my tour by a visit to Barakar on the western frontier of the district.

6. The several officers who held charge of this district spent 95 days in camp, as shown below:—
- Birbhum.

			Days.
Mr. Vincent	...	...	12
„ Waller	...	...	65
„ Ahmad	...	...	17
„ Growse	...	...	1
			—
Total	...	...	95
			—

There is nothing deserving of special attention in the tours of Messrs. Vincent and Ahmad, which were limited to a few localities.

Mr. Waller's tour extended to all parts of the Sadar subdivision and to the head-quarters of the Rampur Hát subdivision. He paid special attention to excise and crime and to chaukidari matters, as well as to patshalas, schools, and roads. No other details regarding his tour have been given in the Birbhum report.

7. Mr. Barrow was out in camp for 109 days. He visited every part of the district, and inspected the subdivisional offices and municipalities thoroughly, as well as rural sub-registry offices, schools, excise shops, roads, and pounds. Much of his time
- Bankura.

was occupied in work connected with ghatwali tenures and in the extension of the Chaukidari Act. He also tried several bad livelihood cases locally, and did his best to improve the criminal administration of the district.

8. Mr. Allen was out on tour 49 days and Mr. Shirres 58 days, making up 107 days in all. Mr. Allen writes:—"Mr. Shirres

Midnapore.

admits that he ought to have done more, but the

Balasore and kidnapping cases prevented his doing as much camping in the rains as he desired." On Mr. Allen's representation he was allowed to curtail his camping in the latter end of March, to enable him to inspect the offices at head-quarters.

Every subdivision was, however, inspected twice, every municipality visited, and practically the whole district was seen.

In November last Mr. Shirres inspected the southern parts of the district and the tracts where the people suffered from some distress, but did not see any signs of serious trouble. He thoroughly inspected Contai and Tamluk subdivisions, and visited the Kaminachak estate. In December he visited the western thanas, Jhargram and Gopiballabhpur, and also inspected the municipalities of Ramjibanpur and Chandrakona in the north. In January Mr. Allen went out northwards to Amlagora, found the disputes between Messrs. Watson and Company and the Bogri raiyats settled, and then inspected the offices of Ghatal subdivision. After this he visited Contai and other places in the south, and concluded his tour by a visit to Jamboni estate in the west, which has lately come under the administration of the Court of Wards.

9. Mr. Duke's tour extended over 81 days, and Mr. LeMesurier remained in the mufassal for 10 days Mr. Duke

Hooghly.

inspected all the municipalities but one, all the

thanas but two, and all the registration offices but three. He paid special attention to illicit traffic, and to the falling off in the sale of country spirits, to higher English schools, and to dispensaries. He also visited six of the larger khas mahals, and inspected the accounts of a large number of others which he was not able to personally visit. There are upwards of 300 khas mahals in the district. All the subordinate offices (except Serampore) were duly inspected twice during the year.

10. Messrs. Grierson and Vincent were altogether on tour for 64 days.

Howrah.

They inspected all the thanas of the district but one and nearly all the outposts. Most of the fac-

tories were also inspected.

In September and October Mr. Vincent travelled in Ulubaria subdivision by boat and visited Amta. In the cold weather Mr. Grierson visited these places again and made a complete circuit of the north of the district. The subjects which principally occupied Mr. Grierson's attention during his tour were—

- (1) The effects of the cyclone of May 1893.
- (2) The general condition of the people.
- (3) The repression of crime and its concealment.
- (4) The work done by chaukidars.
- (5) The results of the Rajapur and Howrah drainage systems.
- (6) The state of communications.

(c) Tours of Subdivisional Officers.

—  
Burdwan.

11. Mr. Maxwell, Subdivisional Officer of Raniganj, spent 7 days out on tour, and Mr. Webster was out for 92 days. The usual inspections were made, and they visited the large collieries and factories.

Babu Nagendra Nath Pal, who was subdivisional officer of Kalna from the 1st April to the 17th June 1893, did not go out at all. His successor, Babu Mohendra Nath Mukherji, was out in camp for 89 days. On account of his bad health he could not remain out longer. He encamped at 23 different central places.

The Subdivisional Officer of Katwa was out 98 days, and visited all parts of his subdivision. He made some enquiries about the heavy outstanding criminal fines and the properties of judgment-debtors in certificate cases.

12. Mr. Ainslie spent 111 days in the mufassal, and devoted much time to collecting information about chaukidars, bad characters, and crime. He also paid attention to the introduction of the Chaukidari Act into several villages.

13. The Subdivisional Officer of Vishnupur was out in the interior for 92 days. He made special enquiries into the condition of the people living in the tracts where there had been a failure of crops in the two preceding years.

14. The Subdivisional Officer of Contai was out for 95 days. The condition of the people and the crops and the illicit manufacture of salt received his special attention. He inspected the khas mahal tahsil offices, held enquiries into bad livelihood cases, and supervised distribution of relief.

The Subdivisional Officer of Ghatal was on tour for 90 days. Mr. Allen reports he is not an energetic tourist. But his subdivision is small, and he visited the different parts of it, and inspected all the municipalities and factories in his subdivision.

The Tamluk Subdivisional Officer camped out for 92 days. He made the usual inspections and enquiries, and Mr. Allen thinks he did a good deal of useful work.

15. The tour of the Subdivisional Officer of Serampore extended over a period of 89 days only. Mr. Duke writes that there were frequent changes in the charge of the subdivision, and Mr. Fischer was on tour almost continuously from the time he rejoined in December. He did good work in personally stimulating the collections in his khas mahals.

The Subdivisional Officer of Jahanabad remained in the interior for 105 days. He made special enquiries about roads and communications, and the supply of good drinking-water in villages also received his attention.

16. The Subdivisional Officer of Ulubaria was on tour for 94 days. He paid attention to the appointment of panchayats and to village sanitation, and made the usual inspections.

17. Mr. Power inspected the district offices and treasuries at Burdwan, Birbhum, and Howrah, as also the Hooghly treasury. Mr. Waller inspected the Bankura and Midnapore district offices and treasuries.

18. All the Collectors inspected their offices and treasuries twice in the year.

Very serious irregularities and mistakes were discovered in the tauzi accounts of the Burdwan and Hooghly districts. The demand and balance as shown in the returns differed from those shown in the ledger accounts, and a special establishment is now examining the tauzi accounts of Burdwan. In Hooghly, Deputy Collector Maulvi Mahamad-ul-Nabi conducted special enquiries, and a special establishment has been asked for.

19. Mr. Waller inspected the Contai and Vishnupur subdivisional offices and sub-treasuries, and Mr. Power inspected the offices at the other subdivisional head-quarters, except those at Serampore.

20. The Collectors inspected their respective subdivisional offices, which were found in good order.

### III.—WEATHER AND CROPS.

21. The prescribed statements I and II are herewith appended.

In the last year, the monsoon set in earlier than usual, and the rainfall was evenly distributed and was above the average. The excessive rainfall in May retarded the sowing of the paddy to some extent, and the fall in June delayed transplantation. The heavy rains, however, were on the whole favourable to crops except in very low lands, specially in Midnapore.

22. In Burdwan the total rainfall was 62·25 against 52·21 inches in the previous year. The outturn of *aman* or late rice was estimated at 16 annas

and *aus* or early rice yielded an average of 13 annas. The outturn of rabi crop is, however, reported to have been only 11 annas in the average, as there was a total absence of rain from the latter end of October.

23. The Magistrate of Birbhum says that the heavy rains of June to August and the mild rain of September did much good to the rice crop, but injured the sugarcane to a great extent. The outturn of the former was 18 annas, and that of the latter is said to have been only 8 annas in the Sadar and 5 annas in the subdivision. The yield of rabi is said to have been only 8 annas.

24. In Bankura, notwithstanding partial and local damage from the floods in September, the main crop of the district was not on the whole injuriously affected by the heavy rainfall, and the outturn was 16 annas. The winter crops are said to have suffered somewhat from the excessive rainfall of September and October. Cotton yielded about 7 annas, and indigo scarcely yielded a quarter of an average crop.

25. In Midnapore the floods which accompanied the cyclone towards the end of May, and the heavy rains and gales in June, destroyed the seedlings and delayed resowing in many places. In Contai the Public Works Department kept the Bhaigur lock open as an outlet for the flood-water. The floods were very bad in Tamluk, and about 60 square miles in thana Panchkura and 20 square miles in thana Tamluk were submerged, and the *aman* rice destroyed. This area was then sown with *boro* which promised well, but owing to the drought in February and March did not yield more than an 8-anna crop.

26. In Hooghly a large area was cultivated with rice owing to the copious rains, and the produce was above the average in all parts of the district, except in a portion of Ulubaria and in a few hundred acres of *bil* land in Serampore.

It is worthy of note that the drainage system of this district carried off the flood-water in time to make transplantation possible, and excellent crops were eventually obtained. The outturn of rabi crop was not a good one, oil-seeds only middling; but on the whole, the Collector reports, the supply has been above the average.

27. In Howrah some local damage was done by a storm-wave, which swept over a great portion of the south of the district, broke several embankments and a portion of the Grand Trunk Road, and flooded the low lands. On the whole, however, the winter rice crop was about 12 to 14 annas. The rabi was fair, sugarcane was very good, and so also *pán* or betel leaf.

#### IV.—PUBLIC HEALTH.

28. The accompanying statement shows the deaths registered in each district from different diseases during the past three calendar years. The figures given in this report are for the calendar year, as directed in Government Resolution No. 527, dated 24th February 1893:—

DISTRICT.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from bowel-complaint.			Number of deaths from small-pox.			Number of deaths from other causes.			Total number of deaths.		
	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
Burdwan ...	26,135	31,830	25,014	3,392	5,851	526	927	1,068	801	101	236	224	6,180	7,458	8,731	36,825	46,443	36,196

Midnapore ...	51,577	54,048	48,135	6,261	6,029	2,796	2,448	2,375	1,080	4,360	3,712	377	10,622	10,643	13,071	74,268	81,207	66,515
Hooghly ...	22,297	26,411	23,337	1,306	3,415	910	2,515	2,121	2,307	49	34	8	4,740	4,186	6,049	31,437	35,637	33,584
Howrah ...	8,479	9,302	6,631	2,974	2,091	1,421	2,741	2,731	2,808	110	23	8	4,200	4,053	4,626	18,500	19,185	18,484
Total ...	141,401	157,933	137,952	15,868	26,100	6,337	9,216	9,091	8,312	4,815	4,269	899	36,613	45,462	55,462	207,088	232,416	196,903

29. The total number of deaths registered during the year was 200,000 in round numbers, against 208,000 in 1891 and 232,000 in 1892. According to these figures the death-rate fell from 27·05 and 29·9 in 1891 and 1892, respectively, to 26·1 per mille. The figures, however, cannot be accepted as altogether reliable, and the real death-rate must be considerably higher than what is shown. The decrease by ten thousand in Burdwan, and by fifteen thousand in Midnapore, seems at first sight to be unaccountable, specially as the year 1893 was not a healthy year. The unhealthiness, however, began in the last

quarter, and will, as usual with malarial fevers, probably affect the death-rates of the subsequent year.

30. The Magistrate of Burdwan states that the year was bad during the last quarter when malarial fever was more prevalent, on account of the heavy rainfall of the year, than in the corresponding period of the previous year. This was specially the case in the eastern portions of the district, where fever prevailed very badly when I visited those portions in December last.

31. The malarial fever is generally attributed to obstructed drainage, and the consequent dampness of the soil. The drainage of Burdwan has certainly been seriously obstructed, partly by natural and partly by artificial causes. The main current of the Ganges now flows by way of Goalundo into the sea; the Bhagirathi is drying up, and the numerous natural channels which drained the country into the Bhagirathi are stagnant or dry, and are being brought under cultivation. To the south of the district, the Damodar is embanked; its floods do not sweep over the district, and the natural drains which drained the country into the Damodar are also dry, and are being brought under cultivation. The natural drainage of the district is thus obstructed on both sides, and this appears to me to be the main cause of the malaria which broke out first in Burdwan, and has since spread to other districts on both sides of the Bhagirathi.

32. The Civil Surgeon of Midnapore, who supplied statistics for the district, writes that malarial fever prevailed throughout the year, but increased in virulence after the close of the rains.

33. In Hooghly malarial fever was very prevalent in all parts of the district, and chiefly in the Serampore and Jahanabad subdivisions. Many persons suffered from it, but the mortality was not great. The causes assigned are—(1) the heavy rains. (2) obstructed drainage, and (3) bad water-supply.

34. Cholera appeared in all the districts in a more or less mild form. In Birbhum it prevailed in an epidemic form in the Rampur Hât subdivision from January to March 1894. The mortality during these months was great—1,744 people died of it. Of the two Hospital Assistants deputed for medical aid, one succumbed to it. In Midnapore the epidemic advanced in severity from the month of December 1893 in almost all the thanas, but specially in Contai and Tamluk subdivisions. Extra native doctors were deputed, and cholera pills were distributed to the villages affected.

35. Cholera is mainly due to bad drinking-water as malarial fever is mainly due to obstructed drainage; and as the supply of drinking-water is improved, cholera must abate. This has been so in Calcutta, where cholera raged furiously in every hot season, thirty years ago, and the disease has never raged to the same extent since the town got a supply of filtered water. It is to be hoped that every district town will sooner or later be supplied with filtered water, and that tanks will be reserved in every village. A very great deal has yet to be done to improve the sanitation of the country; but it is impossible for District Boards to undertake this with their present resources which are meant, and are barely sufficient, for roads and education.

36. The District Board of Burdwan spent Rs. 3,304 on the excavation and re-excavation of five tanks in five villages in different parts of the district. The Collector advanced Rs. 9,165 to 30 persons for the purpose of cleaning and deepening 32 silted-up tanks belonging to private individuals. There is room for much improvement in the Municipality of Burdwan, and the large number of filthy *dobas* and small tanks require to be filled up. The present Commissioners have adopted measures gradually to fill up some of them.

In Birbhum the villages and rural tracts are reported to be in need of sanitary improvement. The Magistrate of Bankura states that the district is naturally a healthy one, and no special sanitary measures were needed during the year.

The Magistrate of Hooghly writes that a proposal has been made to the railway authorities for supply of water to the Hooghly and Chinsura town, in cases of drought, from their pipes laid along the Jubilee Bridge embankment. This, however, is likely to come to nothing for the present, for although the Municipal Commissioners have paid for the connection, they have not the means to make adequate arrangements to conduct the water. The most pressing wants of this municipality are good drinking-water tanks in places distant from the river, and a better system of drainage. In the Serampore Municipality

the drainage system has at last been completed at a cost of Rs. 17,725. The internal drainage of the town, however, should be connected with it. Village sanitation has been as bad as ever.

37. The number of persons vaccinated during the year was 159,948 against 187,108. The decrease was in the districts of Burdwan, Birbhum, and Hooghly, due to the prevalence of fever and influenza amongst the people and the vaccinating staff. The people generally are well disposed towards vaccination and accept it freely. But the Officiating Magistrate of Burdwan, Mr. Vincent, writes:—"Petty extortion on the part of the vaccinators is a cause among the lower classes of the dislike with which vaccination is regarded."

Vaccination.

#### V.—MATERIAL CONDITION OF THE PEOPLE.

38. The material condition of the people was generally good throughout the Division owing to the excellent outturn of the rice crop. In the southern portion of Midnapore, where considerable damage was done by floods, a large number of the people went as usual to cut paddy in the Sundarban tracts, and came back with ample wages, and thus the difficulty was got over. Only in Contai subdivision, there was some slight distress, and Rs. 791-15-3 was subscribed locally and a sum of about Rs. 200 was contributed by the District Board and distributed to those who required help.

The condition of the lower middle classes is not improving, but is perhaps becoming worse. They are averse to manual labour, and the competition among them for appointments in Government or mercantile offices is becoming keener every year. The Collector of Burdwan writes that it would cost less to keep a clerk who can read and write English than to keep a good carpenter, blacksmith or tailor. The Collector of Birbhum says the "*Bourgeois*" class of small *bhadra lok* on fixed salaries or inelastic incomes are gradually feeling the strain of high prices. These remarks, however, apply to some extent to other countries besides India. The man of "genteel" birth is averse to take to labour, and suffers in these days of keen competition in all professions.

On the other hand, the high prices of food-grains are a boon to the cultivating classes. The Subdivisional Officer of Tamluk records the fact, which is generally known, that brass utensils are in common use among these classes, and the women wear silver ornaments. The labouring classes earn good wages in Hooghly and in the Raniganj subdivision, owing to the number of factories and collieries in this last place. And even in tracts which do not boast of these special advantages, the extension of cultivation lessens the condition of the landless labourer. Mr. Grierson compares the Bengal labourer with the Bihar labourer, and remarks that while in Gaya a labourer is lucky if he gets one full meal a day, in Howrah every one gets two full meals, plus a tiffin.

Mr. Grierson also makes some remarks on the taste which is spreading for European articles. Soap is more extensively used than before. I am afraid, however, Mr. Grierson goes too far when he says that "Huntley and Palmer's biscuits are taking the place of native *mithais*." In articles of food the people (except when under medical advice) adhere to their own produce, and *mithais* will hold their own against all European confections.

#### VI.—EMIGRATION AND IMMIGRATION.

39. Emigrants were registered in three districts of this Division, viz., Burdwan, Bankura, and Midnapore. The number of contracting emigrants registered during the year rose from 1,501 to 2,095; 670 of these went to the colonies and the rest to the tea districts. A considerable portion of these men were recruited by garden sardars.

The increase occurred in Burdwan only; the registrations in the other districts are still on the decline. The increase in Burdwan is, I believe, due to the opening of the Nagpur Railway line, which has greatly helped the Chota Nagpur coolies to come to Burdwan for registration.

In Burdwan 1,228 coolies, including their dependants, were registered, against 712 in the preceding year. Most of them come, as stated above, from Chota Nagpur and the Central Provinces, and consist of Sonthals, Kols and other aboriginal tribes. They find their way to Asansol by the Bengal-Nagpur Railway, the recruiters and garden sardars take charge of them there, and

arrange for their final destination. The labouring classes of Burdwan and neighbouring districts find sufficient employment in the fields and in the coal mines and potteries at Raniganj.

In Bankura the number of emigrants fell from 782 to 511, of whom 412 were recruited by garden sardars.

Six hundred and one emigrants were registered in Midnapore, against 919 in the previous year; nearly 93 per cent. of these were recruited by garden sardars.

The number of coolies registered bears no proportion, however, to those who proceed under the system which is called "free emigration," and which is rapidly expanding. In Burdwan the number of such emigrants is supposed to exceed 14,000. The system is under little or no control, and is therefore attended with much abuse, and gives rise to frequent and well-founded complaints.

Copies of Statement A, showing the criminal cases in connection with emigration, prescribed by Government order No. 1848, dated 20th April 1892, are appended. There were 14 cases in Burdwan, 2 cases in Midnapore, and 5 in Bankura; the accused in all these cases, except two, were convicted. The number of cases, however, is no index to the number of cases in which persons are fraudulently and under false pretexts taken away from their homes under the "free emigration" system. The evil requires to be checked.

There were seven rest-houses and 50 cooly depots in this Division. Most of them are located at district or subdivisional head-quarters. With the exception of seven, all were regularly inspected. The instructions given by inspecting officers for sanitary improvements and supply of drinking-water were generally attended to by the officers in charge of depots, except in Bankura, where the suggestions made by the inspecting officers were in some cases disregarded. The Magistrate has been asked to warn the owners of their responsibility in the matter.

No arrangements exist for the treatment of invalids at rest-houses; the sick coolies in depôts are treated by local practitioners. No such arrangement, however, exists in Bankura.

Blankets and warm clothing were supplied to the emigrants in Burdwan, Birbhum, and Bankura.

There was no regular immigration in any of the districts of this Division; but people from the Sonthal Parganas, Chota Nagpur, and Northern India come in thousands to Burdwan, Hooghly and other districts in the cold season to find employment in harvesting, in road works, on the railway, and in various industries. I found large gangs of them during my last cold-weather tour.

#### VII.—PRICES OF FOOD AND LABOUR.

40. The two prescribed statements under this head, III and IV, are herewith appended.

The price of common rice, which is consumed by the masses, was high in the earlier part of the year, but became cheaper in all districts after the winter crop was harvested. The prices varied according to the means of communication and the outturn of each district. In Hooghly and Howrah the prices were high— $11\frac{1}{2}$  to  $12\frac{1}{2}$  seers a rupee. In Birbhum and Midnapore the price was about 15 seers a rupee, but in Contai for some time it was cheaper—18 seers a rupee. At Bankura, which is 30 miles away from the nearest railway station and across the river Damodar, rice was sold at 17 seers per rupee. In Burdwan the prices varied from 13 to 16 seers a rupee.

There was no special demand for labour, and therefore the wages remained almost stationary. They vary according to locality. Near coal mines and the railway line, the rate is higher than in the interior. The Collector of Midnapore writes that six pice a day for a common labourer was considered handsome wages in some parts in the interior of that district. But the ordinary wages of a cooly in Midnapore are reported to be slightly over three annas in Midnapore and rises to four annas in Howrah. The average rate for the Division may, therefore, be taken to be three and-a-half annas, which is the rate in Burdwan district.

#### VIII.—MANUFACTURES AND MINES.

41. There is nothing worth adding to what was said in the annual reports of previous years. Silk, tasar, jute, cotton molasses, shellac, rope, brass and hardware, indigo, paper, pottery and iron, continue to make up the list of local industries in this Division.

In Burdwan the production of silk has increased; the value of the outturn is estimated at Rs. 1,62,681, against Rs. 1,35,625 in 1892. In Birbhum, Midnapore, and Hooghly the industry appears to be on the decline, as the stuff produced cannot compete with that imported from Europe. In the Ghatal subdivision, in Midnapore, fine silk fabrics, such as flowered silk scarfs, wrappers, &c., are manufactured by the local weavers and sent to Calcutta, Bombay, and Madras for sale.

There was a slight improvement in the manufacture of tasar in Birbhum. In Bankura the manufacture of tasar cloth was much limited, there being no great demand for it either in the local market or from outside.

There are large jute mills in the Serampore subdivision and in Howrah, and there are cotton mills in the latter district.

**Jute and cotton.** Large quantities of gunny bags and cloth are manufactured in the jute mills, but as the owners of some of them have not furnished the necessary statistics, the total outturn of these articles cannot be ascertained. The quantity of jute worked up in four out of the five mills in Hooghly was 29,306 tons, against 44,378 tons of the previous year; the five mills afforded employment to no less than 13,372 people daily.

In Howrah the value of the outturn of three of the jute mills was Rs. 83,40,877, against Rs. 70,39,257 in the preceding year. The figures for the other two mills are not available. Of the four cotton mills one showed a decrease, two gave an outturn of Rs. 34,87,222 against Rs. 31,50,374; no information could be obtained from the other.

Cotton cloth is manufactured by native looms in all the districts of this Division. The industry is, however, gradually giving way to the extensive import from Manchester and other places, and weavers are taking to cultivation or other occupations. There has been a tendency of revival in this industry in the Serampore subdivision, where the well-to-do people have taken to the use of country-made cloths of fine texture which, though dearer, are more durable than the machine-made articles. This is, perhaps, one of the good results of the high rate of exchange which gives a chance to country produce as against imported goods.

The hât or weekly market at Ramkrishnapur, in the town of Howrah, has continued to maintain its flourishing condition.

Molasses prepared from date-palm in Burdwan is locally consumed. The **Bihia** mills are now generally used in this district in preparing molasses from sugarcane.

The business in shellac in Bankura showed much activity owing to a rise in the price of the article in London. About

**Shellac.** 30,000 maunds of stick-lac or the raw material was imported from Chota Nagpur Division. The total quantity of shellac turned out in the several factories in this district was about 15,159 maunds, against 6,000 maunds in the preceding year. The entire quantity manufactured was sent to Calcutta. In Birbhum *churis* or bracelets and toys of various descriptions are made of shellac. The value of the outturn is estimated at Rs. 35,000. A small quantity was exported to Calcutta.

The manufacture of rope is confined to Serampore subdivision and Howrah.

**Rope.** At Serampore the outturn last year was one-half of what it had been in the preceding year. The Shalimar and Ghusry roperies in Howrah turned out Rs. 7,35,320 worth of rope against Rs. 6,65,124.

The manufacture of brass, bell-metal and hardware continued to be carried on more or less in every district in this

**Brass, bell-metal and hardware.** Division.

In Burdwan the market for brass and bell-metal was somewhat dull, the value of the outturn decreased from Rs. 5,11,423 to Rs. 4,37,224. Knives and scissors of good quality continue to be manufactured at Kanchannagore, a suburb of Burdwan. But the manufacturer, Prem Chand Mistri, is unwilling to train others in the industry, and it is possible the manufacture of these articles in the locality will cease when he dies.

In Midnapore the manufacture in brass and bell-metal wares is extensively carried on at Kharar, a municipal town, where articles worth nearly 15 lakhs of rupees were produced and exported to Calcutta. It gave employment to

four or five thousand persons daily, their daily wages varying from 4 annas to 1 rupee 4 annas.

In Hooghly this manufacture is confined to Jahanabad and Sadar subdivision. Some of the articles, viz., tumblers, jugs, ghará, pán-dán, &c., are widely known for their special make and finish.

The manufacture in indigo has declined during the year. In Bankura the outturn last year shows a decline from 250 maunds to 75 maunds only. The decrease is attributed to the abnormally heavy rainfall of the year. The Magistrate of Midnapore has not furnished any statistics.

This article is manufactured in the subdivision of Raniganj and in the town of Bally. The mill at Raniganj, working with a capital of eight lakhs, turned out papers worth six lakhs of rupees. At Bally the value of the outturn rose from 9 to 14 lakhs.

There was a decrease of 25 thousand rupees, as compared with last year, in the value of articles manufactured at the Pottery Works of Messrs. Burn and Company at Raniganj.

Bricks, tiles, &c., were largely manufactured in Howrah. Earthen pots manufactured in different parts of this district are exported in large numbers to Calcutta.

The iron works at Barakar owned by the Bengal Iron and Steel Company, Limited, are doing well, and have been considerably extended within recent years. It is working with a capital of 171,500 pounds sterling. The value of the outturn was Rs. 9,34,529, against Rs. 8,42,628 in the previous year.

There were four iron manufactories at work in Howrah; the value of works turned out in three of them has been returned at Rs. 20,48,266 against Rs. 20,55,000; no information is available for the other.

Among other articles manufactured in this Division, the fine mats, called Machland, of Raghunathpur in Midnapore, and of Gurbhanipur in Jahanabad subdivision, deserve mention. Ebony works made in the same subdivision and the *hukas* of Begri and Andul in Howrah also deserve mention.

The subjoined table shows the outturn of some of the principal articles of manufacture:—

DISTRICTS.	Articles.	Outturn in—		
		1891.	1892.	1893.
1	2	3	4	5
Burdwan	Indigo ... Mds.	173	81	58

	Rope ... "	4,20,600	6,65,124	7,35,320

There are collieries in the Raniganj subdivision and in a part of Bankura

Coal mines.

The coal trade in Raniganj was brisk, and the prices in the latter part of the year were high, at least for coal of superior quality. The Magistrate of Burdwan thinks that the coal strike in England has given a great impetus to the local industry. Several old collieries which were worked out, or of which the production was inferior, were closed during the year: this has been assigned as the cause for a decrease in the output of coal. Great difficulty was experienced by the owners of collieries in obtaining an adequate supply of labour.

The coal obtained from the few collieries in Bankura is locally used.

The prescribed Appendix V shows the outturn of coal in each district.

#### IX.—TRADE AND COMMERCE.

42. The trade in this Division is carried on by rail, river, canals and roads. The old Benares road and the old Nagpur road are the chief means of communication between Calcutta and the district of Bankura and parts of Midnapore, while the Burdwan-Midnapore road supplies a trade route between those districts. The East Indian Railway, which traverses the districts of Burdwan, Birbhum, and Hooghly, affords great facilities for both import and export traffic, and the Grand Trunk Road also contributes to the same end. The steamers running daily from Kalna, and bi-weekly from Katwa to Calcutta, serve the riparian tracts of the districts of Burdwan and Hooghly. Though Midnapore has no railway, it is fortunate in respect of communication by water. It has river and natural streams navigable by native crafts throughout the year, and artificial water-courses, through which a large traffic finds its way to Calcutta.

The principal articles of trade in this Division were the same as in previous year, viz.—

Exports—

Rice, paddy, pulses, lime, hides, oil-seeds, brass and bell-metal utensils, shellac, tasar cocoons, coal, potatoes, molasses, timber and paper.

Imports—

European piece-goods, twist and yarn, tobacco, salt, kerosine, pulses, spices, ghi, gunny bags and grains.

#### *Export.*

The export of rice and paddy in Burdwan was very considerable, owing to the good harvest reaped.

Grains.

The subjoined memorandum shows the quantity of rice exported from Burdwan during the last three years:—

DISTRICT.	1891-92.		1892-93.		1893-94.	
	Rice.	Paddy.	Rice.	Paddy.	Rice.	Paddy.
	2	3	4	5	6	7
Burdwan	Tons. 27,68,759	Tons. 8,87,544	Tons. 18,68,617	Tons. 4,06,469	Tons. 28,75,572	Tons. 11,46,277

It will be seen that the export of paddy increased from 4 lakhs to 11 lakhs of tons, and that of rice from 18 lakhs to 28 lakhs. During my last cold-weather tour I ascertained that the reason of this increase was that while a bumper harvest had been reaped in Burdwan, rice had failed partially in some eastern districts, and the prices therefore were high at Goalundo and elsewhere. Mr. Growse, Magistrate of Birbhum, says:—"I knew that, when I was in Faridpur, rice was being imported into Goalundo from this district, and I have reason to believe that not a little went as far as Cachar." The exportation of rice from Bankura was small, and 63,157 tons of rice were exported from Midnapore by the canals.

Pulses.

The exportation in pulses also increased in Burdwan and Birbhum.

The export of hides from Burdwan and Bankura suffered a decrease.

Hides.

No reason has been assigned for the gradual decline in Burdwan, but it may probably be due to a lull in the Calcutta market. The opening of the Nagpur Railway has also diverted most of the traffic that formerly passed through Bankura.

There was a falling off in the export of lime from Burdwan, the only district in this Division which supplies the article for the Calcutta market.

Lime.

Brass and bell-metal wares in considerable quantity are exported to Calcutta from this Division. The other principal articles of export have been noticed under the preceding head of manufacture.

### *Import.*

The import of European piece-goods is gradually on the increase. In Burdwan the figures were Rs. 1,23,482, against Rs. 1,19,863 and Rs. 1,12,863 in the preceding two years. Accurate statistics to determine the extent of trade, however, are not available.

The Magistrate of Birbhum reports that kerosine oil is much used on account of its cheapness. This is true now for all Bengal.

### X.—ADMINISTRATIVE CHANGES.

43. The following changes were effected in this Division :—

(1) The Government notification of the 19th August 1873, appointing the members of the Municipal or Town Committees of Burdwan, Raniganj, Kalna, Katwa, and Dainhat, in the district of Burdwan, to be Honorary Magistrates within the limits of their respective municipalities or towns, was cancelled, and the Municipal Benches of those places were abolished, and their work is now done by the general and Independent Benches of those places.

Similarly, the Municipal Benches of Midnapore, Sadar, and Ghatal were abolished under Government order No. 1110, dated the 23rd February 1894.

(2) The Independent Bench at Garhbeta was reduced last year to a Dependent Bench presided over by a salaried Magistrate from the headquarters.

(3) The Gambling Act was introduced in Asansol town in the district of Burdwan.

(4) The Chaukidari Act, VI(B.C.) of 1870, amended by I(B.C.) of 1892, was extended to some more villages in most districts of this Division. Mr. Growse, Magistrate of Birbhum, writes:—"The year also marks the beginning of an important change, viz., the reduction of the unmanageably large army of chaukidars appointed under Regulation XX of 1817, remunerated by service lands, and the substitution of a comparatively small number of well-paid chaukidars."

(5) In accordance with the recommendation of the Police Commission, several police *outposts* were abolished in the districts of Hooghly, Birbhum, and Burdwan.

(6) Under Government notification, dated the 10th April 1893, the headquarters of the Ghatal subdivision were again changed from Garhbeta to Ghatal.

(7) During the year a sub-registry office was opened at Purbasthali in Kalna subdivision, and another at Krishnagar in the Hooghly district. A joint sub-registry office was started at Shambazar under the Goghat sub-registry office in Hooghly.

(8) In the town of Suri chaukidars were substituted in the place of constables.

(9) The fourth general *Municipal* elections were held during the year, and the people everywhere evinced a keen interest in the elections.

## XI.—STATISTICAL ENQUIRIES.

44. The following table shows the birth and death-rates per mille in the several districts of this Division for the last two years:—

DISTRICTS.	Birth-rate per mille.		Death-rate per mille.	
	1892.	1893.	1892.	1893.
1	2	3	4	5
Burdwan ...	25·13	34·79	33·36	26·00
Birbhum ...	27·83	40·62	32·96	29·04
Bankura ...	24·20	32·69	19·58	22·18
Midnapore ...	25·30	31·02	30·85	26·44
Hooghly ...	21·30	35·80	33·02	31·19
Howrah ...	28·08	34·34	26·60	25·63

In rural areas births and deaths were reported at the police-stations by the chaukidars. The system is still defective, and the figures given above cannot be accepted as even approximately accurate. It is reported that in Burdwan the chaukidars were regularly warned on the parade days to report births and deaths. The entries in the birth and death registers were tested by the Sanitary Inspector, the police-officers, including the District Superintendent of Police, and the Magistrate of the district when in the interior. But the figures do not appear to be reliable. The death-rate for Burdwan district as recorded is only 26 in 1893, although 1893 was by no means a healthy year. In Midnapore the police-stations and outposts, which are the registering circles, were inspected several times during the year by the Magistrate, District Superintendent of Police, Inspector and other officers, and the registers kept there for the purpose were examined. But the death-rate shown, 26·44, does not appear to me to be reliable. In Bankura the registration of births and deaths has somewhat improved, and some help was rendered by the vaccination staff in testing the statistics and bringing omissions to light. Still the death-rate shown, 22·18, is not even approximately correct. The figures showing the death-rate in Howrah is reported to be only 25·63. Those for Birbhum and Hooghly, 29·04 and 31·19, come nearer the mark.

There were eight prosecutions under Act IV (B.C.) of 1873 in Burdwan, against three in the previous year. One person was sentenced to ten days' simple imprisonment and the others were fined. Besides 24 persons were warned. In Birbhum 19 persons were prosecuted—one person was warned and 18 persons fined. There were 20 prosecutions during the year in the town of Bankura. In Midnapore 67 persons were prosecuted, and in Hooghly there were 79 prosecutions. The Collector of Hooghly reports that "registration now depends principally on the village chaukidars. Most of these being still under the Regulations, are not amenable to the above-mentioned Act. With care and discipline, however, they can be got to register very fairly."

The statistics as regards the preliminary and final forecast of crops were collected by Sub-Deputy Collectors and kanungos. They also collected the prices-current statistics. Statistics of important industries were collected by these officers and in some cases by the police. Zamindars were also occasionally consulted in the matter. Enquiries regarding import and export traffic were made by Sub-Deputy Collectors and the kanungos or also by nazirs.

## XII.—CIVIL JUSTICE.

45. Under instructions contained in Government order No. 1T.—G., dated 6th May 1882, and paragraph 2 of Government Resolution No. 762, dated 24th February 1893, the District Judges were addressed by me to furnish this office with statistics of civil suits in their districts in Forms VI, VII and IX. Burdwan, Birbhum, and Hooghly statistics were received in time, and

those from Bankura reached this office only on the 26th instant. The figures for Midnapore have not yet been received.

There was an increase in the number of disposals of cases in the districts of Birbhum, Bankura, and Hooghly; Burdwan shows a slight decrease.

From an extract from the annual administration report of the Civil Courts in Bankura for 1893, which the Judge has kindly forwarded to me, I learn that there has been a gradual increase in the number of suits during the last decade, and the Munsifs have worked hard to keep pace with the institutions. There has been a similar increase in the miscellaneous judicial business and miscellaneous appeals in this district, and also in criminal work. On account of the rapid accumulation of arrears in appellate business, he has asked the High Court to locate a Subordinate Judge permanently in his district.

The District Judge of Birbhum has made remarks on the administration of civil justice, from which I make the following extracts:—

“The principal feature of the year was the development of litigation. The number of suits instituted rose from 7,428 to 8,101. But the civil staff showed itself equal to the occasion, for no less than 8,247 suits were decided, as against 7,772 in the previous year.

“Another remarkable feature of the year’s civil litigation is the growing tendency of litigants to content themselves with the decisions pronounced by the Court of First Instance. That this backwardness in throwing good money after bad is no fortuitous or exceptional phase will appear from the following table:—

	1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.
	1	2	3	4	5	6	7	8
A. Appealable decision in contested suits ...	1,158	1,379	1,300	1,451	1,458	1,337	1,646	1,643
B. Appeal therein ...	297	314	264	456	345	274	319	252
C. Percentage of B to A ...	25·9	22·7	20·3	31·4	23·7	20·4	19·4	15·3

“This is to my mind a highly satisfactory state of things, and the general increase of litigation, in so far as it springs from the same cause, namely, the growth of confidence in our Munsifs’ Courts, is equally satisfactory.”

### XIII.—CRIME.

46. There was some decrease in cognizable crime in Burdwan, notably in serious offences against the person and property. The Magistrate attributes this partly to the evenly distributed rainfall of the year, which afforded the lower classes plenty of field work, and there was less inducement to have recourse to crime. The worst thanas for burglaries are Raniganj and Barakar; large numbers of coolies from Bihar and Chota Nagpur work on the collieries and factories in these thanas, and professional criminals find it easy to take shelter among them in the guise of labourers.

In Birbhum there was a slight increase in cognizable crime, but the number of dacoities was only 5, against 9 of the previous year. Three of these were detected, and 9 persons were convicted. The murder cases, however, were dealt with in a most unsatisfactory manner; eleven out of 12 persons sent up for trial were discharged, and the twelfth prisoner was of unsound mind and incapable of making a defence. The reason alleged for this unsatisfactory result is that the villagers combined to conceal the facts. This, however, is generally the plea put forward by police officers who are wanting in tact and detective ability.

Burglaries also increased in Birbhum, in the north of Rampur Hat subdivision, and the Magistrate reports that the police “seemed powerless to interfere, and were either actually terrorized themselves, or feigned to be.” The Subdivisional Officer, however, prosecuted the local bad characters during the cold weather, and some of the worst of them were imprisoned for three years in default of finding security. The result was a diminution of crime.

In Bankura there was an increase in cognizable crime which the Magistrate attributes partly to high prices which prevailed, and partly to the better reporting of cases. There were 21 dacoities, 10 robberies, and 370 burglaries, against 18, 9 and 279, respectively, of 1892. In nearly one-half of the dacoities

no clue was found, and out of 89 persons sent up in the remaining cases only 19 were convicted. This result is unsatisfactory.

There was a large increase in cognizable crime in Midnapore, and the Magistrate attributes this, I think correctly, to the better reporting of cases. The increase is most marked in offences against property. The Midnapore Police was notorious for suppressing such cases, and Mr. Allen has done much to teach them their duty, and to make them report and enquire into cases as they occur.

There was a slight increase in cognizable crime in Hooghly, but the difference is not much, and does not call for any special comment. In Howrah there was a slight decrease, which likewise calls for no remarks.

47. In Burdwan, out of 146 cases declared false, prosecutions were instituted against the complainants in 20 cases, and 7 persons were convicted. In Birbhum prosecutions were ordered in 13 cases out of 78 declared false, but only one case ended in conviction. In Bankura 77 cases were reported false; prosecutions were instituted in five, and conviction was obtained in one only.

In Midnapore, 196 cases were declared false, and there were 33 prosecutions, and only 7 ended in conviction. Hooghly had 152 false cases, 14 prosecutions and 3 convictions, while in Howrah there were 68 false cases, 5 prosecutions, and 2 convictions.

I have given these figures to show what endeavours were made in each district to repress false cases. The difficulty of obtaining convictions in such cases is well known, but better results might have been secured in most districts with a little more care in selecting cases and initiating proceedings. The Magistrate of Midnapore remarks that the Magistrates of his district were indiscriminate in their selection of cases for prosecution. It is of great importance that a Magistrate should use his discretion very carefully in this matter.

The only general rule which can be laid down is that a prosecution should not be instituted unless the Magistrate is satisfied that the complaint made was substantially and maliciously false, and that there is *prima facie* evidence to prove this. If this rule were carefully observed in selecting cases for prosecution, there would be a greater approach to uniformity in practice, and the result would be more satisfactory.

48. Compensations were paid in 145 cases in 1893, as against 112 cases in the previous year. The number of cases in which a Magistrate is satisfied beyond a doubt that a complaint is false, frivolous and vexatious, is not very large, and compensations therefore cannot be granted in most cases.

49. Attention was paid to the prompt disposal of cases, and, except in Bankura, the proportion of cases which were remanded several times was small. Out of 4,518 cases in the Division only 268, or a little over 5 per cent., were remanded over four times. The proportion of cases remanded over six times varies from 2 per cent. in Midnapore to 5.7 per cent. in Burdwan; while in Bankura it goes up to 15.4 per cent. The reason for this has not been explained.

50. Out of 194 cases committed to sessions 122, or nearly 63 per cent., ended in conviction. The proportion was, however, better in 1892, when 72 per cent. of the cases ended in convictions. Birbhum showed the worst results in the year under review, there being conviction in 14 cases only, against 10 ending in acquittal. Of the persons sent up in this district, 15 were convicted, and no less than 18 acquitted.

51. Enquiry was refused last year in 1,615 cases, against 1,327 in 1892. I think the police do well in refusing enquiry into cases which are of a petty nature, in which the property stolen is of insignificant value and cannot be identified. When such cases, however, multiply in any particular locality, they demand the attention of the police.

52. The number of such cases increased from 187 in 1892 to 337 in 1893. The most marked increase was in Birbhum, for reasons which have been explained before. There

was also a large increase in the number of cases in Midnapore, Bankura, and Howrah; whereas Burdwan showed a decrease.

A great deal depends on a careful selection of the men who should be bound down for good behaviour. When crimes multiply in any locality, when the suspicions of the people point to particular criminals, or notorious gangs, as the authors of those crimes, prosecutions of the ringleaders have the best possible effect. On the other hand, these provisions of the law should never be had recourse to except against such habitual criminals, and even they should be given to understand that they will not be interfered with so long as they choose to keep quite and give no trouble.

It is of the utmost importance to make the police work on these lines. It happens, not unoften, that the police leave alone the real culprits who are preying on society, and send up minor criminals to keep up the average. Society is not protected, and men who are living quietly are harassed because they have old convictions recorded against them. The Magistrate of Birbhum reports that in that district men were often sent up on very insufficient grounds, and Mr. Waller had to pass strict orders to stop the practice. During 1893 the cases sent up by the police showed the worst results in Birbhum, there being 28 discharges against 26 convictions.

On the whole, the proportion of convictions in bad livelihood cases was not unsatisfactory. Two hundred and eight cases ended in conviction, and 109 cases in discharge.

53. Eleven thousand one hundred and three licenses were granted in the year under review, against 10,303 in the previous year. The number is not large considering the population of the Division, and the arms are used generally for self-protection and sometimes for sport. The use of firearms for the purposes of crime or disturbance is unknown.

Arms Act.

Complaints are often made of the trouble and inconvenience felt in getting licenses renewed, and there are proposals under consideration for minimising this inconvenience. On the other hand, the holders of licenses are often very negligent and forgetful in the matter of renewing them, and prosecutions have to be ordered to remind them that the licenses require renewal. There was a large increase in such prosecutions in the Hooghly district; the number of men prosecuted being 100 in 1893, as against 29 only in 1882. It is undesirable to multiply prosecutions, for the Arms Act is an unpopular Act, and a large number of prosecutions under the Act are likely to make it still more unpopular. But the Magistrate of Hooghly explains that the indifference of the people in the matter of renewing licenses had gone so far as to cause serious harassment to the executive in getting licenses renewed, and it was necessary to impress on the public that the law was meant to be obeyed.

#### XIV.—POLICE.

54. The remarks made under the head of *Crime* show that the work of the police during the year has not been altogether satisfactory. They worked with different degrees of success in the different districts.

Mr. Vincent, Magistrate of Burdwan, writes that the police have, on the whole, worked fairly, and have succeeded in repressing dacoity to a great extent.

Mr. Growse, Magistrate of Birbhum, remarks that the police did not work satisfactorily, and were completely demoralized in one outpost where crime prevailed.

Mr. Cornish, Magistrate of Bankura, states that the work at Khatra police-station was very bad, owing to suppression of cases.

Mr. Duke, Magistrate of Hooghly, says that the conduct of the police was on the whole satisfactory during the year. He adds that "there are many lazy, apathetic, or stupid officers, but the general standard is not below the average."

Mr. Collin, Magistrate of Howrah, remarks that the district police worked well during the year, but that the want of a better set of investigating officers is greatly felt.

Mr. Allen, Magistrate of Midnapore, remarks that a decided check has been imposed on the tendency to suppress crime in Midnapore, but it goes on still to some extent.

What Mr. Collin says of Howrah may be said of most districts in Bengal, and the want of a better set of investigating officers is generally felt everywhere. From my experience as a Magistrate, derived in many districts in Bengal, I have found that about one Sub-Inspector in three, or about six or seven in a district with 18 or 20 thanas, are what they all ought to be, *i.e.*, fairly intelligent, tolerably honest, and with a zeal to work well and show good results. With such an officer in a thana, it is possible to successfully cope with crime, to repress burglaries and thefts, and to keep habitual criminals and notorious bad characters in check. The majority of the station officers, however, are more or less apathetic and lazy, or something worse, and it is an uphill work with such officers to deal with crime. I inspected nearly all the thanas of the Burdwan district during the last cold weather, and remarked that in most thanas the police had failed more or less in burglaries and theft cases. It was in exceptional instances that the police honestly and zealously tried to cope with these cases, and I recorded my satisfaction whenever I found evidence of such zealous endeavours having been made.

Two things are necessary to improve the Bengal Police. In the first place, we must allow the Police Sub-Inspector a pay at which it is possible to get educated and intelligent young men, fit for the great powers and responsibilities of thana officers. When we pay less we simply pitchfork inefficient or dishonest men into these responsible posts. In the second place, the police force ought to be handled more intelligently than it is at present. Sub-Inspectors should be treated with greater consideration than they now receive, their good and zealous work should be more carefully noted and rewarded, and their apparently dishonest or inefficient work should be more promptly discouraged than it is at present. They should feel that they are being judged by their work; they should feel a zeal to show good work, a confidence that their good work will be appreciated. A District Magistrate would be more competent, even in addition to his other work, to deal with the police on these lines than District Superintendents of Police generally are. I have not always found District Superintendents able to discriminate between good workers and bad workers, and competent to train subordinates into zealous workers. And yet I feel sure that this could be done, and that by handling the police force with greater intelligence and with more sympathy, it would be possible to inspire them with an emulation and a zeal for doing good work which at present does not generally exist.

55. Progress was made in introducing Act VI in all districts. In Birbhum it was introduced into 320 census villages within the year, and the Magistrate notes it will be further extended during the current year. Some progress was made in Burdwan, and more in Bankura, in this direction, and the latter district has now 1,543 Act VI chaukidars, against 844 Regulation chaukidars. In Hooghly, as in Burdwan, the Regulation chaukidars greatly predominate in number, but the Magistrate remarks that chakran chaukidars are not always appointed now on the occurrence of vacancies, and that a result of this will be to accelerate the introduction of Act VI year after year.

The Magistrate of Midnapore remarks that a good deal of attention has been paid in his district to improve the chaukidari system, and the payment of their salaries is more regular now than it used to be. This is so in other districts also.

As Magistrate of Burdwan, I recorded the following remarks about the work of chaukidars. "On the whole," I stated, "I have no reason to complain of the work done by the chaukidars; they are a useful, willing, and fairly intelligent class of men, and where the thana Sub-Inspectors know how to utilize them, they render excellent service. When thana officers fail in their work, they often seek to shift the blame on the chaukidars."

#### XV.—CRIMINAL JUSTICE.

56. The total number of cases tried by the various courts of Magistrates in this Division was 25,166, against 28,024 in 1893. As in previous years, the Benches of Magistrates and Honorary Magistrates sitting singly assisted

materially; they disposed of 10,573 cases, as against 11,509 cases in the preceding year.

57. Out of 31,775 persons concerned in the above cases, 21,829, or 68·6 per cent., were convicted, against 69 per cent. in the preceding year. The following two statements show the number of cases decided by the stipendiary and Honorary Magistrates in each district and their results:—

DISTRICT.	Number of cases disposed of.	Number of persons tried.	Number of persons convicted.	Number of persons acquitted.	Percentage of conviction.	WITNESSES EXAMINED.	
						Total number.	Number detained over two days.
1	2	3	4	5	6	7	8
<b>STIPENDIARY MAGISTRATES.</b>							
Burdwan ... ..	2,474	3,480	1,970	1,490	.....	8,603	380
Birbhum ... ..	1,860	2,374	1,406	878	.....	6,020	199
Bankura ... ..	1,318	2,029	1,294	734	.....	4,707	893
Midnapore ... ..	4,191	5,679	3,267	2,411	.....	12,908	280
Hoochly ... ..	2,836	3,062	1,923	1,139	.....	8,167	216
Howrah ... ..	2,674	3,734	2,895	839	.....	6,980	118
<b>Total ...</b>	<b>14,598</b>	<b>20,358</b>	<b>12,845</b>	<b>7,492</b>	<b>63·</b>	<b>46,637</b>	<b>2,066</b>
<b>HONORARY MAGISTRATES.</b>							
Burdwan ... ..	2,966	3,229	2,643	566	.....	3,028	101
Birbhum ... ..	231	271	107	164	.....	383	6
Bankura ... ..	174	186	66	120	...	332	60
Midnapore ... ..	1,371	1,511	911	600	.....	2,304	143
Hoochly ... ..	1,754	1,974	1,411	563	.....	3,034	217
Howrah ... ..	4,047	4,240	3,786	454	.....	4,313	124
<b>Total ...</b>	<b>10,573</b>	<b>11,417</b>	<b>8,964</b>	<b>2,426</b>	<b>78·6</b>	<b>13,474</b>	<b>651</b>
<b>GRAND TOTAL ...</b>	<b>25,166</b>	<b>31,775</b>	<b>21,829</b>	<b>9,908</b>	<b>68·6</b>	<b>63,111</b>	<b>2,717</b>

It will be seen from the above figures that the Benches dealt with more than 42 per cent. of the total number of cases. They tried mostly cases of petty offences and breaches of Municipal Act and rules. The percentage of persons convicted by the Benches and Honorary Magistrates sitting singly, was higher than the percentage in cases tried by stipendiary Magistrates. Except in Burdwan and Midnapore, the percentage of convictions in cases tried by stipendiary Magistrates exceeded 60 per cent. in all districts. I joined at Burdwan as Magistrate towards the close of the calendar year, and am unable therefore to account for the small percentage of convictions in that district. The bad result of cases decided by the Bankura Bench is attributed to many cases having been compounded in and out of court.

58. Out of 63,111 witnesses examined, 2,717, or 4·3 per cent., were detained over two days; the stipendiary Magistrates detained 4·1 per cent., while the Honorary Magistrates 4·8 per cent. This shows an improvement as compared with 1892, when the percentage of witnesses detained over two days was 5·6.

It is evident from the figures given above that Magistrates now do their best to dispose of the cases as quickly as is compatible with the efficient discharge of their judicial duties. The pressure of work of different kinds, revenue and executive, often interferes, however, with the prompt disposal of criminal cases, and often leads to judicial work being hurriedly and perfunctorily done.

59. Appendices XI and XII show the criminal work done by the stipendiary and Honorary Magistrates during the year. The Magistrates have not furnished separate figures for Benches sitting daily as distinguished from those which sit at longer intervals, as directed in Government order No. 2643J., dated 30th May 1893. They have been asked to submit figures as soon as possible.

60. As noticed under head "Administrative changes," the Municipal Benches at Burdwan, Raniganj, Kalna, Katwa, and Dainhat were amalgamated with the Independent Benches at those places under Government orders contained in their circular No. 2643J., dated 30th May 1893. The total number of Honorary Magistrates

in this Division on the 1st April 1894 was 366. Three of them exercised first-class powers, 50 exercised second-class, and the rest third-class powers. A large number of Honorary Magistrates in Burdwan and Howrah, viz., 18 in each district, have second-class powers. The three who exercise first-class powers are of Hooghly.

61. The following statement shows the attendance of Honorary Magistrates in this Division during the year:—

DISTRICT.	Number of Honorary Magistrate.	Number of times asked to attend.	Number of times actually attended.	NUMBER OF ABSENCES—		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Burdwan ... ..	157	3,252	1,985	194	1,073	1,267
Birbhum ... ..	26	343	266	32	45	77
Bankura ... ..	34	649	376	48	225	273

Total ... ..	498	10,904	7,261	1,117	2,501	3,618

\* Including voluntary attendance.

There was some improvement in the attendance of Honorary Magistrates in all the districts except Bankura and Howrah.

62. From what I have seen of the different Benches in Burdwan, their judicial work seems on the whole to be satisfactory.

Working of Benches.

I have had occasion, however, to complain of the irregular attendance of some Honorary Magistrates, and the dilatoriness of others in the disposal of cases. Since the abolition of the Municipal Benches and the strengthening of the Independent Benches, I have insisted on the more punctual attendance of Honorary Magistrates, and I believe there has been a great improvement in this respect in Burdwan.

63. The Magistrate of Birbhum writes that there is a tendency in that district to discourage rather than to encourage Benches, possibly because the work is generally light, and the stipendiaries have not found much difficulty in getting through their files.

64. The Magistrate of Hooghly reports that the Honorary Magistrates have afforded material assistance to the stipendiary Magistrates in the administration of criminal justice, so far as regards petty cases capable of being very summarily disposed of. He does not think it possible, however, to entrust important police cases to Benches, and he rightly finds fault with these tribunals for the frequent adjournments granted by them for very inadequate reasons.

65. The Magistrate of Howrah reports that the Benches in his district have worked well and have rendered great assistance to the Magistrates of the district. He writes:—"I beg especially to bring to the notice of the Commissioner the good work done by the Howrah Bench in the disposal of the numerous petty cases which would otherwise have greatly pressed the work of the Deputy Magistrates."

66. The Magistrates of Bankura and Midnapore have not made any special remarks on the working of the Benches in their districts.

67. The absence of public prosecutors in important cases tried by Magistrates is greatly felt. The Court Sub-Inspector is incompetent to prosecute, and Magistrates who sit as Judges often fail to do the duties of a prosecutor at the same time. It is of importance in the interests of justice to appoint Junior Government Pleaders to prosecute all important cases before subordinate Magistrates. They will be expected to study police papers, to consult the District Magistrate and the District Superintendent of Police, if necessary, and to place before the court all the evidence for the prosecution in the manner in which it should be placed. In the absence of such a trained prosecutor, the trying Magistrate often fails to grasp the weight of the evidence for the prosecution, specially when the ablest members of the local bar are

ranged for the defence. Failure of justice in important cases is often the result.

68. Rupees 96,025 was imposed during the year, and the outstanding balance at the close of the preceding year was Rs. 32,819. Therefore the total amount for realization was Rs. 1,28,843. Rupees 83,538 was collected and Rs. 11,037 remitted on appeal or written off as irrecoverable, leaving a balance of Rs. 34,268 at the close of the year. Midnapore has the largest balance, viz. Rs. 14,218. The attention of Magistrates was drawn from time to time to the realization of the outstanding fines. In Bankura unduly heavy fines were imposed in excise cases. They will have to be remitted, as the defaulters are generally poor Bauries or Sonthals on whom, the Magistrate says, the heavy fines were recklessly imposed by some of the subordinate Magistrates.

#### XVI.—REGISTRATION OF DEEDS.

69. The following table shows the number of deeds registered, the total amount of receipts, expenditure and surplus credited to Government during the year 1893-94 in the several districts in this Division:—

DISTRICTS.	Number of deeds registered.	Receipts.	Expenditure.	Surplus credited to Government.
1	2	3	4	5
		Rs.	Rs.	Rs.
Burdwan ...	34,599	41,162	24,661	16,501
Birbhum ...	17,014	18,764	10,568	8,196
Bankura ...	23,889	24,835	15,454	9,381
Midnapore ...	65,422	62,061	35,883	26,178
Hooghly ...	26,276	29,712	18,653	11,059
Howrah ...	17,987	22,905	11,091	11,814
Total ...	185,187	1,99,439	1,16,310	83,129

The number of documents registered shows a steady increase in the last four years. The increase in the year under report was shared by all the districts except Hooghly and Howrah, which show a nominal decrease. The increase is attributed to the following causes:—

1890-91	...	137,897 deeds.	
1891-92	...	152,922 "	
1892-93	...	178,747 "	
1893-94	...	185,187 "	

- (1) Settlement of incumbrances created during the previous year of scarcity.
- (2) Growing tendency of the people in general to acquire lands for agricultural purposes in consequence of the high price of the food-grains.
- (3) Appreciation of the value of registration.

The decrease in Hooghly is attributed to the rich harvest throughout the district during the past year coming after two bad years. The decrease in Howrah is less than two per cent., and calls for no remarks.

The total receipts during the year under report amounted to Rs. 1,99,439, against Rs. 2,11,212 in the previous year; thus they fell by Rs. 11,773. This fall was shared by all the districts, and is due chiefly to the reduction of *ad valorem* fees from 12 annas to 8 annas for deeds the consideration of which does not exceed Rs. 50.

The expenditure was however greater, viz. Rs. 1,16,310, against Rs. 1,05,555 in the previous year. The opening of new offices in Burdwan, Midnapore, and Hooghly, the allowances of the newly-appointed Special Sub-Registrar at Bankura, and the increase in the pay of the Special Sub-Registrar of Midnapore, the increase in the establishment allowances of the Sub-Registrars, and the payment

of extra establishments introduced by Circular No. 22 of 1893, and lastly, the cost of fitting up new iron racks in the Midnapore office, contributed towards the increase.

Three new offices were opened in the district of Burdwan, as also a joint sub-registry office, as stated before in paragraph 43 of this report.

The system of taking finger prints to secure the identification of the executants was formally introduced into the Sadar office under the order of the Government of Bengal.

Finger prints.

The system has also been introduced into the sub-registry offices lying within the jurisdiction of the Jahanabad subdivision, where cases of false personation are very common. It is now under contemplation to introduce the system into the mufassal offices.

On the 10th March 1894, the Inspector-General held a class of instruction.

Class of instruction.

All the Sub-Registrars of the district were present at the meeting, in which the following subjects were discussed: (a) finger prints, (b) new mode of indexing, (c) searching fees under headings H (a) and H (b) of the table of fees, and some other minor points.

Three cases of false personation were instituted during the year under report, and in all of them convictions were obtained at the Sessions Court at Hooghly.

Prosecutions.

No complaint was made during the year against the conduct of the Sub-Registrars in any of the districts of this Division.

The prescribed statement No. XVII of registration of deeds for the year under report is annexed herewith.

#### XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

70. There was no change in the system of administration of land revenue. The total number of estates exceeded that of the previous year by 44. The increase is chiefly due to the addition of a number of estates in class I in the district of Burdwan. These estates, it is said, were actually on the roll before, but were not shown in the former returns. The number now reported is said to have been ascertained by actual counting. A further report on the subject has been called for.

71. Of the total demand of Rs. 85,56,394, Rs. 81,46,268 was collected and Rs. 6,141 was remitted, leaving a balance of Rs. 4,03,985. The percentage of total collections on total demand fell from 96·3 to 95·2. In Birbhum the collection was nearly cent. per cent., in Burdwan it was over 99, in Bankura nearly 99, and in Hooghly 97. Midnapore, as usual, comes last with 86·8 per cent., the small collections being ascribed chiefly to bad crops in low lands on account of floods in this district.

72. The sale law was administered with due leniency and moderation. Recourse to actual sale was had in only 136 cases out of 1,772 defaults, and exemptions were granted even at the last moment.

73. The cess demand increased from Rs. 10,54,533 to Rs. 10,59,814. The increase was the highest in Bankura, where the revaluation was given effect to in certain estates during the year. Raiyati holdings have been treated as tenures in numerous cases for the purpose of this revaluation in Bankura, and this, I think, is wrong. There was some improvement in collection, and the percentage of balance was reduced from 22·3 to 19·21. The improvement was perceptible in all districts except Bankura, where as usual the high percentage is ascribed to the difficulty in the realization of cess from ghatwals.

74. There was some confusion in the administration of the zamindari dak cess owing to the conflict between the rules and orders on the subject. The question whether the transactions should be according to the calendar or the financial year is still under the consideration of the Board. The collections were fairly good, being 93·7 per cent.

Settlement.

75. No important settlement of Government estates was effected during the year. Police thanadari lands, roadside and chur lands, and jalpai lands in Midnapore were settled. The settlement of D schedule embankment lands in the district of Midnapore is at a standstill. The raiyats are hesitating to execute kabuliyats

in consequence of some of the talukdars of Chetua and Ghatal circuit embankments having obtained civil court decrees against Government tenants. Some of the suits instituted by Government against tenants have been decided against Government by the lower courts. Appeals were preferred, but the lower courts' decisions were upheld. No further appeal was recommended by the Superintendent and Remembrancer of Legal Affairs. The settlement of the 18 temporarily-settled estates of Potaspur under Chapter X of the Bengal Tenancy Act is in progress.

76. The number of certificates pending from 1892-93 was 28,585, the number filed during the year was 30,711. The disposals exceeded the institutions by over 4,683, or 15·2 per cent. There was some improvement in the working of the department. Out of 35,394 cases disposed of, payments were made in 30,594, or in over 86 per cent., before recourse to sales. Sales took place in only 477, against 1,442 in the previous year.

The defects which come most frequently to notice in the working of the Certificate Department spring mainly from two causes. The extreme ease with which a certificate may be filed makes it at the same time very open to abuse. A tahsildar in a Government or Ward's estate sends in a long list of defaulting raiyats, or a muharrir in the Road Cess Department prepares a similar list of defaulting cess-payers. It is not the usual practice to examine such lists with the scrutiny which would be necessary if we were to go to a civil court to obtain decrees for the amounts which we claim. The result is that certificates are generally made as a matter of routine, and numerous mistakes creep in, entailing hardship on those against whom certificates are filed. I myself think it would be a great improvement, both in principle and in practice, if we had to go to a civil court with our lists, and if we had to prove them by some sort of declaration or evidence before obtaining certificates. This would make our officers and subordinates more careful, and the obtaining of decrees would not be a mere matter of routine as it is now. The procedure indicated would not cause delay in realization, as the Collector might keep in his hands the power to execute such certificates, as he does now, under the present law. It is only in the matter of making the decree or the certificate that I would transfer the power now exercised by a subordinate of the Collector (who is virtually the plaintiff) to a Court specially appointed for the purpose.

Another matter which gives rise to complaints is that our processes are not properly served. It is notorious that processes entrusted to a collectorate peon are not as safe as letters entrusted to a postal peon for delivery. Letters posted seldom miscarry, while the vague reports of collectorate peons about the absence of the parties on whom processes should have been served personally, afford just grounds for suspicion that the peons are extremely careless in the performance of their work. When peons are suspended for frequent reports of this nature, their successors generally manage to find the parties at home and serve the processes personally. Recourse to the post-office for service of such notices and processes as can be conveniently served through that channel, would be a move in the right direction.

Land acquisition. 77. The new Act I of 1894 had effect from March 1894.

Proceedings for the acquisition of 196 acres of land under Act X of 1870 were confirmed by the Board of Revenue during 1894. The following are the important projects the proceedings of which were confirmed by the Board:—

		Rs.
1.	Foreshore road at Howrah ...	35,000
2.	For water-supply at Howrah ...	8,000
3.	Volunteer rifle range at Leluah ...	2,289
4.	Drain from Serampore to Konnagore ...	5,761
5.	Cholera camp for Midnapore Jail ...	1,078
6.	Balighai Branch Canal, Midnapore... ..	3,161
7.	Jheria extension of the East Indian Railway ...	18,426
8.	Loco. quarters at Asansol ...	10,023

The total cost of acquisition was Rs. 92,025. Abatement of revenue to the extent of Rs. 82 was allowed on account of land acquired for Government, and an abatement of rent in khas mahals to the extent of Rs. 29 for land taken up for

municipalities. The average cost per acre was Rs. 470, against Rs. 312 in the preceding year. The higher cost paid during the year was due to lands acquired in towns. In one single case in Howrah Rs. 35,000 had to be paid for nine poles of land.

Partition.

78. Only two cases of partition are pending in Hooghly. There were no such cases in other

districts.

79. The percentage of mutations effected on initial registration fell in Burdwan from 15·8 to 14·6, in Birbhum it rose from 5·8 to 7·8, and in Bankura from 27·2 to 48·7. In

Land registration.

Midnapore there was a falling off from 4·2 to 3·9, and in Hooghly from 4·9 to 4·2. The recent ruling of the High Court, that unless a proprietor's name is registered he is not entitled to sue for rent, is likely to have some beneficial effect.

80. The Act appears to have worked smoothly. The District Judge of Birbhum says that the general result of the Act may be regarded as favourable to the tenants; the selling

Bengal Tenancy Act.

value of rights of occupancy has risen very greatly since 1885.

In my last cold-weather tour as Collector of Burdwan I was impressed with the necessity of a revision of the Act so as to give protection to the raiyats with regard to their homestead lands. A raiyat acquires the right of occupancy with regard to his cultivated land, but acquires no such right with regard to his homestead. I was informed that zamindars are beginning to take advantage of this, and when they are unable to oust a raiyat from his field, they sometimes secure their object by turning him out from his homestead. The matter is one which deserves serious attention, and I think some protection should be afforded to the raiyat in respect to his homestead.

81. No work of importance was undertaken last year in any of the districts of this Division. In Bankura the embankment

Embankment.

constructed for the protection of Government estates Pithampur and Rajabari at a cost of Rs. 2,725, having proved useless, has been ordered to be abandoned. In Midnapore the embankments are maintained under the contract system. The Government demand for maintaining them was Rs. 75,648. Of this sum Rs. 56,892 was realized, Rs. 1,728 is due from Government and wards' estates, and the remainder, Rs. 17,028, is under realization under the certificate procedure.

82. There are four drainage works in this Division, all in the district of Hooghly, viz., Dankuni, Howrah, Rajapur, and

Drainage.

Ampta. The first three have been completed, and

the last is still in the hands of the Public Works Department.

The original cost of the Dankuni project has been realised. The maintenance charge has been capitalised for Rs. 65,344, of which Rs. 45,058 was collected between January 1892 and March 1894; out of the balance, Rs. 3,228 is due from Government, which will be adjusted by transfer, and the remainder Rs. 17,018 is likely to be realised in four years.

The assessment of the land benefited and the apportionment of cost of the Howrah scheme have been completed. The capitalisation of both the original cost and maintenance charge has been sanctioned by Government in March 1894 for Rs. 5,24,924. Out of this sum Rs. 4,37,149 represents principal and Rs. 87,775 interest.

The cadastral survey and kharanpuri of the Rajapur scheme are expected to be completed before the rains, but not the final attestation. This, however, is being pushed on rapidly. The cost of the scheme up to December 1894 amounted to Rs. 9,39,366.

The Ampta scheme, as already stated, is still in the hands of the Public Works Department. The necessity for carrying it out was demonstrated by the last year's rains. In the absence of proper drainage, crops here are safe only in years of exceptional drought; in other years they are flooded and destroyed.

83. A sum of Rs. 38,500 was allotted to this Division, but only Rs. 25,434 was advanced. As the year was one of good

Advances under Land Improvement and Agricultural Loans Act.

harvest, the number of applications was comparatively small, and several had to be rejected owing

to insufficiency of the security offered. The Collector of Burdwan thinks that "loans are granted very much too often here." He therefore intends to restrict these loans considerably, only granting them in cases of need, where, for special reasons, the borrower cannot get money from the local mahajans. Looking, however, at the amount advanced in Burdwan, viz. Rs. 2,075, I hardly think it can be said that loans have been granted in Burdwan too often, and I scarcely think it is the intention of the Act to restrict the loans to the cases to which the Collector wishes to restrict them.

The realisation of former advances was poor in Bankura; out of Rs. 30,736, which fell due under both the Acts, Rs. 12,286 only was realised, leaving a balance of Rs. 18,450. The short collections are attributed to the bad harvests of the two preceding years, the debtors were in straitened circumstances, and the last year's crop, though a good one, did not leave sufficient margin to pay the Government demand after satisfying landlords and local creditors. Certificates have been filed for the realisation of Government demands.

#### XVIII.—ATTACHED ESTATES AND WARDS' ESTATES.

84. The number of estates under the management of the Revenue authorities during the year was the same as in the previous year, viz. 11. Two estates were released from the Court's management and two were added; one of them, Jalamuta, has been attached for non-payment of Government revenue due from an estate which has been released.

85. The most important estate under the management of the Court of Wards in this Division is the Burdwan Raj estate. Raja Bun Behary Kapur continued to be the sole manager of the Burdwan Raj. He managed the estate with the help of two assistant managers, who are in charge of separate departments. His management shows signs of gradual improvement, although there is room for further improvements in some of the departments. The new system of account-keeping introduced is now appreciated by the Raj.

As is usual with zamindars, the Raj is averse to write off the rents that are irrecoverable through the death and desertion of raiyats, or even those barred by limitation. During the year under report a special officer was appointed in addition to the circle officer to help in squaring these accounts and to expedite the submission of remission statements. Rupees 1,24,079 was remitted, against Rs. 71,973 in the previous year, for the entire estate. The percentage of collections on the current demand was 102·09, against 99·7 in the preceding year. This result is satisfactory and is creditable to the management.

The audit of the Raj was, as before, conducted by a Deputy Collector. The examination of the accounts down to February 1894 was completed during the year. The progress in the disposal of objections was not, however, satisfactory owing, it is said, to the manager's inability to furnish prompt explanations. Only one case of fraud or over-charge in the bills in connection with law suits came to light. In addition to the monthly audit conducted by the Deputy Collector, the accounts for 1892-93 were audited by the Local Auditor, Babu Ashutosh Singh. His report is not yet to hand.

The public institutions maintained by the Raj continued to be well managed. The state of the Raj College was found to be satisfactory by Dr. C. A. Martin, the Officiating Director of Public Instruction, by whom it was inspected within the year. The Officiating Inspector-General of Civil Hospitals also visited the Raj Charitable Dispensary at Burdwan, and was pleased with the manner in which this dispensary is conducted under the able management of the Assistant Surgeon, Babu Mohendra Lal Gupta.

The Raj office building is still under construction by Messrs. Burn and Company under the supervision of the District Engineer. It is hoped that it will be completed shortly.

The Maharaj Kumar is taught English by Babu Ram Narain Dutt, and Sanskrit and Bengali by two pandits. The progress made by him during the year was satisfactory, and I was pleased with his progress when I examined him lately. Arrangements are being made for the appointment of an English companion to the Kumar.

The Burdwan Raj khas mahals, which were under settlement during the year, are situated in the districts of Burdwan and Hooghly. In these districts

105 villages with an area of 54,762 acres had to be settled. Up to the close of the year attestation was completed in 78 villages with an area of 42,777 acres. Draft records of rights were published in 68 villages with an area of 37,256, and final records were published in 51 villages with an area of 22,849 acres.

The case work done during the year in completing the records for draft publication consisted of 4,322 objections, which were summarily disposed of at the time of attestation; 1,104 objections were heard under section 105, while 25 disputes were tried as civil suits under section 106 of the Bengal Tenancy Act.

The cost of settlement during the year amounted to Rs. 10,837, and the total cost from the commencement of the work in Burdwan and Hooghly down to 31st March 1894, came to Rs. 22,816. An increase of Rs. 1,872 in rental has been obtained in the two districts mentioned above with an aggregate present rental of Rs. 59,100. The increase has resulted entirely from amicable settlement. *Solehnamahs* or agreements were filed by tenants through the exertion of the Raj officials. Credit is due to Mr. Srinath Dutt, Assistant Manager, for this satisfactory result.

The settlement of the Sujamuta estate was completed in the previous year, but some of the settlement appeals made to the High Court by the Mudhakhali raiyats are still pending final settlement.

86. There were nine estates under the Court of Wards in Midnapore district at the commencement of the year, excluding Sujamuta, which is a part of the Burdwan Raj estate. Of these nine estates, Basudebpur and Pathra were released within the year. On the other hand, Jalamuta was attached for revenue due from Basudebpur, and a new estate, Jamboni, was brought under our administration, so that the number of estates remained the same as before. The estates Basudebpur, Berabaria, Nayagram, and Belki were involved in debts contracted before they came under the Court of Wards. Basudebpur was released just before the close of the year in an insolvent state, a portion of the Government revenue remained unpaid, and for this the estate of Jalamuta has been attached. Berabaria is hopelessly insolvent, and is about to be released in that state. The unpaid balance of the debts due by the Nayagram estate are being paid year by year, and are expected to be paid off in five or six years more. The debts due by the Belki estate were reduced from Rs. 2,505 to Rs. 1,817 during the year, and the balance will be paid off by the sale of some of the properties belonging to the estate.

Among the solvent estates in Midnapore, Malighati and Turka are large, and each of these is managed by a separate manager. Moheshpur was managed by the manager of Basudebpur, and Barattarhingly is managed by the manager of Nayagram.

The percentage of total collections on total demand in Midnapore during the year was 35·7, against 39·4 in the previous year. This poor result is partly due to the damage caused by floods in Midnapore district, partly to the laxity and inefficiency of the managers.

The settlement of some of the mahals of the Turka and Malighati estates was undertaken during the latter end of the year. The work is in progress.

87. The Maliara estate in the district of Bankura does not call for any special remarks; it was brought under our administration in January 1893.

Howrah has one estate under the Court of Wards, viz., Sankurpur managed from the Rajshahi Division. Hooghly and Birbhum have none.

The accompanying statement No. XXVII will show the demand, collections, remissions, balances, and expenditure of the several wards' estates in this Division during the year under report.

88. From what has been stated in paragraph 86, it will appear that the administration of wards' estates in the Midnapore district has not been as satisfactory as might be expected. In taking involved estates under our administration we hope to improve their condition and to make them over in a solvent state. We have not done this either in respect of Basudebpur or in respect of Berabaria, which were in our hands for years. And the condition of some other estates which were released within the past few years was quite as bad at the time of release. It is to be hoped that we shall succeed better in future, and that all the estates in Midnapore now under the Court of Wards will improve by our administration.

## XIX.—EXCISE.

89. During the last year 2,930 shops were opened in this Division, as against 2,827 and 2,946 in the two preceding years. Tari shops are no longer settled by auction. They were settled generally with their former holders on their submitting a schedule of trees to be tapped. The tree-tax system has not worked well in the districts of Burdwan and Midnapore; but the increase in tari revenue in Howrah is attributed to this new system of regulating the fees, as well as to the poorer classes resorting more to tari owing to the rise in the price of country liquor. I am not in a position yet to give any opinion on the tree-tax system.

The total revenue amounted to Rs. 11,72,190, against Rs. 11,55,147 in the preceding year. The revenue derived from country spirit shows a decrease, while there is increase under all other heads. The miscellaneous revenue shows a slight falling off.

The decrease in the country spirit revenue from Rs. 3,33,172 in 1892-93 to Rs. 3,10,984 in the last year, was shared by all the districts except Birbhum. It is attributed to the high price of rice that prevailed in the earlier part of the year as well as to other causes; but I think the main reason is that the poorer classes are taking to cheaper liquor like pachwai. I consider this change an unmixed blessing, for pachwai is food, and it does not demoralise the lower classes of people to the same extent as distilled liquor. In Midnapore the decrease is also attributed to the larger consumption of rum and imported liquor. Considering the very inferior and almost obnoxious imported liquor sold at cheap prices in the mufassal, the increase in its sale is to be regretted.

The Collector of Hooghly reports on the difficulty of transport of country liquor from Hooghly to Jahanabad, and has made proposals to reduce both the rate of duty and license fees in Jahanabad. The difficulty will disappear when Jahanabad is connected with Burdwan by a continuous line of pukka road.

The steady expansion of the pachwai revenue received a check last year owing to the dearness of the price of rice. The revenue decreased in all districts except in Birbhum, where the revenue increased from Rs. 95,323 to Rs. 1,12,619, and the gain in this district more than compensated the loss in the other districts. The total pachwai revenue in this Division rose from Rs. 2,22,699 to Rs. 2,35,082.

There was again an increase in the ganja revenue, which amounted to Rs. 1,69,106 last year, as against Rs. 1,57,089 in the previous year. It is satisfactory, however, that this increase was obtained, even though the consumption was less. The increase was due to the raising of the duty on ganja and to the settlement of shops at increased rates.

Several cases of illicit manufacture of madak were detected, and many new shops for its sale have been sanctioned for the current year. The fee fixed, Rs. 50, for the domestic use of this article is very high for the class of people who generally use it. The Collector of Midnapore writes:—"The fee fixed is so high that not a single license was taken out." Rupees 12 perhaps would be adequately high fee for the poorer consumers.

Hooghly shows a marked inactivity in prosecuting cases; there were only 73 cases last year, as against 136 in the previous year. No reason is given for this falling off. Bankura also shows some decrease. The figures for the other districts call for no remark.

## XX.—STAMPS.

90. The total revenue from the sale of stamps during the year under review amounted to Rs. 19,61,616, against Rs. 18,82,919 in the preceding year, thus showing an increase of Rs. 78,697. In the two preceding years also there was increase, and the revenue is steadily expanding. As compared with the preceding year, all classes of stamps show an increase, except notarial stamps.

The annexed table exhibits the revenue derived from the sales of the different descriptions of stamps in the districts of this Division during the year:—

*Statement showing Stamp revenue during the year 1893-94.*

DISTRICT.	Court fees.	Copies.	Non-judicial adhesive.	Receipt.	Non-judicial impressed.	General.	Court paper.	Total.	REMARKS.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Burdwan ...	3,02,796	19,088	10	5,601	72,895	4,268	6,307	4,10,855	
Birbhum ...	1,38,812	8,370	...	2,192	34,718	1,395	3,570	1,89,057	
Bankura ...	1,69,427	13,133	1	1,263	39,422	1,643	3,667	2,28,556	
Midnapore ...	4,24,473	26,479	...	4,316	1,13,669	3,575	10,875	5,82,386	
Hooghly ...	2,84,303	18,937	12	3,526	47,676	4,212	5,115	3,67,781	
Howrah ...	1,31,361	7,127	1	4,015	35,495	1,735	3,757	1,83,481	
Divisional total for 1893-94.	14,55,161	92,134	24	20,313	3,43,865	16,828	33,291	19,61,616	
Divisional total for 1892-93.	13,91,383	89,992	34	19,577	3,32,036	16,332	33,565	18,82,919	

As in the previous year, the increase mainly occurred in court-fees, and the increase is observable in all districts except Howrah. The increase in the number of civil suits, and in the number of certificates for the recovery of cesses is alleged to account for this increase.

91. The increase in the sale of non-judicial stamps is attributed to the registration of a larger number of deeds and to the increase in the number of loan transactions, consequent on the poor harvests of the preceding two years.

The increase in the sale of one-anna revenue stamps, commonly known as receipt stamps, is ascribed to the better observance of the provisions of law by all classes of the people.

92. The number of cases in which duty and penalty were levied by Civil Courts fell from 181 to 159, while those in which Collectors levied the duty and penalty rose from 415 to 435. Rupees 1,049 was levied as duty and penalty by civil courts, and Rs. 3,144 by Collectors, making a total of Rs. 4,193, against Rs. 4,297 in the preceding year. The fluctuations are small and require no explanation.

93. The number of prosecutions instituted during the year for various breaches of the provisions of the stamp law was 42, against 44 in the preceding year, viz., 10 in Burdwan, 7 in Birbhum, 2 in Bankura, 6 in Midnapore, 14 in Hooghly, and 3 in Howrah. Of the 42 persons brought to trial, 20 only were convicted. The fines imposed and rewards paid were Rs. 169 and Rs. 2-8, against Rs. 423 and Rs. 5, respectively, in the preceding year. All the District Officers of the Division have been reminded that activity in the detection of evasion of the law must to a great extent depend on the encouragement afforded by a liberal distribution of rewards.

#### XXI.—INCOME-TAX.

94. The final demand on account of tax was Rs. 2,12,262 on 9,343 persons, against Rs. 2,03,357 on 9,063 persons in the preceding year, showing an increase of Rs. 8,905 and of 280 persons. As in the previous year, there was increase both in the demand and in the number of assesses in all the districts of the Division except in Howrah, where there was again a small decrease of Rs. 36 and 14 assesses. The increased demand is due to the revision of assessments in towns and in important trade centres.

The decrease in Howrah is attributed to exemptions granted in the lower classes on objection. The collection amounted to Rs. 2,07,230, and the balance on the 31st March amounted to Rs. 5,032 only, and the percentage of collection on the final demand was thus 97·6. Of this balance, Rs. 4,539 is reported to be good and under realisation. One thousand and thirty-three objections were filed, against 982 in the preceding year. The increase is due to the assessment of new persons, and also to the enhancement of tax in some cases on revision. Judging from the appeals which come before me for hearing, I cannot say that the assessments and enhancements have always been carefully made, or that the assessors tried to obtain any clear data for coming to their findings. Assessment in most cases must be guess work only, but even this guess work was often very perfunctorily done. The attention of Deputy Collectors has been directed to making careful enquiries when objections are preferred.

As the tax does not touch the large class of cultivators and labourers in the country, it cannot be said to be widely unpopular. It is far less unpopular than the Road Cess.

The prescribed statement is appended. The districts of Hooghly and Howrah were amalgamated for the purpose of income-tax, and the same Deputy Collector and assessor managed the work of both the districts.

One assessor also worked in the districts of Bankura and Birbhum. I do not think the amalgamation of districts under the same officers has produced good results.

#### XXII.—MONETARY ARRANGEMENTS.

95. Currency notes to the value of Rs. 77,23,615 were received and to the value of Rs. 74,73,295 were issued in the treasuries of the Division, against Rs. 72,61,770 and Rs. 73,68,885 respectively in 1892-93, showing an increase of Rs. 4,61,645 in receipts and Rs. 1,04,410 in issues. The fluctuations are ascribed to the increasing appreciation by the public of the use of notes for making remittances. The introduction of the enlarged money-order system has not apparently yet affected the transactions in notes; as it is cheaper to send money by currency notes than by money-order.

96. Some of the district officers having failed to give the total number of money-orders of all descriptions issued, I have to confine my remarks to money-orders issued for the payment of land revenue and rent.

Land revenue money-orders numbered 36,775 covering Rs. 2,45,493, against 31,915 and Rs. 2,36,156, showing an increase both in the number of orders and in the amount remitted. The increase was mainly contributed by the advanced districts of Burdwan and Hooghly, and this shows that the facilities afforded by the system are most appreciated in the more advanced parts of the Division. In Midnapore there was a large increase in the number of money-orders sent, although there was a decrease in the amount; while in Birbhum the number of orders was less, but the amount remitted was larger. The backward district of Bankura shows a decrease in both.

The system of payment of rent by money-orders seems to be rapidly growing in popularity. There was increase both in the number of money-orders and in the amount covered by them. It has, however, not found much favour with the landlords, for the percentage of refusals continues to be on the increase. All the districts show an increase in the number of refusals except Bankura, where there was a slight decrease.

The Collector of Burdwan thinks that the inability of the amla to exact undue payment from the raiyats is frequently the cause of refusals. The Collector of Midnapore thinks that the landlords are still under the impression that by accepting the amount sent by money-orders they might be held to admit the jama entered in the money-orders by their tenants. There is much force in both these reasons assigned for the refusal of money-orders.

97. The Post Office Savings Bank, as already reported, has proved beneficial to the middle classes, specially to the poorer Government servants. The districts of Midnapore and Hooghly have not furnished any figures under this head; the other districts, except Howrah, show a decrease in the amount deposited. The withdrawals increased in all districts. The Collectors of Birbhum and Bankura attribute it to high prices of food and costly living.

The interest on deposits has, since the close of the year, been reduced from  $3\frac{3}{4}$  to  $3\frac{1}{8}$  per cent. per annum, and this must necessarily cause a reduction in the amount of deposit.

## XXIII.—RAILWAY AND OTHER PUBLIC WORKS.

98. The construction of the Tarakeswar-Mugra Steam Tramway could not be completed within the time sanctioned, and a further extension of time has been recommended. The Collector hopes that the line will open for traffic in the beginning of the next year. The Taposi line, the construction of which commenced in 1892-93, has lately been opened for traffic. The portion of Jheria line lying within the district of Burdwan has also been finished.

The East Coast Railway between Bezwada on the Krisna and Cuttack on the Mahanadi, which is under construction, is proposed to be extended to Calcutta *via* Midnapore. There is also a proposal for constructing a cross country line from Midnapore to Sini on the Bengal-Nagpur line. Detailed surveys with estimate of cost have been made for the Cuttack-Calcutta extension, but the construction of the line has not yet been sanctioned by the Government of India. A draft agreement deed between the Municipal Commissioners of Howrah and the promoters of the Howrah-Ampta Tramway for the working of the line, has been submitted to Government for approval.

The following table shows the number of accidents and obstructions in the railway line. There was a considerable increase in the number of accidents:—

DISTRICT.	PERSONS.				TRAINS.				REMARKS.
	Killed.		Wounded.		Accidents.		Obstructions.		
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	
1	2	3	4	5	6	7	8	9	10
Burdwan ...	28	31	8	21	9	46	6	...	* Including obstructions.
Birbhum ...	3	3	2	...	...	...	1	1	
Hooghly ...	3	3	1	7	5	10	...	...	
Howrah ...	3	...	10	...	6*	...	...	...	
Total ...	37	37	21	28	20	56	7	1	

Two accidents in Burdwan and one in Hooghly deserve notice. A cart with three passengers was struck on the permanent-way by a goods train and was dragged about 25 yards ahead. The gate was open, and the occupants of the cart were asleep. One of the passengers was killed and one injured. The gateman was criminally prosecuted, and was convicted and sentenced to one year's rigorous imprisonment. The second accident took place at the Damoda railway station of the Bengal-Nagpur Railway line; a shunter was killed while getting out from between a couple of waggons, owing to negligence of the rules for shunting. The third accident occurred at the Mugra railway station. A down passenger train on entering the Mugra station collided with five trucks which had been driven by a severe storm out of the goods shed siding to the down line. All the coaching vehicles of the train were more or less damaged, and one third-class carriage had the entire side torn off, and two passengers were injured. The station-master, who was to blame for the accident, was prosecuted under section 101 of the Railway Act and sentenced to simple imprisonment for two weeks and to pay a fine of Rs. 50; in default to two weeks' further imprisonment.

## XXIV.—COMMUNICATIONS.

99. As remarked last year, the districts of this Division are fairly provided with means of communication. The division is traversed by rail, river, and water-courses. The steamer service connects 10 out of the 17 district and sub-divisional head-quarters. The East Indian Railway passes through six district and sub-divisional head-quarters. The head-quarters of Bankura, Vishnupur, and Jahanabad are the three outlying stations. Bankura town is situated at a distance of 30 miles from the nearest railway station at Raniganj. There is a metalled road from Raniganj to Midnapore passing through the towns of Bankura and Vishnupur, and hackney carriages ply regularly between Raniganj and Bankura, but in the rainy season the crossing of river Damodar gives trouble. The subdivision of Jahanabad is the worst off in respect of communication. Though a subdivision of Hooghly, Jahanabad is reached more easily from Burdwan, and a portion of the Burdwan-Jahanabad road is pukka. Since taking charge of the Division I have suggested to the District Boards of Burdwan and Hooghly the necessity of metalling the remainder of this road, and my suggestion has been accepted.

The Bengal-Nagpur Railway and the Tarakeswar Railway have greatly facilitated communication.

The funds of District Boards are exhausted in maintaining the existing roads and do not permit the opening out of new roads. The Magistrate of Burdwan remarks that "this is a serious matter, as it means that there is no probability of communications being improved materially for many years to come unless some funds are available."

The condition of the roads in Birbhum and of some roads in Midnapore is unfavourably reported on. The condition of the Birbhum roads is said to be worse than it was some years ago, and this is a fact which does not reflect credit on the District Engineer. In Midnapore, the Provincial roads, 114 miles in length, are not kept in such good repair as those in the Puri district; the cost of maintenance and repair exceeded Rs. 445 per mile, and the Magistrate writes that an additional grant is urgently necessary, which he thinks may be obtained by a deduction from the grant for the Puri roads. The roads in Howrah, which suffered much under the late supervisor in charge, have been greatly improved by the new District Engineer, though much has yet to be done.

Among the important public works undertaken or executed during the year were—(1) the completion of a feeder road one mile in length from the 87th mile of the Grand Trunk Road to the Galsi station on the East Indian Railway; (2) communication of the Victoria bridge on the 9th mile of Burdwan to Katwa road; (3) completion of a road from Bagnapara to Kalua, three miles in length; and (4) proceedings to acquire land for a feeder road, three miles in length, from Devipur railway station, at the expense of a zamindar, which were in progress. All these are in Burdwan. The construction of a road in Bankura, which was first taken in hand some eight years ago, was brought to a completion. The other works were the construction of culverts, wooden bridges, embanking and metalling roads, and repairing roads and bridges.

The subjoined table shows the amount expended in the several districts on original works and repairs and on village roads:—

DISTRICTS.	Original works.		Repairs.		Village roads.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan ... ..	29,252	25,787	1,53,782	1,26,932	5,761	7,193
Birbhum ... ..	7,117	2,047	27,864	24,307	3,310	4,284
Bankura ... ..	6,830	1,905	31,107	34,218	1,322	2,345
Midnapore ... ..	15,670	9,021	77,986	77,316	13,252	16,334
Hooghly ... ..	10,255	4,809	91,008	85,621	1,483	3,879
Howrah ... ..	17,209	9,583	5,360	20,269	2,016	4,500
Total ... ..	86,413	51,152	3,87,057	3,68,663	27,144	37,544

100. The amounts noted in the margin were expended on planting trees on roadsides and maintaining them. The Magistrate of Midnapore has not furnished information on the subject. The District Boards of Burdwan and Hooghly appear to have paid attention to arboriculture.		
	1892-93.	1893-94.

Howrah ...	17	470

#### XXV.—WORKING OF THE LODGING-HOUSE ACT.

101. There has been no change in the operation of this Act, which was in force in this Division in Garhbeta and Dantan in Midnapore district and in Ulubaria in Howrah district.

The lodging-houses in Garhbeta are little used by pilgrims: the pilgrims generally prefer to camp under trees. Litigants or applicants for registration generally occupy the lodging-houses. The total income of this town including the balance was Rs. 531, of which Rs. 87 was expended on conservancy and Rs. 14 was paid to the Health Officer. A balance of Rs. 428 was left at the close of the year. The tendency on the part of the Committee to spend the fund on charitable relief has been checked.

At Dantan there were 38 lodging-houses. The total income, including balance of previous year, amounted to Rs. 957, of which Rs. 100 was spent towards the construction of an in-door hospital for invalid pilgrims, Rs. 63 on medicine, Rs. 84 as allowance to the Health Officer, and Rs. 61 only on conservancy, and there was a surplus balance of Rs. 614 at the close of the year. The tendency to spend the fund on charitable relief has been checked.

Ulubaria had 33 lodging-houses. The total receipts including balance were Rs. 610, of which Rs. 216 was expended on conservancy, and there was a balance of Rs. 221 at the close of the year. The town, being the head-quarters of a subdivision, was well looked after. Cholera once broke out in an epidemic form, but early measures were taken to arrest its progress. The disease is generally spread there by the pilgrims. To prevent this the Sub-divisional Officer has arranged with Messrs. Hoare, Miller and Company to take the pilgrims to Calcutta without landing them in the town.

New bye laws have been framed for all these towns.

#### XXVI.—EDUCATION.

102. There was an increase in the number of schools and patshalas, from 10,883 to 10,944, but the number of pupils attending them diminished from 300,400 to 299,187; the decrease was, I believe, due to the unhealthiness of the last months of the year.

The decrease in the number of pupils was shared by all the districts except Birbhum and Bankura, which are comparatively healthy, and in both of which there was an increase.

103. The total expenditure on education in this Division amounted to Rs. 11,35,578, as compared with Rs. 11,17,132, showing an increase of Rs. 18,446. The expenditure from Provincial revenues rose from Rs. 80,415 to Rs. 81,252, and that from public sources, including district and municipal funds, rose from Rs. 10,36,717 to Rs. 10,54,326, or by Rs. 17,609. The high schools cost Rs. 2,91,990, the middle schools Rs. 2,42,117, primary schools Rs. 5,74,289, and special schools Rs. 27,182.

The allotments to high schools have decreased; the allotments to the middle and primary schools have much increased. The municipalities have increased their allotments to primary education.

104. There was a loss of two high schools during the year, and the total number of pupils receiving high education fell from 14,652 to 14,055. The Magistrate of Hooghly, where the decrease was most marked, attributes it to high prices, which compelled the poorer class of people to withdraw their boys from schools, and also to the general prevalence of fever, which greatly reduced the attendance. In Midnapore the loss was due to the year being exceptionally unhealthy.

The results of both the F.A. and the University Entrance Examination contrast very unfavourably with that in the preceding year.

In Burdwan, out of 88 boys who appeared at the F.A. Examination, only 26 were successful, against 34 out of 87 in 1892-93; in Midnapore only 9 passed out of 25, against 12 out of 30. The result of Hooghly is not known.

The following table exhibits the result of the University Entrance Examination as compared with that of the preceding year:—

DISTRICTS.	1892-93.		1893-94.	
	Number of competitors.	Number of successful students.	Number of competitors.	Number of successful students.
1	2	3	4	5
Burdwan ...	194	113	139	57
Birbhum ...	33	31	30	14
Bankura ...	81	36	67	15
Midnapore ...	25	25	23	15
Hooghly ...	233	155	210	100
Howrah ...	143	81	97	44
Total ...	709	441	566	245

The result, which was generally unsatisfactory, is believed by some of the Magistrates to be due to more difficult questions having been set at the last examination. The number of competitors was also much fewer in Burdwan and Howrah.

105. The number of middle English and vernacular schools in the Division increased by 6 only, and the number of pupils attending them by 189. The result of middle scholarship examination was also bad. The subjoined table compares the result of the last two years:—

DISTRICTS.	1892-93.		1893-94.	
	Competed.	Passed.	Competed.	Passed.
1	2	3	4	5
Burdwan ...	412	253	401	185
Birbhum ...	97	63	112	75
Bankura ...	264	121	255	93
Midnapore ...	259	153	256	120
Hooghly ...	219	139	214	122
Howrah ...	121	97	117	72
Total ...	1,372	832	1,355	667

The Magistrate of Birbhum ascribes the bad result to the fact that English is more or less indifferently taught in these schools, but this reason cannot specially affect the result of the year under report, as compared with the previous year. The Magistrate of Midnapore attributes the bad result to the examination being held in the most unhealthy season of the year.

106. The number of primary schools increased from 10,365 to 10,425 or by 60, but there was a loss of 823 pupils sustained by all the districts except Birbhum and Bankura, where there was an increase. The Magistrate of Midnapore attributes this to the prevalence of cholera and influenza towards the end of the year.

Except Howrah, of which the figures have not been furnished, the results of both the upper and lower primary examinations were satisfactory. The number of pupils who competed and passed at these examinations are given below:—

DISTRICTS.	UPPER PRIMARY.				LOWER PRIMARY.			
	1892-93.		1893-94.		1892-93.		1893-94.	
	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.
1	2	3	4	5	6	7	8	9
Burdwan ...	477	238	521	261	1,310	478	1,159	680
Birbhum ...	224	159	242	178	679	283	747	392
Bankura ...	365	187	433	206	1,599	598	1,959	953
Midnapore ...	463	260	562	316	2,833	1,285	2,830	1,873
Hooghly ...	206	92	207	146	1,489	586	1,190	734
Howrah ...	99	75	109	64	509	90	476	278
Total ...	1,834	1,011	2,074	1,171	8,419	3,320	8,361	4,910

The rule of payment by result was largely given effect to in Birbhum and Bankura.

107. Education among the females, it appears, made some advance. There were 407 schools attended by 8,116 girls, against 370 schools and 8,024 girls in 1892-93; besides 9,267 girls attended boys' schools. The increase was contributed to by all the districts. Fifty-seven girls from Burdwan, 20 from Birbhum, 87 from Midnapore, and 36 from Hooghly appeared at the Uttarpara Hitakari Sabha scholarship examination; the result is not known.

108. There was a decrease in the number of Muhammadan pupils attending the various classes of schools, from 30,883 to 29,120. The decrease occurred in all the districts except Birbhum, which shows an increase. The decrease in Midnapore is said to be due to the year being unhealthy; no explanation has been given by other Magistrates.

The following statement shows the extent to which Muhammadan education has made progress in this Division:—

DISTRICTS.	POPULATION.		TOTAL NUMBER OF PUPILS ATTENDING SCHOOLS.		NUMBER OF MUHAMMADAN PUPILS ATTENDING SCHOOLS.		RATIO OF MUHAMMADAN PUPILS PASSED TO TOTAL NUMBER OF PUPILS.	
	Total.	Muhammadan.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9
Burdwan ...	1,391,880	267,224	46,947	46,326	6,747	6,482	14	13
Birbhum ...	797,833	169,752	24,043	25,060	4,638	5,348	19	21
Bankura ...	1,069,668	45,312	38,512	40,667	1,568	661	4	1
Midnapore ...	2,631,516	171,412	107,340	106,865	6,109	5,786	5	5
Hooghly ...	1,076,710	192,685	53,731	49,465	8,147	7,509	15	15
Howrah ...	721,211	152,806	32,922	31,304	3,674	3,334	11	10
Total	7,688,818	999,191	308,495	299,187	30,883	29,120	10	9

Roughly speaking, while the proportion of Muhammadans is 1 to 8 in this Division, the proportion of Muhammadan boys in schools is 1 to 11. But the proportion is much less in the middle and higher schools than in the primary schools, because, as stated elsewhere in this report, the Muhammadans of this Division are mostly agriculturists, labourers and traders.

The results of the several departmental examinations in which the Muhammadans competed last year were not satisfactory. In Burdwan one passed

the Entrance and five passed the middle scholarship examination, while 80 boys passed the primary scholarship examination. In Birbhum 64 boys received high education, and one passed the Entrance examination. Out of 266 pupils in the middle schools only two passed, while in primary schools there were 4,864 pupils, of whom 74 only competed successfully. In Bankura the result of the several examinations in which they appeared is reported to be poor.

In Midnapore, out of 108 boys in the high schools, four passed the Entrance examination, and out of 175 boys in the middle schools only one passed. Steps are being taken for the improvement of Midnapore Madrassa, the only middle class school specially maintained for Muhammadans in that district.

The Magistrates of Hooghly and Howrah have not specially reported on the progress made by the Muhammadans in their districts.

It is clear from the above figures that the number of Muhammadan pupils receiving high education is comparatively small, and of the large number of pupils receiving primary education a very few care to continue their studies further. The reasons for this have been explained before.

109. There are eight schools at Raniganj, as in the preceding year, for the education of miners' children. The number of pupils attending them fell from 202 to 189, and of these 108 were aborigines and 80 low-caste Hindus and Muhammadans. The pupils receive free tuition, and a monthly stipend of Rs. 8 is paid by Government to each guru.

Some of the managers of collieries have provided the patshalas with thatched houses. Mr. Agabeg, Manager of the Barakar Coal Company, continued to subscribe Rs. 3 a month for the support of a patshala and to take the same interest for it as in previous years.

The number of schools for the education of aboriginal races in Birbhum was the same as in the previous year, namely, 13. The number of pupils rose from 228 to 311. Thirty-one aboriginal candidates from 10 schools competed at the reward examinations and 22 passed. Eleven Sonthal pupils competed at the lower primary examination and 3 passed, and 2 of them obtained the scholarship reserved for Sonthals. Two Sonthals passed creditably at the upper primary examination. The rate of stipends has been increased from Rs. 3 to Rs. 5 a month.

The number of aboriginal pupils in Bankura increased from 979 to 1,179 during the year. The aboriginal races form 9·7 per cent. of the entire population; and the proportion of aboriginal pupils is 2·8 per cent. to the total number of pupils at school. The Wesleyan Mission is said to be doing its best for the furtherance of Sonthal education. There is a training school established with the express object of turning out trained Sonthal teachers. The results of the several departmental examinations were more satisfactory than in the previous year; one passed the upper and 23 the lower primary examination. In Midnapore the number of scholars belonging to the aboriginal tribes fell from 2,045 to 1,886; 10 of them competed successfully at the different scholarship examinations. In Hooghly, 52 pupils belonging to the aboriginal tribes known as Koras attended schools.

110. A technical school was opened in Burdwan during the year; carpentry and blacksmith's work are the subjects taught in this school. It has made a fair start with 38 students in the workshop classes and 46 in the ordinary classes. A survey class was also opened in November last attended by 46 students. The school is maintained by the District Board, assisted by the Burdwan Municipality. There are 9 mak-tabs in this district for teaching Persian and Urdu to Muhammadan pupils.

In Birbhum there are four training classes for training pathshala gurus as teachers of primary schools. An attempt is being made in this district for opening a technical school.

In Bankura the four guru-training classes attached to middle schools and the muktari school opened in the preceding year have ceased to exist.

In Midnapore the number of training and industrial schools remained the same as in the previous year, viz. 5, and the number of pupils attending them rose from 207 to 224. An improved system of technical education is proposed to be soon introduced by the District Board into the Mahishadal Raja's technical school in the town of Midnapore.

In Hooghly there are 7 special schools, 29 maktabas teaching a little Arabic and Persian, 3 teaching Koran, 97 Sanskrit tols.

In Howrah the number of pupils attending schools teaching Arabic, Persian and Sanskrit rose from 291 to 321; the number of schools remained the same.

XXVII.—DISPENSARIES AND HOSPITALS.

111. The following additions to the number of dispensaries and hospitals existing in 1892-93 were made in the year under review:—Dhaniakhali, Haripal, Khanakul, and Mondlya dispensaries were started in the district of Hooghly; and two Irrigation dispensaries were established at Contai and at Panskura in Midnapore. The dispensaries at Dhaniakhali, Haripal, and Khanakul were opened by the District Board to afford relief in the unhealthy season of the year. The Mondlya Dispensary, which was established under Government order, in the Municipal Department, No. 240 T.M., dated 22nd September 1891, is maintained from the proceeds of the Trust Fund created by the will of the late Dr. Bhola Nath Bose of Barrackpore. Its management will devolve on the District Board. This institution is at present located in a portion of the village school house and will remain there till the dispensary building is constructed. The Irrigation dispensaries at Contai and Panskura are supported from the Provincial revenue; 349 and 280 patients were treated at a cost of Rs. 769 and Rs. 589 in Contai and Panskura, respectively.

The total number of patients under treatment in the Division (both in-patients and out-patients) fell from 256,263 in the preceding year to 241,484 in the year under report. The total expenditure rose from Rs. 1,01,508 to Rs. 1,11,830. Government contributed Rs. 11,178 against 10,142, the rest being obtained from local sources. It is satisfactory to note that the amount of contribution in the shape of private subscriptions and endowments rose from Rs. 53,281 to Rs. 56,005.

To the Burdwan Dispensary a separate female ward has been attached with an intelligent lady doctor of the Civil Hospital Assistant class, on Rs. 50 a month, in charge of it.

Though the Railway Company has discontinued their subscription to the dispensary, still it continues to send passengers, especially those suffering from infectious and contagious diseases, to it. The unfairness of this arrangement has been pointed out to the Railway authorities. As reported last year, the Mankur Dispensary continues to be largely in arrears as regards realization of subscriptions. While inspecting the dispensary during my last cold-weather tour as Magistrate of Burdwan, I made some arrangements for the proper accommodation of the dispensary and raised subscriptions. The record of work done by the Burdwan Raj dispensaries at Burdwan and Kalna is good. The Chakdighi Dispensary is also well looked after. A temporary dispensary was opened at Dainhat by the local municipality for treatment of the malaria-stricken people of the neighbourhood. Three Municipal Commissioners, who are medical men, offered their services gratis.

The record of work done by the Suri Dispensary is pronounced by the Magistrate to be excellent. Regarding the Rampur Hát Dispensary building, correspondence is still going on with the Railway authorities. The District Board has recently increased its grant to this dispensary which, as reported last year, continues to suffer from want of funds. Besides these two, there are private dispensaries at Hetampur and Kundala maintained by local magnates. The establishment of two dispensaries at Bolepur and Murarui, at the extreme south and extreme north of the district, is in contemplation.

The Dufferin Female Hospital at Bankura was started this year. Caste prejudices prevent people from largely resorting to it for the present. It is hoped that this will die appear in course of time.

The most noticeable circumstance in respect of the dispensaries in the Hooghly district was the large increase in the number of out-door patients, from 40,410 to 52,734. This is owing to the prevalence of malarial fevers in the district.

The Howrah General Hospital continues to keep up its reputation of being a useful institution, and is highly prized by the European community. A proposal for placing its funds in the hands of the Treasurer under the Charitable Endowments Act is under consideration. The financial condition of the Ulubaria Dispensary is satisfactory. A cholera ward has been newly constructed and attached to the hospital.

The establishment of two new dispensaries in this district has already been noticed. There was no noticeable change in the management of the other dispensaries in the district.

* Burdwan	...	7	Generally the dispensaries in this Division serve a very useful purpose. The people have faith in them, and flock to them in much larger numbers than they do in East Bengal. And as the whole Division suffers more or less from malarial fevers, the 44 dispensaries* of the Division supply a real want.

#### XXVIII—LIBRARIES.

112. There is nothing new to write under this head. No new library was started during the year. There are no public libraries in the two backward districts of this Division—Birbhum and Bankura. In the four other districts there are 24 libraries, but most of them are small.

Nothing has yet been done to examine the old correspondence at Midnapore. Assistant Magistrate, Mr. Platel, has promised to take up the work.

#### XXIX—MUSEUMS.

113. There are no museums in this Division.

#### XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

114. I recorded the following remarks as Magistrate of Burdwan on the District Board of that district:—

District Boards. "The members of the Burdwan District Board have taken a laudable interest in their work, and I have received much help from their advice and opinion. I have not unoften changed my own view of a question after a friendly discussion with members of the Board in meeting. A great deal of useful work is unostentatiously done by the different committees of the District Board. Non-official gentlemen give us their time and services in these committees and help our work. And it is a still greater gain to the cause of administration that these non-official gentlemen are thus becoming familiar with administrative work, are taking a share in it, and are practically disposing of the proceeds of the road cess for the improvement of their native district."

Mr. Growse, Magistrate of Birbhum, remarks:—

"The District Board seems to have done its work smoothly and well during the year, but there is no doubt that it is difficult to get up any enthusiasm when the district funds are barely sufficient to keep existing roads in decent repair, and too small to allow of any new work of interest being undertaken."

Mr. Barrow, late Magistrate of Bankura, has left the following remarks:—

"Several members of the Board have taken an active interest in its affairs, and the public is especially indebted to the late Vice-Chairman, Babu Kuloda Prasad Mukherjee, and the present Vice-Chairman, Babu Mohesh Chandra Banerjee. Both these gentlemen have been unsparing in their exertions, and I consider that both are eminently fitted to hold such a post. In both road and educational affairs the district officer receives the greatest help from the members of the Board. Local self-government is so far a success, a stability and continuity being obtained which would be otherwise impossible."

Mr. Duke, Magistrate of Hooghly, cites a number of useful and important works done by the District Board within the year, and adds:—

“Attendance at the Board’s meetings is sometimes rather deficient, but on the whole the members cannot be accused of want of interest. After the annual budget has been settled, the Board’s functions are in a great measure formal, so far as regards its main heads of expenditure, and the petty matters of administrative detail which come before it from time to time are hardly such as to interest the majority of members.”

Mr. Grierson, late Magistrate of Howrah, says that “the District Board did good work during the year,” and Mr. Allen, Magistrate of Midnapore, remarks that “there was a fair attendance of members at the meetings of the District and Local Boards.”

I have nothing to add to these remarks. Local self-government has been a success, and it is, as I have said before, a distinct gain in the cause of good administration to secure the co-operation of representative non-official gentlemen in our administrative work.

115. I remarked, as Magistrate of Burdwan, that “Local Boards have not much work made over to them yet,” and that “no sanitary improvement of villages is possible unless more money is provided.”

Local Boards.

Mr. Barrow made much the same remark of Bankura, and said, “the two Local Boards of Bankura and Vishnupur are not given much opportunity to make themselves useful, still they are of some help, and as time goes on, and funds are placed at their disposal, I am sure they will prove themselves useful adjuncts to the general administration.”

Mr. Growse would abolish the Local Boards because they are of little use, but Mr. Duke writes that “the Local Boards carried on their duties successfully as far as their funds allowed.” All these remarks show that the utility of Local Boards is limited by the poverty of their funds, and the limited scope of their work. When we begin the work of village sanitation, as we must do sooner or later, the services of Local Boards will be more marked, and indeed indispensable. And this brings me to the subject of Village Unions or Union Committees.

116. Mr. Growse would introduce Union Committees in villages, and would have nothing between these Committees and District Boards.

Union Committees.

Mr. Duke, of Hooghly, makes some thoughtful remarks about beginning work from the village, and the remarks are worth quoting. “The Local Boards exhibit local self-government in this country from its weakest side as a tree without roots. We have cut the branch in full growth—leaves, flowers and fruits—and have stuck it in the ground with the expectation that it will put out roots for itself. But if it is ever to succeed, the propagation must begin in the village, or at any rate in a much smaller area than that of the subdivision.”

The action which I took as Chairman of the Burdwan District Board to create smaller areas of administration than a subdivision, will appear from the following remarks which I recorded on the subject, and which the present Magistrate of Burdwan has embodied in his Administration Report:—

“In a recent resolution on Local Self-Government, the Government of Bengal has expressed its intention of creating village unions experimentally in some places. With a view to making this possible, I have encouraged the villagers in three selected thanas (Burdwan, Kalna, and Katwa) to form themselves into committees. They are not ‘unions’ yet, and do not possess the legal powers which can be conferred on unions by the Government. They have not legally the power of reserving a tank for drinking purposes, or effecting other improvements which the chapter on village unions provides for. The committees have formed themselves merely with the object of becoming familiar with their village works and taking an interest in them. In course of time they may become fit to be entrusted with the powers contemplated by the Act. The villages of Burdwan thana have been grouped into six such village committees, those of Kalna into 15, and those of Katwa into 11 committees.”

“If we desire to effect sanitary improvements in villages, to reserve tanks for drinking purposes, or to remove obstructions to drainage in villages, we

can only effect this through such village committees or village unions, acting under the direction of Local Boards. The villages within the limits of an average thana can be grouped into about ten unions; each subdivision will thus have thirty or forty such unions, and they can be conveniently managed by the Local Board of the subdivision with the help of an executive sanitary officer. Funds must be provided for the pay of such an officer under each Local Board, and also for sanitary improvements in each union; and it will be possible then to insist on improvements in each village under the powers which unions will possess under the law. The vast work of improving the sanitary condition of the Bengal villages lies before us, and we can only make a beginning in the work under the system indicated above. And until we adopt the system, provide funds for sanitary improvements, and create unions with the powers contemplated by the law, it is idle to talk of the inefficiency of the District Boards or the apathy of villagers."

117. Birbhum has only one municipality,—at Suri, the district headquarters. The Magistrate writes that the Commissioners took interest in their work, that the assessment was revised, the suggestions of the Sanitary Commissioner partly carried out, and a tank for drinking purposes was reserved. "Altogether," the Magistrate writes, "I think I can discern efforts towards what is right and an appreciation of duty by many of the Commissioners."

The Magistrate of Bankura reports that the municipalities of Bankura, Vishnupur, and Sonamukhi have all done fairly well.

The Magistrate of Hooghly makes detailed remarks about the several municipalities in his district. The town of Hooghly and Chinsura has been well administered, but its sanitary condition cannot be improved until the Commissioners consent to levy the full rate of taxation. In Serampore, the drainage scheme has been completed so far as the main channel is concerned, but the balance of the loan taken, which should have been applied to complete the internal drainage, was spent in other directions. In Uttarpara faction spirit runs high. Generally speaking, assessments in nearly all the municipalities in the district are, the Magistrate thinks, inadequate, and progress is therefore impeded.

The Magistrate of Howrah reports that sanitation in Howrah is deplorable. But the Commissioners have lately raised the latrine-tax, and have applied for a loan of Rs. 50,000 for sanitary improvements.

The Magistrate of Midnapore says there are signs of improvement in his district. An energetic Chairman has been elected in Midnapore. Ghatal and Kharar have invested in iron latrines, and Tamluk has improved, as witnessed by the Deputy Sanitary Commissioner, who visited the place.

In Burdwan, I inspected all the municipalities during the last cold season and found them on the whole as well and creditably managed as our Government offices and departments. The slow progress in sanitary improvements is considered the weak point in municipal administration; but officers who were District Magistrates ten or twelve years ago, know that the progress was not quicker when we were Chairmen. Dirty tanks are private properties, and cannot be filled up or cleaned without a great deal of difficulty, and schemes of drainage require time to prepare and money to carry out. Sometimes the schemes prepared locally are rejected by the Sanitary Board, and at other times schemes approved by the Sanitary Board are so elaborate that it is impossible to carry them out. Dainhat is a small municipality in Burdwan district, and cannot spare more than Rs. 500 a year for drainage improvements; but the scheme which has been prepared for the town would require an expenditure of over Rs. 20,000.

It is necessary that we should constantly direct the attention of Municipal Commissioners to effect sanitary improvements, and that we should insist on these improvements being effected. But often, when we blame Municipal Commissioners, it is in fact their poverty and not their will that consents to the existing state of things. It is my experience that when we make reasonable and practicable suggestions, and indicate the way in which improvements should be effected, Municipal Commissioners show an anxious and sincere desire to accept and act on our advice. And an important

circular of the Bengal Government, No. 10T.M., dated 1st July 1893, imposes upon us this duty of helping municipal administration, and removing its defects, as senior inspecting officers help us in removing the defects of our offices.

### XXXI.—EMPLOYMENT OF MUHAMMADANS.

118. I have nothing to add to what was reported by Mr. Power last year under this head.

Mr. Vincent, the Officiating Magistrate of Burdwan, writes:—"Unless Muhammadans take more interest in education, the posts they will obtain must decrease; the education returns of the district show that the number of Muhammadan boys at the various schools is decreasing."

Mr. Cornish, Magistrate of Bankura, is of opinion that "as the Muhammadans form only 4·2 per cent. of the total population" in his district, "they clearly get more than their share of Government service."

Mr. Growse, of Birbhum, reports "many apprentices have been admitted into the office during the year, but a single Muhammadan candidate appeared among them. Amongst the menials the number of Muhammadans, however, is disproportionately large."

Mr. Duke, of Hooghly, writes that the Government order on the subject of considering the claims of Muhammadans when vacancies occur, are duly observed. But the majority of the Muhammadans in the district belong to agricultural or trading classes, and even the small number of Muhammadans who hold Government appointments in his district are, with very few exceptions, residents of other districts. In Howrah, the Magistrate writes, there is no demand among them for education. In fact the Muhammadans in this Division are mostly cultivators, labourers and traders.

### XXXII.—POST OFFICE AND TELEGRAPH.

119. There was nothing noticeable in the working of the Post Office and Telegraph during the year. Three cases of embezzlement of postal money occurred. A postman of the Sakulipur Post Office in Birbhum misappropriated the money entrusted to him for payment of money-order: he was convicted and sentenced to seven months' rigorous imprisonment at the Sessions. A sub-postmaster in Bankura was charged with misappropriation of a large sum of money invested in the Savings Bank: he was convicted by the Sessions Judge, but was acquitted by the High Court on appeal; the third case was that of a patshala guru in charge of a branch office in Midnapore, who misappropriated the value of a money-order and some Savings Bank deposits; he was convicted and sentenced to four years' rigorous imprisonment by the Sessions Judge: the amount embezzled has been recovered from his sureties.

No complaint against the postal administration was heard during the year.

Nothing has been done to remove the inconvenience felt at Suri, owing to the telegraph office being kept closed from 9 P.M. to 9 A.M. on week-days and on Sundays.

The Magistrate of Hooghly notices the want of a telegraphic communication with the Jahanabad subdivision. It would be desirable to have a line constructed from Tarakeswar, but the people of Jahanabad refused to give any guarantee for opening the office.

The telegraphic line between Suri and Sainthia in Birbhum was interrupted on four different days, but the cause could not be ascertained.

### XXXIII.—ZAMINDARI DAK, FAIRS AND POUNDS.

120. The confusion resulting from the transfer of the work of collection of the zamindari dak cess to Collectors, and the change of account keeping from the basis of the

Zamindari Dak.

official to that of the calendar year, reported in paragraph 108 of the previous year's report, was brought to the notice of the Board of Revenue during the year. I have been informed in reply that Mr. Slack is considering the matter.

The accompanying statement B shows the demand, collection and balances, as also the cost on account of the zamindari dák of the six districts in this Division. The total demand for the year was Rs. 47,892 and the collections Rs. 44,847. The percentage of total collections on the total demand of the Division was 93·7. The percentages were above 95 only in the districts of Howrah and Birbhum; in the other districts they fell below 95; in Bankura it was less than 90, being 89·3.

The total expenditure amounted to Rs. 41,778; the balance left at the end of the year was Rs. 35,334.

The Magistrates of Burdwan and Birbhum report that the zamindari dák service was well managed during the year. No inconvenience or difficulty has been represented by any of the district officers regarding the dák service.

121. The important fairs in the district of Burdwan were those held at Agradip, Bairagitala, Dadnia, and Uddhanpur, in the Katwa subdivision; 15 to 20 thousand people assembled on the occasion of the mēlas. Proper sanitary and police arrangements were made in these mēlas, and there was no outbreak of any disease or disturbance.

The principal gatherings in the districts of Bankura and Midnapore were those at Debar and Hatnagar in the subdivisions of Vishnupur and Contai, respectively. These were free from any epidemic diseases, and the cost of sanitary arrangements at Hatnagar was paid by the District Board. There was no regular fair in the district of Howrah.

The Bakresvar, Kenduli, and Tarapur fairs in Birbhum, and those at Tarakeswar, Mahes, and Tribeni in the district of Hooghly, were the most important in the Division. The District Board of Birbhum took precautions against the spread of disease, and the police there kept order at the fairs. Temporary wells were sunk for drinking-water in the fair at Bakresvar. The Magistrate, who visited this mēla with the District Superintendent of Police and the medical officer, remarks that perfect sanitary arrangements are only possible, if the provisions of section 34 of Act V of 1861 be extended, and a proper staff of mehters entertained to look after the trenches.

At Tarakeswar, in the district of Hooghly, about 100,000 pilgrims assembled at the Siva Gajan and about 20,000 at the Siva Katri. At the instance of one of the rival claimants after the death of mahant Madhavgiri, Mr. Gordon Leith was this year appointed Receiver by the High Court for the purpose of collecting the offerings made at the shrine. The sanitary arrangements made there were supervised by the Civil Medical Officer and the Subdivisional Officer of Serampore. There was no breach of the peace, nor any criminal cases in these fairs.

The Rath Jatra festival at Mahes and Ballabhpur in Serampore was held on 15th and 22nd July 1893. The mēla lasted for a fortnight, and about 50,000 people assembled. The ground was very heavy owing to excessive rain, and there was great difficulty in pulling the cars. The ceremony, which usually requires only an hour or so, was protracted over many days. An untoward accident also occurred. One of the cars is of novel construction, the wheels and framework being of iron made by an English firm. When once started, it runs with less friction, and consequently more momentum than an ordinary wooden car. It was pulled out of a slough after a great struggle, and having acquired an unusual impetus, ran down a slight incline, where it got beyond control, and overtook and upset the Subdivisional Officer, Mr. Thompson, and ran over him. He fortunately fell between the wheels and escaped with slight injuries.

The Uttarayan and Baruni fairs were held at Tribeni. The gathering at each of them numbered from 25,000 to 30,000. The sanitary and police arrangements on these occasions were carried out by the Municipal Commissioners of Banberia and the District Superintendent of Police.

122. The cattle-pounds remained under the administration of the District Boards and Municipalities during the year. The subjoined statement will show the number of pounds and collections made in the last two years:—

DISTRICTS.	Number of pounds in—		Collections in—	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
Burdwan ... ..	197	200	Rs. 15,818	Rs. 14,074
Birbhum ... ..	69	71	7,743	7,946
Bankura ... ..	34	31	2,057	2,227
Midnapore ... ..	114	125	9,172	12,286
Hooghly ... ..	90	93	9,080	10,250
Howrah ... ..	37	38	2,978	2,486
Total ... ..	541	561	48,338	49,249

Some of the pounds in the district of Burdwan were inspected by the Magistrate and Subdivisional Officers when on tour, and a Pound Inspector was employed in the Sadar subdivision. In Birbhum the Pound Inspector was employed to see that the impounded cattle were properly housed and fed, and Sub-Inspectors of Schools also visited the pounds.

The increase in the number of pounds in Midnapore is due to branch pounds having been separately settled during the year as so many main pounds. The large increase in collection in the district was due to the fact that a considerable amount of outstanding balance of previous years was realized during the year. The Collector of Hooghly writes:—

“A far stricter supervision and control should be exercised over the izardars of pounds, who have the reputation of overcharging the owners of impounded cattle, although no definite complaint was made. The old system of accounts was faulty, and provided very slight means of check. The forms which have just been introduced will provide greater facilities for check and control.”

There was increase in revenue in all districts except in Burdwan and Howrah, where there was decrease.

#### XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

123. Besides the *Hitakari Sabha* of Uttarpara, which continues to help in the spread of female education, there are rate-payers' and other local associations in Hooghly, Serampore, Uttarpara, Konnagar, and Baidyabati. They do not generally concern themselves with politics, but occupy themselves with criticising local institutions like the municipalities. The Magistrate of Hooghly remarks that they require to be educated before they can hope to guide Municipal Commissioners.

The Hooghly National Muhammadan Association devotes itself to advancing the interests of Muhammadans.

There are many Hari Sabhas—Hindu religious institutions—in Burdwan and other districts. Similarly, there are Brahmo Somajas in all districts.

The Indian Association has its branches in Midnapore and other places. These branches convene meetings only when there is some special work to do—either to send a delegate to the National Congress or express the public feeling on questions which excite interest. The agitation is confined to the educated classes.

The Society for Prevention of Cruelty to Animals continues to do useful work, and is said to have worked well during the last year.

124. In Burdwan a Hindu married girl of ten years was baptised without the knowledge of her husband. The latter applied to the Judge to be declared guardian of his wife, and while the case was pending, the girl was carried away by her husband's party. The case caused considerable excitement in the public feeling and the public press.

town, and the men who used force were convicted by the District Magistrate and fined.

No other local matters of any interest have been reported. The agitation against cow-killing shows no signs of having actively extended to this Division, but Mr. Duke, Magistrate of Hooghly, reports:—"There are, however, numerous small indications of unrest between Hindus and Musalmans. Whereas until a few years ago they lived side by side with little or no feeling about each other, it is now apparent that their relations are less cordial than they were, and the more bigoted Hindus influence their co-religionists to restrict their dealings with Muhammadans in all relations of life. On the other hand, there are signs that the Musalmans are becoming exceedingly touchy and ready to construe everything that happens into an affront to their religion, and an attempt to lower their status."

I do not think this want of cordiality has spread in villages among the masses, or that it is observable anywhere except among a very limited class in one or two towns. But nevertheless, in so far as it exists, it is a matter for regret. It is needless to enquire how this feeling has been created within the memory of the present generation—I may almost say within the last ten or twelve years. But it should be the object of our administration to heal this difference and division. The widening of the difference will not be beneficial either to the Hindus or the Muhammadans, and may lead to consequences which we cannot now foresee. Those who foster this difference and division are adding to the difficulties of the administrative work in India.

In regard to other matters, the educated classes in districts receive their opinions from Calcutta. The subjects which excited interest and were discussed within the year were—(1) the Mufassal Municipal Bill, (2) the financial crises of Government and the grant of exchange compensation to European officials, (3) exclusion of cotton duties from the Tariff Act. With regard to the Opium Commission, educated men know well enough that it will effect no change in our excise policy.

The *Burdwan Sanjibani*, published in Burdwan, has a small circulation. It is edited by a pleader, and is moderate in its tone. The *Bankura Darpan*, published in Bankura, has some circulation in that district, owing to the official information it conveys. Two papers—one a weekly, the *Ulubaria Darpan*, and the other a fortnightly—are issued from Ulubaria subdivision, but their circulation is very small and they are not of importance.

The great majority of the educated people of this Division read the Calcutta papers, and my predecessor, Mr. Power, in his annual report for the year 1891-92, quoted with approval some remarks which I made about these Calcutta papers. I reproduce those remarks here:—

"The educated classes read the *Statesman*, the *Bengali*, the *Hindu Patriot*, the *Indian Mirror*, and the *Amrita Bazar Patrika*, and other Calcutta journals. The majority of these papers write in a temperate style, and with a desire to criticise public measures with fairness and justice, and when their criticism is unfair and violent, it often proceeds from an ignorance of facts and from mistaken views of the scope of administrative measures. An improvement in the tone of criticism is observable year by year, and the improvement will go on as the people obtain an increasing share in the work of administration, and understand its scope and its difficulties. The Press Association, which has been newly established, will do much good if it can secure correct information on matters which excite the public mind from time to time. And if a similar Association were formed among the European journals of this country, with a view to moderate and improve their tone with respect to the people of the country, and to work in harmony with the Indian journals and their Association, much good might be effected and much angry writing on both sides avoided."

I still hold, as I held two years ago, that the tone of the Native Indian press is likely to improve if the tone of the Anglo-Indian press is improved. The Native Indian press is a borrowed institution, and Native Indian journalists unconsciously imitate the tone of their Anglo-Indian brethren. It is unfortunate that the latter indulge in ridicule and contempt when writing of the people and their aspirations. And it is unfortunate that the former reply in an angry and immoderate tone.

Differences of opinion there will always be. In the matter of administration, the Native press will always plead for obtaining an increasing share for the people of the country, and the Anglo-Indian press will always write on the unwisdom of allowing them that share. This roughly speaking is the main difference in opinion, and represents the two sides of nearly every important question that is discussed. Discussions will therefore continue, but it is possible to continue them without the bitterness which characterizes them now. Every journal which adds to the bitterness of these discussions, adds to the difficulties of administrative work in India.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

125. The statement showing the character of officers is herewith submitted. I have quoted the remarks left by Mr. Power, and I have nothing to add to them, as he consulted me when he noted the remarks. Mr. Power also desired me to bring to the notice of the Government the excellent work done during the year by the following officers:—

Among District Officers—

Mr. G. A. Grierson.

Mr. F. W. Duke.

Mr. D. B. Allen.

Mr. J. Windsor.

Among Suidivisional Officers—

Mr. J. E. Webster, Raniganj. | Babu Jaga Bandhu Bhattacharjee, Contai.

Babu Bhupati Chakraverti, Ulubaria.

Mr. Power also desired to bring to notice the excellent services of Babu Pran Kumar Das, Personal Assistant to the Commissioner of Burdwan, and of Babu Mohananda Gupta, who is specially employed on "drainage" work.

XXXVI.—CONDUCT OF ZAMINDARS.

126. The conduct of zamindars continues to be generally satisfactory in all the districts of the Division. The following facts deserve special mention.

The administration of the Burdwan Raj estate by the able manager, Raja Bun Bohari Kapur, under the Court of Wards, has been satisfactory during the year under report, and no complaints were received from the tenants in any part of the Raj estates.

The district officer of Birbhum makes favourable mention of Raja Ran Ranjan Chakrabarti, Bahadur, of Hetampur, the largest resident zamindar of the district. He is in good terms with his tenantry and is a loyal and peaceful gentleman. On the other hand, a few petty cases of disagreement between raiyats and zamindars are reported from this district.

Bankura.

There was nothing special to report.

The Uttarpara zamindars are said to exert the rights which they claim over their raiyats without coming to Courts of Justice.

Hooghly and Howrah.

In Howrah district there were a few riots in the early part of the year. "The cause of this disturbance," writes Mr. Duke, Collector of Hooghly, "lies in the reclamation of land by the Rajapur drainage scheme. The Uttarpara zamindars wish to raise the rents of raiyats who have been benefited by the reclamation without going through the proper course of law."

With regard to the strained relations reported in the previous year between

Midnapore.

Messrs. Watson and Company and their raiyats, Mr. Allen writes:—"A settlement was at last come to

in January, soon after my return to the district. We trust it will be permanent." But there has been no improvement in the relations between zamindar Narahari Jana of Changichak and his tenants. The zamindar's naib was murdered, and the tenants who were sent up for trial were acquitted. The principal cause of dispute was, as usual, the rate of enhancement, and the police had been deputed by Mr. Allen's predecessor to help the zamindar to enforce his decrees and getting his dues. The question of enhancement has since been referred by the Judge to arbitration, and Mr. Allen adds:—"Meanwhile I have declined to give the landlord again the assistance of the local police. In such cases they generally do more harm than good."

Kumar Narendra Lall Khan of Narajole in Midnapore has offered Rs. 30,000 for a bridge on the road connecting his village with Midnapore town.

#### XXXVII.—GENERAL REMARKS.

127. As I have joined this Division since the expiry of the year, I have very few general remarks to make. The year was one of good crops, and cultivators reaped a good harvest all over the Division (except in some parts of Midnapore) after one or two years of bad crops. The excessive rainfall was followed by malarial fevers which raged badly in the winter months.

I have noted above that the work of the police requires improvement; that the certificate procedure admits of improvement; that sanitary measures are required in towns and villages; and that the local self-government system requires extension so as to make sanitary improvements possible.

Municipal elections took place all over the Division during the year, and the people manifested a great deal of genuine interest in the elections. On the other hand, many of the electioneering tricks known in other countries were adopted in some places,—specially in the Hooghly district, and notably in Uttarpara town.

The number of khas mahals is very large in Hooghly, and imposes a great deal of work on the Collector. But the largest khas mahals are in Midnapore, which is the heaviest district in the Division. The number of estates under the Court of Wards is also large in Midnapore, and our administration of some of the estates which we have managed within the last eight or ten years has not been altogether successful. Measures are adopted along the coast line in Midnapore to prevent the manufacture of illicit salt, but not with uniform success.

The tauzi accounts have been found to be in disorder in Burdwan and Hooghly, and special establishments have been sanctioned to adjust the accounts. Some court-fee stamps sent to Bankura about the close of the year were lost, and a special enquiry has been made on the subject in the current year.

The Tenancy Act is appreciated. The khas mahals belonging to the Burdwan Raj estate are under survey, and many private parties, zamindars and cultivators are filing applications for survey and record of rights, specially in Midnapore. The occupancy raiyat, whose right to his lands is now sufficiently protected, is not adequately protected, so far as his homestead is concerned, and some legislation in this direction seems to be necessary.

# RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1893-94.

No. 2173Marino.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

*Dated Calcutta, the 26th September 1894.*

## RESOLUTION.

READ—

The Administration Report of the Orissa Ports for the year 1893-94.

The following table shows the receipts of the ports as compared with those of the previous year:—

PARTICULARS.	1892-93.	1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Port-dues on vessels ... ..	3,392	2,095	.....	1,297
Ditto mail steamers ... ..	10,157	11,914	1,757	.....
Miscellaneous ... ..	71	115	84	.....
Total receipts ... ..	13,620	14,124	504	.....

The increase was due principally to the increased receipts from port-dues on steamers trading with False Point. The tonnage of the steamers visiting that port was greater than that of last year, and hence the increase in the amount of dues collected.

2. The disbursements of the year under report, as compared with those of the previous year, are summarized in the following table:—

PARTICULARS.	1892-93.	1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Establishment ... ..	9,301	10,971	1,670	.....
Light-house establishment ... ..	3,381	3,209	.....	172
Vessels and boats establishment ... ..	2,524	2,480	.....	44
Dockyard services and supplies ... ..	6,510	6,958	448	.....
Miscellaneous ... ..	1,015	1,878	863	.....
Other charges ... ..	226	302	76	.....
Total disbursements ... ..	22,957	25,798	2,841	.....

The increase is due mainly to the establishment charges at False Point being in excess of those of the previous year, to the increased expenditure incurred at that port on account of dockyard services and supplies, and to increased miscellaneous charges at the port of Balasore. The increase in establishment charges at Balasore was due to the payment of furlough and exchange compensation allowances to the Port Officer, while that under the head "Dockyard services and supplies" was caused by the supply of new buoys instead of old ones, which have been condemned.

3. The following table shows the number and the tonnage of the vessels that entered and cleared during the year as compared with those of 1892-93:—

Year.		Entered.		Cleared.	
		No.	Tonnage.	No.	Tonnage.
False Point	1892-93	56	74,559	55	74,552
	1893-94	51	79,843	51	78,368
Balasore	1892-93	339	82,019	339	81,556
	1893-94	313	82,133	320	80,584
Puri	1892-93	20	26,603	20	26,603
	1893-94	16	20,447	16	20,447

Altogether 380 vessels entered the ports during the year, and out of these 295 were steamers, all of which were engaged in the coasting trade. Of the 85 sailing vessels, 4 were engaged in the foreign trade and 81 in the coasting trade.

Though there was a decrease in the number of vessels that entered into and cleared from the port of False Point, their tonnage was greater than that of the vessels which entered and cleared in 1892-93.

There was also a decrease in the number of vessels that entered into and cleared from the port of Balasore. There was, however, very little difference in the tonnage.

4. The following statement shows the value of the trade of the ports during the years 1892-93 and 1893-94 :—

		PRIVATE TRADE.		GOVERNMENT STORES.		Total.	
		1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
		1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports ...	...	76,95,191	62,97,625	364	5,890	67,95,415	63,03,515
Imports ...	...	65,95,496	49,50,125	2,01,328	2,31,412	67,96,824	51,81,537
Total	...	1,42,90,587	1,12,47,750	2,01,692	2,37,302	1,44,92,279	1,14,85,052

The decrease in the private trade is attributed to the poor local crop of rice and to diminution in the stocks sent down the Mahanadi for export, in consequence of their diversion in the Bombay direction through the competition of the Bengal-Nagpore Railway.

5. A weekly steamer service was maintained throughout the year between Calcutta and Chandbally by the India General Steam Navigation Company and the Rivers Steam Navigation Company. The steamer *Pilot* belonging to Babu Badya Nath Sahia, which was plying between Calcutta and Chandbally, ceased to run to the latter port since April 1893. The *Seagull* and the *Oorya* made regular weekly trips from Calcutta to Chandbally. The *Curlew* and the *Bassein*, belonging to the India General Steam Navigation Company, also occasionally visited the latter port. During the pilgrim season of July and August 1893, other steamers, viz., the *Kasara*, the *Kisna*, and the *Kotoria*, visited the port, and Chandbally-trading vessels made double trips weekly to Calcutta with pilgrims. The steamer service between Calcutta and Balasore was kept up by the *Bassein* only.

Communication between Cuttack and Chandbally was kept up throughout the year by the canal steamers and cargo-boats of the India General Steam Navigation Company and the Rivers Steam Navigation Company. A bi-weekly canal service was carried on by the former Company between Cuttack and Balasore in conjunction with the coast canal service from Calcutta.

6. There was no accident to the tower and subsidiary lights of Shortt's Island. The Balasore light at Chandipur is visible at a distance of ten miles, and is in good order.

7. The channel buoys of Chandbally were all intact, and were overhauled; those of Balasore were painted and overhauled.

8. The channels of the Brahmini and Byturni rivers gave rise to no inconvenience. There has been no improvement in the channels of the Burabalong river; they can be used by vessels of light draught only during high tide.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

**RESOLUTION ON THE ADMINISTRATION REPORT OF THE  
COMMISSIONERS OF THE PORT OF CHITTAGONG  
FOR THE YEAR 1893-94.**

No. 2181 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

*Dated Calcutta, the 27th September 1894.*

**RESOLUTION.**

**READ—**

The Administration Report of the Commissioners of the Port of Chittagong for the year 1893-94.

THE financial position of the Chittagong Port Fund on the 31st March 1894, is shown in the following statement:—

		Rs.	A.	P.			Rs.	A.	P.
Opening balance on the 1st April 1893	...	38,223	12	11	Expenditure during the year 1893-94	...	60,516	3	8
Receipts during the year	...	77,584	1	4	Balance on the 31st March 1894	...	55,291	10	7
Total	...	1,15,807	14	3	Total	...	1,15,807	14	3

2. The subjoined table shows the number and tonnage of the vessels which visited the port during the year, as compared with the figures of the two previous years:—
- Shipping.

		1891-92.		1892-93.		1893-94.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
1		2	3	4	5	6	7
European vessels trading with foreign ports.	Entered	40	41,348	26	39,926	17	30,272
	Cleared	34	45,409	27	41,028	15	26,694
Native vessels trading with foreign ports.	Entered	1	89	11	1,824	17	2,572
	Cleared	2	225	2	187	.....	.....
Vessels trading with home ports.	Entered	717	204,629	734	211,362	626	202,030
	Cleared	734	202,086	762	213,357	617	208,885

Of the 15 vessels which cleared for foreign ports during the year under review, 10 were bound for the United Kingdom, three for Mauritius, one for Trinidad, and one for Port Said.

3. The total value of the foreign trade during the year was Rs. 90,14,997, of which Rs. 24,10,148 were under imports. The nature of the trade will appear from the following
- Foreign trade.

statement, which shows an increase, compared with the previous year, of Rs. 1,83,608 :—

	1893-93.		1893-94.		INCREASE.		DECREASE.

All other articles of merchandise ... ..	.....	1,179	.....	4,270	.....	3,091	.....	.....
Total ... ..	.....	84,01,540	.....	6,04,840	.....	1,69,478	.....	19,88,189
<b>Imports.</b>								
Oil ... .. Tons.	.....	1,08,001	.....	4,71,042	.....	3,65,041	.....	.....
Salt ... .. "	14,205	1,81,130	13,301	3,46,455	.....	62,325	.....	.....
All other articles ... ..	.....	8,718	.....	15,91,651	.....	15,52,933	.....	.....
Total ... ..	.....	4,26,819	.....	24,10,148	.....	19,80,299	.....	.....
Total foreign trade ... ..	.....	88,31,359	.....	90,14,997	.....	1,83,608	.....	.....

4. In the coasting trade, both the exports and imports increased. The total trade was valued at Rs. 1,47,73,960 against Rs. 1,35,29,721 of last year, the increase amounting to Rs. 12,44,249. This is wholly accounted for by an increase of Rs. 14,32,848 under the head "Treasure," probably mainly required for expenditure on the Assam-Bengal Railway.

Coasting trade.

5. The quantity of jute shipped at Chittagong during the year under review was 33,762 tons, against 47,549 tons in the previous year.

Jute trade.

6. The quantity of grain, including rice, exported during the year, amounted to 8,455 tons, showing a decrease of 10,244 tons, as compared with that of the previous year. This was due to the price of grain in the local market having been very high, which restricted shipments. Of the quantity exported, 3,552 tons went to home ports, and 4,903 tons to foreign ports. The grain exported to home ports consisted chiefly of paddy and rice. The average value of rice exported to foreign ports was Rs. 5-2 per cwt.

Grain trade.

7. The total quantity of tea exported amounted to 1,119,426 lbs., being 40,969 lbs. greater than that of the previous year. The amount exported to foreign ports was 460,807 lbs. showing an increase of 357,439 lbs. as compared with that of last year.

Tea trade.

8. The quantity of salt imported during the year was 13,301 tons, showing a decrease of 904 tons as compared with that of the previous year. This was due to a large stock remaining in hand at the beginning of the past year. The value, however, of the quantity imported shows an increase of Rs. 62,325 owing to enhanced rates, presumably due to the fall in exchange.

Salt trade.

9. The imports of oil from foreign ports increased in value by Rs. 3,65,041, and those from home ports by Rs. 35,111. The total value of oil imported was Rs. 6,30,861, while the value of the exports amounted to Rs. 60,363 only. The total value of mineral oil imported was Rs. 4,72,042.

Oils.

10. The value of piece-goods imported from home ports shows an increase of Rs. 4,12,291. The value of jute sent down from Narayanguge decreased by Rs. 2,50,637. Cotton shows a decrease of Rs. 2,80,698, which was due probably to the quantity obtained from the Hill Tracts for exportation having been less than that of the previous year.

Piece-goods and other articles.

11. The appliances of the port and the lighthouses at Norman's Point and Kutubdea are reported to have been kept in good order during the year. The depth of water in Track No. I decreased by one foot, and that in Track No. II by 2 feet

Port appliances.

9 inches, while the depths in Track No. III, Track No. IV, and Track No. V remained the same.

12. The earnings of the steam-tug *Gekko*, maintained by the port, amounted to Rs. 7,046 only, whilst the expenditure on maintaining that vessel, exclusive of Rs. 27,750 for interest and sinking fund, aggregated Rs. 15,541. There was, however, a set off to the extent of Rs. 5,000, being the estimated value of services performed for the port for which no charge was made.

13. The health of the shipping was good compared with that of the previous year. Thirty seamen were admitted into hospital against 37 in the year before. Of this number 25 were discharged, three died of cholera, one of fracture of the skull, and one of aneurism. There were no cases of scurvy or disease arising from bad or insufficient food.

Working of the Pilot Service.

14. The state of the Pilotage Fund is shown in the subjoined table:—

	Rs.	A.	P.		Rs.	A.	P.
Balance on the 1st April 1893 ..	3,962	7	6½	Disbursements during the year 1893-94	11,463	7	6
Receipts during the year 1893-94	14,842	11	3	Balance on the 31st March 1894	7,341	11	3½
Total ..	18,805	2	9½	Total ...	18,805	2	9½

The working of the Pilot Service is stated to have been satisfactory, no accidents having occurred to ships in pilotage charge.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Govt. of Bengal.*

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE  
YEAR 1893 FROM PRIVATE CONTRIBUTIONS.

No. 4865M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Impts.

*Dated Calcutta, the 3rd October 1894.*

RESOLUTION.

READ—

Statement of works of public utility constructed by private individuals in the several districts in Bengal during the year 1893, and statement of similar works constructed during the year 1892 and the Resolution thereon.

REMARKS.—The cost of works of public utility constructed during the year 1893 amounted to Rs. 3,95,620-6, of which the following is a distribution:—

		No. of works.		Cost.			
				Rs.	A. P.	Rs.	A. P.
I.—Works costing Rs. 500 each and upwards.	Public buildings	...	4	74,750	0 0		
	Roads	...	5	4,980	0 0		
	Bridges	...	4	8,040	0 0		
	Embankments or bunds	...	1	1,500	0 0		
	Ghats	...	3	5,000	0 0		
	Tanks	...	172	1,67,792	0 0		
	Wells	...	11	11,400	0 0		
	Irrigation channels	...	3	13,000	0 0		
						2,86,462	0 0
II.—Works costing less than Rs. 500 each		...	.....	1,09,158	6 0	1,09,158	6 0
Total		...	203	.....		3,95,620	6 0

2. The following statement compares the two classes of works under reference done in 1893, with those of the two previous years, with the result that the outlay in 1893 is less than that of 1892 by Rs. 45,786-11-9, but exceeds that of 1891 by Rs. 1,31,135-5-9:—

CLASS OF WORK.	1893.	1892.	1891.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
I. Works costing less than Rs. 500 each.	1,09,158 6 0	1,27,242 5 6	81,840 0 3
II. Works costing Rs. 500 each and upwards.	2,86,462 0 0	3,14,164 12 3	1,82,645 0 0

3. The following works deserve special notice:—

*Public Buildings.*—Under this head the contributions amount to Rs. 74,750, and show a considerable increase over the figures of last year. Of this sum

Babu Sewbux Bogla of Cotton Street, Calcutta, and Sir Dinshaw Manikji Petit of Bombay, respectively, contributed Rs. 30,000 and Rs. 25,000 towards the cost of the veterinary school and institution at Belgachia; Babu Behari Lall Pandit of Cuttack gave Rs. 15,000 for a dharamsala at Puri; Gopal Khan gave Rs. 2,000 for a pukka mosque at Basirhat.

*Roads.*—The contribution for roads stand at Rs. 4,980, thus :—

His Highness the Maharaja of Kuch Bihar Rs. 2,480 for the maintenance of the emigration road from the 23rd to the 32nd mile, and for a cross-road from Patgram to Bhutan, Jalpaiguri district; Babu Dwarika Nath Dutta and others of Batajore Rs. 1,500 for a road from Batajore to Soloki, Backergunge district; Kumar Promotha Nath Roy Rs. 500 for a road from Hagoodia to the Godai river, Rajshahi district; Jogendra Kumar Chaudhri Rs. 500 for a road at Panchbia, Dinajpur district.

*Bridges.*—The total expenditure of Rs. 8,040 on bridges was met by the following donations :—

His Highness the Maharaja of Kuch Bihar, Rs. 5,040 for two pukka bridges at Patgram, Jalpaiguri district; Babu Raj Kumar Poddar, Rs. 1,500 for a timber bridge of 25 feet span on the Jamna near Haringhatta, Nadia district; Brajeshari Baisnabi Rs. 1,500 for a pukka bridge at Nalchiti Bandar, Backergunge district.

*Embankments or bunds.*—An embankment near Chapra in the Nadia district was carried out at a cost of Rs. 1,500 from funds given by Babu Nafar Chandra Pal Chowdry.

*Ghats.*—Chunni Mal Khetri contributed Rs. 1,800 for a pukka ghat on the Hooghly river at Bellur; Kasum Kumari Dasi of Calcutta Rs. 1,700 for a Chandni ghat on the banks of the Churni, at Aranghatta, and Khirode Prosad Pal Rs. 1,500 for a pukka ghat on the Hooghly river at Telkul ghat, Howrah.

*Tanks.*—The expenditure on tanks is Rs. 1,67,792, which was met by the following donations principally :—

Babu Nakur Lal Chowdhri, Monghyr district, Rs. 10,000; the Maharaja of Hatwa, Shahabad district, Rs. 9,100; Maharaja Lachmeshar Singh of Darbhanga Rs. 7,000; Babu Kala Chand Biswas, Nadia district, Rs. 4,000; Babu Mohendra Singh, Saran district, Rs. 4,000; Gatinath Mozumdar, Pabna district, Rs. 3,000; Babu Ashutosh Nath Rai, Tippera district, Rs. 2,500; Soshi Mohan Saha, Patna district, Rs. 2,000; Babus Bhogoban Chandra Rai Chaudhri, Bhairab Chandra Rai Chaudhri and others, Dacca district, Rs. 2,000; the widow of Babu Laderi Mohan Rai, Dacca district, Rs. 2,000; Babus Hansraj Jha and Madhan Jha, Darbhanga district, Rs. 2,000 each; Haradhan Sheik and Indra Kumar Banerji, Burdwan district, Rs. 2,000 each.

*Wells.*—Rupees 11,400 was expended on wells, thus :—

Hanuman Kaya of Calcutta Rs. 5,000 for a well at the Matigara Bazar; Sasiman Thakurain of Loha, Rs. 900 for a well at Sahaspur, Darbhanga district; Rs. 500 were contributed for a well in the Dinajpur district; Rs. 500 for a well in the Rangpur district; Rs. 500 for a well in the Gaya district; Rs. 500 for a pukka well in Shahabad district; Rs. 500 for a well in the Darbhanga district; Rs. 1,000 for two pukka wells in the Monghyr district; Rs. 500 for a well in the Bhagalpur district; Rs. 500 for a well in the Palamau district.

*Irrigation channels.*—Maharaja Durga Churn Law, C.I.E., of Calcutta, gave Rs. 12,000 for a khal in the Khulna district; Babu Girindra Nath Mukerji and others Rs. 500 for a drainage in the Nadia district; and the villagers of Purbahag, Tippera district, Rs. 500 for a khal.

**RESOLUTION.**—The total cost of works of public utility constructed during the year under review shows a slight falling off, as compared with 1892, it is hoped there will be an improvement during 1894. To those who have displayed their liberality and public spirit, more especially Babu Sewbux Bogla and Sir Dinshaw Manikji Petit, who have respectively given the handsome gifts of Rs. 30,000 and Rs. 25,000, His Honour tenders his acknowledgments, and hopes that the good example set by them will be followed by others who can afford to contribute towards works of utility for the benefit of the poorer classes.

Formal letters of acknowledgment will be forwarded by the Government to those who have constructed works, costing Rs. 500 each and upwards. The usual acknowledgment will be conveyed to the others from the Commissioner or Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution and of the statement be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chota Nagpur; to all Superintending Engineers of Public Works Circles in Bengal; and to the Inspectors of Works, Eastern Circle and Bihar Division, for information.

Ordered also that a copy of this Resolution and of the statement be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

*Secretary to the Government of Bengal.*

## Statement of Works of Public Utility constructed by private individuals during the year 1893.

**LIBERALITY OF BABU ISWARA CHANDRA HAZRA OF AMRAGORI,  
IN THE DISTRICT OF HOWRAH.**

No. 466T.M. dated Darjeeling, the 4th October 1894.

From—C. W. BOLTON, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,  
To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your memorandum, dated the 18th September 1894, and previous correspondence, in which you report that Babu Iswara Chandra Hazra of Amragori, in the district of Howrah, has made over to the Magistrate of that district Government Promissory notes of the value of Rs. 12,000 for the purpose of establishing a charitable dispensary in his native village, and is bearing in addition the cost of erecting a suitable building.

2. In reply, I am desired to request that you will be so good as to convey to the donor the thanks of the Lieutenant-Governor for his public spirit and liberality. This letter will be published in the *Calcutta Gazette*.

## REPORT ON THE BHADOI CROPS, 1894.

THE following is published for general information.

C. E. BUCKLAND,

*Secy. to the Govt of Bengal.*

REVENUE DEPT.,  
The 8th October 1894.

## DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

*First forecast of the bhadoi crops in Bengal, 1894.*

*Explanatory.*—Under orders of Government contained in their letter No. 1557, dated 16th March 1894, the present *bhadoi* forecast furnishes statistics for whole districts instead of for each sub-division, as has hitherto been the arrangement. A change has been made in the classification of crops with special reference to the compilation of the Agricultural Statistics for the Province. The headings adopted in the appended returns are intended to give a conspectus of all the *bhadoi* or rain crops. The most important *bhadoi* food crops are *bhadoi* paddy, Indian-corn, and millets. The cultivation of *bhadoi* paddy prevails chiefly in Bengal Proper and Orissa, where the area under maize and millets is limited. The latter crops occupy large areas in Bihar and Chota Nagpur. The chief millets are *jowar*, *bajra*, and *mandua*, all of which have been shown separately in the returns. The less important millets and *bhadoi* pulses have been included under the head "Other cereals and pulses." Among *bhadoi* non-food crops, the most important are jute, indigo, and cotton. Special reports are published by this Department for the jute and cotton crops: in the present return, these two crops have been grouped with other non-food crops.

2. *Character of the season.*—The outturn of the *bhadoi* crops is determined by the rainfall from April to September. The season up to the end of May was characterized in South-West Bengal, Bihar, Orissa, and Chota Nagpur by deficient rainfall, which is reported to have led to a contraction of the area under cultivation in these parts. In North and East Bengal the rainfall was heavier, and more evenly distributed. In June, the rainfall in North Bengal and in the Presidency Division was short of the normal, while there was an excessive fall in Orissa and Chota Nagpur. Elsewhere the rainfall in this month was either normal or slightly in excess of the normal. During July, the rainfall throughout these Provinces, except in the Rajshahi Division, was generally above the normal. This deficiency in North Bengal was compensated by heavy rainfall in August. The rainfall of this month was generally above the normal throughout these Provinces, except in the Burdwan and Presidency Divisions. In the first half of September, the rainfall has been below the normal.

3. *Area sown.*—The total area sown with *bhadoi* crops during the current year appears from the returns attached to this note to amount to 15,545,600 acres against 15,607,200 acres in the preceding season. Taking these Provinces as a whole, the decrease is inappreciable. A falling off in the

area in consequence of the want of rain at the time of sowing has been reported from nine\*  
 Bankura, Midnapore, Bogra, districts. The total cultivated  
 Champaran, Darbhanga, Malda, area of these Provinces being  
 Cuttack, Balasore, and Puri. estimated in these returns at  
 57,229,900 acres, it will be seen that roughly a little more  
 than one-fourth of this area is estimated by the District  
 Officers to have been cultivated with *bhadoi* or rain crops.  
 Comparing now the areas under *bhadoi* food and non-food  
 crops, with the total area sown with all *bhadoi* crops, the  
 district estimates of the current year show that the food-  
 crops occupy in round numbers about 76 per cent., and  
 the non-food crops about 24 per cent. of the total *bhadoi* area.  
*Bhadoi* paddy, which is the most important *bhadoi* crop,  
 occupies about 45 per cent. of the total *bhadoi* area.

The above estimates will be understood to be merely approximate, as they are not based on measurements.

4. *Character of the crops.*—The present season has been favourable to *bhadoi* crops. From the appended statement, it will be seen that out of the 45 districts of these Provinces, two districts, viz., Tippera and Noakhali, report an outturn above the average, 29 districts including all the districts of the Dacca and Bhagalpur Divisions, and the four North Ganges districts of the Patna Division report an outturn of from 12 to 16 annas, 12 districts an outturn between 8 and 12 annas, and in the case of only 2 districts, viz., Palamau and Manbhum, is the yield estimated to be less than eight annas. Floods are reported to have caused damage in six districts, viz. Murshidabad, Muzaffarpur, Monghyr, Malda, Cuttack, and Balasore, but the damage done does not seem to have been very considerable. The yield of all *bhadoi* crops for the Province is estimated by this Department, after allowance for the tendency to understate the outturn, and looking to the fact that the prospects of the *bhadoi* crops are admittedly much better this year than last year, to be not less than 15 annas, and it may reach the average of 16 annas.

N. N. BANERJEE,

*Assistant Director of the Dept. of Land  
 Records and Agriculture, Bengal.*

Countersigned.

W. C. MACPHERSON,

*Director of the Dept. of Land Records  
 and Agriculture, Bengal.*

*The 24th September 1894.*

Preliminary Forecast of Bhadoi Crops to the end of August 1894.

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of bhadoi crops.	Approximate normal area under each specified bhadoi crop in acres.	Approximate area last year under each specified bhadoi crop in acres.	Estimated area this year under each specified bhadoi crop in acres.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan	1,720,000	1,381,000	Bhadoi paddy Indian corn (maize), Other cereals and pulses, Other food-crops (e.g., vegetables), Indigo Other non-food-crops including jute and cotton, as shown in the special forecast.	172,700 2,000 8,100 700 6,000 19,200	171,500 2,000 7,400 800 4,200 15,400	172,700 3,000 7,700 600 5,800 15,800	Annas. 13½ 14 13½ 13½ 13 11½	Annas. 13½ 14 13½ 13½ 13 11½	Owing to early rains there has been an increase in the estimate of outturn and of area over that cultivated last year. The outturn of the present year is expected to be better, owing to timely rains.	
			Total	210,700	205,000	208,600	13½	13½		
Birbhum	1,124,023	900,000	Bhadoi paddy Indian corn (maize), Other cereals and pulses, Other food-crops (e.g., vegetables), Indigo	159,000 2,000 ..... 1,500 .....	163,000 2,200 ..... 2,000 .....	150,000 2,400 ..... 1,500 .....	16 18	16	Sowing began generally late, owing to want of rain in May. After the monsoon set in, rainfall was capricious some parts of the district getting a good and other parts deficient rainfall. The late rain in August was, however, general, and I think the average area is under sown this year.	The district area as now given (1,124,023 acres) differs from that shown in the Agricultural Statistics for 1892-93, viz. 1,121,990 acres. The Collector states that the present figure has been

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of <i>bhadoi</i> crops.	Approximate normal area under each specified <i>bhadoi</i> crop in acres.	Approximate area last year under each specified <i>bhadoi</i> crop in acres.	Estimated area this year under each specified <i>bhadoi</i> crop in acres.	Taking 10 annas to represent the average outturn, how many annas will represent this year's outturn?	Taking 10 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Birbhum— <i>concd.</i>	.....	.....	Other non-food-crops including jute and cotton, as shown in the special forecasts.	2,500	2,500	2,500	Annas. ....	Annas. ....		obtained from survey papers. The area estimated to be under cultivation has been raised by the Collector from 459,000 acres as shown in last year's final <i>bhadoi</i> crop report and from 455,500 shown in the Agricultural Statistics for 1892-93 to 500,000 acres as now shown in column 3.
Bankura	1,677,440	649,860	Total ..  <i>Bhadoi</i> paddy .. Indian corn (maize) .. Other cereals and pulses .. Other food-crops (e.g., vegetables). Indigo .. Other non-food-crops including jute and cotton, as shown in the special forecasts.	44,300 300 5,000 500 2,900 3,500	41,970 300 5,000 500 2,900 3,500	43,300 300 5,000 300 2,700 3,000	14 11 13 13 12½ 13	18 16	There was some decrease of cultivation under most of the <i>bhadoi</i> crops, owing to the scanty rainfall in March, April and May, when fields were prepared for these crops. In subsequent months the rainfall in some parts of the district was rather excessive, which has injured the outturn of crops to a certain extent.	
			Total ..	56,900	57,240	57,140	13	16		

Midnapore	3,292,800	2,111,500	Bhadol paddy	...	...	100,900	110,900	11	The whole of the normal area could not be brought under cultivation for want of rain at sowing time. The prospects are at present very favourable in the Sadar and Tamuluk. In Contai and Ghatal the crops have suffered from excessive rainfall. Last year these crops suffered from excessive rainfall before they were harvested, and especially in low lands they were submerged. The normal area under these crops shows an increase over last year, which has been arrived at by latest calculation. N.B.—The figures in column 2 have been taken from the census figures excluding the river beds.	The district area was shown in the Agricultural Statistics for 1892-93 to be 3,19,040 acres. The Collector states that the district area now given by him (3,292,800 acres) has been taken from the census figures and is exclusive of river beds. The whole area of the district should be shown in future returns. The Collector has furnished no estimate of the area and outturn under <i>dehra</i> and <i>mandua</i> last year, though he has given figures for these crops for this year. The figures for this year have been accordingly shown against the above named crops in column 6.
			Jowar	...	...	6,000	6,000	11		
			Bajra	...	...	1,800	1,800	11		
			Mandua	...	...	21,000	21,000	11		
Hooghly	1,086,050	762,200	Indian corn (maize)	...	...	94,000	94,000	11	The area under <i>Bhadol</i> paddy given in column 6 (45,000 acres) does not agree with the corresponding figure (50,270 acres) shown in the Final <i>Bhadol</i> Report for 1893. An explanation should have been given of the change of figures.	The figure in column 7 against "other cereals" and "other food-crops" have been inserted against these two cross-headings in column 6 in the absence of figures supplied by the Collector.
			Other cereals and pulses.	...	...	343,800	343,800	11		
			Other food-crops ( <i>e.g.</i> , vegetables).	...	...	8,700	23,500	10		
			Indigo	...	...	35,300	40,600	10		
24 Parganas	1,671,628	1,225,800	Other non-food-crops including jute and cotton, as shown in the special fore-casts.	...	...	47,500	43,200	11	The increase in area is only in Serampore. This is owing to the timely rain in that subdivision. The outturn is expected to be almost the same as that of the previous year.	Insufficient rain is the cause of the unfavourable outturn.
			Total	...	...	343,800	294,700	11		
			Bhadol paddy	...	...	48,000	51,500	11		
			Jowar	...	...	...	...	11		
24 Parganas	1,671,628	1,225,800	Bajra	...	...	...	...	11	This year's outturn is expected to be better than that of last year owing to seasonable rainfall.	The figure in column 7 against "other cereals" and "other food-crops" have been inserted against these two cross-headings in column 6 in the absence of figures supplied by the Collector.
			Mandua	...	...	...	...	11

Approximate normal area under each specified <i>bhadai</i> crop in acres.	Approximate area last year under each specified <i>bhadai</i> crop in acres.	Estimated area this year under each specified <i>bhadai</i> crop in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Jalpaiguri ..	1,995,881	985,300	<i>Bhadai</i> paddy ... Indian corn (maize) ... Other cereals and pulses. Other food-crops (e.g., vegetables). Other non-food-crops including jute and cotton, as shown in the special forecast. Total ..	186,704 2,000 4,500 5,200 85,400 283,800	191,400 1,000 1,500 5,200 88,400 2-2,509	186,200 2,000 4,500 5,200 85,600 283,500	Annas. 13 10 10 .. 13 12	Annas. 13 10 10 .. 12 13	The increase in area in column 3 is due to increase of cultivation in the Duars. The difference between the figures shown in columns 5 and 6 and those shown in last year's return are owing to insertion of new headings in the forecast, and also to alteration made in last year's figures. The decrease in area cultivated this year with <i>bhadai</i> paddy is due to increase in cultivation of jute.	Estimates of area and out-turn for last year against "other food-crops," which were not furnished by Deputy Commissioner, have been supplied by inserting the corresponding figures of the current year.
Darjeeling ..	744,980	189,400	<i>Bhadai</i> paddy ... Maize Indian corn (maize) ... Other non-food-crops including jute and cotton, as shown in the special forecast. Total ..	32,300 7,700 17,700 15,300 73,000	33,500 5,300 22,300 15,300 76,300	33,500 5,300 22,300 15,300 76,300	13 14 14 14 14	13 14 14 14 12	Want of seasonable rainfall accounts for the decrease in outturn this year.	
Rangpur ..	2,331,040	1,002,700	<i>Bhadai</i> paddy Indian corn (maize) ... Other cereals and pulses.	275,400 100 91,000	285,400 100 91,000	275,400 100 91,000	16 16 13	10 16 16	Owing to the comparatively dry season of this year, the outturn of <i>bhadai</i> paddy has been less than that of the previous year.	

Bogra	...	921,600	421,000	Bhadai paddy	...	140,000	175,000	105,000	10	8	13	16	In the final forecast of Bhadoi crops of 1893, the outturn of jute was entered as 18 annas instead of 13½ annas through a clerical mistake.
Pabna	...	1,176,000	882,500	Bhadai paddy	...	125,200	123,500	124,000	10	11	10	11	The decrease in the area sown this year is due to the heavy rainfall at the time of sowing. The low estimate of outturn is due to the delay done to the plants by the continued drought which immediately followed the sowing. As far as in the final forecast of jute, the heavy rainfall of June and July did not allow the plants to grow healthy. The subsequent showers, specially those that fell during the current month, have greatly benefited the lowland plants, and an outturn of two annas below normal is expected.
Dacca	...	1,790,000	907,700	Bhadai paddy	...	174,300	162,500	165,500	7½	15	9	15	The poor outturn of jute last year owing to heavy rainfall led the raiyats to grow jute this year on a smaller area in the Sadar sub-division. Want of rain was felt in the beginning of the sowing season; but it having rained afterwards, and the river rising later than usual, the Bhadoi crops do not appear to have been damaged to any great extent. In the Siraganj sub-division, the prospect would have been better had there been seasonable rainfall. The decrease in the area of other cereals and pulses is due to the increase in the area under paddy, jute and other food-crops. Owing to timely rainfall the outturn of paddy and jute is better than last year. Owing to better outturn of jute and paddy, less care was taken of rice, and the outturn is a little worse than that of last year.

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

The decrease in the outturn is due to floods in the south of the district. • There were no particular beatings for these crops last year. Further, they are not grown to an appreciable extent; hence they were not shown in last year's return. The decrease in area and outturn is due to excessive rains and floods.	
Anarul and Khondmah.	1,008,900	802,900	<i>Bhadol</i> paddy ... Jowar ... Baajra ... Indian corn (maize) ... Other cereals and pulses. Other food-crops (e.g., vegetables). Other non-food crops including jute and cotton, as shown in the special forecasts. Total ...	14,600 ..... 6,000 8,000 8,200 1,000 30,100 62,900	13,500 ..... 6,000 3,000 8,200 1,000 35,100 61,800	(a) 11,000 ..... 6,350 2,000 (c) 18,200 1,000 (d) 30,100 55,800	..... ..... 13 16 44 8 10 101	..... ..... 10 6 124 8 101	The difference between the approximate normal area and the area estimated for this year, marked a, b, c, and d in column 7, is due to continual rainfall from June to the end of July, which was not favourable to the sowing of <i>bajra</i> and <i>maize</i> . The low outturn of <i>bajra</i> is due to the low level and <i>maize</i> crops is anticipated owing to excessive rain at the time of sowing.	The district area and the total area under cultivation shown in the Agricultural Statistics for 1892-93 are 1,053,840 acres and 142,300 acres respectively. The differences should have been explained.

Purl	...	1,612,929	723,100	Bhadai paddy	...	86,109	83,500	84,000	12	11	The increase of area under paddy with reference to last year is very slight, and calls for no explanation. The difference with reference to the normal area under paddy and <i>mandus</i> is due to the late rainfall, which did not begin till June, and the continuous and heavy rainfall afterwards which retarded the sowing of <i>beut</i> paddy and <i>mandus</i> . The increase in area under other non-food-crops is due to the addition of the area under <i>hemp</i> this year, which was not added last year. The outturn has been less on account of the continuous rainfall.

				Total	...	1,178,400	1,178,400	1,178,400	12	12		

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

The area under jute should have been included in column 6 against the cross-heading "Other non-food crops."

Areas for *oil* and *hemp* should not have been omitted by Deputy Commissioner. The area returned under these crops in the final report on *Bhadai* crop for 1893 have been added (by this office) to the area shown against "other non-food crops, &c." in columns 5, 6 and 7.

The difference in the total area in columns 5 to 7 with that of the final forecast for 1893 is due to the exclusion of areas under *oil* and *hemp* and to the inclusion of fresh figures for vegetables. All the crops, except *Bhadai* paddy and vegetables, suffered more or less owing to heavy rains. The rainfall, though heavy, was not so continuous as was the case last year: hence the outturn is expected to be better than that of last year.

The area cultivated and the estimated outturn remains the same as last year. No better outturn can be expected owing to excessive rainfall.

			Total	16,252,400	15,607,200	15,545,100	11	15*

The Deputy Commissioner's remark with regard to the area sown this year is not borne out by the figures which he furnishes.

The area sown this year is equal to that of last year, but the slight increase in the outturn of this year is due to seasonal rainfall.

\* As estimated by the Agricultural Department. See paragraph 4 of the Note.

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 6th October, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIV.	1 Burdwan Oct. 6, '94	1.52	Weather—seasonable. Harvesting of <i>aus</i> continues. Weeding of <i>aman</i> completed. Prices of common rice:—
	Kalna ...	1.14	
	Katwa ...	1.51	
	Raniganj ...	2.52	
			Srs. c. Burdwan ... 15 0 Kalna ... 10 to 12 0 Katwa ... 14 5 Raniganj ... 14 8 } per rupee.
	2 Birbhum " 6, '94	1.42	Weather—rainy during the last three or four days in the Sadar subdivision; cloudy and stormy in the Rampur Hât subdivision. Paddy doing well.
